Eightieth Annual Report

of the

BOARD OF DIRECTORS OF CITY TRUSTS

To the Council of the City of Philadelphia, to the Board of Appointment composed of the Judges of the Courts of Common Pleas of the County of Philadelphia, and to the General Assembly of the Commonwealth of Pennsylvania.

Gentlemen:

In compliance with the will of Stephen Girard, deceased, and the Act of Assembly approved June 30, 1869, the Board of Directors of City Trusts respectfully presents this report of the several Trusts under its administration for 1949.

The principal of the Residuary Fund for the maintenance of Girard College amounted on December 31 to \$65,936,074.53, or \$622,129.17 more than at the end of the year 1948.

The total ordinary expenditures for the support of Girard College amounted to \$2,081,885.51, a decrease of \$294,591.82 from the preceding year. The average number of students maintained was 1,304 and the cost of maintenance per capita, \$1,596.54. This is a decrease of \$212.04 from the year 1948.

Total student enrollment, January 1, 1949..	1,306	
Students admitted during the year	178	1,484
Indentures cancelled	107	
Students leaving at eighteen years of age .	69	
Students deceased	1	177
Total student enrollment, December 31, 1949....	1,307	

The most significant change at Girard College during the year was the reorganization of its administrative personnel, brought about largely because of the retirement in September of the Principal of the High School, the Superintendent of Household, the Supervisor of Playgrounds and Recreation, and the Assistant Supervisor of Elementary Schools, all of whom had made significant contributions to Girard College. After a lapse of years, the office of Vice-President was re-established, and it is now filled by the former Principal of the Elementary Schools. This position and the four positions vacated by retirements were discontinued, and the following were established: Director and Associate Director of Secondary Education, and Director and Associate Director of Elementary Education. In connection with the reorganization, several additional positions were discontinued because of financial retrenchment. The Department of Admission and Discharge, whose Assistant Superintendent was made Secretary of the Board of Directors of City Trusts, continues to function without this position under the name of Office of Admissions and Student Relations.

Numerous changes in the schedule of the College have been made, including some changes in curriculum. Girard boys have appeared more extensively in outside activities. On the campus itself a student-managed center, or store, has been opened. The alumni initiated this year the Alumni Fund for Girard College to assist undergraduate activities and to aid younger alumni who desire to attend institutions of higher learning.

The higher costs of services and materials and the necessity of restricting the College budget made retrenchment necessary wherever eliminations and curtailments of services could be made which would do the least harm. An unexpected expense was the cost of extensive renovation of the capitals of the columns and adjacent areas of Founder's Hall. Their dangerous condition was disclosed when two large pieces fell. Replacement of the elevator, kitchen equipment, and roof of the Infirmary, and of the refrigeration equipment in the House Group have been made. The major part of the work of renovating the Power Plant, including installation of two new boilers, has been completed.

The income from the property of the Girard Estate Within the City, as compared with the preceding year, is as follows:

	Gross	Net
1949	\$2,939,624.35	\$1,043,206.10
1948	2,939,525.67	1,085,054.99
Increase (Decrease) ..	\$ 98.68	(\$ 41,848.89)

During the latter part of the year 1949 the generation of steam in the power plant located in the Stephen Girard Building, supplying heat for the building and the stores on Chestnut Street, was discontinued, and steam is now being purchased from the Philadelphia Electric Company, the generation of electricity having been discontinued in 1948.

Due to the approaching condemnation by the United States Government of the Third Street Power Plant, which is included among the buildings to be razed in connection with the East Mall of the "Independence National Historical Park," professional engineering services have been engaged for the study of the substitution of alternating current, to be purchased from the Philadelphia Electric Company, for the direct current now being generated by this power plant.

During the year 1949 the Fairmount Park Commission planted 210 shade trees along Oregon and Vare Avenues

from Eighteenth Street and Oregon Avenue to the intersection of Vare Avenue and Shunk Street, improving the appearance of some 20 acres of vacant land lying between Oregon Avenue and the houses of the Girard Estate.

The city block of ground bounded by Eighteenth, Nineteenth, Johnston and Bigler Streets was taken under condemnation proceedings by the City of Philadelphia for playground purposes. Upon appeal from the award of \$42,600 made by the Board of View, a jury trial before Judge Oliver in Common Pleas Court No. 7 resulted in an award of \$50,000.

During the year the improvement of the north side of Chestnut Street between Eleventh and Twelfth Streets, begun in 1940, was finished with the completion of alterations to enlarge and remodel the existing stores under lease to Lane Bryant, Inc., and the Algee Shoe Corporation.

The amount invested on December 31, 1949, in bonds, preferred stocks and mortgages for the Residuary Fund was \$55,911,480.14, or \$352,122.05 more than in 1948, and the net income therefrom amounted to \$1,593,103.19.

The City of Philadelphia, as guardian of 937 minors, at present or formerly students in Girard College, holds assets amounting to \$634,298.31, composed as follows:

\$ 16,600, par value, United States Treasury Bonds	\$ 16,789.39
310,900, maturity value, United States Savings Bonds	234,121.50
Cash—Philadelphia Saving Fund Society	193,359.37
Cash—Western Saving Fund Society	184,940.35
Cash—Philadelphia National Bank	5,087.70
	<u>\$634,298.31</u>

The Fire Insurance Fund has assets amounting to \$628,243.02. The risks being carried amount to \$4,950,300, of which \$2,459,000 has been re-insured. The Fund suffered no fire loss during the year.

From the Fund for the Improvement of the Delaware Front of the City the expense of lighting and of minor items incident thereto of the district lying between Vine and South Streets, Front Street and the Delaware River, has been paid in the amount of \$19,898.73.

The receipts from the property of the Girard Estate Without the City, as compared with the preceding year, were as follows:

	Gross	Net
1949	\$1,259,543.86	\$453,977.68
1948	1,410,262.24	552,808.47
Decrease	\$ 150,718.38	\$ 98,830.79

The shipment of coal from the Girard Estate during the year 1949 was 1,228,559.15 gross tons, a decrease as compared with 1948 of 356,189.20 gross tons, or 22.48%. The shipments were made up as follows:

	Tons
Shipped to market—Fresh mined	1,158,418.55
Bank coal	70,140.60
Total	<u>1,228,559.15</u>

The total rail shipment from the region for the year 1949 was 27,956,438 tons, a decrease of 14,274,259 tons, or 33.80% as compared with 42,230,697 tons for 1948. The Girard Estate's proportion of the regional shipments was 4.39% as compared with 3.75% in 1948.

The quantity of coal consumed in operating was 32,942.40 tons, 2.61% of the total production of 1,261,501.55 tons, and represented an increase of 825.05 tons, or an increase of 0.62% as compared with 1.99% in 1948. The average for the thirteen years from 1901 to 1913, when there were no collieries operated by electricity, was 10.92%.

During the eighty-seven years of active mining on the Girard Estate properties there have been marketed from them 134,604,662.55 tons.

The coal leases at the end of the year were twenty in number, one less than at the end of 1948, as follows:

COAL LEASES

The separate trust funds included in the group designated Wills Eye Hospital and Minor Trusts number seventy-eight (78), the same as in the preceding year.

The total principal of these trusts on December 31, 1949, amounted to \$3,793,479.38, exclusive of the value of real estate devised and still held by the several trusts. The income received during the year amounted to \$723,158.45, of which \$610,371.78 represented income from the Wills Eye Hospital and the Bushrod Washington James Eye and Ear Institute. The disbursements during the year amounted to \$679,684.32, of which \$611,430.14 represents the cost of operation and maintenance of the Wills Eye Hospital and the Bushrod Washington James Eye and Ear Institute. The cost of administration amounted to \$15,903.96, which was charged to the several trusts in proportion to their investments.

The Wills Eye Hospital is the largest of the Minor Trusts, having an endowment fund of \$531,793.32, exclusive of the value of building and grounds. It was established in 1832 by a bequest of \$108,396.00 from James Wills a philanthropic Quaker merchant, from which amount \$65,344.88 remained for endowment after the erection of the first hospital building.

The original Wills Eye Hospital was erected in 1832 on the south side of Race Street, between Eighteenth and Nineteenth Streets, and continued at this location until 1932 when the new, modern hospital building at the northwest corner of Sixteenth and Spring Garden Streets was completed.

Because it is a Trust of the City, administered by the same Board of Directors as Girard College, many citizens have the impression that the Hospital receives substantial financial support from the City and benefits from the income of the Girard Estate and other Trusts administered by the Board. The hospital receives no financial support whatever from either the City of Philadelphia or the Girard Estate.

The Hospital receives biennial appropriations from the Commonwealth of Pennsylvania, which meet a part of the cost of caring for ward patients only. State funds cannot be applied toward the cost of rendering service to thousands of patients attending the clinics.

Donations and bequests to the hospital have been quite small in comparison with other hospitals of like reputation. One of the greatest needs of the Hospital today is the

means for conducting adequate research in connection with the various diseases of the eye, no other institution having available such a large number of case histories, the detailed study of which would mean so much to the profession and, through it, to those afflicted with eye trouble of any kind.

During the year 38,565 patients were admitted to the free clinics and 14,127 admitted to the accident ward; these patients made a total of 103,504 visits, representing an increase of 64 per cent over the total of 32,077 patients admitted ten years ago. The number of bed patients has increased 53 per cent during the decade, from 2,622 to 4,019.

Sixty per cent of the patients admitted were cared for in the public wards, none of whom paid the full cost of their care, and a large percentage of whom paid nothing. During the year over 1,000 pairs of glasses were supplied without charge.

The present professional Staff consists of seventy (70) ophthalmologists, considered to be outstanding in their field, and twenty-three (23) consultants. The Board of Attending Surgeons is presently composed of:

Warren S. Reese, M.D., President
 James S. Shipman, M.D., Vice-President
 Wilfred E. Fry, M.D., Secretary
 Louis Lehrfield, M.D.
 Carroll R. Mullen, M.D., Executive Surgeon
 Edmund B. Spaeth, M.D.
 William J. Harrison, M.D.
 Isaac H. Tassman, M.D.
 P. Robb McDonald, M.D.

In May 1949 the Hospital and the Medical Staff held its First Annual Clinical Conference which was attended by more than 200 ophthalmologists from all sections of the United States, also 1 from Cuba and 1 from the Dominican Republic. Fifteen (15) formal papers on subjects related to the eye and its diseases were presented. It is expected that similar conferences will be held annually in order to acquaint ophthalmologists generally with new procedures and methods of treatment developed at the Hospital during the year.

During the year members of the Staff, as usual, published a number of articles in recognized medical journals on subjects relating to the eye, and also they were in great demand for lectures to medical groups throughout the country.

During the year 1949, in accordance with the provisions contained in the instruments creating the Trusts, the income of the remaining seventy-seven (77) Minor Trusts was applied as follows:

Due to the adjustment of the books of account to conform with the recommendations of Hon. George W. Pepper, Auditor, resulting in income adjustments, no distribution for the purpose of the trust was made in the Henry B. Palethorp Fund, the income of which is applied toward the maintenance of the Wills Eye Hospital.

Under authority of an Act of Assembly, dated April 16, 1838, permitting such use of the income when not needed for the purpose for which the fund was created, \$320.00 of the income of the John Bleakley Yellow Fever Fund was applied toward the maintenance of the Wills Eye Hospital.

From the income of the Mary Shields Hospital Fund, the sick and insane poor at the Philadelphia General Hospital have been provided with comforts not otherwise available at a cost of \$3,225.00.

By Decree of Court, dated September 10, 1934, the Bushrod Washington James Eye and Ear Institute was established on the mezzanine floor of the Wills Eye Hospital building. During the year 1949 a total of 2,277 patients were admitted for clinic and hospital care at a cost of \$51,814.39.

The Philadelphia General Hospital made no recommendations for the purchase, from the income of the Margaret E. Cavanaugh Fund, of delicacies for the female sick suffering from cancer in Philadelphia General Hospital.

From the income of the George L. and Mary McMichael

Harrison Memorial Fund the sum of \$531.42 was applied to extend and conduct the work of the Radiological Department of the Philadelphia General Hospital.

From the income of the Abraham and Hannah Merzbacher and Sadie Merzbacher Windner Memorial Fund the sum of \$75.00 has been applied toward the maintenance of the Wills Eye Hospital.

The Philadelphia General Hospital made no recommendations for financial assistance, from the income of the J. William White Fund, to patients discharged from the Surgical Wards of the Philadelphia General Hospital, to help them secure steady employment.

From the income of the C. Henderson Supplee Fund the sum of \$3,784.70 was expended for convalescent care of fifty-six (56) individuals whose applications had been approved in accordance with the provisions of the instrument creating the trust, as follows:

	No.	Cost
Dunwoody Home, Newtown Square, Pa...	28	\$1,890.75
Broomall Convalescent Home, Broomall, Pa.	25	1,653.95
Bethesda Home, Collingdale, Pa.	1	80.00
Greiser Convalescent Home, Phila., Pa. ...	1	80.00
Willow Crest, Willow Grove, Pa.	1	80.00
	56	\$3,784.70

Income in excess of the amount expended for convalescent care was distributed to the following Visiting Nurse Societies:

Little Sisters of the Assumption	\$ 500.00
Visiting Nurse Society of Philadelphia	500.00
	<u>\$1,000.00</u>

From the income of the Juliana H. Good Fund the sum of \$102.05 was expended for the purchase of books for the library of the House of Correction at Holmesburg.

From the income of the Roberts School Fund the sum of \$9.00 was expended for the purchase of magazines for use in the John Marshall School, Griscom and Sellers Streets, Frankford, in the district formerly known as Oxford Township.

From the income of the Stephen Girard School Fund the sum of \$142.80 was expended for the purchase of books for the use of the George W. McCall Public School, Sixth and Spruce Streets, Philadelphia.

From the income of the Rittenhouse School Fund the sum of \$30.36 was expended for the purchase of scholastic equipment for the use of the Alfred Crease School on Wissahickon Avenue, above Walnut Lane.

From the income of the James E. Lennon Fund the sum of \$30.00 was expended for the purchase of books and scholastic equipment for Francis McGovern, a graduate of Girard College attending St. Joseph's College.

The scholarships presently being awarded from the Simon Muhr Scholarship Fund are for a term of four (4) years at \$600 per annum. At present the fund is maintaining seven scholarships, as follows:

	Ex-	Paid
Attending	pires	During
	1949	1949
Jean S. AbramsUniv. of Pennsylvania	1950	\$400.00
Francis J. PattiDrexel Institute	1950	360.00
Solomon Rudman ...Univ. of Pennsylvania	1951	600.00
Joseph CramerTemple University	1952	557.90
Sarah A. Heinhardt..W. Chester Teachers	1952	133.53
Sandra SchwartzTemple University	1953	238.92
Martin BrillDrexel Institute	1953	294.80
		<u>\$2,585.15</u>

Miss Doris Spera, who had been attending Temple University, and whose scholarship would have expired in 1951, withdrew from school in 1949 to accept a secretarial position.

Under rules adopted by the Board of Directors of City Trusts on July 9, 1896, the scholarships are awarded upon

the recommendation of the Simon Muhr Scholarship Commission, presently composed of:

Dr. Paul H. Musser, Provost of the University of Pennsylvania
 Dr. Merle M. Odgers, President of Girard College
 Walter Biddle Saul, President of the Board of Public Education
 Hon. James Gay Gordon, Jr., President Judge of the Court of Common Pleas No. 2
 Hon. Nochem S. Winnet, Bert W. Levy, and Henry N. Wessel, Secretary, Executors and Trustees of the Estate of Simon Muhr, deceased

Upon the recommendation of the President of Girard College the Lawrence Todd Scholarship Fund provided financial aid in the amount of \$1,650.00 to twenty-one (21) graduates of Girard College who are attending higher institutions of learning, and who, in the opinion of the Board, are worthy of such assistance.

Upon the recommendation of the President of Girard College financial aid in the amount of \$100.00 was granted from the income of the James H. Windrim Scholarship Fund to Richard E. Frey, a graduate of Girard College, attending the University of Pennsylvania.

From the income of the Fred Gowing Memorial Scholarship Fund financial aid in the amount of \$320.00 was granted to the following graduates of the Philadelphia High School for Girls:

Louise A. JungUniv. of Penna.	\$ 45.00
Goldie BernsteinTemple University	210.00
Gloria M. CocciaTemple University	65.00
	<u>\$320.00</u>

Upon the recommendation of the President of Girard College financial aid in the amount of \$200.00 was granted from the income of the George L. Meyer Scholarship Fund to the following graduates of Girard College:

Donald BakerUniv. of Penna.	\$70.00
Bernard J. McDowell ..Cornell Univ.	130.00
	<u>\$200.00</u>

The scholarships presently being awarded from the George W. Fetter Scholarship Fund are for a term of four (4) years at \$400 per annum. At present the fund is maintaining six scholarships, as follows:

		Ex-	Paid
		pires	During
Attending			1949
Betty S. Edelman	Drexel Institute	1949	\$ 150.00
Gloria S. Mitchell	Temple Univ.	1950	380.00
Claire J. Baldwin	Temple Univ.	1951	389.95
Rosemary T. Mulvaney ..	Immaculata Col.	1951	393.00
Inge Hoffman	Pen State Col.	1951	400.00
Marjorie A. Brophy	Immaculata Col.	1953	390.50
			<hr/>
			\$2,103.45

By Decree of Court, dated July 1, 1947, the income of the Inez Walsh Fulton Scholarship Fund is being accumulated until the amount is adequate and sufficient to provide a scholarship to Jefferson Medical College for a Protestant graduate of Girard College for training in general medicine during a course of four years.

Due to a contemplated major improvement to the real estate comprising the only asset of the Harry Brocklehurst Fund, made necessary by the condemnation by State authorities of an elevator, nor distribution for the use and benefit of former students of Girard College was made during the year.

From the income of the John R. Neison Fund the sum of \$2,298.59 was expended in providing assistance to twenty-six (26) graduates of Girard College attending higher institutions of learning, and the sum of \$2,553.60 was applied for placement aid to unemployed graduates in an endeavor to obtain steady employment for them.

From the income of the Elmer E. Rodenbough Fund the sum of \$100.75 was expended in providing assistance to two (2) graduates of Girard College attending higher

institutions of learning, and the sum of \$806.39 was applied for placement aid to unemployed graduates in an endeavor to obtain steady employment for them.

From the income of the William C. Scott Fund the sum of \$4,817.08 was applied to the use of Girard College, for the purchase of school supplies and expenses incidental to social activities.

Under the provisions of the instrument creating the trust the income of the John Scott Medal Fund was to be "laid out in premiums to be distributed among ingenious men and women who make useful inventions, but no one of such premiums to exceed twenty dollars, and along with which shall be given a copper medal with this inscription 'to the most deserving.'" The original bequest of \$4,000, made in 1816, has since increased to \$109,535.71.

By Decrees of Court, dated February 19, 1919, and November 20, 1921, the City of Philadelphia, Trustee, is authorized to distribute the income in premiums of the maximum value of \$2,000, to be accompanied by the usual copper medal; and to make such rules and regulations for enabling it to make a wise selection of beneficiaries, either by the selection of an Advisory Board or otherwise, as it deems best; the premiums to be awarded for inventions that will be useful to mankind in the advancement of chemical, medical or any other science or development of industry in any form, the test being that the invention is, in the judgment of the Trustees, definitely accomplished and that it may add to the comfort, welfare and happiness of mankind.

An Advisory Committee has been formed, presently composed of:

Ernest T. Trigg, Chairman
John W. Iliff, Secretary, Director Phila. Laboratory,
E. I. du Pont de Nemours & Co.
Edwin G. Conklin, Emeritus Professor of Biology, Princeton University
J. Warren Kinsman, Vice-President, E. I. du Pont de Nemours & Co.
Thomas A. Shallow, Professor of Surgery, Jefferson Medical College
Wendel M. Stanley, Head of Department of Biochemistry, Univ. of California
Carroll P. Streeter, Managing Editor, Farm Journal
Edward R. Weidlein, Director, Mellon Institute of Industrial Research, University of Pittsburgh

Corresponding Members:

Arthur H. Compton, Chancellor, Washington University
Harlow Shapley, Director of Harvard College Observatory, Harvard University
Harold C. Urey, Professor, University of Chicago Institute for Nuclear Studies

Upon the recommendations of the Advisory Committee the following awards were made during the year:

Frank W. Caldwell, Director of Research, United Aircraft Corporation, for "Development of Controllable Pitch Propeller."
Dr. Charles Glen King, Scientific Director, The Nutrition Foundation, Inc., for "Isolation and Identification of Vitamin C."
Dr. Selman A. Waksman, Professor of Microbiology, Rutgers University, for "Discovery and Development of Streptomycin."
Harry T. Bennett, Chief Chemist, Mid-Continental Petroleum Corporation, and Dr. Leroy S. Story, Head of Patent Division, Swift and Company, joint award for "Stabilization of Cracked Gasoline."

Each of the above awards were in the amount of \$1,000. Expenses incidental to the awards, including medals, engraving, certificates, etc., amounted to \$864.32.

From the income of the Hannah Matilda Dodd Fund the sum of \$51.00 was expended in the purchase and engraving of medals which were presented to the most distinguished graduates of the Girls' High School, as follows:

Gold Medal Violet E. Simmons
Silver Medal Elizabeth D. Moore

From the income of the George A. Vare Medal Fund the sum of \$36.00 was expended in the purchase of a gold medal which was presented to Andrew Bozzelli, Class of June 1949, at the commencement of the Southern Manual Training High School, for attaining the highest standing in his class.

In accordance with Decree of Court, dated August 24, 1942, the sum of \$25.00 was contributed to the Firemen's Pension Fund of the City of Philadelphia from the income of the Daniel Baugh Medal Fund.

Pending the outcome of litigation relative to an interpretation of certain provisions contained in the will, no award has as yet been made from the Edward Powell Fund. The Award Committee appointed by Hon. Bernard S. Samuel, Mayor of the City of Philadelphia, is composed of:

William M. Hollenback, Chairman
Philip Klein, Secretary
Walter H. Grosscup

This Committee has approved and selected the design of the gold medal to be awarded in January 1951, the cost of which, including the dies, amounted to \$1,912.00.

The Philadelphia Normal School was discontinued in June 1938 and the Board of Public Education recommended that the income of the Obadiah Wheelock Fund be used for the purchase of books for the Pedagogical Library of the Board of Public Education. Upon this recommendation and in accordance with a resolution of the Board, adopted November 10, 1938, the sum of \$17.61 was expended in the purchase of books for the aforesaid Library.

From the income of the Louis Wagner Prize Fund the sum of \$58.00 was applied to the purchase of a gold watch which was presented to Walter W. Wagner who graduated from Girard College in June 1949 with highest honors.

From the income of the Simon Gratz Prize Fund the sum of \$200.00 was awarded in prizes of \$25.00 each, to the following High School graduates who had attained the highest degree of proficiency in the knowledge and correct use, oral, and written, of the English language:

	January 1949	June 1949
High School for Girls	Joan C. Fricker	Anne D. Moore
Central High School	Peter Bauland	Charles Alcorn
West Philadelphia High School for Girls	Charlotte Zislin	Gloria Becker
Northeast High School	Gerald Klein	Walter Mueller

From the income of the Joseph C. Ferguson Prize Fund the sum of \$16.00 was awarded in prizes of \$4.00 each to the boy and girl passing the best examinations or whose work in the last term of attendance at the Joseph C. Ferguson School at Seventh and Norris Streets, Philadelphia, was most satisfactory. The prizes were awarded to:

January 1949	June 1949
Deane Giella	Mildred Birk
Melvin Sharp	Sidney Libson

From the income of the Early Eighties Prize Fund the sum of \$65.00 was distributed in prizes to eleven (11) members of the student body of Girard College, as follows:

Chemistry	—Walter W. Wagner	\$10.00
	Irvin A. Miller	7.00
Penmanship	—Emanuel Gerstein	7.00
	Raymond J. Schlechtweg	5.00
Short Stories	—Jerome S. Goldman	7.00
	Walter W. Wagner	5.00
Safety Essays	—Stephen J. Winnick	6.00
	James J. Raciti	4.00
	Edward O. Gordon	2.00
Manual Training	—Jerome S. Goldman	7.00
	Ralph Gentle	5.00
		<u>\$65.00</u>

From the income of the Ruth Dene Award Fund the sum of \$15.00 was awarded in January 1949 to Irene Block, a graduate of the Philadelphia High School for Girls, who was judged to have shown marked growth in character during her high school years.

The Philadelphia Normal School was discontinued in June 1938 and the donors of the fund requested that the income of the Edward Gideon Memorial Fund be used for the purchase of books to be added to "The Edward Gideon Memorial Book Shelf" in the Library for Teachers. Upon this request and in accordance with a resolution of the Board, adopted July 8, 1938, the sum of \$13.00 was expended in the purchase of books for the aforesaid Library.

From the income of the Joseph G. Simcock Prize Fund the sum of \$8.00 was awarded in June 1949 for having submitted the best essays on the latest developments in the steel industry, to the following students of Girard College:

Earl K. Guiles	\$5.00	
Richard C. Hutchinson	3.00	\$8.00

From the income of the Sherwood Githens Prize Fund the sum of \$21.00 was distributed in prizes for having performed outstanding work in public speaking, to the following members of the graduating classes of Girard College:

	February 1949	June 1949
1st Prize \$7.00	James P. Rabbit	John M. Toutkaldjian
2d Prize \$3.50	Edward H. Powers	David Pustilnick

During the year 1949 one loan was granted by the Benjamin Franklin Fund. The will of Benjamin Franklin bequeathed the sum of One Thousand Pounds Sterling to be "loaned to an amount not exceeding sixty pounds sterling to young married artificers under the age of twenty-five years, who have served an apprenticeship in Philadelphia and faithfully fulfilled the duties required in their indentures, and who will furnish two satisfactory sureties for the return of the money in ten annual installments with interest at 5 per cent."

By Decree of Court, dated May 20, 1949, the maximum amount of the loans has been increased to \$6,000, the rate of interest reduced to 4 per cent., one-fifteenth part of the principal to be repaid annually, and loans were authorized to any properly qualified worker, skilled, unskilled and clerical, without regard to the place where or the mode whereby he or she has obtained his or her qualifications and notwithstanding that he or she has never served as an indentured apprentice in the City of Philadelphia, preference to be given, however, to married artificers who have served an apprenticeship or received their training in the City of Philadelphia; the loans to be made upon well secured first mortgages on real estate in Philadelphia.

This fund was established in 1790 and provided that at the end of the first hundred years a certain proportion of the fund was to "be laid out in public works * * * or whatever may make living in the town more agreeable to strangers resorting thither for health or a temporary residence." In accordance with this provision in 1908 the sum of \$133,076.46 was used for the establishment of the Franklin Institute Building Fund. When this fund was terminated in 1930 it had grown to \$1,522,805.33 and was contributed toward the erection of the building of the Franklin Institute on the Parkway. The fund will continue to run for a second one hundred years when it will terminate and be divided equally between the City of Philadelphia and the State of Pennsylvania.

During the year 1949 no loans were granted by the John Scott Loan Fund, no applicants possessing the necessary qualifications having presented themselves.

This fund was established in 1816 and its provisions are identical to those contained in the will of Benjamin Franklin. In accordance with the provision for a partial distribution at the end of the first one hundred years, \$66,697.80 was expended from this fund for the erection of the bandstand on Reyburn Plaza. The fund will continue to run for a second one hundred years when it will

terminate and be divided equally between the City of Philadelphia and the State of Pennsylvania.

In addition to the amount expended for fuel, from the income of the George Emlen Fund, the sum of \$87.82 was applied to the purchase of clothing for needy persons who had been discharged from the Philadelphia General Hospital.

Upon the terms prescribed for the distribution of fuel from the various Fuel Funds, coal was distributed at a cost of \$21,129.67, as follows:

Fund	Tons	Cost
George Emlen	7	\$ 128.80
City	6	106.74
Elias Boudinot	189½	2,487.07
Stephen Girard	24	427.71
Esther Waters	34	602.87
Paul Beck	44	779.75
Thomas D. Grover	399	7,372.20
Frederic A. Sheaff	6	111.30
Mary Shields	14	254.30
John E. Maynes	356½	6,954.53
Murtha P. Quinn	15	270.60
Philip R. Freas	2	36.80
James Dutton	22	405.10
Spring Garden	10	180.55
Henry Seybert	33	592.80
William Carter	2	35.00
James Claypoole	1	17.50
Ann Armitt	1	17.50
B. W. and I. W. Morris	2	35.00
Bernard McMahon	1	17.50
Joseph Wright	16	296.05
Totals	1,185	\$21,129.67

In addition to the sum stated as being paid by the Elias Boudinot Fund, the recipients of the coal furnished from this fund themselves paid \$7.00 per ton, or \$1,326.50.

In addition to the amount expended in the purchase of fuel the sum of \$23.80 was expended from the income of the Thomas D. Grove Fund for the care and maintenance of his cemetery lots in Union Burial ground.

In addition to the amount expended in the purchase of fuel the sum of \$150.000 was expended from the income of the Murtha P. Quinn Fund in the purchase of eyeglasses for the poor.

From the income of the Archibald Thomson Fund 2,118 loaves of bread have been delivered to the poor of the City of Philadelphia at a cost of \$338.88.

From the income of the Samuel Scotten Fund 49 loaves of bread were distributed on February 23, 1949, this being his birthday, to the poor of the City of Philadelphia, at a cost of \$7.84.

From the income of the Paul Beck Soup Fund the sum of \$335.00 was contributed to the Western Soup Society to aid in their work of supplying the poor with soup.

From the income of the Andrew R. Chambers Fund the sum of \$27.00 was contributed to the following Soup Societies:

Kensington Soup Society	\$9.00	
Spring Garden Soup Society	9.00	
Western Soup Society	9.00	\$27.00

From the income of the Jacob J. Snyder Fund the sum of \$200.00 was contributed to the Children's Heart Hospital.

Pending the presentation of a petition to permit the merger of the Ellen Kinnier Fund with the Philip R. Freas Fund, no distribution for the relief of the poor of the Township of Germantown was made during the year.

From the income of the Selden Twitchell Fund the sum of \$270.00 was paid over to the City Treasurer of the City of Philadelphia to be applied toward the care and maintenance of Independence Hall.

Upon the recommendations of the Board of Public Education the sum of \$6,000.00 was applied from the income of the Simon Gratz Teachers Fund to provide pecuniary re-

lief in special cases of teachers and clerical assistants in the Public Schools of Philadelphia.

As the distribution of money to the Alexander G. Mercer Fund has been received in instalments during the years when conditions arising from the war and post-war developments have made it impossible to carry out the intention of the testator to provide low cost housing, the fund is being held for use at a time when it will be more practicable to accomplish the desired purpose.

From the income of the Arthur J. Bedell Fund the sum of \$100.00 was distributed in awards for the best clinical presentation submitted by the resident physicians at Wills Eye Hospital, as follows:

Dr. Thomas J. Cogswell	First Prize	\$75.00
Dr. John P. Hobach	Second Prize	25.00
		<u>\$100.00</u>

In addition to the amount expended in the purchase of fuel the sum of \$135.00 was paid from the income of the Joseph Wright Fund to the Trustees of the Free Library of Philadelphia, for the exclusive use of the Frankford Branch.

From the income of the William D. and Mary Steuber Fund the sum of \$265.00 was distributed in December 1949 to the following:

Catholic Children's Bureau	132.50	
Crime Prevention Association	132.50	<u>\$265.00</u>

From the income of the Bushrod W. James Cemetery Fund the sum of \$60.00 was expended for the care and maintenance of the cemetery lots in Monument Cemetery, Philadelphia.

From the income of the Rudolph Blankenburg Pension Fund the following contributions have been made:

Police Pension Fund	\$120.00	
Firemen's Pension Fund	120.00	
Teachers' Annuity Fund	120.00	<u>\$360.00</u>

From the income of the Christian Schrack Fund the following contributions have been made:

Philadelphia Protestant Episcopal		
City Mission	\$525.00	
Evangelical Lutheran Missions	525.00	
Catholic Missionary Society	525.00	
Visiting Nurse Society	525.00	<u>\$2,100.00</u>

From the income of the Samuel H. Ashbridge Fund the sum of \$1,576.00 was expended in providing shelter and maintenance for four (4) indigent widows and single women, whose circumstances compel them to seek such assistance, and who met the requirements of the Decree of Court under which the fund is administered.

The accounts for the year ended December 31, 1949, for the several Funds under the care of this Board are shown in the attached statements.

On behalf of the Board of Directors of City Trusts.

JOSEPH GILFILLAN,
President.

December 31, 1949.

INEZ WALSH FULTON SCHOLARSHIP FUND

Created 1945

"to purchase a scholarship in the Medical School, Jefferson Col-
lege, for a Protestant graduate of Girard College, at graduation, who
has an excellent record during his entire period of residence in
Girard College for character and scholarship."

By Decree of the Orphans' Court of Philadelphia County, dated
July 1, 1947, the City of Philadelphia, Trustee, is authorized and
empowered to accumulate the income and when in its opinion the
said income is adequate and sufficient, to use same in payment to
The Jefferson Medical College of Philadelphia, for or toward, tuition
fees, costs and expenses, in training in general medicine during a
course of four years, in accordance with its established standards,
Protestant graduates of Girard College regardless of date of gradu-
ation therefrom, who had, in the opinion of the Board of Directors
of City Trusts, an excellent record for character and scholarship
during the entire period of residence in Girard College, with an
allowance to such medical students, during the sessions of The
Jefferson Medical College of Philadelphia, should the Trustee find
the same available, of an amount not in excess of \$30.00 a month.

LOANS TO ARTIFICERS

BENJAMIN FRANKLIN FUND

Created 1790

To "be loaned to an amount not exceeding sixty pounds sterling to Young Married Artificers under the age of thirty-five years, who have served an apprenticeship in Philadelphia and faithfully fulfilled the duties required in their indentures, and who will furnish two satisfactory securities for the return of the money in ten annual instalments, with interest at 5 per cent."

By Decree of the Orphans' Court of Philadelphia County, dated May 20, 1949, the maximum amount of each loan was increased to \$6,000, at four per cent. interest per annum, one-fifteenth part of the principal to be repaid annually, and loans were authorized to any properly qualified worked, skilled, unskilled and clerical, without regard to the place where or the mode whereby he or she has obtained his or her qualification, and notwithstanding he or she has never served as an indentured apprentice in the City of Philadelphia, preference to be given, however, to workers who have served an apprenticeship or received their training in the City of Philadelphia, the loans to be made upon well secured first mortgages on real estate in Philadelphia.

MISCELLANEOUS

SAMUEL H. ASHBRIDGE FUND

Created 1948

By Decree of the Orphans' Court of Philadelphia County, dated March 8, 1948, the City of Philadelphia, acting by the Board of Directors of City Trusts, was awarded this Fund under the following terms and conditions:

The net income when, and as often as, same is sufficient in amount shall be used for the support and maintenance, without charge, cost or expense to them, in appropriate homes, public or private, in the City of Philadelphia or its immediate suburbs, of indigent and worthy widows and single women, irrespective of race, creed or religion, of not less than fifty years of age, whose circumstances and necessities compel them to seek shelter and maintenance.

Accounts for the year ended December 31, 1949

Principal Account

Balance, January 1, 1949	\$58,599.14
Decrease:	
Net loss on sale of bonds	129.18
Balance, December 31, 1949	<u>\$58,469.96</u>

Balance, December 31, 1949, composed as follows:

These accounts represent monthly instalment receipts on mortgages, which are applied to interest, taxes and water rents, when due, and to reduction of principal.

* At value in award.

REPORT OF INDEPENDENT CERTIFIED
PUBLIC ACCOUNTANTS

To the Board of Directors of City Trusts,
Philadelphia.

We have examined the foregoing accounts of the Board of Directors of City Trusts acting for the City of Philadelphia, Trustees of the Girard Estate, Wills Eye Hospital and Minor Trusts for the year ended December 31, 1949. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary.

Bonds and stocks owned on December 28, 1949, were examined or otherwise satisfactorily accounted for. Mortgages owned on September 10, 1949, were confirmed as to principal, interest and taxes, by correspondence with the mortgagors who were in possession of their properties.

In our opinion, the foregoing accounts, pages 28 to 158, present fairly the respective balances of principal and income, in the Girard Estate, Wills Eye Hospital and Minor Trusts at December 31, 1949, and the increases and decreases therein for the year then ended, in conformity with the reports of the Auditor on the First Account stated as of December 31, 1937, approved by the Orphans' Court of Philadelphia County.

LYBRAND, ROSS BROS. & MONTGOMERY.

REPORT OF THE BOARD OF DIRECTORS OF CITY
 TRUSTS TO THE LEGISLATURE OF THE
 COMMONWEALTH OF PENN-
 SYLVANIA FOR 1949

May 4, 1950

To the General Assembly of the Commonwealth of Penn-
 sylvania.

Gentlemen:

In accordance with Clause XXIV, Item 3, of the Will of
 Stephen Girard, the City of Philadelphia, acting by the

Board of Directors of City Trusts, herewith submits a
 detailed account concerning the devised and bequeathed
 estate of Stephen Girard, deceased, with the investments
 and application of the same, together with a report of the
 state of Girard College, for the year 1949.

The principal of the Residuary Fund for the mainte-
 nance of Girard College amounted on December 31, 1949
 to \$65,936,074.53, or \$622,129.17 more than at the end of
 the year 1948.

The total ordinary expenditures for the support of
 Girard College amounted to \$2,081,885.51, a decrease of
 \$294,591.82 under the preceding year. The average number
 of pupils maintained was 1,304 and the cost of maintenance
 per capita, \$1,596.54. This is a decrease of \$212.04 under
 1948.

Total student enrollment, January 1, 1949 ..	1,306
Students admitted during the year	178 1,484
Indentures cancelled	107
Students leaving at eighteen years of age ...	69
Students deceased	1 177

Total student enrollment, December 31, 1949	1,307
---	-------

The most significant change at Girard College during the
 year was the reorganization of its administrative personnel,
 brought about largely because of the retirements in Sep-
 tember of the Principal of the High School, the Superin-
 tendent of Household, the Supervisor of Playgrounds and
 Recreation, and the Assistant Supervisor of Elementary
 Schools, all of whom had made significant contributions to
 Girard College. After a lapse of years, the office of Vice-
 President was re-established, and it is now filled by the
 former Principal of the Elementary Schools. This position
 and the four positions vacated by retirements were discon-
 tinued, and the following were established: Director and
 Associate Director of Secondary Education, and Director
 and Associate Director of Elementary Education. In con-
 nection with the reorganization, several additional posi-
 tions were discontinued because of financial retrenchment.
 The Department of Admission and Discharge, whose As-
 sistant Superintendent was made Secretary of the Board
 of Directors of City Trusts, continues to function without
 this position under the name of Office of Admissions and
 Student Relations.

Numerous changes in the schedule of the College have
 been made, including some changes in curriculum. Girard
 boys have appeared more extensively in outside activities.
 On the campus itself a student-managed center, or store,
 has been opened. The alumni initiated this year the Alumni
 Fund for Girard College to assist undergraduate activities
 and to aid younger alumni who desire to attend institu-
 tions of higher learning.

The higher costs of services and materials and the neces-
 sity of restricting the College budget made retrenchment
 necessary wherever eliminations and curtailments of serv-
 ices could be made which would do the least harm. An
 unexpected expense was the cost of extensive renovation
 of the capitals of the columns and adjacent areas of
 Founder's Hall. Their dangerous condition was disclosed
 when two large pieces fell. Replacements of the elevator,
 kitchen equipment, and roof of the Infirmary, and of the
 refrigerator equipment on the House Group have been
 made. The major part of the work of renovating the Power
 Plant, including installation of two new boilers, has been
 completed.

The receipts from the property of the Girard Estate
 Within the City of Philadelphia were as follows:

	Gross	Net
For the year 1949	\$2,939,624.35	\$1,043,206.10
(See details on page A-4)		

The receipts for the year 1949 from the property of the
 Girard Estate Without the City of Philadelphia were as
 follows:

Gross receipts	\$1,259,543.86	
Taxes and other expenses ..	355,004.55	\$904,539.31
Amount expended on Re- habilitation of Packer No. 5 Colliery	\$260,648.98	
Other extraordinary expendi- tures	189,912.65	450,561.63
Net receipts		<u>\$453,977.68</u>

During the year 1949 the sum of \$415,472.61 was set aside for possible permanent improvements and capital investments by colliery lessees.

The amount invested in bonds, preferred stocks and mortgages for the Residuary Fund is \$55,911,480.14, or \$352,122.05 more than in 1948, and the gross receipts therefrom amounted to \$1,593,103.19.

The Fire Insurance Fund has assets amounting to \$628,-243.02. The risks being carried amount to \$4,950,300, of which \$2,459,000 has been re-insured. The Fund suffered no fire loss during the year 1949.

From the Fund for the Improvement of the Eastern Front of the City the expense of lighting the district lying between Vine and South Streets, Front Street and the Delaware River, together with minor items incident thereto, has been paid in the amount of \$19,898.73.

The shipment of coal from the Girard Estate during the year 1949 was 1,228,559.15 gross tons, a decrease as compared with 1948 of 356,189.20 gross tons, or 22.48%. The shipments were made up as follows:

	Tons	Cwt.
Shipped to market—Fresh mined	1,158,418	55
Bank coal	70,140	60
	<u>1,228,559</u>	<u>15</u>

The total rail shipment from the region for the year 1949, as reported by the Pennsylvania Department of Mines, was 27,956,438 gross tons, a decrease of 14,274,259 gross tons, or 33.80% as compared with 42,230,697 gross tons for 1948.

The Girard Estate's proportion of the regional shipments was 4.39% as compared with 3.75% in 1948.

The quantity of coal consumed in operating was 32,-942.40 tons, 2.61% of the total production of 1,261,501.55 tons, an increase of 825.05 tons, and an increase of 0.62% as compared with 1.99% in 1948. The average for the thirteen years from 1901 to 1913, when there were no collieries operated by electricity was 10.92%.

During the eighty-seven years of active mining on the Girard Estate there have been marketed from it 134,604,-662.55 tons.

The coal leases at the end of the year were twenty in number, one (1) less than at the end of 1948.

Under the provisions of Clause IV of the Will the sum of \$142.80 was expended in the purchase of scholastic supplies for schools in the first section of the first school district of Pennsylvania.

During the year 1949 the sum of \$427.71 was expended in the purchase and distribution of fuel (coal) in accordance with the provisions of Clause V of the Will.

On behalf of the Board of Directors of City Trusts.

JOSEPH GILFILLAN
President.

GIRARD ESTATE

RESIDUARY FUND FOR THE MAINTENANCE OF
GIRARD COLLEGE

Principal Accounts

For the year ended December 31, 1949.

Personal Estate

Balance, January 1, 1949, and December 31, 1949, excluding balance in the gain and loss account	\$43,495,246.66

REPORT OF THE BOARD OF DIRECTORS OF CITY TRUSTS TO THE LEGISLATURE OF THE COMMONWEALTH OF PENNSYLVANIA

FOR 1950

April 26, 1951

To the General Assembly of the Commonwealth of Pennsylvania.
Gentlemen:

In accordance with Clause XXIV, Item 3, of the Will of Stephen Girard, the City of Philadelphia, acting by the Board of Directors of City Trusts, herewith submits a detailed account concerning the devised and bequeathed estate of Stephen Girard, deceased, with the investments and application of the same, together with a report of the state of Girard College, for the year 1950.

The principal of the Residuary Fund for the maintenance of Girard College amounted on December 31, 1950 to \$66,499,051.39, or \$562,976.86 more than at the end of the year 1949.

The total ordinary expenditures for the support of Girard College amounted to \$2,163,647.45, an increase of \$81,761.94 over the preceding year. The average number of pupils maintained was 1,313 and the cost of maintenance per capita, \$1,647.86. This is an increase of \$51.32 over 1949.

Total student enrollment, January 1, 1950	1,307	
Students admitted during the year	166	1,473
Indentures cancelled	114	
Students leaving at eighteen years of age	53	
Students expelled	1	168
Total student enrollment, December 31, 1950	1,305	

The year 1950 at Girard College was marked by the celebration of the two hundredth anniversary of Stephen Girard's birth and by ceremonies attended by distinguished guests, including two members of President Truman's Cabinet, during which wide recognition was accorded the Founder as a citizen of outstanding importance in American history. It was the first complete year of operation under the reorganization of staff, schedule, and program effected in September 1949. During the year there was a consolidation of the Office of Admissions and Student Relations with the Department of Student Personnel under the Director of Admissions and Student Relations in an effort to maintain and strengthen the guidance program while reducing staff.

An increased amount of teaching is being carried on by housemasters and the curriculum is under continual survey to attempt to meet without increasing costs the divergent needs of the students. There is of course an increasing competition in recruiting well-qualified persons on both the professional and non-professional staffs.

It is regrettable to note the inroads made on the work of the College by inflation, which forces the professional staff of the College to do its utmost not to sacrifice much progress that has been made. Yet, even in a period of curtailment and retrenchment, when activities like civilian defense are being reactivated, a few things are heartening, such as the strengthening of student responsibility and the increase in their successful handling of their own affairs under proper guidance, the development of home-and-home athletic engagements on Saturdays with other boarding schools, the significant increase in intramural sports, the expansion of club and Boy Scout activities, the acoustical treatment of the High School Auditorium and the dining rooms of the Dining and Service Building, the modest modernization of fire protection equipment, the completion of the new city sewer eighty feet below the surface, the new method of purchasing coal, which effects a considerable saving, and the emphasis on Annual Giving by the Alumni.

The receipts from the property of the Girard Estate Within the City of Philadelphia were as follows:

	Gross	Net
For the year 1950	\$2,761,700.07	\$931,478.08

(See details on page A-4)

The receipts for the year 1950 from the property of the Girard Estate Without the City of Philadelphia were as follows:

Gross receipts	\$1,452,932.17	
Taxes and other expenses	355,769.45	\$1,097,162.72
Amount expended on Rehabilitation of Packer No. 5 Colliery	\$62,001.13	
Other extraordinary expenditures	56,040.87	117,042.00
Net receipts		\$980,120.72

During the year 1950 the sum of \$564,978.48 was set aside for possible permanent improvements and capital investments by colliery lessees.

The amount invested in bonds, preferred stocks and mortgages for the Residuary Fund is \$55,838,286.39, or \$73,193.75 less than in 1949, and the gross receipts therefrom amounted to \$1,546,824.76.

The Fire Insurance Fund has assets amounting to \$647,839.11. The risks being carried amount to \$5,124,200 of which \$2,457,950 has been re-insured. The Fund suffered no fire loss during the year 1950.

From the Fund for the Improvement of the Eastern Front of the City, the expense of lighting the district lying between Vine and South Streets, Front Street and the Delaware River, together with minor items incident thereto, has been paid in the amount of \$3,192.88.

The shipment of coal from the Girard Estate during the year 1950 was 1,591,937-4/20 gross tons, an increase as compared with 1949 of 363,378-1/20 gross tons, or 29.58 per cent. The shipment was made up as follows:

	Tons	Cwt.
Shipped to market—Fresh mined	1,485,612	02
Bank Coal	106,325	02
Total	1,591,937	04

The total rail shipment from the region for the year 1950, as reported by the Pennsylvania Department of Mines, was 27,991,882 gross tons, an increase of 35,444 gross tons, or 00.127% as compared with 27,956,438 gross tons for 1949.

The Girard Estate's proportion of the regional shipment was 5.69% as compared with 4.39% in 1949.

The quantity of coal consumed in operating was 35,299-16/20 tons, 2.17% of the total production of 1,627,-237 tons, an increase of 2,357-8/20 tons, and a decrease of 0.44% as compared with 2.61% in 1949. The substitution of electricity for steam continued to be the chief factor in the lessening consumption of boiler fuel. The average for the thirteen years from 1901 to 1913, when there were no collieries operated by electricity was 10.92%.

During the eighty-eight years of active mining on the Girard Estate there have been marketed from it 136,-196,599-15/20 tons.

The coal leases at the end of the year were seventeen in number, three less than at the end of 1949.

Under the provisions of Clause IV of the Will the sum of \$172.71 was expended in the purchase of scholastic supplies for schools in the first section of the first school district of Pennsylvania.

During the year 1950 the sum of \$175.00 was expended in the purchase and distribution of fuel (coal) in accordance with the provisions of Clause V of the Will.

On behalf of the Board of Directors of City Trusts

JOHN DIEMAND,
President

GIRARD ESTATE RESIDUARY FUND AND THE MAINTENANCE OF GIRARD COLLEGE

Principal Accounts for the year ended December 31, 1950

Personal Estate

Balance, January 1, 1950, and December 31, 1950, excluding balance in the gain and loss account \$43,495,246.66

Add balance in gain and loss account, December 31, 1950, as shown on page A-3, temporarily included in principal 3,344,860.27

Balance, December 31, 1950, including balance in gain and loss account, composed as shown on page A-2 \$46,840,106.93

	<u>\$681,727,959.09</u>

The Society also hold for safekeeping for 1,136 depositors,
United States Government Bonds amounting to \$91,500.00.

Report of Certified Public Accountants

We have examined the foregoing statement of condition
of The Philadelphia Saving Fund Society as of December
31, 1949, and the appended statement listing in detail the
bond investments of the Society at that date.

Our examination included a verification by count or
confirmation of the cash on hand and in banks and of all
investments of the Society in bonds, stocks, mortgages
and deeds to real estate.

The value shown for bonds and stocks is less than cur-
rent market value. The mortgages, office building and
real estate for Society's use are conservatively valued.

We have reviewed the system of internal control and

accounting procedure and have examined or tested
accounting records and other supporting evidence to the
extent and by methods which we deemed appropriate.

In our opinion the statements correctly reflect the assets
and liabilities and the bond investments of the Society
as of December 31, 1949.

Philadelphia, Pa.
January 13, 1950.

LINVIL & PARRY
Certified Public Accountants

Member Federal Deposit Insurance Corporation

PSFS—a mutual savings bank having no stockholders
and operated solely for the benefit of its depositors.

THE DOLLAR SAVINGS BANK

The only Mutual Savings Bank in Pittsburgh.

Member of Federal Deposit Insurance Corporation

REPORT OF THE AUDITING COMMITTEE

We have examined the assets of the Bank and find them to correspond with the foregoing statement as of December 1, 1949.

Robert R. Gordon
C. M. Yohe

James M. Bovard
Theodore F. Smith

Francis B. Nimick

Auditing Committee

December 13, 1949.

THE DOLLAR SAVINGS BANK

Organized in 1855 for the purpose of encouraging thrift and the habit of saving, is a Mutual Savings Bank, operated solely for the benefit of its depositors. It has no stockholders. All profits, after payment of taxes and expenses, are distributed to depositors in dividends, or carried for their protection in the reserves and surplus of the Bank.

RECORD OF DEPOSITS FOR 94 YEARS

INFORMATION FOR DEPOSITORS

Put Your Savings in a Savings Bank

Deposits may be made:

In the name of one person.

In trust for a minor. Under absolute control of Trustee during his or her lifetime. In event of Trustee's death, payable to beneficiary on attaining the age of 21 years.

In trust, payable to one or more beneficiaries after the death of the Trustee or Trustees, without letters of administration.

In trust for Lodges, Societies or Associations.

In the names of husband and wife jointly, payable to either or the survivor.

In the names of persons other than husband and wife, payable to survivor or survivors.

In the names of Executors, Administrators, Committees or Guardians, with proper court documents.

Banking by Mail:

Accounts may be opened, deposits made and funds withdrawn by mail.

The Pass Book must accompany every transaction and will be returned on the day it is received.

If Pass Book is lost, the Bank should be notified promptly.

Savings Bank money orders and Travelers checks.

Loans are made to depositors on their pass books.

Dividends are credited semi-annually, June 1st and December 1st.

Banking Hours:

Daily, 9 A. M. to 3 P. M.

Saturdays, 9 A. M. to 12 Noon,
except summer months.

THE DOLLAR SAVINGS BANK

The only Mutual Savings Bank in Pittsburgh

Member of Federal Deposit Insurance Corporation

REPORT OF THE AUDITING COMMITTEE

We have examined the assets of the Bank and find them to correspond with the foregoing statement as of December 1, 1950.

E. Bruce Hill W. F. Trimble, Jr.
C. McK. Lynch J. Henry O'Neill

Geo. L. Collard
Auditing Committee

December 12, 1950

THE DOLLAR SAVINGS BANK

Organized in 1855 for the purpose of encouraging thrift and the habit of saving, is a Mutual Savings Bank, operated solely for the benefit of its depositors. It has no stockholders. All profits, after payment of taxes and expenses, are distributed to depositors in dividends, or carried for their protection in the reserves and surplus of the Bank.

INFORMATION FOR DEPOSITORS

Put Your Savings in a Savings Bank

Deposits may be made:

- In the name of one person.
- In trust for a minor. Under absolute control of Trustee during his or her lifetime. In event of Trustee's death, payable to beneficiary on attaining the age of 21 years.
- In trust, payable to one or more beneficiaries after the death of the Trustee or Trustees, without letters of administration.
- In trust for Lodges, Societies or Associations.
- In the names of husband and wife jointly, payable to either or the survivor.
- In the names of persons other than husband and wife, payable to survivor or survivors.
- In the names of Executors, Administrators, Committees or Guardians, with proper court documents.

Banking by Mail

Accounts may be opened, deposits made and funds withdrawn by mail.

The Pass Book must accompany every transaction and will be returned on the day it is received.

If Pass Book is lost, the Bank should be notified promptly.

Savings Bank money orders and Travelers checks.

Loans are made to depositors on their pass books.

Dividends are credited semi-annually, June 1st and December 1st.

Banking Hours:

Daily, 9 a.m. to 3 p.m.
Saturdays, 9 a.m. to 12 noon,
except summer months.

GENERAL REPORT OF THE JOINT STATE
GOVERNMENT COMMISSION—1949-1951

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH
OF PENNSYLVANIA

January, 1951

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Common-
wealth of Pennsylvania:

There is submitted herewith the General Report of the
Joint State Government Commission.

The General Report deals briefly with the directives of
the General Assembly of 1949 to the Commission and with
projects initiated by the Commission under the authority
granted by the Act of 1937, July 1, P. L. 2460, as amended
1939, June 26, P. L. 1084.

This report is designed to serve as a reference guide for
the members of the General Assembly. It is divided into
four parts. Parts I and II outline the findings of the Com-
mission studies undertaken in accordance with specified
directives. Whenever findings of fact eventuated into Com-
mission recommendations, the suggested policies are out-
lined. Part III lists studies which were initiated by the
Commission. Part IV presents a listing of the subcom-
mittees created by the Commission in accordance with the
Act of 1943, March 8, P. L. 13, Section 1, and the adminis-
trative and technical staff of the Commission.

Specific Commission recommendations are embodied in
bills drafted by the Legislative Reference Bureau. These

drafts will be submitted for the review, consideration and
action of the General Assembly.

On behalf of the Commission, the cooperation of the
subcommittees, their advisors and the Legislative Ref-
erence Bureau is gratefully acknowledged. The Commis-
sion regrets the death, during this biennium, of Frederick
L. Homsher, member of the Joint State Government Com-
mission on behalf of the Senate.

The research facilities of the Commission, established on
a permanent basis, serve the Commission and stand ready
to render such service as the General Assembly and its
standing committees require.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building, Room 450
Harrisburg, Pennsylvania
January, 1951

 - Subcommittees
 - Administrative and Technical Staff

Part I

STUDIES DIRECTED BY CONCURRENT RESOLUTIONS

Eighteen of the thirty-one studies and investigations of the Commission were directed by concurrent resolutions of the General Assembly. Thirteen of these directives concern factual studies and analyses and the remaining five deal with codifications and revisions.

A. FACTUAL STUDIES AND ANALYSES

1. Accounting Procedures of the Commonwealth

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate the accounting systems used by the several departments, agencies and commissions of the Commonwealth with a view of developing adequate and uniform accounting systems and complete analyses of the Commonwealth's fiscal condition, including a statement and analysis of assets, exclusive of physical assets, and liabilities of the Commonwealth.

Investigation:

In collaboration with the Pennsylvania Institute of Certified Public Accountants, and with the cooperation of the

Auditor General, made a detailed investigation of the accounting practices used in Commonwealth departments and agencies. Studied accounting methods in use in the other forty-seven states, with particular attention to states whose general expenditures are comparable to Pennsylvania's. Considered changes in existing law necessary to the establishment of a modern, integrated accounting system.

Strategic Facts:

(a) In Pennsylvania, responsibility for the over-all management of the Commonwealth's financial affairs is divided among three elective officers—the Governor, the Auditor General and the State Treasurer.

(b) Under Section 701 (d) of The Administrative Code, the Governor is directed "to prescribe and require the installation of a uniform system or systems of bookkeeping, accounting, and reporting, for the several administrative departments, boards, and commissions, except for the Department of the Auditor General, the Treasury Department and the Department of Internal Affairs, but, before prescribing and requiring such installation, the Governor shall consult with the Department of the Auditor General," (1929, April 9, P. L. 177).

(c) At present, the accounts of the Commonwealth are kept on a cash basis but, by virtue of the use of different codes and conventions, reconciliation of the statements of elected officers is difficult and adequate appraisal of the financial condition of the Commonwealth is impossible.

(d) Reconciliation difficulties aside, the cash system of accounting not only permits but actually requires the preparation of statements which are at variance with the facts because:

(1) It fails to take cognizance of such non-cash assets as inventories, subsidies receivable and taxes due and collectable; similarly, it fails to take cognizance of such liabilities as supplies received and services rendered.

(2) It provides for the recording of cash only as actually received and only as actually disbursed, without allocation to the fiscal period to which such receipt or disbursement applies. For example, analysis discloses that on May 31, 1945, the Commonwealth had an amount receivable from the Federal government of \$2,992,000, which did not appear as an asset on any financial statement of the Commonwealth. On May 31, 1947, the Commonwealth collected from the Federal government \$593,000 in excess of the amount due, which did not appear as a liability on any financial statement of the Commonwealth. At one time, at least, the amounts involved in improper allocation of receipts to time periods exceeded \$15,000,000.

(e) Under present statutory arrangements, the Auditor General postaudits all accounts of the Commonwealth, and in addition performs certain preauditing functions; this latter function makes the Auditor General a party to accounting which he subsequently postaudits.

(f) Of the eighteen states whose annual general expenditures exceed \$195,000,000, only Pennsylvania combines the post- and preauditing functions in one office, and in the main, the larger states do not keep their accounts on a cash basis.

Recommendations:

In order to facilitate the preparation of meaningful, reconcilable financial statements for the Commonwealth and

to assure critical review of all financial transactions of the Commonwealth, the Commission recommends that:

(1) The Commonwealth employ an accrual rather than a cash method of accounting, such method to be prescribed by legislation and its use made mandatory upon all Commonwealth officials including the Governor, the Auditor General, and the State Treasurer.

(2) An office of Accountant General be established by legislation, the Accountant General to be of cabinet rank, appointed by the Governor with the advice and consent of the Senate, for the purpose of installing, operating and supervising the legislatively-prescribed system of accounting for the Commonwealth.

(3) The postauditing and preauditing functions be performed by the Accountant General.

(Separate report to be issued)

2. Allegheny County Court

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate the criminal jurisdiction of the Allegheny County Court.

Investigation:

Studied the laws, constitutional provisions and court decisions affecting the jurisdiction of the Allegheny County Court. Compared the jurisdiction in criminal matters of the Allegheny County Court with that of the Municipal Court of Philadelphia.

Strategic Facts:

(a) In Allegheny County the courts of record consist of the Court of Common Pleas, Orphans' Court, County Court and Juvenile Court.

(b) Under present law, criminal jury trials are committed to judges of the Court of Common Pleas who sit as judges of Courts of Oyer and Terminer and Quarter Sessions of the Peace.

(c) The allocation of criminal jury trial work between Common Pleas judges and County Court judges is not now possible, because:

(1) The laws fixing the criminal jurisdiction of the County Court fail to provide for such trials in that court;

(2) The Supreme Court of Pennsylvania has held that Article V, Section 8, of the Pennsylvania Constitution is not sufficiently broad to permit the assignment of County Court judges to hold such criminal courts (Park's Petition, 329 Pa. 60).

(d) In Philadelphia County, the courts of record consist of seven Common Pleas Courts, the Orphans' Court and the Municipal Court; the last of which has jurisdiction of adoption cases, juvenile court cases and a broader criminal jurisdiction than is possessed by the Allegheny County Court.

(e) The act creating the Municipal Court of Philadelphia (1913, July 12, P. L. 711, 17 P. S. 681) confers upon it jurisdiction in all criminal actions except trial of indictments for arson, burglary, murder, voluntary manslaughter, treason, or misprision of treason, or for violation or conspiracy to violate the election or registration laws or for embezzlement by any public officer or any offense involving breach of official duties by any public officer. It is further provided that indictments may be presented against

defendants before the grand jury in accordance with existing laws; and that trials may be had in existing courts or in the Municipal Court at the election of the district attorney, who is charged with the prosecution of all defendants tried in the Municipal Court.

Recommendations:

(1) That the act creating the County Court in Allegheny County (1911, May 5, P. L. 198, 17 P. S. 621) be amended to confer upon that court the same criminal jurisdiction (exclusive of juvenile court cases) now possessed by the Municipal Court of Philadelphia.

(2) That Article V, Section 8, of the Pennsylvania Constitution be amended to permit the Court of Common Pleas of Allegheny County to designate judges of the County Court, as well as Common Pleas judges, to hold Courts of Oyer and Terminer and Quarter Sessions of the Peace in Allegheny County.

3. Child Placement and Adoption

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate child placement and adoption in the Commonwealth.

Investigation:

Ascertained the number, geographic distribution, administrative responsibility for and cost of maintenance of children under care in the Commonwealth and investigated the standards and practices of private and public agencies with respect to adoption placements.

Strategic Facts:

(a) In 1949, approximately 36,000 children in Pennsylvania were under institutional care or in foster homes, and 4,000 were placed in adoptive homes.

(b) Of the 36,000 in institutions and foster homes, some 3,800, or about 10%, were handicapped and delinquent children; 12,000, or 33%, were in institutions for dependent and neglected children; 9,977, or approximately 27%, were under the care of the county institution districts, primarily in foster homes; and 10,329, or approximately 28%, were under the care of private child-caring agencies, primarily placed in foster homes.

(c) The public cost of child care in Pennsylvania, in 1949, amounted to some \$14,000,000. Of this total, \$12,196,000, or 88%, was borne by the counties or the county institution districts; 11.4% of the cost was borne by the Commonwealth, either through state aid to private institutions and agencies, the operation of state-owned institutions, or public assistance payments for the care of certain children removed from their homes by court order. The total of \$14,000,000 does not include the Commonwealth grants to dependent children cared for in their own homes, which in 1949 amounted to approximately \$31,000,000.

(d) The "Mallery Amendment" of 1949 permits continuation of public assistance payments to children who are removed from their homes by court order and placed in foster homes or children's homes maintained by a county institution district (1949, April 28, P. L. 767).

(e) Placements of children, including placements for adoption, are made by the county institution districts, Juvenile Courts, private child-caring agencies and individuals.

(f) At the present time, adoption placement is not a Commonwealth responsibility. Under existing law, the Orphans' Court (and in Philadelphia County, the Municipal Court) has permissive power to investigate the parties concerned in adoption proceedings.

(g) Under existing conditions, the standards of parties placing children for adoption vary widely.

(h) The evidence shows that the time involved in consummation of an adoption placement varies from a few months to several years, with a child sometimes passing through numerous foster homes in the process.

Recommendations:

A. Adoption Placement

(1) That a state-wide Adoption Placement Service be established in the Department of Welfare.

(2) That standards for agencies and institutions placing children for adoption, and for prospective adoptors be established by the Department of Welfare.

(3) That there be annual licensing, by the Department of Welfare, of private and public agencies meeting the standards prescribed; and the placing or taking a child for adoption by or from an unlicensed agency be prohibited; that relatives be permitted to take a child provisionally, but required to apply to the Department of Welfare for a preliminary certificate of approval.

(4) That provision be made for appeal from the decision of the Department of Welfare to the Juvenile Court.

(5) That a parent or parents be permitted, by petition to the Juvenile Court, to surrender custody of a child to the Department of Welfare or a licensed agency or institution for purposes of adoption.

(6) That preference be given by the Department of Welfare to prospective adoptors designated by the natural parent or parents.

B. Jurisdiction in Adoption Proceedings

That adoption proceedings be placed under the jurisdiction of the Juvenile Court.

C. Assistance Payments to Dependent Children

That the provisions of the "Mallery Amendment" (1949, April 28, P. L. 767), be clarified to facilitate continuation of assistance payments to all children removed from their homes by court order.

(Separate report to be issued)

4. Commonwealth-Owned Forests and Reforestation

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate Commonwealth-owned forests and reforestation.

Investigation:

Surveyed action taken in the past to restore the depleted forests of Pennsylvania; consulted with Department of Forests and Waters on current plans under 20-year program begun in 1949; reviewed legal aspects of differential taxation of forest land in Pennsylvania and other states; estimated expected returns on forest lands; and compiled lists of trees suitable for growths in Pennsylvania.

Strategic Facts:

(a) As the result of its geographical location and cli-

mate, Pennsylvania was originally one of the most heavily forested areas in the United States. Timber formed the foundation of the state's first industry. Through indiscriminate cutting, waste, careless use and fire, the timber resources of the state were reduced until they reached an all-time low of 8,000,000 acres in 1915.

(b) At present, Pennsylvania's forest area comprises 15,000,000 acres, which represents about 52% of the land area of the Commonwealth. The Department of Forests and Waters manages 1,730,534 acres of state-owned forest lands and 29,028 acres leased from the federal government for 99 years.

(c) The reforestation of Pennsylvania is a joint venture of the Commonwealth, which owns and manages forest lands, and private individuals who own forest lands or land suitable for reforestation. It is also a long-term venture, since the growing cycle of timber from seedling to mature tree ranges from 75 to 100 years.

(d) The profitability of investments in forests may be estimated on the basis of the long-term trends of annual costs and the expected revenues from the sale of timber.

(e) On the average, the private investor's rate of return appears to be the same as that of the Commonwealth.

(f) The General Assembly has sought to encourage the private landowner to engage in sound forestry practices by differential taxation of forest lands. Seven bills passed by the General Assembly providing for differential treatment of forest lands have been declared unconstitutional.

(g) Today, Pennsylvania wood consumption is about 2¼ billion board feet per year, of which less than half is produced in Pennsylvania.

(h) Although the demand for timber is strong, Pennsylvania producers have access to but limited current market information. At present, the Department of Forests and Waters issues a monthly marketing bulletin, and, under the twenty-year program, plans further activity to facilitate the marketing of Pennsylvania's forest products.

Recommendations:

(1) That the long range policy for the administration of Commonwealth-owned or managed forest lands be continued and that the appropriation for the acquisition of forest land be limited so as not to encourage an increase in the price of land.

(2) That the Constitution be amended to permit classification of forest lands for tax purposes.

(See Separate Report: Commonwealth-Owned Forests and Reforestation)

5. Commonwealth Space Requirements

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate space requirements for state government outside of the city of Harrisburg, rental costs and convenience involved, and the cost and convenience of alternative arrangements.

Investigation:

Compiled lists of office space leased by the Commonwealth in central Philadelphia and Pittsburgh, together with information on the location, leasing agency and rental cost per square foot. Examined previous legislation providing for the acquisition of state office buildings in Phila-

delphia and Allegheny counties. Considered cost, convenience and possible gains from relocation in central state office buildings of agencies now leasing offices.

Strategic Facts:

(a) In central Philadelphia, nineteen agencies of the Commonwealth maintain a total of forty-three offices, for which they pay annual rentals ranging from \$.40 to \$3.74 per square foot. In 1949-50, the Commonwealth leased a total of 263,111 square feet in central Philadelphia, at an annual rental of \$404,342, an average per square foot rental of \$1.54.

(b) In central Pittsburgh, seventeen agencies of the Commonwealth maintain a total of twenty-seven offices, for which they pay annual rentals ranging from \$.60 to \$4.06 per square foot. In 1949-50, the Commonwealth leased a total of 122,000 square feet in central Pittsburgh, at an annual rental of \$259,088, an average per square foot rental of \$2.12.

(c) The overwhelming majority of the heads of the agencies maintaining offices in the above cities are of the opinion that consolidation of all Commonwealth operations in one suitable location in each city would not impair their operating efficiency.

(See Separate Report: Commonwealth Space Requirements in Pittsburgh and Philadelphia)

6. Fishways

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate fishways and similar devices which may be used in the waters of the Commonwealth, and the fish population in such waters.

Investigation:

Studied the progress of the development of fishways in the Atlantic Coast region; considered alternate proposals to facilitate the migration of fish which might be employed pending the development of practical fishway designs; conferred with the U. S. Department of Interior Fish and Wildlife Service concerning the problem; evaluated the feasibility of a code, at this time, regulating aquatic life.

Strategic Facts:

(a) The Joint State Government Commission, in January, 1949, reported to the General Assembly that as regards shad fishways, it was important to ascertain, among other factors, rates of water flow, ranges of water temperature and degree of water purity necessary to encourage migration of fish, and also the biological and hydraulic conditions suitable to the migration of fish through artificial barriers; that only if and when such factors are known will it be possible to design effective devices for the passage of fish over existing dams; that the problem was common to all states along the Atlantic seaboard whose rivers receive migratory fish; that, hence, the expense of such inquiry should be borne by the Federal government.

(b) The 81st Congress enacted H. R. 2740 as Public Law 249 (Chapter 478—1st Session), which provides, inter alia, as follows:

"Sec. 2. The Secretary of the Interior is hereby authorized to undertake, through the Fish and Wildlife Service, a comprehensive and continuing study of the

shad of the Atlantic Coast for the purpose of recommending to the Atlantic Coast States, through the Atlantic States Marine Fisheries Commission, measures to be taken to arrest decline, increase the abundance, and promote the wisest utilization of such shad resources at a cost of not to exceed \$75,000 per annum for a six-year period. For the purposes of this section, any agency of the United States, or any corporation wholly owned by the United States, is authorized to transfer, without exchange of funds, any boats or equipment excess to its needs required by the Fish and Wildlife Service for the studies authorized herein.

* * *

"Sec. 4. There is authorized to be appropriated from time to time, out of any moneys in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the purposes and objectives of this Act.

"Approved August 18, 1949."

(c) The United States Department of Interior Fish and Wildlife Service in 1950 utilized the funds provided by Public Law 249 for studying shad in the Hudson River; in 1951 the studies will center upon shad runs in the Connecticut River and in 1952 the funds will be employed for studies of shad in the Chesapeake Bay region, including the Susquehanna River basin.

(d) Power dam installations at Holyoke, Massachusetts, in the Connecticut River, include a shad fishway, the effectiveness of which is not yet known.

(e) The United States Department of Interior Fish and Wildlife Service advises that transportation of shad during the spawning migration from waters below the power dams to the waters above, is practical; the Service may be in a position to furnish suitable trucks for such purpose, upon payment of the cost of operation; the Service welcomes an opportunity to participate in the experiment of trucking shad, to the extent of providing personnel for required tagging of 1,800 fish, follow-up study of the upstream migration and the return of adult shad and fingerlings; such services can be had prior to the planned intensive study for the Susquehanna River area.

(f) At this time, the Commission deems it inadvisable to submit a comprehensive code covering aquatic life in the waters of the Commonwealth.

Recommendations:

(1) That an appropriation be provided to finance in part the experiment of trucking shad from the waters below the Conowingo Dam on the Susquehanna River to the waters above each of the three power dams on the river during the migratory season of 1951.

(2) That the United States Department of Interior Fish and Wildlife Service be invited to participate in this project.

(3) That the Joint State Government Commission be directed to continue the study of fish in the Commonwealth so that a report may be made to the General Assembly of 1953 concerning the progress in the development of fishways, the result of trucking migratory fish from waters below the power dams to Pennsylvania waters above, and other matters of interest to Pennsylvania sportsmen.

7. Highway Costs

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

Study and investigate costs of construction and maintenance of public highways as related to vehicles used thereon.

Strategic Facts:

On the day following the adoption of the resolution directing this study, the Senate concurred in the House amendments to Senate Bill No. 716, which was approved by the Governor on May 23, 1949, and became Act No. 537. Act No. 537 establishes a "Highway Planning Commission," with an appropriation of \$250,000, whose duty it shall be "to ascertain, gather, study and analyze all pertinent facts, material and data deemed pertinent to and necessary for the Commonwealth, including but not limited to the classification of highways, roads and streets in the state, the construction, reconstruction, improvement and maintenance of the highways, roads, streets and bridges, the ways and means of financing such long-range highway program, and the nature and character of the administration needed to carry such program into effect."

The assignment to the Highway Planning Commission, being by Act of Assembly of later date, supersedes the directive of the Concurrent Resolution.

8. Occupational Hazards to State Employees

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate occupational hazards to state employes in the performance of their official duties.

Investigation:

Studied the five-year injury experience of all state occupations on the basis of the records of the State Workmen's Insurance Fund. Ascertained from the departments and agencies of the Commonwealth hours worked by state employes engaged in different occupations. Compared injury experiences and hours worked and calculated severity rates, frequency rates and severity averages for all state occupations. Tested significance of rates.

Strategic Facts:

(a) The employes of the Commonwealth receive wages or salaries, are entitled to paid vacation periods and sick leave with pay, and in addition, are covered by workmen's compensation insurance and are eligible for superannuation and disability retirement allowances.

(b) The financing of workmen's compensation benefits is the exclusive responsibility of the Commonwealth (Commonwealth allocations to the State Workmen's Insurance Fund for the calendar year 1949 amounted to \$533,793.07); payments to the State Employees' Retirement Fund are the joint responsibility of the Commonwealth and the employee (Commonwealth contributions \$6,449,858, employes' contribution \$12,620,060 for the biennium 1947-49).

(c) The compensation of state employes may be modified by changes in:

- a. Wage and salary scales;
- b. Workmen's compensation benefits;
- c. Retirement and disability allowances.

(d) The General Assembly of 1949 had before it five bills designed to liberalize the retirement allowances respectively of fish wardens, game protectors, institutional

employes, Liquor Control Board enforcement officers and mine inspectors. Three of these bills—H. B. No. 200, H. B. No. 260 and H. B. 1166—passed both houses but were vetoed by the Governor on the ground that it had not been established that these employes are subjected to extraordinary hazards in the performance of their official duties.

(e) The hazards associated with the occupations enumerated in the Governor's veto messages, measured in terms of severity rates (total days lost from work by virtue of disabling injuries per 1,000 employe hours worked) are less than the average hazards associated with all state occupations.

(See Separate Report: Occupational Hazards to State Employes)

9. Partial Unemployment Compensation Benefits

(House Concurrent Resolution Serial No. 87, adopted April 28, 1949; agreed to April 28, 1949.)

Legislative Mandate:

To make a study of the problem of partial unemployment, both seasonally and during continued periods of unemployment resulting from a general slackening of economic activity, and the benefits payable by reason of partial unemployment.

Investigation:

Examined unemployment compensation statutes of the forty-eight states. Made intensive study of partial benefits payable under different employment conditions in sixteen states, including Pennsylvania, and analyzed the distribution of persons eligible for benefits in Pennsylvania by high quarterly earnings during the base year. Conferred with state-wide organizations representing both employers and organized labor.

Strategic Facts:

(a) The forty-eight states of the union have unemployment compensation laws. The Pennsylvania unemployment compensation system was established in 1936. The Pennsylvania system at the time of its establishment provided for benefit payments only if a worker was fully unemployed; in 1945, the statute was amended to provide for benefit payments to partially unemployed persons.

(b) It is the purpose of all unemployment compensation systems to make available to a fully or partially unemployed, covered worker some statutorily-determined fraction of the income which he would have earned in the covered employment had he been fully employed.

(c) To accomplish the objective indicated under (b), above, two systems are in use—the so-called "wage loss" type of program and the "day base" plan.

(d) The "wage loss" system is used by forty-seven states including Pennsylvania; the "day base" plan is used only in the State of New York. It is possible to incorporate, within the concepts of either system, a feature providing for supplemental allowances for dependents, and some states have incorporated such a feature.

(e) In Pennsylvania, a covered employee is compensated for total or partial unemployment as follows: The statute establishes a minimum weekly benefit of \$8, to which a wage earner is entitled if his high quarterly earnings during his base year (the five quarters preceding the date of application for benefits) were \$60 to \$212. The benefit payment increases by \$1 for every \$25 of high-quarterly

base year earnings, until it reaches a maximum of \$25 at a high-quarterly earning of \$613. In order to be eligible for benefits for either full or partial unemployment, a covered worker must have received remuneration during his base year in an amount not less than thirty times his weekly benefit rate. The maximum benefit payments for any one benefit year are twenty-four times the full weekly benefit rate to which he is entitled.

In the case of a fully unemployed person whose eligibility has been established, the full benefit rate is payable. In the case of a partially unemployed person, an incentive deduction of \$3 is made from his weekly earnings, and the balance of his earnings is deducted from his full benefit rate. Thus, in order to be eligible for benefits for partial unemployment, a worker must earn less than his full weekly benefit amount.

(f) Under the "day base" plan (used in New York), benefit rates are computed in basically the same manner as those under the "wage loss" plan (used in Pennsylvania). However, the payments are computed in a different manner. For purposes of computing the payments, the day base plan recognizes a seven-day week. Provided a worker earns less than \$24 from his employment during the week, the fourth and succeeding days of unemployment in that week are designated as "effective days." Four effective days are considered as a week of full unemployment, and the full benefit amount is paid to any covered person who has accumulated four effective days.

(g) Examination of the two plans, described under (e) and (f), above, shows that in both systems amounts paid for partial unemployment depend upon amounts paid for full unemployment.

(h) The day base system, in use only in the State of New York, has recently been evaluated by a legislative committee at the direction of the New York General Assembly. This committee has recommended abandonment of the day base plan.

(i) Generally speaking, evidence shows that the wage loss system provides more generous benefits for covered employees in the lower earning brackets.

(Separate report to be issued)

10. Public Assistance

(Senate Resolution No. 40, adopted April 19, 1949; House Concurrent Resolution No. 74, April 26, 1949, agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate the administration and financing of public assistance in the Commonwealth.

Investigation:

Examined public assistance administration and financing methods in the forty-eight states; established relationship of general assistance expenditures and degree of local financing; developed methods of compensation for variations in public assistance expenditures among counties. Examined application of eligibility standards and pertinent departmental records; examined educational training and experience of public assistance personnel. Examined characteristics of general assistance recipients on the basis of a representative and adequate random sample; related public assistance payments to prevailing wages. Surveyed Pennsylvania's blind pensions in the light of recent federal enactments.

Strategic Facts and Recommendations:

Strategic facts, pertinent data and recommendations are set forth at length in separate report to be issued.

(Separate report to be issued)

11. Public School Attendance Areas

(House Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate efficient public school attendance areas within the Commonwealth.

Investigation:

Studied methods used in the forty-eight states for the purpose of increasing the size of public school attendance areas and school districts, and the history of public school attendance areas in Pennsylvania. Established the relationship between numbers of pupils and per pupil total current expense costs, per pupil instruction costs and per pupil current expense costs other than instruction costs. Established the relationship between per pupil costs of interdistrict transportation and the number of miles pupils are transported and the relationship between per pupil cost of interdistrict transportation and the number of pupils transported.

Strategic Facts:

(a) In the opinion of educators, it is desirable to enlarge many school attendance areas (the geographic area service by a single school) in order to make available diversified curricula at a reasonable cost to the taxpayer.

(b) Four methods are currently employed with a view to enlarging areas:

(1) Mandatory consolidation.

(2) Voluntary consolidation without state financial assistance.

(3) Voluntary consolidation with state financial assistance.

(4) Voluntary consolidation of school operations.

(c) The Pennsylvania system of voluntary consolidation of operations provides advantages for pupils without sacrificing local control.

Prior to Act of 1945, May 29, P. L. 1112, Pennsylvania laws tended to discourage the enlarging of attendance areas and the formation of joint schools. However, the 1945 school subsidy system has proved conducive to the establishment of economical school attendance areas and to the equalization of educational opportunities.

(d) Data from a group of Pennsylvania 3rd and 4th class school districts with average capacity to support public education show that, as the number of pupils (average daily membership) increases, the total current expense costs, the instruction costs, and the total of all current expense costs other than instruction costs (on a per pupil basis) tend to decrease. The per pupil costs which are typically related to given numbers of high school pupils in school districts maintaining four-year high school decrease from \$244 for a school whose average daily membership is 50 pupils to \$163 for a school of 300 pupils. Similarly, the per pupil costs in school districts maintaining six-year high schools decrease from \$209 for only 100 pupils to \$156 for 700 pupils. In school districts maintaining eight-year elementary schools, the per

pupil costs decrease from \$124 for 50 pupils to \$93 for 350 pupils.

(e) Data from a group of 3rd and 4th class school districts show that, as the number of pupils transported increases, the per pupil cost of transportation decreases, and that, as the number of miles pupils are transported increases, the per pupil per mile cost of transportation decreases.

(See Separate Report: Public School Attendance Areas)

12. Retirement Costs

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate the cost of retirement systems to the Commonwealth and its political subdivisions.

Investigation:

Examined the elements of the State Employees' Retirement System and projected the cost of the system to the State on the assumptions: (a) that the elements as now provided by law would remain constant; (b) that the elements would be varied as indicated by proposals heretofore submitted to the General Assembly.

As regards the Public School Employees' Retirement System the General Assembly, in 1949, made extensive changes, including the fraction on the basis of which the State allowance is computed, and as yet no actuarial valuation reflecting the changes is available. Hence, no cost projections are feasible.

Strategic Facts:

Pertinent data are set forth at length in separate report to be issued.

(Separate report to be issued)

13. Tax Exempt Liquid Fuels

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and investigate the taxation and exemption of liquid fuels utilized for nonhighway purposes, methods of exempting, taxing and rebating and distributing any such taxes.

Investigation:

Surveyed legal provisions for taxation, exemption and refunding of taxes on liquid fuels in twenty-one states. Studied the extent of exemptions and refunds of liquid fuels taxes and the estimated private and commercial nonhighway use of liquid fuels in the selected states. Determined effect of the 1949 act which provided for the refunding of one-half of the tax on gasoline used for non-highway agricultural purposes.

Strategic Facts:

(a) Pennsylvania has levied a tax on liquid fuels since 1921. At the present time the tax rate is \$.05 per gallon, of which \$.03 is levied on a permanent basis and \$.02 under authorization which expires May 31, 1951.

(b) The General Assembly of 1949 made provision (1949, May 26, P. L. 1880) for the refunding of one-half of the amount of liquid fuels taxes paid on fuels used for non-highway agricultural purposes and for the payment of a

quarterly filing fee of \$1.50, such filing fee to be deducted from the claim. The quarterly filing fee of \$1.50, in effect, makes it impossible for a farm operator to get a refund on the first sixty gallons of liquid fuels used in any one quarter for nonhighway agricultural purposes.

(c) For the year beginning July 1, 1949, and ending June 30, 1950, total dollar refunds amounted to \$219,034.08. Farm operators filing claims, by quarters, ranged from 1.4% to 2.9% of the total number of farm operators in Pennsylvania.

(Separate report to be issued)

B. Codification and Revisions

1. Administrative Code

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and revise The Administrative Code of 1929 and related statutes.

Investigation:

Reviewed The Administrative Code of 1929 and a compilation of amendments to the Code made since 1929, including the amendments of 1949; the organization of administrative departments, boards and commissions showing method of creation and legislation governing their operation; and legislation relating to boards and commissions which might be covered by general provisions of The Administrative Code.

Strategic Facts:

Revision of The Administrative Code at this time does not seem expedient because:

(a) Such a revision, to be successful, should be made in collaboration with the Governor during his first biennium.

(b) The Joint State Government Commission has under consideration numerous amendments to The Administrative Code.

(c) In light of the present national emergency, suspension of certain provisions of the code may be necessary.

2. Decedents' Estates Laws

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and revise the Orphans' Court Act, Orphans' Court Partition Act, Register of Wills Act, and Revised Price Act, with their supplements and related statutes.

Investigation:

Studied existing laws on the subject; prepared, with the guidance of the Advisory Committee on Decedents' Estates Laws, a proposed draft of an orphans' court act, a register of wills act, an incompetents' estates act and amendments to the Fiduciaries Act and the Fiduciaries Investment Act.

Strategic Facts:

Heretofore the Joint State Government Commission, as directed by Senate Resolution Serial No. 46 of the 1945 Session of the General Assembly, submitted drafts of an intestate act, a wills act, an estates act and a principal and income act, all of which were enacted in 1947.

These, with comments, are contained in the Commission's report, "Decedents' Estate Laws of 1947." And, as directed by Senate Resolution Serial No. 34 of the 1947 Session of the General Assembly, the Joint State Government Commission submitted drafts of a fiduciaries act and a fiduciaries investment act, both of which were enacted in 1949. These, with comments, are contained in the Commission's report, "Decedents' Estates Laws of 1949."

The proposed acts and amendments supplement these decedents' estates laws enacted in 1947 and 1949.

Recommendations:

That the proposed orphans' court act, register of wills act, incompetents' estates act and the proposed amendments to other decedents' estates laws, as finally prepared, be enacted.

(See separate reports: Proposed Orphans' Court Act of 1951, May 10, 1950; Proposed Register of Wills Act of 1951, July 10, 1950; Proposed Incompetents' Estates Act of 1951, November, 1950.)

3. Insurance Laws

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and revise the laws relating to insurance.

Investigation:

(a) The Joint State Government Commission, on August 10, 1949, requested the Insurance Commissioner to prepare and submit a preliminary draft of a proposed insurance code for review by the Commission and possible submission to the General Assembly in 1951, together with:

(1) A table showing the sections of the existing law and comparable sections of the proposed code.

(2) A statement listing provisions of existing laws, the deletion of which is proposed because they are held to be obsolete.

(3) A list of sections, revision of which is proposed to conform to court decisions.

(4) Proposed changes in existing law, together with a statement as to the purposes which are to be accomplished by the change.

(b) On April 19, 1950, the Insurance Commissioner informed the Joint State Government Commission that the Insurance Department was proceeding with the work of codification and had enlisted the aid of an Advisory Committee.

(c) On November 16, 1950, the Insurance Commissioner reported that on May 25, 1950, a meeting, called by the commissioner, was held at Harrisburg, attended by approximately 150 representatives of interested parties; that it was the consensus of the meeting that a complete revision and codification of the insurance laws is a matter for long-range study, and that it was not practical to attempt to present such an extensive code to the General Assembly at the 1951 Session.

Strategic Facts:

The Insurance Commissioner is proceeding with the codification project as requested by the Joint State Government Commission.

Recommendation:

That a long-range study for the revision and codifica-

tion of the insurance laws be continued so that the Insurance Commissioner may complete the preparation of the material requested by the Joint State Government Commission.

4. Landlord and Tenant Laws

(House Concurrent Resolution No. 6, January 25, 1949; agreed to January 26, 1949. House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and revise the laws relating to landlord and tenant, eviction proceedings, rent control and kindred statutes.

Investigation:

Compiled and studied the law of landlord and tenant as contained in the statutes and court decisions, together with bills on the subject heretofore presented to the General Assembly; reviewed the proposals contained in the Report of the Committee on Civil Law of the Pennsylvania Bar Association; prepared a proposed draft of a landlord and tenant act, and reviewed and considered suggestions and recommendations submitted by interested persons.

Strategic Facts:

(a) The law of landlord and tenant in Pennsylvania is based upon numerous separate statutes enacted between 1772 and 1900 which contain obsolete terminology and overlapping and inconsistent provisions.

(b) The practice in this field is largely regulated by case law interpreting the above statutes and supplying decisional law in the absence of statutory provisions.

(c) There is a need for codification of the existing law of landlord and tenant.

Recommendations:

That the proposed landlord and tenant act, as finally prepared, be enacted.

(See Separate Report: Proposed Landlord and Tenant Act of 1951, September, 1950)

5. Mental Health Laws

(House Concurrent Resolution No. 74, April 26, 1949; agreed to April 27, 1949.)

Legislative Mandate:

To study and revise laws relating to mental health.

Investigation:

Compiled and studied the law relating to mental health contained in the statutes and court decision; held a public hearing on April 19, 1950, to afford organizations and individuals an opportunity to be heard; prepared a proposed draft of a mental health act; and reviewed and considered suggestions and recommendations submitted.

Strategic Facts:

(a) The law relating to mental health is chiefly stated in the Mental Health Act of 1923 (P. L. 998). While adequate, this act has many times been amended and does not embody many provisions of earlier statutes dating back over a hundred years.

(b) There is need for codification of the mental health laws to eliminate obsolete matter and terminology, re-

move duplications, clarify ambiguities, present the subject matter in logical order and bring all of the statutory provisions into one consistent statute.

Recommendation:

That the proposed mental health act, as finally prepared, be enacted.

(See separate report: Proposed Mental Health Act of 1951, August, 1950.)

Part II

STUDIES DIRECTED BY SENATE RESOLUTIONS

Eight of the thirty-one studies and investigations of the Commission were directed by Senate Resolutions. Four of these directives concern factual studies and analyses and the remaining four deal with codification and revisions.

A. Factual Studies and Analyses

1. Historical Sites

(Senate Resolution No. 49, adopted April 27, 1949.)

Legislative Mandate:

To make a study of appropriate legislation to assure the safety and preservation of the historical buildings, sites and remains, as listed in the Catalog of Historical Buildings, Sites and Remains reported by the Commission to the General Assembly, and to report the result of this study with definite recommendations for legislation at the next regular session of the General Assembly; and to continue the survey and revise the Catalog of Historical Buildings, Sites and Remains.

Investigation:

Review the Catalog of Historical Buildings, Sites and Remains in Pennsylvania above referred to. Examined legislative proposals relating to preservation of property of historical significance. Conferred with Judge Edwin O. Lewis, chairman of the Committee of Advisors to the Joint State Government Commission Historical Subcommittee (biennium 1947-1949), and with the Attorney General and the Legislative Reference Bureau concerning appropriate legislation. Conferred with Pennsylvania Historical and Museum Commission relative to the continued compilation of historical buildings, sites and archaeological remains.

Strategic Facts:

(a) At present legislation is not adequate to protect historical sites and structures in the Commonwealth.

(b) The Joint State Government Commission recommended to the 1949 Session of the General Assembly that legislation be passed to prohibit the destruction or sale, without approval, of any of the buildings or sites designated in the Catalog of Historical Buildings, Sites and Remains in Pennsylvania as being of prime historical importance.

Recommendations:

That legislation be enacted to safeguard property in the Commonwealth which has historic importance and significance and that such legislation:

(1) Define sites, buildings and structures in the Commonwealth which are of significant historic importance, and the preservation of which is of prime concern to the Commonwealth.

(2) List the specific properties marked by stars in the Catalog of Historical Buildings, Sites and Remains in Pennsylvania, submitted by Joint State Government Commission to the General Assembly, March, 1949, as being of such significance.

(3) Declare all such property to be affected with the public interest because of its patriotic, inspirational and educational value.

(4) Prohibit the destruction, defacing or alteration of such property except with the approval of the Pennsylvania Historical and Museum Commission; provide a penalty for failure to comply and provide a right of appeal to the courts from the action of the commission.

(5) Provide for injunction proceedings to restrain the destruction, defacing or alteration of such property.

(6) Provide for damages to the owner of private property suffered by reasons of any such restraint upon the use of the property.

(7) Provide procedure by which the owner of property may apply to the Pennsylvania Historical and Museum Commission for a determination as to whether or not specific property comes within the purview of the act.

(8) Provide the right of eminent domain to permit the Commonwealth to acquire property within the scope of the definition.

2. Medical Care and General Welfare

(Senate Resolution No. 35, adopted April 11, 1949.)

Legislative Mandate:

That the Joint State Government Commission be empowered to employ all its resources, plus whatever scientific, expert or administrative advice and testimony it can arrange to receive to fully determine the solution of the problem of medical care and general welfare.

Much of the information was compiled in collaboration with the United States Public Health Service, during the biennium 1947-1949. See Findings and Recommendations of the Committee on Post-High School Education, November, 1948.

3. Smoke Control

(Senate Resolution No. 43, adopted April 22, 1949.)

Legislative Mandate:

Through a subcommittee, to make a thorough and exhaustive study of the smoke and soot nuisance problem existing in the Commonwealth and of various smoke and soot control methods and devices and their relative costs; and prepare model smoke control plans suitable for use by the various political subdivisions of the Commonwealth.

Investigation:

Investigated the causes of smoke and soot and the methods and devices for preventing the nuisance. Studied enforcement methods and legislative and ordinance restrictions of Pennsylvania and other comparable industrial areas. Consulted with smoke control units in other states and in Pennsylvania and with the Bureau of Industrial Hygiene, and held a public hearing on February 20, 1950.

Strategic Facts:

(a) Smoke is defined as the products of combustion diffused in air. The products of combustion are both visible and invisible. The visible components are soot

(carbon particles and tarry materials) and fly ash (non-combustible particles). The invisible products are compounds of sulphur and oxygen, carbon and oxygen, carbon and hydrogen, and sulphur and hydrogen. The most objectionable invisible combustion products are the compounds of sulphur and oxygen, since they combine with moisture to produce acids which act destructively on metal, paint, stone, and animal and vegetable fibers.

(b) Because of the important part that coal has played in Pennsylvania's industrial development, smoke has come to be regarded by many as a symbol of prosperity. It should be regarded as a symbol of waste, since it is the result of incomplete burning of fuel. As the Mellon Institute of Industrial Research, in a published report, observed: "... combustion with heavy smoke always indicates loss."

(c) Damage to real property, damage to personal property and increased operating expenses occasioned by the need for additional illumination are costs imposed upon the citizens of a community by the visible and invisible products of combustion. The estimated measurable costs of smoke to each individual sometimes approximate \$30 a year.

(d) In Pennsylvania, enabling legislation permits second class counties, cities, boroughs and first class townships to abate smoke. However, due to air currents, localized control of smoke is generally ineffective.

(e) The effectiveness of a smoke control program depends upon:

- (1) The establishment of one smoke abatement unit for all communities within a given smoke-affected area.
- (2) The statutory ability of the communities to join together for the purpose of establishing a control unit.
- (3) The establishment of standards to fit the needs of the communities concerned.
- (4) The maintenance of a balance between direct costs to the citizens of the area, the equipment costs of producers and the savings accruing to the community at large.
- (5) The availability of information from other communities.

Recommendations:

- (1) That the area for the control of smoke shall not be smaller than one county.
 - (2) That counties be permitted and encouraged to co-operate in the establishment and operation of a joint unit for smoke control, and establish standards of emission at least equivalent to those prescribed by the American Society of Mechanical Engineers.
 - (3) That in local control units, there be established a three-member board with hearing and advisory powers.
 - (4) That the Commonwealth provide financial assistance to the counties which maintain Commonwealth approved control units, for the purpose of payment of salaries of technical personnel; and that the appointment of such personnel be subject to the approval of the Secretary of Health of the Commonwealth.
 - (5) That a State Office of Smoke Control for the establishment of standards and the clearing of information be established in the Department of Health.
- (See Separate Report: Smoke Control.)

4. Warehouse Facilities

(Senate Resolution No. 67, adopted April 28, 1949.)

Legislative Mandate:

To (1) make a survey of available warehouse facilities suitable for use by the Pennsylvania Liquor Control Board and the rental terms thereof; (2) make an investigation of the reasonableness of the rentals previously and currently being charged; (3) determine whether the present warehouse facilities are properly located for efficient and economical distribution and (4) determine the feasibility of having the Pennsylvania Liquor Control Board either purchase or construct and operate its own warehouses and the savings which might result therefrom to the Commonwealth.

Investigation:

Investigated present warehouse facilities, present charges and alternative arrangements as above directed.

Strategic Facts:

(a) The Pennsylvania Liquor Control Board does not own or operate warehousing facilities, but contracts with commercial warehousing firms for storage space and labor. Charges for space are based upon a per-case storage fee, while labor charges are based upon a per-case handling rate.

(b) The locations of warehouses, liquor storage fees and handling charges for the calendar year 1949 are shown below:

Location of Warehouses	Storage Fees	Handling Charges
Philadelphia	\$311,253	\$238,409
Pittsburgh	228,339	169,672
Scranton	107,614	59,721
Erie	45,494	23,239
Harrisburg	17,314	6,251
Totals	\$710,014	\$497,292
Grand Total—Storage and Handling—\$1,207,306.		

(c) In order to compare the present arrangement with possible alternative arrangements, such as the renting by the Commonwealth of storage space with the handling provided by Commonwealth employes, it is necessary to convert per-case storage fees into equivalent square-foot rentals and to compare wage rates in conjunction with efficiency of labor.

No reliable measures of labor efficiency exist. However, as regards hourly rates for labor in 1949, the weighted average for such labor at the five warehousing locations utilized by the Commonwealth was \$1.27 per hour. This compares with hourly rates ranging from \$.85 to \$.95 for Commonwealth Service 42, Grade 11—Manual Labor.

As regards storage fees in 1949, the case-basis storage cost can be converted into a square-foot storage cost by dividing the space required (square feet) for the greatest number of cases in storage at any one location at any one time during the year into the total storage cost at that location for that year. If this calculation is performed for all five locations, it appears that, on a square-foot basis, annual liquor storage costs to the Commonwealth range from \$.88 to \$1.24 per square foot. The average for all locations is \$1.00. In this connection, it may be observed that the rental paid for liquor store premises in the cities in which liquor is also stored ranges from \$.66 to \$.96 per

square foot; the average rental per square foot for liquor stores in these cities amounted to \$.86.

B. CODIFICATION AND REVISIONS

1. Administrative Agencies

(Senate Resolution No. 54, adopted April 28, 1949.)

Legislative Mandate:

To investigate, study and consider the manner in which administrative agencies have used and are using the legislative and rule-making power delegated to them by the legislature for the purpose of carrying out the laws of this Commonwealth with particular emphasis on the abuse of such power and whether affected parties in interest are being deprived of their rights.

Investigation:

Redrafted House Bill No. 879, Printer's No. 821 (1949) to meet the objections contained in the Governor's Veto Message No. 50.

Recommendation:

That the bill as redrafted be enacted.

2. Amphibian and Aquatic Life

(Senate Resolution No. 48, adopted April 27, 1949.)

Legislative Mandate:

To review, investigate, study and consider all of the laws relating to fish, frogs, terrapin, animals of aquatic habits, amphibian and other aquatic life in the waters of this Commonwealth, the laws providing for control of the same, the laws regulating the acquisition and improvement of lands and waters for the protection of animals of aquatic habits, to restate and codify all such laws.

See Fishways, page 6.

3. Criminal Procedure

(Senate Resolution No. 66, adopted April 28, 1949.)

Legislative Mandate:

To continue the survey, investigation and consideration of all the laws of the Commonwealth relating to criminal procedure and to completely revise and restate such laws into codified form.

Recommendation:

That revision and codification of the laws of criminal procedure be deferred pending consideration by the General Assembly of the proposed crimes act of 1951, in order that procedural provisions may be made to conform to the substantive law.

4. Liquor Laws

(Senate Resolution No. 41, adopted April 20, 1949.)

Legislative Mandate:

To review, investigate, study and consider all of the laws relating to liquor and to report findings and conclusions to the next regular session of the General Assembly with proposed legislation embodying a codification of such laws of the Commonwealth; to appoint a subcommittee to conduct such review, investigation, study and consideration of the laws relating to liquor, and to prepare a codification thereof.

Investigation:

Reviewed the liquor laws of the Commonwealth and legislative proposals heretofore submitted to the General Assembly; prepared a proposed codification of the law, together with a reference table relating the sections thereof to corresponding provisions of existing law. Held a public hearing on May 25, 1950, to afford all interested parties an opportunity to be heard.

Strategic Facts:

(a) The liquor laws of the Commonwealth are contained in numerous separate acts which have been amended frequently. The last proposal for a code was submitted to the General Assembly in 1947 as House Bill No. 1170, and thereafter in 1947 and in 1949 amendments were made to existing law.

(b) The parties appearing at the public hearing presented suggestions and recommendations which are on file in the office of the Commission for the use of the General Assembly upon request.

Recommendation:

That there be enacted a codification of the liquor laws of the Commonwealth in the form contained in the original House Bill No. 1170 (1947) with the incorporation therein of 1947 and 1949 amendments and such changes as are required to conform the draft to existing law in a number of particulars and to achieve uniformity.

PART III

STUDIES INITIATED BY THE JOINT STATE GOVERNMENT COMMISSION

Pursuant to the authority vested in the Commission by the Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084, the Commission undertook inquiries into five additional subjects which it deemed "useful to the General Assembly." Three of these concern factual studies and analyses, and the remaining two deal with codifications and revisions.

A. FACTUAL STUDIES AND ANALYSES

1. Reapportionment

Investigation:

(a) Compiled constitutional and statutory provisions relating to congressional, legislative and senatorial reapportionment.

(b) On the basis of final population figures for 1920, 1930 and 1940, calculated:

(1) Representative entitlements by district and by county.

(2) Senatorial entitlements of counties and population of senatorial districts.

(c) Obtained partial preliminary official population figures for 1950, and on the basis of these preliminary figures, calculated:

(1) Preliminary representative entitlements for all counties and for the districts for which preliminary population data are available.

(2) Preliminary senatorial entitlements of counties and population of the senatorial districts for which preliminary population data are available.

As regards the completion of (c), (1) and (2), above, it should be noted that the U. S. Bureau of the Census

advised the Commission that preliminary population data necessary to complete representative and senatorial entitlement estimates were not available as of January 1, 1951.

As regards congressional reapportionment, it may be noted that the preliminary population figures for Allegheny County boroughs and townships were not available as of January 1, 1951.

In connection with all the calculations based upon 1950 data and indicated above as partially completed, it should be noted that they are preliminary only, by virtue of the fact that the final population figures are not yet available. The Commission has been advised that the final population figures for the civil subdivisions will not become available until May or June of 1951.

2. Sex Offenders

Investigation:

Gathered relevant data on sex crimes and on the laws and statutes affecting this type of offender in Pennsylvania and other states.

Strategic Facts:

(a) A survey discloses more than a dozen states which have recently experimented with new legislation aimed at the sex offender. In 1950, the State of New Jersey published a comprehensive study, "The Habitual Sex Offender." Also, in 1950, the State of New York published its "Report on Study of 102 Sex Offenders in Sing Sing Prison."

(b) Generally, (1) statutes which authorize commitment of persons not charged with, or convicted of, crime are ineffectual; (2) the New Jersey and New York recommendations contemplate confinement only after conviction for a criminal offense.

(c) In Pennsylvania, the conviction rate for all sex crimes combined, per 100,000 population, has decreased from 20.2 in 1939 to 17.0 in 1949; the conviction rate for rate, both common law and statutory, has decreased from 3.7 in 1939 to 1.8 in 1949.

(d) Five Pennsylvania statutes deal specifically with the problem of sex offenders and potential sex offenders: the School Code, the Mental Health Act, the Penal Code, the Greenstein Act and the Classification Act.

Recommendation:

That the Pennsylvania Correctional, Diagnostic and Classification Center authorized by the General Assembly in 1945 (1945, May 15, P. L. 570) be established and institutional facilities reorganized for the purpose of segregating sex offenders.

(See separate report: Sex Offenders)

3. Teacher Supply and Demand

Investigation:

Estimated the supply and demand of elementary and secondary public school teachers for the state as a whole and for the several classes and types of school districts in Pennsylvania.

Strategic Facts:

(a) The supply and demand situation of teachers in Pennsylvania in 1948-49 was as follows:

(1) Elementary Teachers—

Demand:

Number needed to replace teachers withdrawing and retiring	2,400
Number needed to replace teachers holding emergency certificates, reduce overcrowding and allow for increased enrollment	2,150
Total	4,550

Supply:

Teachers completing educational curricula—

a. In state teachers colleges	657
b. In liberal arts colleges	485
Total	1,142

In other words, the estimated demand for elementary teachers exceeded the estimated supply by 3,408.

(2) Secondary Teachers—

Demand:

Number needed to replace teachers withdrawing and retiring	1,890
Number needed to replace teachers holding emergency certificates, reduce overcrowding and allow for increased enrollment	1,350
Total	3,240

Supply:

Teachers completing educational curricula—

a. In state teachers colleges	1,913
b. In liberal arts colleges	2,379
Total	4,292

Contrary to the situation in the elementary field, the estimated supply of secondary teachers exceeded the estimated demand for such employes by 1,052.

(b) The relationship between teacher supply and teacher demand exhibited marked variations from district to district. The following table shows these variations with regard to teaching positions in the elementary schools as of July 20, 1949:

Class of Districts	Number of Vacancies	Applicants
First	424	260
Second	72	118
Third (under district supt.)	222	332
Third and fourth (under county supt.)	868	198

Examination of the above table indicates that the supply and demand situation in third and fourth class districts under county superintendents seems to be different from that in second and third class districts under the supervision of district superintendents. Although it is impossible to determine or estimate the number of duplicate applications, the evidence strongly suggests that the shortage problem is primarily a problem of third and fourth class districts under county superintendents.

(c) The inference drawn under (b), above, gains support from a comparison of the number of registrants who use the placement service of the Department of Public

Instruction with the number of requests made to the department for teachers. In 1945-46, the department's placement service had 385 registrants, but only 205 requests for teachers; in 1948-49, 505 registrants and 83 requests for teachers; and in 1949-50, 608 registrants and 52 requests. For the three years under review, the number of placements were 18, 24 and 16, respectively.

(d) The evidence, taken in toto, suggests that an increase in the production of elementary teachers would not necessarily solve the shortage problem in third and fourth class districts under county superintendents because:

(1) Many persons in teacher training seem reluctant to accept employment in these districts.

(2) Many school boards in these districts hesitate to engage applicants whose backgrounds differ from those of the members of the community.

Hence, a mere increase in the supply of elementary teachers, unless these teachers are of the specific types sought by local school boards and are willing to accept employment conditions in the third and fourth class districts cannot be expected to solve the shortage problem.

(e) It has been suggested from time to time that the total supply of teachers be increased by strengthening the agreement into which the Commonwealth and enrollees at state teachers colleges enter. Aside from the fact that a mere increase in supply could not be expected to solve the problem, as pointed out under (d), above, it should be noted that contrary to prevalent belief education at state teachers colleges is not entirely free. Although the Act of March 10, 1949, P. L. 29, provided "The tuition of all students at the State Teachers' Colleges, who are residents of Pennsylvania . . . and who sign an agreement to teach in the public schools of this Commonwealth for not less than two years, and who are pursuing therein regular courses for the preparation of teachers, shall be paid by the Commonwealth," the teachers colleges charge so-called "contingent fees," which are the equivalent of tuitions. All teachers colleges charge both so-called "activities" and "contingent" fees. The activities fees range from \$20 to \$30 per pupil per academic year, and the contingent fees range from \$90 to \$180 per pupil per academic year, which is but another way of saying that the total charge ranges from \$110 to \$210. At The Pennsylvania State College, where students are not required to enter into any agreement regarding their future activities, total fees amount to \$220 annually.

Under the circumstances, it appears that mere strengthening of the agreement into which teachers college enrollees enter may not increase the available supply but may simply divert students to other institutions.

B. CODIFICATIONS AND REVISIONS

1. Penal Laws

Investigation:

Reviewed Senate Bill No. 243, Printer's No. 679 (1949), the Governor's Veto Message No. 53 (1949) and 1949 amendments to The Penal Code of 1939 (June 24, P. L. 872).

Strategic Facts:

The Joint State Government Commission submitted to the 1949 Session of the General Assembly a proposed

crimes act, consolidating, amending and revising the penal laws of the Commonwealth. This measure passed the General Assembly as Senate Bill No. 243, Printer's No. 679 (1949), but was vetoed by the Governor.

Recommendations:

(1) That, in order to meet the objections contained in the Governor's veto, Sections 614 and 615 of the Penal Code, as amended by the Act of 1949, March 4, P. L. 19 (Taylor Amendment), be incorporated in the proposed draft.

(2) That the 1949 amendments to the Penal Code (1939, June 24, P. L. 872) be incorporated in the proposed draft.

(3) That Section 301 of the proposed draft, "Procuring Unlawful Arrest or Prosecution," provide for the maximum penalty as specified in Senate Bill No. 243, Printer's No. 243, (1949).

2. Uniform Commercial Code

Investigation:

Reviewed the proposed final draft of the "Uniform Commercial Code" with text and comments, submitted by the Council of the American Law Institute for discussion and approval at the Twenty-seventh Annual Meeting of the American Law Institute in joint session with the National Conference of Commissioners on Uniform State Laws, May 18, 19 and 20, 1950. Consulted with William A. Schnader, former Attorney General of the Commonwealth, chairman of the Commercial Code Committee of the National Conference of Commissioners on Uniform State Laws and one of the draftsmen of the proposed law, concerning the feasibility of incorporating the proposals into Pennsylvania law.

Strategic Facts:

(a) The proposed final draft of the Uniform Commercial Code is a comprehensive codification of the commercial law, including the Uniform Negotiable Instruments Law, the Uniform Warehouse Receipts Act, the Uniform Stock Transfer Act, the Uniform Sales Act, the Uniform Bills of Lading Act, the Uniform Trust Receipts Act and other commercial acts.

(b) The drafting of the proposed code has been the joint enterprise of the American Law Institute and the National Conference of Commissioners on Uniform State Laws.

(c) At the joint session of the American Law Institute and National Conference of Commissioners on Uniform State Laws, held in Washington, D. C., May 18-20, 1950, final approval of the "Proposed Final Draft" was deferred until May, 1951.

(d) Mr. Schnader urged the continued study of the proposed law in order that the General Assembly might be fully informed concerning a possible draft to be submitted in 1953.

Recommendation:

That the study of the proposed Uniform Commercial Code be continued in order that the Commission may make recommendations concerning it to the 1953 Session of the General Assembly.

PART IV

JOINT STATE GOVERNMENT COMMISSION OF THE GENERAL ASSEMBLY

(Created in 1937, P. L. 2460, as last amended 1943, P. L. 13)

Baker Royer, Chairman
John M. Walker, Vice-Chairman
W. Stuart Helm, Secretary-Treasurer

ON THE PART OF THE SENATE

Joseph M. Barr (Allegheny County)
Leroy E. Chapman (Warren County)
John H. Dent (Westmoreland County)
†G. Graybill Diehm (Lancaster County)
Anthony J. DiSilvestro (Philadelphia County)
James A. Geltz (Allegheny County)
*Frederick L. Homsher (Lancaster County)
A. Evans Kephart (Philadelphia County)
John G. Snowden (Lycoming County)
O. J. Tallman (Lehigh County)
M. Harvey Taylor (Dauphin County)
Paul L. Wagner (Schuylkill County)
John M. Walker (Allegheny County)
T. N. Wood (Luzerne County)

ON THE PART OF THE HOUSE

Hiram G. Andrews (Cambria County)
Adam T. Bower (Northumberland County)
§Homer S. Brown (Allegheny County)
Charles H. Brunner, Jr. (Montgomery County)
Edwin C. Ewing (Allegheny County)

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

The survey of the sex crime problem was initiated by the Joint State Government Commission under the authority granted by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084, Section 2.

To facilitate the survey, the Commission, in accordance with Act of 1943, March 8, P. L. 13, Section 1, created a subcommittee on sex offenders. The cooperation of the members of the subcommittee is gratefully acknowledged by the Commission.

Herewith is reported a review of the experience of other states which have experimented with new legislation in this field; a summary of the sex offender studies published in 1950 by the states of New Jersey and New York; and relevant Pennsylvania facts.

BAKER ROYER, Chairman.

LIST OF TABLES

Table 1. Conviction Rates Per 100,000 Population for All Crimes Collectively, Sex Crimes, and Rape in Pennsylvania, 1939-49

Table II. Convictions for Sex Crimes Collectively and for Rape as a Percentage of All Criminal Convictions in Pennsylvania, 1939-49

Table III. Conviction Rates Per 100,000 Population for All Crimes Collectively, Sex Crimes, and Rape in Pennsylvania by Region, 1949

Table IV. Recidivism in Relation to Indictable Crimes

SUMMARY OF FINDINGS

I. A survey discloses more than a dozen states which have recently experimented with new legislation aimed at the sex offender. In 1950, the state of New Jersey published a comprehensive study, "The Habitual Sex Offender." Also, in 1950, the state of New York published its "Report on Study of 102 Sex Offenders in Sing Sing Prison."

II. Generally, (a) statutes which authorize commitment of persons not charged with, or convicted of, crime are ineffectual; (b) the New Jersey and New York recommendations contemplate confinement only after conviction for a criminal offense.

III. In Pennsylvania, the conviction rate for all sex crimes combined, per 100,000 population, has decreased from 20.2 in 1939 to 17.0 in 1949; the conviction rate for rape, both common law and statutory, has decreased from 3.7 in 1939 to 1.8 in 1949.

IV. Five Pennsylvania statutes deal specifically with the problem of sex offenders and potential sex offenders. These statutes are:

A. The School Code (1949, March 10, P. L. 30, as amended), which provides for sex instruction in the public schools, examination and the establishment of special classes for exceptional children;

B. The Mental Health Act (1923, July 11, P. L. 998, as amended), which provides for confinement and treatment of the mentally ill, including sex offenders;

C. The Penal Code (1939, June 24, P. L. 872, as amended), which provides for the punishment of those found guilty of specified sex crimes;

D. The Greenstein Act (1933, May 2, P. L. 224, as amended), which permits judges to defer sentence of any person until such person has been examined by psychiatrists and permits commitment of a person not insane but mentally ill to State or county institutions established for the purpose;

E. The Classification Act (1945, May 15, P. L. 570), which permits the Department of Welfare, with the approval of the Governor, to set up a Correctional Diagnostic and Classification Center. Although authorized by the General Assembly in 1945, the classification center has not yet been established. If and when such classification center is established, Pennsylvania institutions will be adequate to deal with the problem of the sex offender.

RECOMMENDATION

The Joint State Government Commission recommends the immediate establishment of the Pennsylvania Correctional, Diagnostic and Classification Center authorized by the General Assembly in 1945 (1945, May 15, P. L. 570), and reorganization of institutional facilities for the purpose of segregating sex offenders.

Section I

INTRODUCTION

In the past decade, public opinion, aroused by crimes which allegedly had sex motives, has insisted upon the review of existing law covering such crimes.

Historically, sex offenders were dealt with under the penal laws which provided punishment and made no attempt at rehabilitation or treatment of convicted offenders. More recently, statutes providing for clinical treatment of convicted sex offenders have been passed. In some states, legislation, which permits a sex offender's commitment to an institution without charge or conviction, has been adopted.

Legislation dealing with sex offenders is, then, of the following three major types:

(1) Statutes which provide for punishment, without treatment, of convicted sex offenders;

(2) Laws which provide for clinical treatment and rehabilitation of persons convicted of certain crimes, including sex offenses;

(3) Legislation which permits institutionalization of persons with abnormal sexual tendencies, whether or not they have been charged with or convicted of a crime.

The first type of legislation makes certain sex offenses crimes and provides for the payment of a fine by and/or imprisonment of one convicted of the crime. An example of this type of legislation is Pennsylvania's Penal Code (1939, June 24, P. L. 872, as amended).

A New York law which became effective April 1, 1950, illustrates the second category of legislation. It provides for clinics to which would be sent for study and treatment all criminals who had been given an "indeterminate sentence," which may run from a minimum of one day to a maximum of life confinement. The laws concerning certain crimes, including certain sex offenses, were amended to give the judge the discretion of sentencing the convicted person as heretofore or to an indeterminate sentence. Any person convicted of one of the enumerated crimes is to be sentenced only after a psychiatric examination, the results of which are to aid the judge in passing sentence.

Pennsylvania's Greenstein or Psychiatrists' Act (1933, May 2, P. L. 224, as amended) and the Classification Act (1945, May 15, P. L. 570) are also examples of this type of legislation.

Four states (Massachusetts, Minnesota, New Hampshire, Wisconsin) and the District of Columbia have sex offender legislation of the third type, which permits institutionalizing a person who fits into the definition of "sexual psychopath," whether or not he has been charged with a crime. According to the Wisconsin definition a "sexual psychopath" is a person who is

"Irresponsible for sexual conduct and thereby dangerous to himself and others because of:

1. Emotional instability; or
2. Impulsiveness of behavior; or
3. Lack of customary standards of good judgment; or
4. Failure to appreciate consequences of acts; or
5. Combination of the above."¹

Proceedings against the person, under these statutes, are

¹ From chart facing page 68, New Jersey Commission, *The Habitual Sex Offender*, 1950.

instituted by the District Attorney, or comparable official, who, acting on information received by him, at his discretion files a petition with the county court. The petition must be executed and verified by an individual with personal knowledge of the facts. The court then holds an inquiry, at which the accused may offer evidence in his own behalf, orders the accused to be examined by two physicians, and, if justified by the findings, orders commitment to a mental hospital.

In this connection, it may be noted that, although Pennsylvania's Mental Health Act² contains comparable provisions relating to the confinement of the insane, both definition and diagnosis of insanity are on a more secure foundation than the definitions and diagnoses of the so-called "sexual psychopath." At the present state of knowledge "sexual psychopathy" is but a vague concept. In addition, it should be observed that precedent established in connection with the confinement of the insane has developed in a climate of opinion that placed a high value upon the civil liberties of the individual.

Section II

PENNSYLVANIA: STATUTORY PROVISIONS AND CRIME RATES

In Pennsylvania, the legislative attitude toward offenders, including sex offenders, has changed over the years. Increasingly the emphasis has shifted from simple confinement of a convicted offender to confinement supplemented by treatment. However, unlike some few other states—Massachusetts, Minnesota, New Hampshire, Wisconsin—whose experiences to date are not encouraging, Pennsylvania statutes, except in the case of the insane, do not provide for the confinement and treatment of a person on the mere suspicion that he may at some time in the future commit an indictable offense.

Pennsylvania statutes which deal with sex offenders are:

1. The Penal Code (1939, June 24, P. L. 872, as amended)—revision of the Penal Code is currently being prepared by the Joint State Government Commission; this revision, The Crimes Act, will be submitted to the General Assembly in 1951.
2. The Greenstein or Psychiatrists' Act (1933, May 2, P. L. 224, as amended).
3. The Mental Health Act (1923, July 11, P. L. 998, as amended)—the mental health laws are currently being codified by the Joint State Government Commission for submission to the General Assembly of 1951.
4. The Classification Act (1945, May 15, P. L. 570).
5. The School Code (1949, March 10, P. L. 30, as amended).

A. Statutory Provisions Relating to Sex Crimes or Sex Criminals

The Penal Code of Pennsylvania defines sex offenses and provides for terms and fines for sex offenders which range from six months for the offense of advertising an indecent show to life imprisonment or death for rape which results in murder, and fines of from \$300 to \$10,000.

The proposed Crimes Act, to be submitted to the General Assembly of 1951, increases penalties for sex crimes

in a uniform manner. Under this act, fines are increased, to a maximum of \$20,000, and prison terms, aside from those for offenses which carry a life imprisonment or death penalty, range to a maximum of twenty years; in all cases, either a fine or prison term, or both, may be imposed. In addition, the proposed Crimes Act of 1951 provides penalties for offenses not included in the present Penal Code. For example, it recognizes as crimes indecent assault and contributing to the delinquency of a minor, and provides in either case a maximum penalty of \$3,000 or a prison term of three years, or both.

The Greenstein or Psychiatrists' Act gives the judge the power to defer the sentence of a person convicted of any offense until the report of a mental examination of the defendant has been secured. If the psychiatrists' report shows that the defendant "though not insane is so mentally ill or mentally defective as to make it advisable for the welfare of the defendant or the protection of the community that he or she be committed to some institution other than the county prison, workhouse or a penitentiary" the judge may commit the defendant to "a state or county institution . . . until further order of the court." An appeal from an order of commitment may be made in the same manner as if the defendant had been sentenced.

The Classification Act authorized the Department of Welfare, with the approval of the Governor, to establish a correctional, diagnostic and classification center to aid in determining the mental condition of persons sentenced by the courts of the state. Every person sentenced to a "state institution," except those condemned to death and those committed as defective delinquents, would be sent to the center. Every person sent to the classification center would be diagnosed, classified and transferred to the appropriate institution either for service of sentence or for custody as a defective delinquent, which is defined as a person "mentally defective who has criminal tendencies, which may or may not be coupled with mental instability." To date such a center has not yet been established. The Secretary of Welfare, under date of April 25, 1950, has advised the Joint State Government Commission that "It is the hope of this Department that before long we may be able to activate the program in our penal division along the lines laid out by the last [sic] legislature, i.e., the establishment of a receiving and classification center to which all adult prisoners would be sent."

The Mental Health Act³ provides for commitment to a mental institution of a person acquitted of crime because of insanity, a person charged with a crime who, upon appearance before the court, appears to be "in such condition as to make it necessary that he be observed or cared for in a hospital for mental diseases," and of any person detained in any penal or correctional institution for any reason who, in the opinion of a responsible person, is in such a condition as to make it necessary that he be cared for in a mental hospital. The Act provides further that "any person who is mentally ill may be placed and detained in a hospital for mental diseases by order of the court of common pleas or other court of record of the county in which the said person resides, or of any law judge of said courts, upon a sworn or affirmed application by any responsible person addressed to said courts

² A proposed codification of the Mental Health Laws will be submitted by the Joint State Government Commission to the General Assembly of 1951.

³ 1923, July 11, P. L. 998, amended 1937, May 28, P. L. 973 and 1938, Spec. Ses., October 11, P. L. 63.

or judge, which application shall be accompanied by a sworn or affirmed certificate of two qualified physicians."

The Pennsylvania School Code⁴ provides for the teaching of health and physical education and of physiology and hygiene in the public schools of the Commonwealth. The Code further provides for examination of children of compulsory school age of apparent exceptional mental or physical condition by mental clinics, psychiatrists, psychologists or psychological examiners and other experts which the child's condition may necessitate and provides for the education of such children in special classes or special institutions. Reimbursements are provided for school districts which provide such special education as long as it is approved by the State Council of Education. Under the School Code, the appointment of supervisors of special education is provided. It is the duty of these supervisors to examine and investigate the abilities, disabilities and needs of the exceptional children in the schools and to make recommendations concerning the instruction of such children and to supervise their instruction.

At present, sex education is offered in many school districts in the form of lectures and films. To date some twenty mental clinics have been approved by the State Council of Education.

In addition, the Administrative Code, in Section 1307(f) places upon the State Council of Education the power and duty of taking such action as it may deem necessary and expedient to promote the physical and moral welfare of the children in the public schools.

It may be noted that Pennsylvania statutes, except the School Code and the Mental Health Act, which have a bearing upon the problem under review, provide for confinement and/or treatment of sex deviates only if and when such deviates have been charged with or found guilty of a crime. None of the statutes contemplate the confinement and/or compulsory treatment of sex deviates on the theory that they, at some future date, may commit a sex crime or a sex-motivated crime.

It requires no labored demonstration to show that any statute which restricts a citizen because he does not conform constitutes an impingement of his civil liberties and an abrogation of constitutional guarantees.

However, all basic political precepts aside, the evidence strongly indicates that any statute which contemplates the observation, confinement and treatment of sex deviates on the theory that they are predisposed to commit sex crimes or sex-motivated crimes cannot be administered. Some states—Massachusetts, Minnesota, New Hampshire, Wisconsin—have made the attempt and failed. The experience of others aside, the dimensions of the administrative problem that would have to be faced should the Commonwealth contemplate systematic identification, confinement or compulsory treatment of a person who may at some future date commit a sex crime or sex-motivated crime can be approximated on the basis of the following data.

According to the Kinsey estimate (see page 15), at least two-thirds of all American males engage in "perverse" sexual behavior at some time between adolescence and old age. Of Pennsylvania's total population of 9,900,180 in 1940, there were 3,413,655 males from 15 to 64 years of age. According to Kinsey's estimate, therefore,

there were at least 2,275,760 male sexual deviates in Pennsylvania in 1940. As of August, 1949, there were 202 psychiatrists in this state who were members of the American Board of Psychiatry and Neurology.

B. Arrest and Conviction Rates

TABLE I

Conviction Rates Per 100,000 Population¹ for All Crimes Collectively, Sex Crimes, and Rape² in Pennsylvania, 1939-1949

Year	All Crimes	All Sex Crimes	Rape ³
1939	276	20.2	3.7
1940	270	20.3	3.2
1941	242	19.1	3.0
1942	219	18.8	3.0
1943	159	15.7	2.3
1944	155	13.0	2.1
1945	176	14.1	2.0
1946	202	16.8	2.2
1947	215	17.1	2.2
1948	213	17.1	2.3
1949 ³	220	17.0	1.8

¹ U. S. Census, 1940.

² Includes both common law and statutory rape.

³ Eight counties not reporting: rates based on population of remainder of state as estimated August 1, 1948, State Planning Board of Pennsylvania, Department of Commerce.

Source: Department of Welfare: Annual Statistics Reports.

The Pennsylvania conviction rates presented in Table I show:

1. Conviction rates for "All Crimes" "All Sex Crimes" and "Rape" were lower in 1949 than in 1939.
2. Conviction rates for rape have decreased throughout the period 1939-1949; the rate for 1949 was about 51% of the rate for 1939.
3. Conviction rates for "all sex crimes" have increased about 22% since the termination of World War II in 1945, but the 1949 rate was still 17% below the 1939 rate.

In view of the fact that public attention has been increasingly focused upon sex crimes during recent years, it seems reasonable to infer that the decreases in conviction rates reflect decreases in offenses.

TABLE II

Convictions for Sex Crimes Collectively and for Rape as a Percentage of All Criminal Convictions in Pennsylvania, 1939-1949

Year	All Sex Crimes	Rape ¹
1939	7.3	1.4
1940	7.5	1.2
1941	7.9	1.2
1942	8.6	1.4
1943	9.8	1.4
1944	8.4	1.4
1945	8.0	1.2
1946	8.3	1.1
1947	7.9	1.0
1948	8.0	1.0
1949 ²	7.7	0.7

¹ Includes both common law and statutory rape.

² 8 counties not reporting.

Source: Department of Welfare: Annual Statistics Reports.

⁴ 1949, March 10, P. L. 30, as amended.

Table II shows that the proportion of all convictions consisting of sex crime convictions reached a peak in 1943 and has fluctuated about eight per cent since that year. The ratio of rape convictions to all convictions has been decreasing since 1944.

TABLE III

Conviction Rates Per 100,000 Population¹ for All Crimes Collectively, Sex Crimes, and Rape² in Pennsylvania, by Region, 1949

Region	All Crimes	All Sex Crimes	Rape ³
Allegheny County	151	22.2	2.0
Philadelphia County	218	17.6	1.0
Remainder of State ³	236	10.6	2.0
Whole State ³	220	17.0	1.8

¹ Population as estimated August 1, 1948, State Planning Board of Pennsylvania, Department of Commerce.

² Includes both forcible and statutory rape.

³ Eight counties not reporting; rates based on population of remaining counties.

Source: Department of Welfare, Division of Research and Statistics: Judicial Criminal Statistics from Courts of Quarter Sessions.

Table III gives conviction rates for various regions within the state during 1949. The rate of convictions for sex crimes was highest, both with respect to other regions and with respect to all convictions in the same region, in Allegheny County, and lowest in the less densely populated regions. The high sex crime conviction rate in Allegheny County may be due either to a relatively greater prevalence of sex crimes there or to a relatively greater emphasis on the enforcement of sex crime laws.

Section III

NEW YORK⁵ AND NEW JERSEY:⁶ SUMMARY OF COMMISSION REPORTS

A. Extent of Sex Crimes

The frequency of sex crimes, particularly violent sex-motivated crimes, is difficult to determine due to the non-reporting of some sex crimes and to the failure to make necessary distinctions when classifying the crimes.

The New Jersey report quotes Dr. Alfred C. Kinsey as follows:

"... The specific data show that two-thirds to three-quarters of the males in our American culture, and some lesser number of the females, engage in at least some 'perverse' sexual behavior at some time between adolescence and old age. One-half to two-thirds of the males engage in such behavior with appreciable frequency during some period of their lives and a fair number engage in such behavior throughout their lives."

This quotation, together with the alleged reluctance of officials to apply some of the newer legislation, indicates substantial nonreporting of sex crimes.

There has been a failure in most crime statistics to distinguish between aggressive and nonaggressive sex offenses. For example, in cases of rape a significant distinction would be between common law and statutory rape. Of 2,366 cases of rape in New York City during the period 1930 to 1939, 418 or less than 18 per cent were cases of common law rape.

⁵ Report on Study of 102 Sex Offenders at Sing Sing Prison, as submitted to Governor Thomas E. Dewey, March, 1950.

⁶ The New Jersey Commission on Sex Offenders, *The Habitual Sex Offender*, 1950.

B. Characteristics of Sex Offenders

In New York's study of 102 sex offenders convicted of serious offenses, it was found that these sex offenders were of normal intelligence but they all suffered some mental disorder though, in most cases, not sufficiently pronounced for the offenders to be adjudged mentally ill. They characteristically suffered from emotional disturbances stemming from childhood experiences. In many cases they were found to have actually or potentially dangerous attitudes of hostility or resentment against authority. Their behavior involved conflicting, vague or unconscious motives as evidenced by the inability of many to explain their crimes. Alcoholism was found to be a contributing factor in more than 50 per cent of the cases.

Because of the way the cases studied by the New York group were chosen, they cannot be considered as representative of sex offenders as a whole. However, for purposes of classification into groups which were treatable and those which were not, they were divided as follows:

1. Offenders who are predisposed to crimes of violence, are likely to commit new attacks if released, and are not treatable by present known methods 18
2. Offenders who, because of personality make-up, age or alcoholism are not suitable for treatment at present and who are likely after release to continue as a danger to public morals and to women and children 32
3. Offenders who, because of their treatability, could be placed in a treatment center with a good prospect of improvement before release 44
4. Offenders who, because of their treatability, could be released on parole, and treated on an out-patient basis 8

The New Jersey commission reports that, contrary to common belief, the sex offender is not characteristically over-sexed but usually under-sexed, passive and unaggressive. Psychiatrists find among sex offenders a wide variety of psychopathic types, including neurotics, psychotics, schizoids, feeble-minded epileptics, homo-sexuals, alcoholics and many who are normal.

Repeater rates of sex offenders in terms of whether or not the offender has a past record for any crime (sexual offense or otherwise) are given in the following table taken from the New Jersey report:

TABLE IV

Crime	Offenders With		Offenders Without		Per Cent
	Cases	Records	Per Cent	Records	
Abduction	63	34	54	29	46
Carnal Abuse	333	158	47	175	53
Incest	98	42	43	56	57
Rape—Forcible ..	418	215	52	203	48
Rape—Statutory .	1,948	666	34	1,282	66
Seduction	21	6	29	15	71
Sodomy	414	173	42	241	58
Total	3,295	1,294	39	2,001	61
Recidivism in Relation to Indictable Crimes					

Only 9 per cent of the total of 3,295 offenders included

in the above table had prior records of sex crimes. Comparable data is not given for other types of criminals.

C. Possibility of Curing Sex Offenders

The New Jersey report states that "as compared with other types of psychological and constitutional abnormality, per are peculiarly at a loss in the handling of abnormal sex offenders. Methods of effective treatment have not yet been worked out. The states that have passed special laws on the sex deviate do not attempt treatment!"

The New York report suggests a somewhat more optimistic viewpoint. "Psychiatry cannot promise to 'cure' a patient, any more than any other discipline in medicine. Sometimes it can accomplish remarkable results in removing a disorder of the personality. Often it can help a person to recognize and understand his inadequate personality and to aid him in developing constructive attitudes and modes of behavior to counteract it.

"Psychiatric treatment is as complex as human emotion itself, but it is important here in simplified form to explain what we mean by it. It is a process of emotional growth induced by a therapist, who practically assumes the role of a substitute parent or advisor, enters into a most intimate confidential relationship with the subject, seeking for patterns of conduct and unrealized motivations.

"When emotional conflicts are left unresolved in childhood and youth, they continually seek emotional expression, or an outlet, later on. Thus an emotionally conflicted person unconsciously goes through life creating situations where by he can act out his earlier unexpressed feelings. Then he lives not in terms of adult reactions to these situations, which have become the pattern of his life, but rather continually tries to find satisfaction for earlier frustrations through his immature, fixated, and unrealistic attitudes. . . .

"The aim of psychiatric treatment of offenders therefore is to assist them in: (1) freeing themselves from being mastered by emotions they cannot comprehend; (2) developing a social life that is satisfactory to both them and society; (3) enabling themselves to work efficiently but not compulsively; (4) overcoming their sexual immaturity so they can function on an adult level.

"Psychiatric treatment of men in prison is relatively new. It is in the early experimental stage. Any certainty as to results must await study and evaluation a considerable time after the release of treated men."

It will be recalled that 52 out of the 102 cases studied by the New York group were considered treatable at the time that study was made.

D. Administrative Experience under State Sex Offender Laws

Specific sex offender laws have in general been unsuccessful due to (1) the use of ill-defined terms in the legislation; (2) inadequate facilities for the diagnosis and treatment of sex offenders; and (3) inherent dangers to civil liberties in such legislation.

The New Jersey report points out that "after careful inquiry into the administrative experience that has developed under the new sex offender laws, it is apparent that they are inoperative or nearly so in most of the jurisdictions. The statute appears to be completely nullified in four states.⁷ It has been almost completely ineffective in at

least six more.⁸ California is apparently the only state that has used its statute fairly extensively throughout the ten years of its operation: they have usually found between thirty and forty cases a year to be sexual psychopaths."

"The recent sex statutes enacted in fourteen jurisdictions have been directed with the exception of New Jersey, at 'sex psychopaths' or 'psychopathic personalities.' New Jersey is alone in providing in its 1949 law that sexual deviates whose offenses result from a condition of 'abnormal mental illness' of any sort should receive special treatment. The statutory definitions by which the several jurisdictions have attempted to define the coverage of their psychopath laws have in fact made even more vague what was already quite unclear concerning the types of cases to be included. The general reluctance observed in applying these laws may well result in part from uncertainty as to the sorts of cases that should be covered. The descriptive clauses in the enactments leave much to be desired either from the point of view of medical diagnosis or court application.

"One of the apparent reasons for the failure of recent laws on the sex offender lies in the lack of any effective treatment program to handle these cases. The statutes have been formulated generally so as to secure the commitment of sex deviates to state mental hospitals for an indeterminate period of time, until 'cured.' However, since these cases do not belong in the psychotic classification ordinarily committable to psychiatric institutions and since, moreover, the traditional hospital offers neither treatment methods nor sufficient clinical staff to provide therapy, it is difficult to comprehend why this benign result should have been anticipated. A great majority of the sex deviates, even those who may be considered abnormal psychologically are not sick in the ordinary sense as applied to psychotic patients: psychiatric institutions are not presently suited in their space or methods to receive and treat the 'garden varieties' of psychopathic, neurotic, schizoid, and constitutional sex variant.

"An extremely significant shift has suddenly occurred in these states in the policy of the Criminal Law and the Mental Health Law. It appears improbable that the authorities are yet fully aware of the extent and meaning of the change . . . in five jurisdictions⁹ a person may be adjudicated a psychopath for an indeterminate commitment to a mental hospital without the facts of a crime being shown or a charge placed against the patient. The analogy to the handling of the insane under our traditional law is apparent. But these sex cases are supposed under the law not to be insane, psychoneurotic or feeble-minded. They are committed as cases diagnosed simply as psychopaths by such loose, non-meaningful criteria as emotional instability, impulsiveness, lack of good judgment, habitual sexual misconduct, lack of self-control, etc. These are types of cases that have not gone to mental hospitals in the past. They are cases that a majority of psychiatrists believe do not belong with insane patients. Thus individuals who are non-psychotic and non-defective, against whom no criminal charge has been made, may be confined for long periods or permanently in hospitals that lack both the space and the treatment facilities to handle them. By the simple but legalistic expedient of shifting jurisdiction to civil courts, these legislators have made it possible to com-

⁷ Illinois, Indiana, Vermont, New Hampshire, Washington, D. C., Minnesota.

⁸ District of Columbia, Massachusetts, Minnesota, New Hampshire, and Wisconsin.

⁹ Wisconsin, Michigan, Massachusetts, Washington.

mit minor deviates who are not insane—many of whom are not upon the record even psychopathic—to psychiatric institutions where they do not belong. The hazards implicit in this sort of legislative encroachment upon traditional areas of personal freedom is suggested in the opinion of the U. S. Supreme Court which, while it held the Minnesota statute constitutional, pointed nevertheless to the dangers inherent in the administration of such laws. (Minnesota ex rel Pearson v. Probate Court of Ramsey County, 205 Minn. 545, 287 N. W. 297; 60 S. Ct. 523; 84 L. ed. 477, 309 U. S. 270.)”

E. Recommendations

The New Jersey Commission made the following recommendations:

Following conviction of a crime and referral to the Diagnostic Center, “treatment, upon recommendation of the Diagnostic Center, may include one or more of the following measures:

- (a) Probation with out-patient psychiatric treatment.
- (b) Commitment to a specialized facility for intensive psychiatric treatment, followed by parole supervision upon release.
- (c) Commitment for care to a state mental hospital, followed by parole supervision upon release.
- (d) Commitment to a correctional institution, followed by parole supervision upon release.

“Provision should be made for the establishment of an institution with both medical, psychiatric and custodial features to carry on a program of intensive treatment and study designed to develop more effective rehabilitative measures for dangerous sex offenders. It will be the objective of this program to provide demonstrable results through the treatment and research developed there.

“Release from the institution under (b), (c) or (d) shall be when the offender is believed capable of making an acceptable social adjustment. Such release, however, must be on or before the expiration of the maximum term which the offender might have received for the crime of which he was convicted. It will be the duty of the institution of commitment to report to the Department of Institutions and Agencies on each patient committed under this law at six month intervals.”

The New York Commission made the following recommendations:

(a) “. . . We recommend that legislation be enacted placing responsibility on the Commissioner of Mental Hygiene for providing psychiatric and psychological service to the State’s correctional agencies. . . .

(b) “The need exists for further research in this field, for further psychiatric work with offenders, and for training of personnel for this work; therefore we recommend the continuance and expansion of the present research project, with a view to the eventual establishment of a permanent Institute of Criminal Behavior to carry out these purposes. . . .

(c) “We recommend that legislation be enacted requiring that all persons convicted of sex felonies in New York State be examined, before the Court imposes sentence, by a team of publicly employed psychiatrists who shall make use of psychological testing and social work reports. . . .

(d) “The need exists for law to protect women and children from certain dangerous sex offenders who, under

present law, are held in prison for limited periods and then must be released, regardless of whether there is any improvement of the mental or emotional condition which caused them to commit abnormal crimes against the person; therefore,

“We recommend legislation providing that when any offender be convicted of rape or sodomy involving the use of force or violence, or against small children, or convicted of felonious assault involving a sexual purpose, the Court after psychiatric examination of such offender may sentence such offender to serve an indeterminate sentence having a minimum of one day and a maximum of the duration of his natural life;

“We recommend further that, whenever an offender shall be sentenced to such a term of from one day to life, the law shall impose upon the Department of Mental Hygiene, the Department of Correction and the Board of Parole the solemn duty of giving his case prompt and intensive study, to be followed where feasible by therapeutic treatment, to the end that such offender may be rehabilitated and released whenever it may appear that he is a good risk on parole. When serving under this form of sentence, it should be required that a prisoner receive thorough psychiatric examination not less than once every two years, and consideration by the Parole Board.”

COMMONWEALTH ACCOUNTING

A REPORT OF THE JOINT STATE GOVERNMENT COMMISSION TO THE GENERAL ASSEMBLY

of the

COMMONWEALTH OF PENNSYLVANIA

SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the
Commonwealth of Pennsylvania:

Herewith is presented the report on the accounting methods used by the departments, agencies, commissions, boards and authorities of the Commonwealth which was directed by House Concurrent Resolution No. 74 of the 1949 Session.

The resolution reads, in part, "The Joint State Government Commission is hereby directed . . . to study and investigate . . . the accounting systems used by the several departments, agencies and commissions of the Commonwealth with a view of developing adequate and uniform accounting systems and complete analyses of the Commonwealth's fiscal condition, including a statement and analysis of assets, exclusive of physical assets and liabilities of the Commonwealth."

Consideration of the magnitude of Commonwealth fiscal operations is essential to an evaluation of the accounting procedures currently used. For the biennium 1949-51, total budgeted expenditures of the Commonwealth, exclusive of federal aid, amounted to \$1,028,080,643. In addition to this budgeted cash outlay, the General Assembly of 1949 made far-reaching financial commitments. The liberalization of the Public School Employees' Retirement System increased the present value of liabilities of the system by approximately one quarter of a billion dollars. A bond issue in a maximum amount of \$500,000,000 was authorized to finance the soldiers' bonus. The General State Authority and the Highway and Bridge Authority were authorized to borrow up to \$175,000,000, and \$40,000,000, respectively. These and other commitments add considerably to the Commonwealth's future obligations.

From this brief outline of the Commonwealth's financial operation, the importance of an integrated, over-all accounting system becomes apparent. Such a system should make it possible for the Governor, the General Assembly, department heads and the public to obtain, on short notice, an up-to-date, realistic picture of the financial position of the Commonwealth.

Cognizant of the dimensions of the task involved in a careful appraisal of existing accounting practices and the development of a modern integrated system of accounts designed to meet the needs of the Commonwealth, the

Commission has utilized, in addition to its own staff facilities, the good offices of the Pennsylvania Institute of Certified Public Accountants. The Institute has made available to the Commission, without charge, the services of senior personnel associated with accounting firms of national repute. The contribution of the Institute and its members is appreciated and gratefully acknowledged.

The Commission also acknowledges the cooperation of the Auditor General who conferred with the Commission staff and whose representative accompanied members of the Institute on their initial visits to the various departmental offices.

The technical memoranda prepared by the Commission staff and by consultants made available through the Institute have been sifted and evaluated by a subcommittee created by the Commission under authority of Act of 1943, March 8, P. L. 13, Section 1. On behalf of the Commission the cooperation of the sub-committee is acknowledged.

The Joint State Government Commission's evaluation of existing accounting methods and the measures recommended by the Commission for the creation of an accounting system which would meet the demands of current Commonwealth operations have the endorsement of the Pennsylvania Institute of Certified Public Accountants.

BAKER ROYER, Chairman

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Commonwealth Accounting

SUMMARY OF FINDINGS

I. In Pennsylvania, responsibility for the over-all management of the Commonwealth's financial affairs is di-

vided among three elective officers—the Governor, the Auditor General and the State Treasurer.

II. Under Section 701 (d) of The Administrative Code, the Governor is directed “to prescribe and require the installation of a uniform system or systems of bookkeeping, accounting, and reporting, for the several administrative departments, boards, and commissions, except for the Department of the Auditor General, the Treasury Department and the Department of Internal Affairs, but, before prescribing and requiring such installation, the Governor shall consult with the Department of the Auditor General,” (1929, April 9, P. L. 177).

III. At present, the accounts of the Commonwealth are kept on a cash basis but, by virtue of the use of different codes and conventions, reconciliation of the statements of elected officers is difficult; and adequate appraisal of the financial condition of the Commonwealth is impossible.

IV. Reconciliation difficulties aside, the cash system of accounting not only permits but actually requires the preparation of statements which are at variance with the facts.

V. Under present statutory arrangements, the Auditor General, postaudits all accounts of the Commonwealth, and in addition performs certain preauditing functions; this latter function makes the Auditor General a party to accounting which he subsequently postaudits.

SUMMARY OF RECOMMENDATIONS

In order to facilitate the preparation of meaningful, reconcilable financial statements for the Commonwealth and to assure critical review of all financial transactions of the Commonwealth, the Commission recommends that:

I. The Commonwealth employ an accrual rather than a cash method of accounting, such method to be prescribed by legislation and its use made mandatory upon all Commonwealth officials including the Governor, the Auditor General, and the State Treasurer.

II. An office of Accountant General be established by legislation, the Accountant General to be of cabinet rank, appointed by the Governor with the advice and consent of the Senate, for the purpose of installing, operating and supervising the legislatively-prescribed system of accounting for the Commonwealth.

III. The postauditing and preauditing functions be separated, and the preauditing function be performed by the Accountant General.

Section I

TYPE AND MAGNITUDE OF COMMONWEALTH FISCAL OPERATIONS

Total budgeted expenditures of the Commonwealth of Pennsylvania for the biennium 1949-51, exclusive of federal monies, were \$1,028,080,643. Of this total, approximately \$179,531,602 was to be used to finance the operations of the departments and other instrumentalities of the Commonwealth, \$251,520,800 was for grants and subsidies to school districts and \$20,000,000 was for political subdivisions other than school districts. The sum of \$210,500,000 was to be expended for construction and reconstruction of Commonwealth-owned highways, and \$160,000,000 was budgeted for payments to needy citizens.¹

The scope and volume of the Commonwealth's future

operations are substantially extended by three relatively recent developments: credit financed building projects, increases in operating costs, and legislative forward commitments without coverage.

The first type of undertaking, credit-financed building projects, is represented by the activities of the General State Authority and the Highway and Bridge Authority. Both authorities were established by the General Assembly of 1949 and were authorized to borrow to a maximum of \$175,000,000 and \$40,000,000 respectively. In the years to come, today's operations of these authorities will increase the operating expenditures of the Commonwealth departments with whom they do business.

Substantial increases in operating costs are illustrated by increased salaries currently paid to some 40,000 state employes and some 80,000 employes of the public school system who are members of the retirement systems. These salary increases will be further reflected in necessarily increased state appropriations to finance greater retirement and disability allowances.

Legislative forward commitments without coverage are illustrated by the 1949 General Assembly's authorization of a bond issue, not to exceed \$500,000,000 for financing of the soldiers' bonus, by its commitment to increased subsidies for the support of public schools, estimated to exceed, by at least \$15,000,000, appropriations to the Commonwealth's more than 2,500 school districts for the biennium 1949-51, and by the liberalization of the Public School Employees' Retirement System increasing the present value of liabilities by approximately \$250,000,000. These types of legislation pledged the Commonwealth to substantial increases in future expenditures, the effect of which was not determined at the time the commitments were made. In order to evaluate such future commitments and their effects on future budgets, it is essential to have a complete analysis of the present financial position of the Commonwealth. Such an analysis can only be made available by the use of a reliable, integrated system of accounting and reporting.

There is a good reason to believe that the requests for cash appropriations that will be made to the General Assembly of 1951 will exceed the requests made in 1949. In addition, the problems of increased allocations to the Retirement Funds, particularly to the Public School Employees' Retirement System, the payment of bond interest and the retirement of principal will have to be faced.

The Commonwealth's financial operations—which include cash outlays for current operating expenses, for personal, intangible and real property, and interdepartmental and interjurisdictional transfers of cash—are of such magnitude and complexity² that a modern, integrated system of accounts is essential to analysis and comprehension of the Commonwealth's financial position. The Commonwealth is big business and its fiscal affairs must be conducted accordingly.

Section II

FISCAL ADMINISTRATION OF THE COMMONWEALTH AND ACCOUNTING PROCEDURES USED

The administration of the fiscal affairs of the Commonwealth is the joint responsibility of the Governor, the Auditor General, the State Treasurer and the several department heads.

¹ See Appendix A, Budgeted Expenditures of the Commonwealth for the Biennium 1949-51.

² See Appendix B, Accounting Survey Map.

The Governor, under Sections 602 and 701 (g) of the Administrative Code,³ is required to submit a budget to the biennial sessions of the General Assembly, Article IV, Section 15 and 16, of the Constitution of Pennsylvania, authorize him to reduce appropriations after they have been passed by the General Assembly, and Section 701 (h) of the Administrative Code directs him to allocate among the various departments the approved appropriations to the Department of Property and Supplies. In addition, under Section 701 (d) of the Administrative Code, the Governor is directed "to prescribe and require the installation of a uniform system or systems of bookkeeping, accounting, and reporting, for the several administrative departments, boards, and commissions, except for the Department of the Auditor General, the Treasury Department and the Department of Internal Affairs but, before prescribing and requiring such installation, the Governor shall consult with the Department of the Auditor General."

The Auditor General, under Article IV, Sections 401, 402, 403, and 404 of the Fiscal Code,⁴ is given extensive preaudit and postaudit responsibilities.

The State Treasurer, under Article III, Sections 301 and 302, of the Fiscal Code, is directed to receive all monies for the Commonwealth and deposit them in approved depositories to the credit of the proper funds. Article III, Section 306, directs the State Treasurer to cooperate with the Auditor General in the examination and audit of requisitions for disbursements. Under Article III, Section 307, the State Treasurer is directed to make disbursements for properly approved requisitions.

The above arrangement is basically defective because it gives three elective officials,—the Governor, the Auditor General and the State Treasurer—overlapping authority.⁵ It is axiomatic that meaningful records and reports of financial transactions, as they pass from operating departments to disbursing department to auditing department, can be obtained only under a comprehensive integrated accounting system used by all concerned with the financial operations of the Commonwealth.

Furthermore, since the Fiscal Code directs the Auditor General to preaudit accounts, he actually participates in administration. This participation results in divided responsibility, and divided responsibility tends to weaken administration.

At the present time, the financial transactions of the Commonwealth are recorded and accounted for on a "cash basis." Within the framework of cash basis accounting, departments, boards, commissions and other agencies use such codifications, accounts and posting procedures as seem adapted to their circumstances. The current system has expanded by uncoordinated accretion over a period of years. No single, central office has been provided to record and report all official financial data, hence the differences in reported results, which arise by virtue of variations in departmental procedure, cannot be reconciled, and no consistent over-all picture of the Commonwealth's fiscal affairs is possible.

The present classification of accounts was originally designed to facilitate the recording of strictly cash receipts and cash disbursements for budgetary purposes. It fails to take cognizance of non-cash assets such as inventories of consumable supplies, subsidies and taxes due and

collectible, or of such liabilities as supplies and services received.

The cash basis of accounting provides for the recording of cash as actually received and as actually disbursed, without allocation to the fiscal period to which such receipt or disbursement applies. The cash basis of financial reporting not only permits, but actually requires, the preparation of statements which are at variance with the facts. Financial statements on the cash basis do not permit a realistic appraisal of the financial position of the Commonwealth at any one point in time.

Under the cash system, the apparent financial condition of the Commonwealth depends upon the dispatch with which it collects its debts and pays its bills. It is quite conceivable that the financial situation of the Commonwealth might appear excellent at a given time because it has just collected federal allocations and has not yet made the disbursements chargeable against these allocations. For example, analysis disclosures that on May 31, 1945, the Commonwealth had an amount receivable from the federal government for one of the departments of the Commonwealth of \$2,992,000, which did not appear as an asset upon any financial statement of the Commonwealth. Conversely, on May 31, 1947, the Commonwealth had collected from the federal government a sum of \$593,000 in excess of the amount due, which did not appear as a Commonwealth liability on any financial statement.

Again the cash system permits, not to say encourages, the crediting of receipts to time periods other than those to which they are properly allocable. Detailed examination of the financial records of the Commonwealth discloses that at least once, the amounts involved in improper allocation of receipts to time periods exceeding \$15,000,000.

It should also be noted that the cash system does not provide for the valuation and recording of inventories which may or may not have been paid for. The lack of this information means that budget estimates must be made and appropriations approved without knowledge of the value of liquid assets available at the beginning of the biennium.

In addition to the failure to record financial transactions as they apply to specific periods, the cash system does not provide for the preparation and distribution of meaningful financial reports. The only reports currently available are an annual mimeographed report from the Budget Bureau and a published biennial report of the Auditor General, both based on cash receipts and disbursements. In order to describe adequately the fiscal operations of the Commonwealth, a periodic accumulative statement of revenues and expenditures, prepared on an accrual basis, for each fund, accompanied by a combined statement for all funds, must be prepared. Similarly, a balance sheet for each fund, as well as a combined balance sheet for all funds, should be prepared, showing the over-all financial condition of the Commonwealth at any given date.

The present system, then, if it can be termed a system, is unsatisfactory because:

- (1) Inconsistent methods of accounting are used;
- (2) The cash basis of accounting fails to apply receipts and disbursements to proper fiscal periods;
- (3) Lags in payment of bills or collection of debts

³ 1929, April 9, P. L. 177, as amended.

⁴ 1929, April 9, P. L. 343, as amended.

⁵ See Appendix C, Financial Accountability Flow Charts—Present.

result in a distorted picture of the financial position of the Commonwealth, as of a given date;

- (4) The cash basis does not provide for valuation or recording of inventories which represent liquid assets;
- (5) Finally, under the present system, adequate reports for the guidance of the Governor, the General Assembly and the public cannot be produced.

The absence of central control over accounting procedures offers opportunities for manipulation and makes systematic routine discovery of defalcation, if any, impossible.

Industry and many state and municipal governments have recognized the importance of centralized accounting departments which operate on the basis of modern, meaningful accrual concepts. In fact, Pennsylvania is the only state of the six whose annual budgets are in excess of \$500,000,000 which does not have a centralized accounting office.

Clearly, since the offices of the Auditor General and the State Treasurer are primarily concerned with the Commonwealth's fiscal affairs, and these departments are not included in the directive to the Governor to prescribe "a uniform system or systems of bookkeeping, accounting and reporting," it remains for the General Assembly to bridge the gap and take action which will insure the installation and operation of a comprehensive, modern system of accounting.

Section III

SPECIFICATIONS FOR AN INTEGRATED ACCOUNTING SYSTEM

The Commonwealth of Pennsylvania is a business whose gross annual volume exclusive of federal monies and the gross receipts of such subsidiary businesses as the Liquor Control Board, exceeds \$500,000,000.⁶ All Commonwealth monies are channeled through Harrisburg.⁷

Private industry, with a volume of gross receipts comparable to the Commonwealth's, has for many years recognized the necessity for the use of modern, coordinated accounting methods when recording its financial transactions. Government, with its large and still growing volume of receipts and expenditures, has lagged far behind modern business practice. Within the recent past, a number of states have recognized the weaknesses in their accounting procedures and have taken corrective steps.⁸

Effective government administration presupposes a modern, integrated accounting system, operated through a central accounting department. Such a system must provide for each fund and for all funds combined.⁹

1. Accurate periodic and cumulative statements of revenues and expenditures prepared on an accrual basis whenever technically feasible.
2. Comparisons of revenues and expenditures with prior periods.

⁶ The budgeted expenditures for the biennium 1949-51 amounted to \$1,028,080,643, or an average of \$514,040,321 annually. For an analysis of these appropriations see Appendix A.

⁷ See Appendix B, Accounting Survey Map.

⁸ A survey of the accounting procedures and organization used by the forty-eight states shows that twenty-nine states have a centralized accounting office which records all financial data uniformly for all departments. Many of these states record their transactions on a modified accrual basis. Of the six states having budgets exceeding \$500,000,000, only Pennsylvania has so far failed to centralize its accounting procedures. For details, see Appendix D.

⁹ Examples of proposed statement forms are shown in Appendix E.

3. Comparisons of actual performance with budgeted amounts.
4. The summation of operations for each period expressed in terms of excess of revenues over expenditures, or expenditures over revenues.
5. Statements of assets and liabilities as of specified dates.
6. Financial reports, available within thirty days after the end of each fiscal quarter.¹⁰

To attain the objectives outlined above, it is recommended that:

1. A modern, integrated system of accounts be installed.¹¹
2. The use of a prescribed system of accounting by all elective and appointive officers of the Commonwealth be made mandatory.¹²
3. The office of Accountant General, adequately staffed, be established by statute.¹³ The functions of such office shall include:
 - a. The formulation and administration of a modern, integrated system of accounting and financial reporting.
 - b. The maintenance of all accounts for all funds on an accrual basis wherever possible.
 - c. The approval of all requisitions for payment of monies out of any fund and the certification of such approvals to the State Treasurer for payment.
 - d. The preparation and presentation of accurate periodic financial reports to the Governor, the General Assembly and the public.
4. The Accountant General to be of cabinet rank, appointed by the Governor, with the advice and consent of the Senate, the first term to end August 31, 1955, and thereafter for a period of four years.

Such a modern, integrated system of accounts, properly installed and operated, will provide each department with a complete statement of its financial operations in a form that will facilitate the preparation of combined statements to determine the over-all financial position of the Commonwealth. The Governor, through the facilities of the Accountant General, will have access to meaningful financial data which is essential in making realistic estimates of future requirements. There will be one authentic and official source of all financial information available to the Governor, the General Assembly and the public.¹⁴

The proposed amendments to the Administrative and

¹⁰ Concerning this point, The Pennsylvania Institute of Certified Public Accountants observes, "... if these recommendations are adopted ... prompt and reliable financial statements adequate for administrative decisions will be available to the Governor and other administrative officers and to the General Assembly, and appropriate reports will be available for publication at least annually to the public." See Appendix F.

¹¹ The Pennsylvania Institute of Certified Public Accountants endorses the installation of such a system for the Commonwealth and observes that "prompt implementation of the recommendations ... will have far reaching beneficial results." See Appendix F.

¹² Regarding the mandatory use of such a system, the Pennsylvania Institute of Certified Public Accountants suggests, that the officer charged with administration "have the power to require compliance by all departments, offices and officers, whether elective or appointive, with the systems of accounting established ... and with his administrative decisions relating to the operations of such system." For this reason, the Institute recommends that the administrative officer have the power to institute mandamus proceedings. See Appendix F.

¹³ The establishment of the office of Accountant General is endorsed by the Pennsylvania Institute of Certified Public Accountants. See Appendix F.

¹⁴ See Appendix C, Financial Accountability Flow Charts—Recommended.

Fiscal Codes, as well as amendments to the General State Authority Act, the State Highway and Bridge Authority Act and the Public School Building Authority Act, which	would provide for the installation and operation of a modern, integrated accounting system, will be found in Appendix G.

Appendix B

ACCOUNTING SURVEY MAP

The administration of the financial activities of the Commonwealth is centered in Harrisburg where the various agencies account for money received and expended under their respective jurisdictions. From Harrisburg, transactions are conducted with each political subdivision, State-aided and State-owned institution.

The Commonwealth's receipts and expenditures are channeled through fourteen operating funds and twenty-nine custodial funds. Thirty-eight Commonwealth departments, board, commissions and agencies participate in the administration and allocation of the monies.

The accounting for the Commonwealth's financial transactions involving 5,222 political subdivisions and 258 State-owned and/or State-aided institutions presents a complex problem which may be visualized by reference to the map which follows.

The arrows located around the margin of the map indicate six major revenue sources flowing into Harrisburg. Beginning with the arrow in the upper left hand corner and continuing clockwise, the arrows represent the major revenue sources listed below:

Sources	Number of Items
License and Fees	155
Miscellaneous Revenues	119
Fines and Penalties	36
Bonus, Taxes, Penalties and Interest	29
Receipts from the Federal Government ..	18
Monies Received through Counties	11

The heavy line extending from the tip of each arrow represents the flow of receipts into Harrisburg.

The political subdivisions and institutions which receive monies from Harrisburg are identified by symbols in each county. The key to these symbols is shown on the lower margin of the map.

The lines running from Harrisburg to the dollar signs symbolize the outflow of Commonwealth monies to the counties.

The size of the circle enclosing the dollar symbol indicates the relative dollar amount received within each county for its subdivisions and institutions.

The lines running from the dollar signs identify the recipients of monies from Harrisburg. The number of symbols for designated subdivisions and institutions is identical with the number of recipients in either category.

[Map not reprinted in this appendix. See original report, page 15.]

Appendix C

FINANCIAL ACCOUNTABILITY FLOW CHARTS

The charts which follow are designed to show the flow of accounting transactions in Pennsylvania. Chart I shows the flow of accounting transactions under existing statutes. Chart II shows the flow of accounting transactions under the proposed amendments. The functions are identified by colored lines.

Chart II—Present

Chart I shows the flow of accounting transactions under existing statutes.

Budgeting of Receipts and Expenditures: All budget transactions (requests and allocations) are carried on between the departments, boards and commissions and the Budget Office.

Accounting for Revenues: All receipts are accounted for by the departments, boards and commissions, to the Department of Revenue, which, in turn, accounts to the Department of the Auditor General, which in turn, accounts to the Treasury Department.

Accounting for Disbursements: Disbursements are accounted for in two ways:

1. Disbursements for materials and supplies and certain other services are accounted for by each department, board and commission to the Department of Property and Supplies, which, in turn, accounts to the Department of the Auditor General, which, in turn, accounts to the Treasury Department.
2. Disbursements for other expenses are accounted for by each department, board and commission to the Department of the Auditor General, which, in turn, accounts to the Treasury Department.

Auditing Financial Accounts: The auditing functions are carried on by the Department of the Auditor General with each department, board and commission.

Chart II—Recommended

Chart II shows the flow of transactions under the proposed amendments.

Budgeting of Receipts and Expenditures: Budget transactions (requests and allocations) would be carried on between the departments, boards, commissions and other agencies and the Accountant General. The Accountant General would then submit requests to and receive allocations from the Budget Bureau.

Accounting for Revenues: All revenues would be accounted for to the Accountant General who would reconcile the actual receipt of cash by the Treasury Department, with the transmittal received from each department, board, commission or other agency.

Accounting for Disbursements: Disbursements would be accounted for by each department, board, commission or agency to the Accountant General, who would then certify approved requisitions to the Treasury Department for payment.

Auditing Financial Accounts: The Department of the Auditor General would audit the records of the Accountant General. The records would constitute the control accounts of all of the financial operations of the Commonwealth, the details of which would be available to the Auditor General in the offices of each department, board and commission.

[Charts not reprinted in this appendix. See original report, page 18.]

Appendix D

A TABULAR OUTLINE OF THE ACCOUNTING, BUDGETARY AND AUDITING OFFICES OF THE FORTY-EIGHT STATES, WITH SELECTED FUNCTIONS

The constitutional and statutory provisions relating to

accounting, budgeting and auditing functions in each of the forty-eight states are shown on the following pages.

The following tabular presentation shows, for each state, the office responsible for accounting for and auditing of the financial transactions, means of creation and date of establishment of the office, elective or appointive status of the office, term of tenure and salary.

Whenever one or more of the designated offices are divisions of a larger department, the title of the department is shown in the italic heading.

The states are listed in the descending order of the size

of their expenditure appropriations for the fiscal year 1949-50.

The selected functions shown in the tabulation are:

Preauditing—approval of requisitions before payment.

Accounting—recording the financial transactions of the state,

Prescribing and installing systems and methods of book-keeping and accounting, and

Postauditing—auditing books and accounts of state departments and agencies.

Hon. Baker Royer, Chairman
Joint State Government Commission
Harrisburg, Pennsylvania

Dear Sir:

During 1949 fifteen firms represented in the membership of this Institute contributed their services in a survey of the accounting and financial affairs of many departments of the Commonwealth. Reports of these surveys were submitted to your staff and to us as members of our Institute committee on Commonwealth government accounting.

Subsequently we have conferred with your staff regarding the report which the Commission has prepared covering the survey of the Commonwealth's accounting practices and procedures. We concur in the findings and conclusions expressed in that report and believe that prompt implementation of the recommendations therein will have far reaching beneficial results. These recommendations include:

1. Establishment of a central accounting department of the Commonwealth, headed by an Accountant General to be appointed by the Governor, with the consent of the Senate, for a term of four years.

2. The principal functions of the Accountant General will be the formulation and administration of integrated systems of accounting and financial reporting for all of the departments and agencies of the Commonwealth.

3. The Accountant General to have the power to require compliance by all departments, offices and officers, whether elective or appointive, with the systems of accounting established by the Accountant General and with his administrative decisions relating to the operations of such system. For this purpose the Accountant General should have the power to institute mandamus proceedings.

4. All preauditing functions to be performed in the central accounting department. The Auditor General's department should continue to perform postauditing but this department should not perform preauditing which divides responsibility and makes the Auditor General a party to the accounting which he now also postaudits.

Two vitally important objectives will be attainable if these recommendations are adopted:

1. Prompt and reliable financial statements adequate for administrative decisions will be available to the Governor

and other administrative officers and to the General Assembly, and appropriate reports will be available for publication at least annually to the public.

2. The presently existing possibilities for the manipulation of accounts and for the misappropriation of Commonwealth funds will be substantially reduced.

Yours very truly,

Committee on Commonwealth Government
Accounting of the Pennsylvania Institute
of Certified Public Accountants

I. H. KREKSTEIN
THOMAS M. O'NEILL
SAMUEL W. PRICE
CLARENCE L. TURNER
SYDNEY V. YOUNG
CARL H. ZIPF
ROBERT W. WILLIAMS, Chairman.

Appendix G

PROPOSED AMENDMENTS

AN ACT

To amend the act approved the ninth day of April, one thousand nine hundred twenty-nine (P. L. 177), entitled "An act providing for and reorganizing the conduct of the executive and administrative work of the Commonwealth by the Executive Department thereof and the administrative departments, boards, commissions, and officers thereof, including the boards of trustees of State Normal Schools, or Teachers Colleges; abolishing, creating, reorganizing or authorizing the reorganization of certain administrative departments, boards, and commissions; defining the powers and duties of the Governor and other executive and administrative officers, and of the several administrative departments, boards, commissions, and officers; fixing the salaries of the Governor, Lieutenant Governor, and certain other executive and administrative officers; providing for the appointment of certain administrative officers, and of all deputies and other assistants and employees in certain departments, boards, and commissions; and prescribing the manner in which the number and compensation of the deputies and all other assistants and employees of certain departments, boards and commissions shall be determined," by creating the Department and office of Accountant General and defining their powers and duties; changing certain powers and duties of the Governor and of the various departments, boards, commissions and officers; and providing for the transfer of certain employees from the Department of the Auditor General to the Department of Accountant General.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Section two hundred one of the act approved the ninth day of April, one thousand nine hundred twenty-nine (P. L. 177), entitled "An act providing for and reorganizing the conduct of the executive and administrative work of the Commonwealth by the Executive Department thereof and the administrative departments, boards, commissions, and officers thereof, including the boards of trustees of State Normal Schools, or Teachers Colleges; abolishing, creating, reorganizing or authorizing the reorganization of certain administrative departments, boards, and commissions; defining the powers and duties of the Governor and other executive and administrative officers, and of the several administrative departments, boards, commissions, and officers; fixing the salaries of the Governor, Lieutenant Governor, and certain other executive and administrative officers; providing for the appointment of certain administrative officers, and of all deputies and other assistants and employees in certain departments, boards, and commissions; and prescribing the

manner in which the number and compensation of the deputies and all other assistants and employes of certain departments, boards and commissions shall be determined," as last amended by the act approved the twenty-fifth day of April, one thousand nine hundred forty-nine (P. L. 729), is hereby further amended to read as follows:

Section 201. Executive Officers, Administrative Departments, and Independent Administrative Boards and Commissions.—The executive and administrative work of this Commonwealth shall be performed by the Executive Department, consisting of the Governor, Lieutenant Governor, Secretary of the Commonwealth, Attorney General, Auditor General, State Treasurer, Secretary of Internal Affairs, and Superintendent of Public Instruction; by the Executive Board and the Pennsylvania State Police; by the following administrative departments: Department of State, Department of Justice, Department of the Auditor General, Treasury Department, Department of Internal Affairs, Department of Public Instruction, Department of Military Affairs, Insurance Department, Department of Banking, Department of Agriculture, Department of Forests and Waters, Department of Mines, Department of Highways, Department of Health, Department of Labor and Industry, Department of Welfare, Department of Property and Supplies, Department of Revenue, Department of Public Assistance, [and] Department of Commerce, and Department of Accountant General; and by the following independent administrative boards and commissions: Pennsylvania Game Commission, Pennsylvania Fish Commission, State Civil Service Commission, Pennsylvania Public Utility Commission, and the Pennsylvania Historical and Museum Commission.

All of the provisions of this act, which apply generally to administrative departments, or generally except to the Department of the Auditor General and the Treasury Department, shall apply to the Executive Board and to the Pennsylvania State Police.

Section 2. Section two hundred six of said act as last amended by the act approved the tenth day of May, one thousand nine hundred thirty-nine (P. L. 101), is hereby further amended to read as follows:

Section 206. Department Heads—Each administrative department shall have as its head an officer who shall, either personally, by deputy, or by the duly authorized agent or employe of the department, and subject at all time to the provisions of this act, exercise the powers and perform the duties by law vested in and imposed upon the department.

(a) The following officers shall be the heads of the administrative departments following their respective titles:

Secretary of the Commonwealth of the Department of State;
 Attorney General, of the Department of Justice;
 Auditor General, of the Department of the Auditor General;
 State Treasurer, of the Treasury Department;
 Secretary of Internal Affairs, of the Department of Internal Affairs;
 Superintendent of Public Instruction, of the Department of Public Instruction;
 Adjutant General, of the Department of Military Affairs;
 Insurance Commissioner, of the Insurance Department;
 Secretary of Banking, of the Department of Banking;
 Secretary of Agriculture, of the Department of Agriculture;
 Secretary of Forests and Waters, of the Department of Forests and Waters;
 Secretary of Mines, of the Department of Mines;
 Secretary of Highways, of the Department of Highways;
 Secretary of Health, of the Department of Health;
 Secretary of Labor and Industry, of the Department of Labor and Industry;
 Secretary of Welfare, of the Department of Welfare;
 Secretary of Property and Supplies, of the Department of Property and Supplies;
 Secretary of Revenue, of the Department of Revenue;

Secretary of Public Assistance, of the Department of Public Assistance;

Secretary of Commerce, of the Department of Commerce;
 Accountant General, of the Department of Accountant General.

Section 3 Section two hundred seven of said act, as last amended by the act approved the eighteenth day of February, one thousand nine hundred forty-nine (P. L. 16), is hereby further amended to read as follows:

Section 207. Appointment.—The Governor shall nominate and, by and with the advice and consent of two-thirds of all the members of the Senate, appoint:

(a) The Secretary of the Commonwealth, the Attorney General, the Superintendent of Public Instruction, the Adjutant General, the Insurance Commissioner, the Secretary of Banking, the Secretary of Agriculture, the Secretary of Forests and Waters, the Secretary of Mines, the Secretary of Highways, the Secretary of Health, the Commissioner of the Pennsylvania State Police, the Secretary of Labor and Industry, the Secretary of Welfare, the Secretary of Property and Supplies, the Secretary of Revenue, the Secretary of Public Assistance, the Secretary of Commerce, the Accountant General, and the members of all independent administrative boards and commissions.

The Adjutant General may have the rank of Major General of the Adjutant General's Department in the Pennsylvania National Guard, or Pennsylvania Guard, or the Governor may designate the ranking line officer of the Pennsylvania National Guard, or Pennsylvania Guard, or an officer of the Regular Army, United States Navy, United States Coast Guard, or United States Marine Corps, as Adjutant General: Provided, That should the ranking line officer be also appointed Adjutant General, he shall receive only the salary provided by law for the Adjutant General: And provided further, That should the ranking line officer be called into the service of the United States, a Deputy Adjutant General, to be designated by the Governor, shall act as Adjutant General during his absence. No Adjutant General shall be appointed who shall not have served at least ten years as a commissioned officer in the Pennsylvania National Guard, Pennsylvania Guard, or equivalent length of service in the Regular Army of the United States, United States Navy, United States Coast Guard, or United States Marine Corps, or Officers Reserve Corps of the United States Army, United States Navy Reserve, United States Coast Guard Reserve, or United States Marine Corps Reserve, which service may be cumulative, that is service in any one or more of the foregoing services may be added together.

The Accountant General shall be a citizen of the United States, shall be at least thirty-five years of age at the time of his appointment and shall have been a resident of Pennsylvania for at least two years immediately preceding his appointment. The Accountant General shall have had wide technical and administrative experience in accounting. He shall not be eligible to hold any other public office during the period of his term of office.

(b) Except as in this act otherwise provided, the members of all departmental administrative bodies, boards, and commissions, and the officers who shall fill the departmental administrative offices mentioned in this article.

(c) Except as in this act otherwise provided, the members of all advisory boards and commissions.

Section 4. Section two hundred eight of said act, as last amended by the act approved the twenty-eighth day of April, one thousand nine hundred forty-three (P. L. 94), is hereby further amended to read as follows:

Section 208. Terms of Office.—The terms of office of the persons appointed by the Governor under the preceding section shall be as follows:

(a) The Secretary of the Commonwealth and the Attorney General shall serve during the pleasure of the Governor.

(b) The term of the Superintendent of Public Instruction shall be four years.

(b. 1) The term of the Accountant General first appointed shall begin on the effective date of this act and shall expire the thirty-first day of August, one thousand nine hundred fifty-five or as soon thereafter as his successor is appointed and qualified; the term of each of his successors shall be four years and until their successors are appointed and qualified.

The Governor may suspend the Accountant General for inefficiency, neglect of duty, or misconduct in office giving him a copy of the charges against him and affording him an opportunity to be publicly heard in person or by counsel in his own defense upon not less than ten days' notice after which the Governor shall either remove him from or reinstate him in the office. If he shall be removed, the Governor shall file with the Department of State a complete statement of all charges made against him and his findings thereon with a complete record of the proceedings.

Except as in this act otherwise provided, the heads of other administrative departments, the Commissioner of the Pennsylvania State Police, the members of independent administrative boards and commissions, of departmental administrative boards and commissions, and of advisory boards and commissions, and departmental administrative officers, shall hold office for terms of four years, from the third Tuesday of January next following the election of a Governor, and until their successors shall have been appointed and qualified. [Provided, That the term of the Commissioner of the Pennsylvania State Police appointed prior to the third Tuesday of January, one thousand nine hundred thirty-nine, shall expire upon that date, or as soon thereafter as his successor shall have been appointed and qualified.]

Section 5. Section two hundred nine of said act as last amended by the act approved the twenty-eighth day of April, one thousand nine hundred forty-nine (P. L. 776), is hereby further amended to read as follows:

Section 209. Compensation of the Governor, Lieutenant Governor, and the heads of Departments.—Annual salaries shall be payable in equal semi-monthly installments, as follows:

- To the Governor, twenty-five thousand dollars.
- To the Lieutenant Governor, fifteen thousand dollars.
- To the Secretary of the Commonwealth, fifteen thousand dollars.
- To the Attorney General, fifteen thousand dollars.
- To the Auditor General, fifteen thousand dollars.
- To the State Treasurer, fifteen thousand dollars.
- To the Secretary of Internal Affairs, fifteen thousand dollars.
- To the Superintendent of Public Instruction, fifteen thousand dollars.
- To the Adjutant General, fifteen thousand dollars.
- To the Insurance Commissioner, fifteen thousand dollars.
- To the Secretary of Banking, fifteen thousand dollars.
- To the Secretary of Agriculture, fifteen thousand dollars.
- To the Secretary of Forests and Waters, fifteen thousand dollars.
- To the Secretary of Mines, fifteen thousand dollars.
- To the Secretary of Highways, fifteen thousand dollars.
- To the Secretary of Health, fifteen thousand dollars.
- To the Secretary of Labor and Industry, fifteen thousand dollars.
- To the Secretary of Welfare, fifteen thousand dollars.
- To the Secretary of Property and Supplies, fifteen thousand dollars.
- To the Secretary of Revenue, fifteen thousand dollars.
- To the Secretary of Public Assistance, fifteen thousand dollars.
- To the Secretary of Commerce, fifteen thousand dollars.
- To the Accountant General, fifteen thousand dollars.

Neither the Governor, Lieutenant Governor, nor the head of any administrative department, shall receive

any additional compensation for any services rendered to the Commonwealth in any capacity.

Section 6. Section five hundred twelve of said act is hereby amended to read as follows:

Section 512. Legal Advice and Services.—Whenever any department, board, commission, or officer of the State Government, shall require legal advice concerning its conduct or operation, or when any legal difficulty or dispute arises, or litigation is commenced or to be commenced in which any department, board, commission, or officer, is concerned, or whenever any taxes or other accounts of any kind whatever due the Commonwealth remain overdue and unpaid for a period of ninety days, it shall be the duty of such department, board, commission, or officer, to refer the same to the Department of Justice.

It shall be the duty of any department, board, commission, or officer, having requested and received legal advice from the Department of Justice regarding the official duty of such department, board, commission, or officer, to follow the same, and, when any officer shall follow the advice given him by the Department of Justice, he shall not be in any way liable for so doing, upon his official bond or otherwise.

Before the Department of Justice shall render any opinion, interpreting any appropriation act, or act authorizing the expenditure of money, it shall notify the Department of the Auditor General, [and] the Treasury Department, and the Department of the Accountant General of the question upon which its opinion has been requested, and afford to these departments an opportunity to present any views which they may have upon such question.

It shall be unlawful for any department, board, commission, or officer, of the Commonwealth, to engage any attorney to represent such department, board, commission, or officer, in any matter or thing relating to the public business of such department, board, commission, or officer, without the approval in writing of the Attorney General.

Section 7. Section five hundred twenty-seven of said act as added by the act approved the fifth day of June, one thousand nine hundred forty-seven (P. L. 407), is hereby amended to read as follows:

Section 527. Filing and Record Systems.—The Governor, shall, from time to time, cause studies to be made of the accumulations of files of correspondence, reports, records and other papers in possession of departments, boards and commissions, and may direct said departments, boards, or commissions to comply with the provisions of sections 524 and 525 of this act. The requisitions, warrants, cancelled checks, books, records, correspondence and files of the Department of the Auditor General, the Department of Accountant General, the Department of Internal Affairs and the Treasury Department, which date back a period of four years or more, shall be expressly covered by the provisions of this section.

Section 8. Section six hundred three of said act as amended by the act approved the first day of June, one thousand nine hundred thirty-one (P. L. 350), is hereby further amended to read as follows:

Section 603. List of Employees to be Furnished to Certain State Officers.—All administrative departments, boards, and commissions shall, on the fifteenth day of June of each year, transmit to the Auditor General, the State Treasurer, the Accountant General, and the [Budget Secretary] Governor, a complete list, as of June first preceding, of the names of all persons, except day-laborers, entitled to receive compensation from the Commonwealth for services rendered in or to the department, board, or commission, as the case may be. Such list shall show the position occupied by each such person, the date of birth and voting residence of such person, the salary at which or other basis upon which such person is entitled to be paid, the date when such person entered the service of the Commonwealth, whether such person has been continuously employed by the Commonwealth since that date, and all periods of service and positions held as an employee of

the Commonwealth, or such part of such information as the Governor may prescribe.

Each month thereafter, the heads of the several administrative departments, and the several independent administrative boards and commissions, shall certify to the Auditor General, the State Treasurer, the Accountant General, and the [Budget Secretary] Governor any changes in the annual list of employes last transmitted to them which shall have occurred during the preceding month.

The information received by the Auditor General, the State Treasurer, the Accountant General, and the [Budget Secretary] Governor under this section, shall be public information.

Section 9 Section six hundred four of said act as amended by the act approved the third day of June, one thousand nine hundred forty-three (P. L. 833) is hereby further amended to read as follows:

Section 604. [Estimates of Current Expenditures by Departments, Boards, and Commissions.—Each administrative department, board, and commission, except the departments of which the Auditor General, Secretary of Internal Affairs and the State Treasurer are respectively the heads, shall, from time to time, as requested by the Governor, prepare and submit to the Governor, for approval or disapproval, an estimate of the amount of money required for each activity or function to be carried on by such department, board or commission, during the ensuing month, quarter, or such other period as the Governor shall prescribe. If such estimate does not meet with the approval of the Governor, it shall be revised in accordance with the Governor's desires and resubmitted for approval.

After the approval of any such estimate, it shall be unlawful for the department, board, or commission to expend any appropriation or part thereof, except in accordance with such estimate, unless the same be revised with the approval of the Governor.

If any department, board or commission, to which this section applies, shall fail or refuse to submit to the Governor estimates of expenditures, in accordance with the Governor's request, the Governor may notify the Auditor General, in writing, of such failure or refusal, and, after receipt of such notice, the Auditor General shall not draw any warrant in favor of such department, board or commission, until the Governor shall have notified the Auditor General, in writing, that the delinquent department, board or commission has furnished him with, and he has approved, the estimate as required by this section.]

Estimates of Current Expenditures; Approval and Disapproval; Effects of Noncompliance.—The Governor shall monthly, quarterly or for such other period of time as he shall prescribe request each department, board and commission and each other agency receiving State appropriations, except the Department of the Auditor General, the Treasury Department and the Department of Internal Affairs, to prepare and submit to him an estimate of the amount of money required for each activity or function to be carried on by it during the comparable ensuing period of time. It shall be the duty of each department, board and commission to comply with any such request made by the Governor in connection with estimates of current expenditures.

If any such estimate is not in accordance with the budget limitations contained in the appropriations made by the General Assembly, the Governor shall disapprove it. If for any reason any such estimate submitted by any non-elective department, board or commission does not meet with the Governor's approval, he may disapprove it. When an estimate is disapproved it shall be revised to meet the objections made against it and shall be resubmitted for approval.

After the approval of any such estimate, it shall be un-

lawful for any department, board or commission to expend any appropriation or part thereof except in accordance with such estimate unless the same be revised with the approval of the Governor. The Accountant General shall not approve any requisition for expenditures contrary to the requirements of this paragraph.

If any department, board or commission fails or refuses to submit any such estimate or revised estimate of expenditures the Governor may notify the Accountant General in writing of such failure or refusal and after receipt of such notice the Accountant General shall not approve any requisition for expenditures in favor of such department, board or commission until the Governor notifies him in writing that the delinquent department, board or commission has furnished such estimate and that it has been approved.

The Governor shall certify to the Accountant General the periodical allocations of the budget appropriations made to the several departments, boards, and commissions and all other agencies to which State appropriations have been made for the then current fiscal biennium.

Section 10. Clauses (d) and (e) of section seven hundred one of said act as last amended by the act approved the twenty-first day of May, one thousand nine hundred forty-three (P. L. 467) are hereby repealed.

Section 11. Said act is hereby amended by adding immediately following Article XI, thereof, a new Article to read as follows:

Article XI-A

Powers and Duties of the Department of Accountant General

Section 1101-A. Powers and Duties in General.—Subject to any inconsistent provisions in this act contained, the Department of Accountant General shall exercise the powers and perform the duties vested in and imposed upon it and the Accountant General by the Fiscal Code and other laws.

Section 12. Clause (c) of section two thousand three hundred fifteen and clause (a) of section two thousand three hundred sixteen of said act are hereby amended to read as follows:

Section 2315. State Institutions.—With regard to State institutions, the department shall have the power, and its duty shall be:

(c) To issue requisitions upon the [Auditor General for warrants to be drawn by the Auditor General upon the State Treasurer] Accountant General for his approval for payment by the State Treasurer in favor of such institutions, [for the payment,] out of moneys specifically appropriated to the department for the purpose of the expenses of administering, operating, maintaining, and developing such State institutions;

Section 2316. Care of the Indigent.—The Department of Welfare shall have the power, and its duty shall be:

(a) Whenever the General Assembly shall have specifically appropriated money to the department for the purpose, to issue requisitions upon the [Auditor General for warrants, to be drawn by the Auditor General upon] Accountant General for his approval for payment by the State Treasurer, in favor of such hospitals, homes, and institutions as shall conform to at least the minimum standards of plant, equipment, service, administration, and care and treatment necessary for the proper care and treatment of patients or inmates, as required by the rules and regulations of the department, or established by law, in amounts computed upon the per diem rates of payment established by law for free service to indigent persons as follows:

1. The care and treatment of sick or injured persons in hospitals.

2. The care of dependent, delinquent, and defective chil-

dren in homes or institutions,

3. The care of dependent adults in homes or institutions,

4. The care and treatment of crippled children in homes or hospitals.

5. The care, treatment and removal of insane persons in county hospitals for the insane or private institutions licensed by the department,

6. The removal of nonresident dependent children,

7. The placement of dependent children through child-caring agencies;

Section 13. Clause (h) of section two thousand four hundred two, section two thousand four hundred five, and clause (i) of section two thousand four hundred eight of said act as last amended by the act approved the twenty-first day of June, one thousand nine hundred thirty-seven (P. L. 1865), are hereby further amended to read as follows:

Section 2402. Grounds, Buildings and Monuments in General.—The Department of Property and Supplies shall have the power, and its duty shall be:

(h) Whenever loss or damage by fire or other casualty shall occur to any structure, building, equipment, or other property owned by the Commonwealth, and be reported to the department, to make an examination thereof, and, in its discretion, subject only to the approval of the Governor, to rebuild, restore, or replace the property damaged or destroyed, and, for that purpose, to have plans and specifications prepared and contracts executed, and to supervise the erection, construction or replacement thereof, such rebuilding, restoration, or replacement to be in substantial accord with the original character, use, and purposes of the property damaged or destroyed. The cost of the materials furnished, and work and labor performed, under such contracts, shall be certified by the department to the [Auditor General,] Accountant General, who shall issue his [warrant] requisitions against the State Insurance Fund of this Commonwealth, which [warrant] requisition shall be paid by the State Treasurer, in the manner provided by law: Provided, That whenever the department shall have taken such action as will involve expenditures from said fund, it shall forthwith certify the probable amount of expenditure to the State Treasurer, who shall forthwith take such action as is necessary to provide funds sufficient to meet the obligations so entered into:

Section 2405. Sale of Unserviceable Property.—The Department of Property and Supplies shall have the power, and its duty shall be, to receive from the several administrative departments, and independent administrative and departmental administrative boards and commissions, unserviceable personal property of this Commonwealth, to issue a receipt therefor, make a complete record thereof, and, if no other department, board or commission is able to make use of the same presently, then, as soon as convenient, to sell the same, either at public auction or at private sale, in the city of Harrisburg, or elsewhere, as may be deemed advisable. Except in the case of perishable property, such sales shall, if the department deems it feasible in view of the value of the property involved, be advertised in not exceeding five newspapers of the Commonwealth, once a week for three weeks, such advertisement to state the time, place and conditions of any such sales; but if after such advertising, the department is unable to obtain a bid for the property, it may be demolished or destroyed: Provided, That when the unserviceable property is located outside the city of Harrisburg, the Department of Property and Supplies, in its discretion, may authorize the department, board, or commission having possession of the same, without advertising, to obtain at least two bids in the locality where the property is located. Such bids shall be referred to the Department of Property and Supplies, and, if it believes that the property will not realize a higher net sale price if transported to the Capitol for sale, the department may authorize the department, board, or commission having possession of the same, to sell the property locally to the highest bidder, to take a proper receipt therefor, and to transmit the proceeds to the [Department of Property and Supplies,] Department of Ac-

countant General, to be by it paid into the State Treasury [through the Department of Revenue]: And provided further, That whenever any department, board, or commission shall deliver to the Department of Property and Supplies any unserviceable personal property, and, at the same time, requisition the said department to furnish new property of a similar character to replace the unserviceable property delivered as aforesaid, or request said department, as purchasing agency, to purchase new property of a similar character, the Department of Property and Supplies shall endeavor to exchange the unserviceable property for or on account of the purchase price of the new property about to be purchased, but such unserviceable property shall not be delivered for or on account of the purchase price of any property at a lower valuation than the price which such unserviceable property would bring if sold in the open market for cash, and, to the extent that advertising any such unserviceable property for sale may be necessary, to establish its market value, the Department of Property and Supplies is authorized and directed to advertise as hereinabove provided. The Department of Property and Supplies shall obtain from the person, partnership, or corporation, to which any personal property is delivered in exchange under the authority of this section a receipt therefor, describing such personal property and specifying the value at which it was taken in exchange, and such receipt shall be delivered to the [Auditor General,] Accountant General, attached to the requisition for the payment of the balance of the purchase price due for the new property purchased. The proceeds of sales of personal property hereunder, shall be transmitted by the Department of Property and Supplies to the [Department of Revenue,] Department of Accountant General, which shall transmit it to the Treasury Department to be credited to the fund out of which the property sold was originally purchased.

Section 2408. Procedure for Erection of Buildings and Alterations or Additions to Existing Buildings.—Whenever the General Assembly shall have appropriated money to the Department of Property and Supplies, or to any other department, or to any administrative board, or commission, for the erection of new buildings, or sewage or filtration plants, other service systems, or athletic fields, or other structures, or for alterations or additions or repairs to existing buildings, or to such plants, systems, fields, or structures, to cost more than four thousand dollars (\$4,000), the following procedure shall apply, unless the work is to be done by State employees, or by inmates or patients of a State institution or State institutions, or unless the department, board, or commission to which the General Assembly has appropriated money for the foregoing purposes is, by this act or by the act making the appropriation, authorized to erect, alter, or enlarge buildings independently of the Department of Property and Supplies, or under a different procedure:

(i) No contract shall be valid or effective unless a certified copy thereof, detail break-down sheet of the work, and contract price of the work involved, shall have been filed in the offices of the Auditor General, the State Treasurer, the Accountant General, and the department, board, or commission for which the work is to be done, promptly after the execution of the contract;

Section 14. All employees of the Department of Auditor General on the effective date of this act connected with the functions of such department relating to the drawing of warrants shall become employees of the Department of Accountant General and shall perform the duties assigned by the Accountant General upon the same terms and conditions as theretofore until removed or appointed to other positions by the Accountant General.

Section 15. All acts and parts of acts are hereby repealed in so far as they are inconsistent with the provisions of this act.

Section 16. The provisions of this act shall become effective on the first day of June, one thousand nine hundred fifty-one.

AN ACT

To amend the act approved the ninth day of April, one thousand nine hundred twenty-nine (P. L. 343), entitled "An act relating to the finances of the State Government; providing for the settlement, assessment, collection, and lien of taxes, bonus, and all other accounts due the Commonwealth, the collection and recovery of fees and other money or property due or belonging to the Commonwealth, or any agency thereof, including escheated property and the proceeds of its sale, the custody and disbursement or other disposition of funds and securities belonging to or in the possession of the Commonwealth, and the settlement of claims against the Commonwealth, the resettlement of accounts and appeals to the courts, refunds of money erroneously paid to the Commonwealth, auditing the accounts of the Commonwealth and all agencies thereof, of all public officers collecting moneys payable to the Commonwealth, or any agency thereof, and all receipts of appropriations from the Commonwealth and imposing penalties; affecting every department, board, commission, and officer of the State government, every political subdivision of the State, and certain officers of such subdivisions, every person, association, and corporation required to pay, assess, or collect taxes, or to make returns or reports under the laws imposing taxes for State purposes, or to pay license fees or other moneys to the Commonwealth, or any agency thereof, every State depository and every debtor or creditor of the Commonwealth," by defining the powers and duties of the Department of Accountant General and the Accountant General; providing for the installation and maintenance of a uniform system of accounts of Commonwealth finances and of accounting reports based thereon; imposing duties on every Commonwealth agency receiving or disbursing moneys from or on behalf of the Commonwealth; and further regulating the disbursement of moneys from the State Treasury.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Sections two, eight, two hundred four and two hundred six of the act approved the ninth day of April, one thousand nine hundred twenty-nine (P. L. 343), entitled "An act relating to the finances of the State government; providing for the settlement, assessment, collection, and lien of taxes, bonus, and all other accounts due the Commonwealth, the collection and recovery of fees and other money or property due or belonging to the Commonwealth, or any agency thereof, including escheated property and the proceeds of its sale, the custody and disbursement or other disposition of funds and securities belonging to or in the possession of the Commonwealth, and the settlement of claims against the Commonwealth, the resettlement of accounts and appeals to the courts, refunds of moneys erroneously paid to the Commonwealth, auditing the accounts of the Commonwealth and all agencies thereof, of all public officers collecting moneys payable to the Commonwealth, or any agency thereof, and all receipts of appropriations from the Commonwealth and imposing penalties; affecting every department, board, commission, and officer of the State government, every political subdivision of the State, and certain officers of such subdivisions, every person, association, and corporation required to pay, assess, or collect taxes, or to make returns or reports under the laws imposing taxes for State purposes, or to pay license fees or other moneys to the Commonwealth, or any agency thereof, every State depository and every debtor or creditor of the Commonwealth," are hereby amended to read as follows:

Section 2. General Scope of the Act.—This act is intended to define the powers and duties of the Department of Revenue, the Treasury Department, the Department of the Auditor General, the Department of Accountant General, the Secretary of the Commonwealth, the Board of Finance and Revenue, the Board of Fish Commissioners, the Board of Game Commissioners, county treasurers, registers of wills, mercantile appraisers, and other statutory agents, with respect to the collection of taxes and other moneys due the Commonwealth, the custody and disbursement or other disposition of all funds and securi-

ties belonging to or in the possession of the Commonwealth, the maintenance of the accounts of all Commonwealth funds, securities and claims and the rendering of accounting reports based thereon, and the settlement of claims against the Commonwealth.

This act is not intended to change the incidence or amount of any existing tax, license fee, or bonus payable to the Commonwealth, or any agency thereof, under existing law, or to impose any new tax, license fee, or bonus, accruing to the Commonwealth or any agency thereof, nor is it intended to provide for the organization of any department, board, or commission. The organization of all agencies whose powers and duties are defined by this act shall continue to be governed by the Administrative Code and other applicable laws.

Section 8. Payments.—All payments of bonus, taxes, fees or other moneys, now by law required to be made to the Auditor General or to the State Treasurer shall, after the effective date of this act, be made to the State Treasurer either directly or through the Department of Revenue, as provided by this act, no matter by what agency such bonus, taxes, fees or other moneys shall be collected from the person, association, corporation, political subdivision or officer liable to pay them to the Commonwealth or to any officer of the Commonwealth.

Section 204. License Fees.—The Department of Revenue shall have the power, and its duty shall be:

(a) To exercise all of the powers, and perform all of the duties, heretofore exercised and performed by the Department of Highways, or the Secretary of Highways, in connection with the collection of fees for registering and titling motor vehicles and trailers, and for licensing operators of vehicles, and in the collection of fines and penalties imposed upon violators of the laws regulating the registration, titling, and operation of vehicles upon the highways;

(b) To prepare, procure, and supply to the county treasurers of the several counties to be issued by them upon the payment of the fees, if any, prescribed by law;

1. Forms of resident and non-resident fishing license,
2. Fishing license buttons, to be issued in conjunction with resident and non-resident fishing licenses,
3. Forms of resident and non-resident hunters' license certificate,
4. Hunter's license tags, to be issued in conjunction with resident and non-resident hunters' license certificates,
5. Forms of dog license,
6. Dog license tags, to be issued in conjunction with dog licenses, and
7. Forms of kennel license.

The certificates, licenses, buttons and tags, to be furnished by the Department of Revenue to the county treasurers hereunder, shall comply with the requirements of the laws providing for the issuance thereof.

(c) To issue resident and non-resident fishing licenses, and resident and non-resident hunters' licenses, to persons applying to the department therefor, and entitled thereto under the fish and game laws respectively, upon payment of the fees prescribed by law, and after the effective date of this act, such licenses shall be issued only by the county treasurers and by the Department of Revenue; and

(d) If at any time it shall believe the best interests of the Commonwealth would be subserved by so doing, with the approval of the Governor, to discontinue the issuance through the county treasurers of resident and non-resident hunters' licenses, resident and non-resident fishermen's licenses, dog licenses, and kennel licenses, and thereafter to issue all such licenses directly; and

[(e) To receive for transmission to the State Treasury all other license fees of every kind and description collected for the Commonwealth by any statutory agent thereof, or by any administrative department, independent administrative board or commission, or departmental administrative board or commission; and]

(f) To supervise the collection by county officers of any license fees, which it is the duty of such officers to collect as agents of the Commonwealth.

Section 206. Other Collections.—The Department of

Revenue shall have the power, and its duty shall be:

(a) To collect all amounts, payable out of the estates of inmates, for their care and maintenance in State-owned institutions for mental patients, mental defectives, or epileptics, and all amounts payable by other persons, or by political subdivisions of this Commonwealth, or by the Federal Government or any agency thereof, for the care and maintenance in such institutions of persons whose estates are insufficient to enable the entire cost of their care and maintenance to be collected therefrom;

(b) To collect from patients, or from the persons legally liable therefor, all amounts becoming due for the treatment, care, and maintenance of such patients in State-owned hospitals;

(c) To collect from counties and the Federal Government amounts due by them respectively for the cost, or their share of the cost, of maintaining prisoners in State penal or correctional institutions;

(d) To collect all amounts, payable by or for pupils, for instruction and maintenance in State-owned educational institutions, including State normal schools and State teachers' colleges;]

(e) To collect, from political subdivisions of this Commonwealth, all sums payable by them as their share of the cost of improving and rebuilding the highways of the Commonwealth;

(f) To receive, for transmission to the officer of this Commonwealth, if any, specified in the act of Congress appropriating the money, and if no officer be thus designated, to the State Treasurer, any moneys contributed by the Federal Government to this Commonwealth or any agency thereof for any purpose;]

(g) To collect from magistrates, aldermen, justices of the peace, burgesses, and mayors, all fines and penalties imposed by them for violations of acts of Assembly, and payable into the State Treasury, or to any department, board, or commission of the State Government;

(h) Except as otherwise in this act provided, to collect all other revenues of any kind or description payable to the Commonwealth, [In all cases in which existing laws provide that any moneys collectible under this section] except in cases where the law provides that the moneys

collectible shall be payable to any other department, or to any board, commission, or officer of the State Government. [the Department of Revenue shall act as agent of such department, board, commission, or officer in making collection of such moneys.]

Section 2. Sections two hundred nine, two hundred ten and three hundred four of said act, as amended by the act approved the first day of June, one thousand nine hundred thirty-one (Pamphlet Laws 318), are hereby further amended to read as follows:

Section 209. Transmission of Moneys.—All moneys received by the Department of Revenue during any date shall be transmitted promptly to the Treasury Department, and the Treasury Department shall forthwith issue its receipt to the Department of Revenue for such moneys, and credit them to the fund and account designated by the Department of Revenue.

Detailed statements of all moneys received shall be furnished to the Treasury Department [and], the Department of the Auditor General and the Department of Accountant General contemporaneously with the transmission of such moneys to the Treasury Department.

Section 210. Agents of Department of Revenue for the Collection of Money.—The Department of Revenue shall have authority to appoint agents in any place within this Commonwealth for the collection of moneys due the Commonwealth, except taxes and fees now collectible by county officers and except fees and other moneys collectible by other departments, boards and commissions, and which, under the provisions of this amendment, are to be transmitted directly to the Treasury Department.

To facilitate the collection of [money from persons who are inmates, patients, or pupils of State institutions, or who have business with administrative departments, boards, or commissions, such agents shall be placed in

every such institution, including State normal schools and teachers' colleges, and in the offices of such departments, boards, or commissions.] moneys which the Department of Revenue is required by this act to collect through certain administrative departments, boards and commissions, from inmates or patients of State institutions, or from persons having business with those departments, boards, or commissions, such agents shall be placed in every such institution and in the offices of those departments, boards and commissions. It shall be lawful for the Secretary of Revenue to designate any regular of any such administrative department, board, or commission with the consent of [such] the department, board, or commission, as the agent of the Department of Revenue for the collection or receipt of money, but no regular employe thus designated by the Secretary of Revenue shall receive any extra compensation for acting as such agent, except with the approval of the Executive Board.

For all moneys collected by its agents, such agents shall issue receipts on behalf of and in the manner prescribed by the Department of Revenue, except that, where money is paid for the issuance of a license or certificate, no receipt shall be issued unless the Department of Revenue so determines.

All agents shall furnish the Department of Revenue with detailed statements of all moneys received, collected, and transmitted, and shall keep records of the amounts owing to or due the Commonwealth and such other records as shall be required by the Department of Revenue. The form of all such statements and records shall be prescribed by the Department of Revenue.

All agents of the Department of Revenue shall be bonded, in such amounts as shall be determined by the Secretary of Revenue with the approval of the Executive Board, and the Secretary of Revenue shall be responsible for the actions of employes of other departments, boards, and commissions, designated by him as agents of the Department of Revenue, to the same extent to which he is responsible for the actions of employes of his own department.

Section 304. Interest on Deposits; Rate; Reports.—It shall be the duty of the Treasury Department to collect from all State depositories interest on State deposits. Active and inactive depositories shall pay interest at such rates as shall be prescribed by the Board of Finance and Revenue except that, if an active account is opened in an inactive depository by a department other than the Treasury Department, or by a board or commission, the rate of interest thereon may, with the approval of the Board of Finance and Revenue, be reduced to that payable by active depositories. Interest on deposits shall in all cases be credited to the fund upon which the interest was earned, except that interest on deposits of the Liquid Fuels Tax Fund shall be credited to the Motor License Fund, and interest on deposits of the Fire Insurance Tax Fund shall be credited to the State Insurance Fund.

Interest payable hereunder shall become due semi-annually, on the thirtieth day of June, and the thirty-first day of December, each year, and it shall be the duty of every bank, banking institutions, and trust company, acting as a State depository, to make an interest report, relative to its State deposits, to the Treasury Department, in triplicate, within thirty days after the dates above set forth. The Treasury Department shall retain one copy of the report, transmit one to the Department of the Auditor General for audit, and the third and fourth respectively to the [Department of Revenue] Department of Accountant General for its information.

If any bank, banking institution, or trust company shall, within thirty days after the end of any interest period, fail to make such report for such period, the Treasury Department shall certify that fact to the [Department of Revenue] Department of Accountant General with such information as shall enable that department to settle and collect the penalty hereinafter in this act provided.

Section 3. Sections three hundred five and three hundred six of said act are hereby amended to read as follows:

Section 305. Receipts.—It shall be the duty of the Treasury Department to issue its receipt to [the Department of Revenue] any department, board, or commission for all moneys transmitted by [the Department of Revenue] that department, board, or commission to the Treasury Department.

Section 306. [Audit of Requisitions and] Adjustment of Claims.—The Treasury Department shall cooperate with the Department of Auditor General and the Department of Accountant General in the examination and [audit of requisitions for disbursements, and in the examination and] adjustment of claims against the Commonwealth, as hereinafter in this act provided.

Section 4. Section three hundred seven of said act as amended by the act approved the nineteenth day of June, one thousand nine hundred forty-one, (Pamphlet Laws 139), is hereby further amended to read as follows:

Section 307. Disbursements.—No money shall be paid from any of the funds of the State Treasury, except upon [warrant of the Auditor General issued upon requisition pursuant to law] requisitions which have been approved or prepared by the Accountant General except moneys in the State Workmen's Insurance Fund, which may be disbursed by check of the State Treasurer upon requisition of the Secretary of Labor and Industry and except moneys in the Surplus Commodities Stamp Fund which may be disbursed by check of the State Treasurer upon requisition of the Secretary of Public Assistance.

Section 5. Section four hundred three of said act is hereby amended to read as follows:

Section 403. Audits of Agencies Receiving State Aid.—The Department of the Auditor General shall have the power, and its duty shall be, to audit the accounts and records of every person, association, corporation, and public agency, receiving an appropriation of money, payable out of any fund in the State Treasury, or entitled to receive any portion of any State tax for any purpose whatsoever, as far as may be necessary to satisfy the department that the money received was expended [or is being expended] for no purpose other than that for which it was paid. Copies of all such audits shall be furnished to the Governor.

If at any time the department shall find that any money received by any person, association, corporation, or public agency, has been expended for any purpose other than that for which it was paid, it shall forthwith notify the Governor [and shall decline to approve any further] and the Accountant General. The Accountant General shall not approve any requisition for the payment of any appropriation, or any further portion of any State tax, to such person, association, corporation or public agency, until an amount equal to that improperly expended shall have been expended for the purpose for which the money improperly expended was received from the State Treasury.

Section 6. Section four hundred four of said act is hereby repealed.

Section 7. Said act is hereby amended by adding immediately following Article IV thereof, a new Article to read as follows:

Article IV-A

DEPARTMENT OF ACCOUNTANT GENERAL

Section 401-A. Modern Integrated System of Accounts.

(a) The Department of Accountant General shall install and maintain a modern integrated system of accounts conforming to and consistent with proper governmental accounting standards. The accounting system shall reflect, on an accrual basis, the financial condition and operation of the Commonwealth and all the agencies receiving or disbursing moneys, from or on behalf, of the Commonwealth.

(b) Such system of accounts shall also: (1) distinguish technically between capital and revenue expenditures; (2) include a complete system of proprietary and corollary budgetary accounts; (3) treat each statutory fund as an entity and recognize trust, agency, special purpose and working capital funds as well as the general operating fund; (4) provide for the recording of all encumbrances at the time created by Commonwealth commitments against the appropriation or fund affected.

(c) Such system of accounts shall make uniform application and use of the detailed code of accounts to be prescribed by the Accountant General as hereinafter provided.

(d) Commonwealth activities similar to private enterprises in operation shall be treated as such in so far as the application of such system of accounts is concerned.

Section 402-A. Accounts and Reports of Commonwealth Agencies; Code and Manual of Accounts.

(a) The Department of Accountant General shall in conformity with the modern integrated system of accounts hereinbefore set forth supervise and direct the form, manner and content of accounts to be kept by any Commonwealth agency and the form, manner of accounting reports and statements to be rendered by such agency.

(b) For such purpose, the Department of Accountant General shall prepare and keep up to date for the use of all such Commonwealth agencies a code of accounts, either numerical, alphabetical or both, and a manual of accounts setting forth the nature of the integrated system of accounts, the definitions and classifications of each account therein in such form as it shall prescribe, and types of statements to be submitted to it and the methods for their preparation.

(c) The Department of Accountant General shall prescribe and it shall be the duty of each Commonwealth agency to furnish the department with reports of all financial claims against the Commonwealth or accruing to the Commonwealth against others and any other financial data actual or contingent which the department deems necessary to the conduct of its office.

Section 403-A. Quarterly Statements by Accountant General and Commonwealth Agencies.

(a) Within thirty (30) days after the end of each quarter of the fiscal year, the Accountant General shall have prepared a complete statement of the financial condition and operation of the Commonwealth which shall be both current for the preceding quarter and cumulative for the then current fiscal biennium.

(b) In respect to the financial condition of the Commonwealth, such statement shall show the financial condition of each of the component funds.

(c) In respect to the financial operation of the Commonwealth, such statement shall show the actual financial condition and operation, as compared with the projected budgeted financial condition and appropriations respecting operations of each Commonwealth agency.

(d) Within thirty (30) days after the end of each fiscal year the Accountant General shall submit one copy of such statement to the Governor, one to the General Assembly when in session or to the Joint State Government Commission when the General Assembly is not in session, and shall make available such statement for the information of the general public.

(e) The provisions of subsections (a), (b), (c), and (d)

of this section shall not be mandatory upon the Accountant General until the first first day of June, one thousand nine hundred fifty-two.

(f) It shall be the duty of every Commonwealth department and agency keeping accounts to transmit to the Accountant General not later than the fifteenth day of every month such statements as the Account General may require.

Section 404-A. Approval of Requisitions for Disbursement.

The Department of Accountant General shall carefully examine all requisitions submitted to it for approval for the payment of money by the State Treasurer, out of any fund of the State Treasury, and shall approve the same for payment only if such expenditures are (1) in conformity with the budget appropriations and allocations set aside therefor consistent with the financial records maintained by the department, (2) within the functions of the source requesting the expenditure, (3) properly vouchered and (4) for value received. Payment shall be made by the State Treasurer on such requisitions only after approval by the Accountant General.

Section 405-A. Mandamus.—The Accountant General shall have the power and it shall be his duty to bring an action of mandamus to enforce compliance with the powers and duties of the department.

Section 8. Sections six hundred two and six hundred five of said act, are hereby amended to read as follows:

Section 602. Insurance Commissioner to Collect Fees, Fines and Penalties.—The Insurance Commissioner shall continue to collect all fines and penalties, which he is now authorized to impose and collect, and all license and other fees which he is authorized by law to collect from persons, associations, and corporations, subject to the jurisdiction of the Insurance Department. [but the Department of Revenue shall assign to the Insurance Department an agent, or designate an employee of the Insurance Department as its agent, for the purpose of receiving] and all such fees, fines, and penalties shall be promptly transmitted to the Treasury Department.

Section 605. Other Departments, Boards, and Commissions of the State Government to Continue to Collect Certain Fees, Et Cetera.—[Subject to any inconsistent provisions elsewhere in this act contained.] Except as otherwise provided in this act every administrative department, every independent administrative board or commission, and every departmental administrative board or commission of the State Government, which is authorized by law to collect any [taxes,] fees, charges, or other moneys, except taxes payable to such department, board, or commission, for its use, or for the use of the Commonwealth for registrations, licenses, examinations, inspections, services rendered, permits, or any other purpose or reason whatsoever, shall continue to collect such [taxes,] fees, charges, or other moneys, and, subject as aforesaid, shall continue to collect all fines, penalties, and bail forfeited, which it is authorized by law to collect. [but the] All such moneys shall be promptly transmitted directly to the Treasury Department. The Department of Revenue shall assign an agent to any [such] department, board, or commission, [an agent] in or through which it is required under the provisions of this act to collect any moneys, or designate as its agent an employee of such department, board, or commission, for the purpose of receiving all moneys payable to such department, board, or commission.

Section 9. Sections twelve hundred nine and twelve hundred ten of said act as amended by the act of June first one thousand nine hundred thirty-one (Pamphlet Laws 318) are hereby further amended to read as follows:

Section 1209. Collection of Amounts payable to Certain State Institutions.—The Department of Revenue shall place its agent in every State institution except State-owned educational institutions including State Normal schools and State Teachers' colleges, for the purpose of collecting all moneys due to such institutions from patients, [pupils,] inmates, or the estate of such patients, [pupils] or inmates, or from any political subdivision of this Commonwealth, including [school districts, and] poor districts, [or from the Federal Government,] or from any other person, association, corporation, or public agency whatsoever, for care, treatment, instruction, maintenance, or any other expense, chargeable for or on account of such patients, [pupils,] or inmates.

All bills rendered hereunder shall be in the style, "Commonwealth of Pennsylvania, Department of Revenue, Agent for the Collection of Moneys Owning to (name of institution or its board of trustees)."

All such bills shall be due when rendered, and shall bear interest at the rate of six per centum per annum from thirty days after their date.

Section 1210. Collections Made by Departments, Boards and Commissions Other Than the Department of Revenue.—[All] Except as otherwise provided in this act all collections of every kind and description, which any department, board, or commission of the State Government is by this act authorized to continue to make, shall be [turned over] transmitted immediately upon the receipt thereof [to the agent of the Department of Revenue assigned to or designated in such department, board, or commission,] directly to the Treasury Department.

Copies of all bills rendered by every department, board, and commission shall be forwarded to the Department of the Auditor General and to the Department of [Revenue] Accountant General not later than the business day following their date.

Section 10. Article 12 of said act is hereby amended by adding immediately after Section twelve hundred ten, a new section to read as follows:

Section 1211. Detailed statements of all moneys received by any department, board, or commission, other than the Department of Revenue, shall be furnished to the Treasury Department, the Department of Accountant General and the Department of Auditor General contemporaneously with the transmission of such moneys to the Treasury Department.

Section 11. Section one thousand five hundred one of said act as amended in part by the act approved the nineteenth day of June, one thousand nine hundred forty-one (Pamphlet Laws 139) is hereby further amended to read as follows:

Section 1501. Requisitions.—No money shall be paid out of any fund in the State Treasury, except the State Workmen's Insurance Fund and except the Surplus Commodities Stamp Fund, until a requisition therefor shall have been presented to or prepared by the [Auditor General.] Accountant General.

For money appropriated to the Governor or to the Executive Board, the Governor shall prepare requisitions and present them to the Department of [Auditor General.] Accountant General.

For money appropriated to the Lieutenant Governor he shall prepare requisitions and present them to the Department of [the Auditor General.] Accountant General.

For money appropriated to administrative departments, or to independent administrative boards or commissions, the respective departments, boards, or commissions, shall prepare their requisitions and present them to the Department of [the Auditor General.] Accountant General.

For money appropriated to departmental administrative boards or commissions, or advisory boards or commissions, such boards or commissions shall prepare requisitions, and forward them to the departments with which they are respectively connected. Such departments, if they ap-

prove the requisitions, shall so signify in writing and shall transmit them to the Department of [the Auditor General.] Accountant General. No requisition of a departmental administrative board or commission, or of an advisory board or commission, shall be valid without the approval in writing of the department with which such board or commission is connected.

For money appropriated to a person, association, corporation, or agency, not a part of the executive branch of the State Government, the person, association, corporation, or agency, to whom or to which the appropriation was made, shall prepare requisitions and present them to the Department of [the Auditor General.] Accountant General, but whenever, in any such case, any other act of Assembly requires the requisition to be approved by an administrative department of the State Government, other requires the requisition to be approved by an administrative department of the State Government, other than the Department of [the Auditor General.] Accountant General, it shall be forwarded to the Department of [the Auditor General.] Accountant General through such other administrative department.

For money appropriated for a purpose, without designation of the expending agency, the Department of [the Auditor General.] Accountant General shall prepare requisitions.

Section 12. Said act is hereby amended by adding between sections one thousand five hundred one and one thousand five hundred two thereof a new section to read as follows:

Section 1501.1. Approved Requisitions Forwarded to Treasurer.—All approved requisitions for the payment of any money out of any fund of the State Treasury shall be forwarded by the Accountant General to the State Treasurer for payment.

Section 13. Section one thousand five hundred two of said act is hereby amended to read as follows:

Section 1502. [Audit of Requisitions and Issuance of Warrants.—All requisitions shall be audited by the Department of the Auditor General, and, if they appear to be lawful and correct, the department shall approve them and transmit them to the Treasury Department for examination and approval. Otherwise, they shall be returned to the source from which they came for revision, correction, or cancellation.

If the Treasury Department shall approve a requisition, which has been approved by the Department of the Auditor General, it shall note its approval thereon in writing and return the same to the Department of the Auditor General. Thereupon the Auditor General shall draw his warrant upon the State Treasurer for the payment of the amount in which the requisition has been approved.

If, on the other hand, the Treasury Department shall disapprove such requisition, in whole or in part, it shall note its disapproval in writing, together with its reasons for disapproval, and shall return the requisition to the Department of the Auditor General, and thereupon the Department of the Auditor General shall reconsider its approval.

If the Treasury Department shall have entirely disapproved of the requisition, and, upon reconsideration, the Department of the Auditor General shall agree with such action, the requisition shall be returned to the source from which it came, together with a written statement from the Department of the Auditor General explaining why the requisition has been disapproved.

If the Treasury Department has approved a requisition in part only, and, upon reconsideration, the Department of the Auditor General shall agree with the Treasury Department that the requisition should be approved in part only, it shall modify its prior approval of the requisition, and the Auditor General shall issue his warrant on the State Treasurer for the amount in which both departments have approved the requisition.

If the Department of the Auditor General, upon reconsideration, shall be unable to agree with the views of the Treasury Department, it shall lay before the Governor

the requisition, together with all the papers and correspondence attached or appertaining thereto, and the Governor shall decide the issue raised between the two departments. Should the Governor determine that the requisition ought to be approved in whole or in part, it shall be the duty of the Auditor General to issue his warrant in accordance with the directions of the Governor. Should the Governor determine that the requisition ought to be disapproved, the Department of the Auditor General shall, upon receiving it from the Governor, return it to the source from which it came, with a written statement of the reasons for which it was disapproved.]

Disapproval of Requisitions—Appeal to Governor.—If the Accountant General disapproves a requisition from any department or agency, he shall return the requisition and advise the department or agency in writing stating reasons for his action and it shall be the privilege of the department or agency to appeal the decision to the Governor whose decision shall be final.

Should the Governor disapprove the action of the Accountant General in whole or part, it shall be the duty of the Accountant General to act in accordance with the directions of the Governor.

Section 14. Subsection (b) of section one thousand five hundred three of said act, as amended by the act, approved the sixth day of June, one thousand nine hundred thirty-nine (Pamphlet Laws 261), is hereby further amended to read as follows:

Section 1503. Payment.—* * * *

(b) All payments out of the several funds in the State Treasury appropriated for public assistance shall be made by check of a form prescribed and furnished by the Treasury Department, but filled in as to name of payee and amount by the Department of Public Assistance. As soon after the effective date of this act as practicable but not later than sixty (60) days after such date, the Department of Public Assistance shall requisition the Treasury Department for supplies of serially numbered blank checks upon which to prepare disbursements for public assistance grants, and shall give its receipt to the Treasury Department for such blank checks, provided the Department of Public Assistance shall thereupon enter the name and address of the payee and the amount of payment and such other information as shall be necessary, after which it shall prepare a requisition on the [Auditor General] Accountant General in the total amount of such checks, and the [Auditor General] shall issue his warrant on the Treasury Department in the same total amount.] Accountant General shall approve same for payment. Upon receipt of [this warrant,] the approved requisition, the Treasury Department shall sign and mail the checks to the payees designated thereon. This procedure shall be followed in Harrisburg and at such points outside the City of Harrisburg as the Governor shall determine.

Section 15. Section one thousand five hundred four of said act as last amended by the act, approved the twenty-eighth day of June, one thousand nine hundred forty-seven (Pamphlet Laws 1006), is hereby further amended to read as follows:

Section 1504. Advances Out of Appropriations.—Whenever an appropriation shall have been made to any department, board, or commission of the State Government, or to the board of trustees or other agency in charge of any semi-State institution, which is intended for expenses of such a nature as to make it impracticable for such department, board, commission, board of trustees, or agency to file with the Department of [the Auditor General] Accountant General itemized receipts or vouchers prior to the payment of such expenses, upon requisition [and warrant] in the usual way, such department, board, commission, board of trustees, or other agency, may make requisition upon the [Auditor General,] Accountant General, from time to time, for such sum or sums of the appropriation as may be necessary to meet such expenses, and the [Auditor General] Accountant

General shall [draw his warrant upon the State Treasurer] approve the requisition for such sum or sums, to be paid by the State Treasurer out of the appropriation. The total amount of requisitions for advancements from any appropriation less the total amount of property itemized receipts or vouchers filed with the [Auditor General] Accountant General accounting for such advancements shall never exceed an amount approved by the Governor nor shall it in any case exceed the amount of the bond of the officers or individual having control of the disbursements from the funds advanced.

Requisitions for advances hereunder to any departmental administrative board or commission, must be approved by the department with which such board or commission is connected prior to the presentation thereof to the [Auditor General] Accountant General.

Any department, board, commission, board of trustees, or agency, having received an advance hereunder shall,

(1) Whenever required by the [Auditor General] Accountant General, file specifically itemized vouchers, in such form as may be prescribed by him, accounting for all money expended out of such advance;

(2) At the end of the appropriation period, return to the State Treasury all unexpended balances of such advance, before any advance shall be made out of any succeeding appropriation or requisition, the [Auditor General] Accountant General to credit the expiring appropriation, and charge the new appropriation with the exact amount of cash on hand at end of the period: Provided, That advances to local county boards of assistance under the Public Assistance Law for reasonable emergency funds may be made before unexpended balances of advancements out of any previous appropriation are actually returned by such boards to the State Treasury;

(3) Deposit all moneys advanced, in the name of the Commonwealth, in a State depository, and certify the name thereof to the State Treasurer.

Section 16. Section one thousand five hundred five of said act is hereby amended to read as follows:

Section 1505. Advance to State Agencies Having Funds to Invest.—Whenever any administrative department, board, or commission, whose duty it is to invest funds in securities, shall desire to bid for the whole or any part of a bond issue for which bids are invited by the issuer thereof, and the invitation to bidders requires the deposit of a check or a certified check in order to validate all bids, the department, board, or commission, having the funds to invest, and having procured the approval of the Governor in writing to the bid which it proposes to make, may requisition the [Auditor General] Accountant General for such amount, payable out of the fund to be invested, as shall be necessary to validate the bid which such department, board, or commission proposes to make.

In each such case, it shall be the duty of the [Auditor General] Accountant General promptly to [draw his warrant,] approve the requisition, and of the State Treasurer promptly to issue a check, and, if necessary, have it certified by the depository against which it is drawn, in favor of the issuer of the securities in the amount of the requisition.

It shall be unlawful for any department, board, or commission to make any use of any such check, otherwise than for the purpose for which it was issued, and, if such department's, board's or commission's bids shall not be accepted, the check shall forthwith be returned to the State Treasurer for cancellation.

Section 17. All acts and parts of acts are hereby repealed in so far as they are inconsistent with the provisions of this act.

Where any law provides that a warrant or warrants shall be drawn upon the Auditor General or by the Auditor General, for the payment of money out of the State Treasury, it is the intent of this act that in lieu of such warrant, a requisition shall be submitted to the Accountant General for approval, or shall be issued by the Account-

ant General as the case may be, for the payment of such money by the State Treasurer.

Section 18. The provisions of this act shall become effective the first day of June, one thousand nine hundred fifty-one.

AN ACT

To amend section 8 of the act, approved the thirty-first day of March, one thousand nine hundred forty-nine (Pamphlet Laws 372), entitled "An act to promote the welfare of the people of the Commonwealth; creating the General State Authority as a body corporate and politic with power to construct, improve, equip, furnish, and operate projects, and to lease the same, and to fix fees; rentals, and charges for the use thereof; authorizing and regulating the issuance of bonds for said Authority, and providing for the payment of such bonds, and the rights of the holders thereof; and to enter into agreements with the Government of the United States or any Federal agency; and authorizing the Department of Property and Supplies to grant, assign, convey, or lease to the Authority lands of the Commonwealth and interests therein, and to acquire lands therefor; granting the right of eminent domain; empowering The General State Authority to sell and convey projects and property to the Commonwealth; and providing that no debt of the Commonwealth shall be incurred in the exercise of any of the powers granted by this act," by authorizing the Department of the Accountant General to examine the accounts and books of the Authority.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Section 8 of the act, approved the thirty-first day of March, one thousand nine hundred forty-nine (Pamphlet Laws 372), entitled "An act to promote the welfare of the people of the Commonwealth; creating the General State Authority as a body corporate and politic with power to construct, improve, equip, furnish, and operate projects and to lease the same, and to fix fees, rentals, and charges for the use thereof; authorizing and regulating the issuance of bonds for said Authority, and providing for the payment of such bonds, and the rights of the holders thereof; and to enter into agreements with the Government of the United States or any Federal agency; and authorizing the Department of Property and Supplies to grant, assign, convey, or lease to the Authority lands of the Commonwealth and interests therein, and to acquire lands therefor; granting the rights of eminent domain; empowering The General State Authority to sell and convey projects and property to the Commonwealth; and providing that no debt of the Commonwealth shall be incurred in the exercise of any of the powers granted by this act," is hereby amended to read as follows:

Section 8. Moneys of the Authority.—All moneys of the Authority, from whatever source derived, shall be paid to the treasurer of the Authority. Said moneys shall be deposited in the first instance by the treasurer in one or more banks or trust companies, in one or more special accounts, and each of such special accounts shall be continuously secured by a pledge of direct obligations of the United States of America, of the Commonwealth, or of the county, having an aggregate market value, exclusive of accrued interest, at all times at least equal to the balance on deposit in such account. Such securities shall either be deposited with the treasurer or be held by a trustee or agent satisfactory to the Authority. All banks and trust companies are authorized to give such security for such deposits. The moneys in said accounts shall be paid out on the warrant or other order of the treasurer of the Authority or of such other person or persons as the Authority may authorize to execute such warrants or orders. The Department of [Revenue] the Accountant General of the Commonwealth and its legally authorized representatives, are hereby authorized and empowered from time to time to examine the accounts and books of the Authority, including its receipts, disbursements, contracts, leases, sinking funds, investments, and any other matters relating to its finances, operation, and affairs.

AN ACT

To amend section 9, of the act, approved the eighteenth day of April, one thousand nine hundred forty-nine (Pamphlet Laws 604), entitled "An act to promote the welfare of the people of the Commonwealth; creating a State Highway and Bridge Authority as a body corporate and politic with power to construct, reconstruct, improve, maintain, equip, furnish and operate highway and bridge projects, and roadside rests, and to lease the same, and to fix and collect fees, rentals, and charges for the use thereof; authorizing and regulating the issuance of bonds by said Authority, and providing for the payment of such bonds and the rights of the holders thereof; and to enter into agreements with the Government of the United States or any Federal agency; and authorizing the Department of Highways to grant, assign, convey, or lease to the Authority lands, easements, or rights of way of the Commonwealth and interests therein, and to acquire lands therefor; authorizing said Authority and the Department of Highways to enter into agreements providing for mutual cooperation in furtherance of the construction of any project hereby authorized; granting the right of eminent domain; empowering said Authority to sell and convey projects and property to the Commonwealth; and providing that no debt of the Commonwealth or any of its political subdivisions shall be incurred in the exercise of any of the powers granted by this act; and making an appropriation," by authorizing the Department of the Accountant General to examine the accounts and books of the Authority.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Section 9 of the act, approved the eighteenth day of April, one thousand nine hundred forty-nine (Pamphlet Laws 604), entitled "An act to promote the welfare of the people of the Commonwealth; creating a State Highway and Bridge Authority as a body corporate and politic with power to construct, reconstruct, improve, maintain, equip, furnish and operate highway and bridge projects, and roadside rests, and to lease the same, and to fix and collect fees, rentals, and charges for the use thereof; authorizing and regulating the issuance of bonds by said Authority, and providing for the payment of such bonds, and the rights of the holders thereof; and to enter into agreements with the Government of the United States or any Federal agency; and authorizing the Department of Highways to grant, assign, convey, or lease to the Authority lands, easements, or rights of way of the Commonwealth and interests therein, and to acquire lands therefor; authorizing said Authority and the Department of Highways to enter into agreements providing for mutual cooperation in furtherance of the construction of any project hereby authorized; granting the right of eminent domain; empowering said Authority to sell and convey projects and property to the Commonwealth; and providing that no debt of the Commonwealth or any of its political subdivisions shall be incurred in the exercise of any of the powers granted by this act; and making an appropriation," is hereby amended to read as follows:

Section 9. Moneys of the Authority.—All moneys of the Authority, from whatever source derived, shall be paid to the treasurer of the Authority. Said moneys shall be deposited in the first instance by the treasurer in one or more banks or trust companies in one or more special accounts and each of such special accounts shall be continuously secured by a pledge of direct obligations of the United States of America, of the Commonwealth or of a county of the Commonwealth having an aggregate market value, exclusive of accrued interest, at all times, at least equal to the balance on deposit in such account. Such securities shall either be deposited with the treasurer or be held by a trustee or agent satisfactory to the Authority. All banks and trust companies are authorized to give such security for such deposits. The moneys in said accounts shall be paid out on the warrant or other order of the treasurer of the Authority or of such person or persons as the Authority may authorize to execute such

warrants or orders. The Department of [Revenue] the Account General of the Commonwealth or its legally authorized representatives are hereby authorized and empowered from time to time to examine the accounts and books of the Authority, including its receipts, disbursements, contracts, leases, sinking funds, investments and any other matters relating to its finances, operation and affairs.

AN ACT

To further amend section 9 of the act, approved the fifth day of July, one thousand nine hundred forty-seven (Pamphlet Laws 1217), entitled "An act to promote the education and educational facilities of the people of the Commonwealth of Pennsylvania; creating a State Public School Building Authority as a body corporate and politic with power to construct, improve and operate projects and to lease the same and to fix and collect fees, rentals, and charges for the use thereof; authorizing school districts to enter into contracts to lease; authorizing and regulating the issuance of bonds by said Authority; and providing for the payment of such bonds and the rights of the holders thereof; granting the right of eminent domain; increasing the powers and duties of the Department of Public Instruction; and providing that no debt of the Commonwealth shall be incurred in the exercise of any of the powers granted under this act, and making an appropriation to said Authority to pay expenses incident to its formation," by authorizing the Department of the Accountant General to examine the accounts and books of the Authority. The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Section 9 of the act, approved the fifth day of July, one thousand nine hundred forty-seven (Pamphlet Laws 1217), entitled "An act to promote the education and educational facilities of the people of the Commonwealth of Pennsylvania; creating a State Public School Building Authority as a body corporate and politic with power to construct, improve and operate projects and to lease the same and to fix and collect fees, rentals and charges for the use thereof; authorizing school districts to enter into contracts to lease; authorizing and regulating the issuance of bonds by said Authority; and providing for the payment of such bonds and the rights of the holders thereof; granting the right of eminent domain; increasing the powers and duties of the Department of Public Instruction; and providing that no debt of the Commonwealth shall be incurred in the exercise of any of the powers granted under this act; and making an appropriation to said Authority to pay expenses incident to its formation," as amended by the act, approved the twentieth day of April, one thousand nine hundred forty-nine (Pamphlet Laws 636), is hereby further amended to read as follows:

Section 9. Moneys of the Authority.—All moneys of the Authority from whatever source derived shall be paid to the treasurer of the Authority. Said moneys shall be deposited in the first instance by the treasurer in one or more banks or trust companies in one or more special accounts, and each of such special accounts shall be continuously secured by a pledge of direct obligations of the United States of America, or of the Commonwealth, having an aggregate market value, exclusive of accrued interest, at all times at least equal to the balance on deposit in such account. Such securities shall either be deposited with the treasurer, or be held by a trustee or agent satisfactory to the Authority. All banks and trust companies are authorized to give such security for such deposits. The moneys in said accounts shall be paid out on the warrant or other order of the treasurer of the Authority, or of other person or persons as it may authorize, to execute such warrants or orders. The Department of [Revenue] the Accountant General of the Commonwealth and its legally authorized representatives are hereby authorized and empowered from time to time to examine the accounts and books of the Authority, including its receipts, disbursements, contracts, leases, sinking funds, investments, and any other matters relating to its finances,

operations and affairs. All moneys of the Authority, from whatever source derived, except such part thereof as may be required to pay the administrative and other costs of operating the Authority, as may be provided for in the resolution authorizing the issuance of the bonds or in the trust indenture, shall be set aside at such regular intervals as may be provided in such resolution or such trust indenture in a sinking fund, which is hereby pledged to, and charged with, the payment of (1) the interest upon such bonds as such interest shall fall due, (2) the principal of the bonds as the same shall fall due, (3) the necessary fiscal agency charges for paying principal and interest, and (4) any premium upon bonds retired by call or purchase, as herein provided. The use and disposition of such sinking fund shall be subject to such regulations as may be provided in the resolution authorizing the issuance of bonds or in the trust indenture, but except as may otherwise be provided in such resolution or trust indenture, such sinking fund shall be a fund for the benefit of all bonds issued hereunder, without distinction or priority of one over another. Subject to the provisions of the resolutions authorizing the issuance of bonds or of the trust indenture, any moneys in such sinking fund in excess of an amount equal to one year's interest on all bonds then outstanding may be applied to the purchase or redemption of bonds. All bonds so purchased or redeemed shall forthwith be cancelled and shall not again be issued.

COMMONWEALTH SPACE REQUIREMENTS IN PITTSBURGH AND PHILADELPHIA

A REPORT OF THE JOINT STATE GOVERNMENT COMMISSION TO THE GENERAL ASSEMBLY

OF THE

COMMONWEALTH OF PENNSYLVANIA, SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

Pursuant to House Concurrent Resolution No. 74, Session of 1949, there is presented herewith a report dealing with space requirements of the Commonwealth in the cities of Pittsburgh and Philadelphia.

The report takes cognizance of the magnitude, geographic location and present rental costs of office space utilized by various Commonwealth agencies in these cities. Heads of Commonwealth departments, boards, agencies and commissions have been polled concerning the desirability of combining Commonwealth operations in Pittsburgh and in Philadelphia.

In accordance with Act of 1943, March 8, P. L. 13, Section 1, the Commission created a subcommittee to facilitate this study of Commonwealth space requirements outside the city of Harrisburg.

On behalf of the Commission the cooperation of the members of the subcommittee is gratefully acknowledged.

BAKER ROYER, Chairman

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Replies to Questionnaire on Departmental Space Requirements and Advisability of Consolidation with Other State Agencies in the Same Area—January, 1950

Section I

INTRODUCTION

The requirements of the Commonwealth for office space in Philadelphia and Pittsburgh have been the subject of frequent discussion.¹

As regards Commonwealth requirements for office space, it may be noted that the General Assembly of 1937 attempted to solve the problem by the Act of 1937, July 1, P. L. 2687, which provided:

¹ See, for instance, "Report on a Proposed State Office Building," Philadelphia City Planning Commission, Sept., 1949; A. S. Fought, "New Quarters for State Courts in Philadelphia," The Shingle, January, 1947.

"That the Secretary of Property and Supplies, with the approval of the Governor, shall have power to enter into contract with any person, firm, or corporation which shall agree to erect within the city of Pittsburgh or the county of Allegheny, or within the county of Philadelphia, at a location suitable to the Governor and the Secretary of Property and Supplies a suitable office building in each of the respective counties above mentioned, for the use of agencies of the Commonwealth, and to agree, on behalf of the Commonwealth of Pennsylvania to lease said building for a period of thirty years from the time of the completion thereof, at such rental and subject to such terms and conditions as may be agreed upon. No such contract shall be entered into until the plans and specifications for such proposed building shall have been approved by the Department of Property and Supplies. Any such contract shall provide that upon the termination of said thirty year lease the building so constructed and the ground upon which the same is situated shall become the property of the Commonwealth."

The 1937 Act, which was not given administrative effect, was amended in 1945 to read as follows:

"That the Secretary of Property and Supplies, with the approval of the Governor, shall have power to enter into contract with any person, firm, or corporation which shall agree to lease within the city of Pittsburgh or the county of Allegheny, or within the city of Philadelphia or county of Philadelphia, at a location suitable to the Governor and the Secretary of Property and Supplies, a suitable office building in each of the respective counties above mentioned, for the use of agencies of the Commonwealth, and to agree on behalf of the Commonwealth of Pennsylvania, to lease said building for a period of not more than thirty years, at such rental and subject to such terms and conditions as may be agreed upon, and any such contract shall provide that upon the termination of said thirty year lease the building so leased and the ground on which the property is situated shall become the property of the Commonwealth, and any such lease shall provide that at any time during the period of said lease the Commonwealth is empowered to accept title in fee simple to any such land building under said lease: Provided, That no additional moneys are paid in consideration for the said deed." (1945, May 22, P. L. 854.)

In addition, the General Assembly of 1945 (1945, June 4, P. L. 1395) authorized the Department of Property and Supplies, with the approval of the Governor, "to acquire, by purchase or condemnation, land or land and buildings in the city of Philadelphia, and within the city of Pittsburgh, or the county of Allegheny, for the purpose of obtaining or constructing suitable office buildings for the use of the Commonwealth."

The sum of \$1,500,000 was appropriated to carry out the purpose of this act.

The Act of 1945, June 4, was repealed by the Act of 1947, July 7, P. L. 1196.

As of November, 1950, the permissive legislation of July 1, 1937, as amended by the Act of 1945, May 22, had not resulted in the consummation of a lease in either metropolitan area.

Section II

COMMONWEALTH SPACE REQUIREMENTS

With a view to providing a factual basis for judgments, the Commission has compiled, for both Pittsburgh and Philadelphia, the following data relating to office space requirements:

1. Names of departments and other Commonwealth agencies renting office space.
2. Number of square feet rented by departments and other agencies of the Commonwealth.
3. Price of rented space, per square foot.

4. Geographic location of rented space.

5. Attitude of departments and other Commonwealth agencies toward consolidation of all Commonwealth operations in one suitable location in each city.

To facilitate ready visualization of the space requirement problem, maps of downtown Pittsburgh and Philadelphia have been prepared. On the maps, departments and other Commonwealth agencies are identified by letters appearing in colored blocks; the color in each indicates the per square foot rental group.

A. Pittsburgh Facts

The map of Pittsburgh shows that seventeen Commonwealth agencies maintain a total of twenty-seven offices in the downtown section of the city (see page 5). The agencies with offices at more than one location and the number of locations are as follows:

Department of Labor and Industry ..	8
Department of Public Assistance	3
Liquor Control Board	2

The annual rental for Commonwealth offices in Pittsburgh ranges from \$.60 to \$4.06 per square foot.

In the area covered by the map, the Commonwealth leases a total of 122,000 square feet, for which it pays a total annual rental of \$259,088, which is but another way of saying that the average rental per square foot is \$2.12 annually ($\$259,088 \div 122,000$).

In connection with the appraisal of the location shown on the map, it should be noted that six Commonwealth agencies maintain offices at fifteen locations not in the downtown section. The total space leased in other than downtown locations is 76,700 square feet, for which an annual rental of \$99,508 is paid. In other words, the average annual rental per square foot paid for other than downtown locations in Pittsburgh is \$1.30, as compared with \$2.12 per square foot in the downtown district.

In passing, it may be noted that the location of offices in neighborhoods other than downtown Pittsburgh is largely determined by proximity to the segment of the public which is served by these offices.

[Map not reprinted in this appendix. See original report, page 5.]

B. Philadelphia Facts

As indicated on the map on the following page, nineteen agencies of the Commonwealth maintain a total of forty-three offices in the central section of Philadelphia. The agencies with offices at more than one location and the number of locations are as follows:

Department of Labor and Industry ..	11
Department of Public Assistance	8
Department of Welfare	3
Liquor Control Board	3
Department of Health	2
Department of Forests and Waters ..	2
Board of Parole	2

The annual rental for Commonwealth offices in Philadelphia ranges from \$.40 to \$3.74 per square foot.

In the area covered by the map, the Commonwealth leases a total of 263,111 square feet, for which it pays a total annual rental of \$404,342, or an average annual rental per square foot of \$1.50. ($\$404,342 \div 263,111$.)

In connection with the appraisal of the locations shown on the map, it should be noted that four Commonwealth agencies maintain offices at eleven locations not in the central Philadelphia area. The total space leased in other than central city locations is 102,376 square feet, for which an annual rental of \$133,710 is paid. In other words, the average annual rental per square foot paid for other than central city locations in Philadelphia is \$1.31 per square foot, as compared to \$1.54 per square foot in the central Philadelphia area.

[Map not reprinted in this appendix. See original report, page 5.]

Section III
CONCLUSION

Perusal of the Philadelphia and Pittsburgh maps indicates that Commonwealth offices are widely scattered in both cities. The wide scattering of these locations causes serious inconvenience to citizens who have business with more than one office.

The overwhelming majority of the heads of the agencies maintaining offices in the above cities are of the opinion

that consolidation of all Commonwealth operations in one suitably located building in each city would not impair their operating efficiency.²

Under the circumstances, the conclusion seems inevitable that the leasing of one building or the construction of a building to house all Commonwealth operations is desirable from both a public and an operational point of view.

² For replies to the questionnaire sent agency heads, see Appendix, Page 14.

APPENDIX

REPLIES TO QUESTIONNAIRE ON DEPARTMENTAL SPACE REQUIREMENTS AND ADVISABILITY OF
CONSOLIDATION WITH OTHER STATE AGENCIES IN THE SAME AREA—JANUARY, 1950

Department, Board, or Commission Leasing Space—and Type of Space When Given	1. What general factors do you consider important in the selection of leased premises for your Department?	2. Would you consider it feasible or advisable to consolidate your leased premises under one roof in the same area in which they are now located?	3. Would you deem it advisable from the point of view of the operating efficiency of your Department to consolidate with other State departments in the same area where leased prem- ises are now located?
1. Department of Forests and Waters.	Geographical location with respect to area and boundaries of flood control districts, forest districts and park districts involved. Parking space.	Yes is done where feasible.	Yes.
2. Department of Public In- struction.	In Philadelphia, city ordinance requires industry using inflammable films to be in restricted area where facilities are now located. Dormitory for college.	Does not apply—do not have more than one lease in same area.	No objection.
3. Department of Health 1. Office space for Admin- istrative personnel. 2. Clinic Space. 3. Laboratory Space.	In or near hospitals.	Rarely feasible—though now done in Wilkes-Barre.	No objection.
4. Department of Public As- sistance.	1. First floor space sufficient for handling of applications. 2. Located in county seat.	Preferred but not always fea- sible.	Yes.
5. Department of Welfare.	First floor or in building with elevator service for convenience of blind clients.	Does not apply—do not have more than one lease in same area.	No objection.
6. Department of Revenue.	In vicinity of the Court House.	Leased premises are now at one location.	No objection.
7. Department of Banking.	Readily available to banking interests in city wherein premises are to be leased.	Does not apply.	Yes, if available to banking in- terests.
8. Department of Military Af- fairs. 1. Armories. 2. Office space for Regimental Headquarters of National Guard organizations.	Must provide adequate security to pro- tect Federal property issued for training purposes—as required by Department of Army. Garage space.	No, because of size and facilities required.	No, for reasons of security.
9. Department of Mines.	Room in home of each of the 55 mine inspectors—office furniture furnished by state—rent paid to inspector \$15 per month.	Does not apply.	No objection in case of five Division Engineers' offices.
10. Milk Control Commission.	Accessibility to the public, congenial working conditions for office personnel.	Does not apply—leased premises now at one location in each area.	Yes.

11. Board of Parole.	Accessible to courts and other county units concerned with administration of justice. Each parole agent should have privacy for interviews—In district having greatest concentration of parolee population access to building at night—elevator service after regular hours. Garage space.	Feasible in Philadelphia.	Yes.
12. Pennsylvania Liquor Control Board	1. Close to greatest number of State stores.	Yes, in some cases is already done.	No objection but no advantage.
2. District offices.	2. Accessible to licensee.		
3. State stores.	3. Same as for any retail outlet—as population density, business and shopping districts, etc.		
13. Pennsylvania State Police Troop and Substation headquarters.	Availability to public, proper accommodations for members of State Police.	Does not apply. Only one lease in any one area.	No objection.
14. Pennsylvania Game Commission.	Convenient to public and personnel—to operate with minimum inconvenience and expense.	No objection.	Yes, advisable.
15. Insurance Department.	Central location.	Already done where feasible.	No objection.
16. State Tax Equalization Board.	Convenient for field supervisor and territory assigned him and for those having business with the area office.	Does not apply—(only three leased premises).	Might be possible.
17. State Civil Service Commission. All leases are "short term," 1-2 days, for examinations.	Space and facilities must be adequate for giving examinations—desks, chairs, etc.	Already done where possible.	No, because of short-term need for space.
18. Pennsylvania Public Utility Commission.	Central location and convenient for those who may attend hearings.	Already done where possible.	No objection.
19. Department of Labor and Industry.	Central location to transportation systems, court houses, or other government buildings; proximity to places of business and/or industry transacting business with field offices.	Generally speaking, yes. However suboffices should be located in or near employment center.	No opposition if adequate facilities could be provided.
20. Department of Agriculture.	Depends on type of work to be done. Location should be based on amount of work for particular area, accessibility, efficiency.	Already done where feasible.	Not as a general rule, but in few cases such consolidation might be possible.
21. Department of Internal Affairs Only agency leasing space—Bureau of Topographic and Geologic Survey.	Field offices near gas and oil fields. Quarters with space for examinations and storage of rock specimens.	Does not apply.	No objection.
22. Department of the Auditor General.	Office space in Pittsburgh and Philadelphia.	Does not apply.	Worthy of consideration.
23. Department of Highways.	1. Use for which property is required. 2. Location with respect to the area for which the facility to be housed is located.	Inadvisable.	No, except in metropolitan areas.

PUBLIC SCHOOL ATTENDANCE AREAS

A Report of the

JOINT STATE GOVERNMENT COMMISSION

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH
OF PENNSYLVANIA, SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

Appendix Table F. Number of School Districts in Ranges of Cost of Transporting One Pupil One Mile Twice a Day During a School Term of 180 Days

SUMMARY OF FINDINGS

- I. In the opinion of educators, it is desirable to enlarge many school attendance areas (the geographic area served by a single school) in order to make available diversified curricula at a reasonable cost to the taxpayer.
- II. Four methods are currently employed with a view to enlarging areas:
 - A. Mandatory consolidation.
 - B. Voluntary consolidation without state financial assistance.
 - C. Voluntary consolidation with state financial assistance.
 - D. Voluntary consolidation of school operations.
- III. The Pennsylvania system of voluntary consolidation of operations provides advantages for pupils without sacrificing local control.

Prior to Act of 1945, May 29, P. L. 1112, Pennsylvania laws tended to discourage the enlarging of attendance areas and the formation of joint schools. However, the 1945 school subsidy system has proved conducive to the establishment of economical school attendance areas and to the equalization of educational opportunities. The characteristics of the system are:

 - A. The rate of reimbursement from the state does not vary with size or class of district.
 - B. The rate of state reimbursement is independent of the school or district in which the pupil is educated.
- IV. The following demonstrate Pennsylvania's progress:
 - A. During the 1949 school year, 191 joint boards composed of 542 districts were operating in Pennsylvania. One hundred of these operated both elementary and secondary schools, 53 operated secondary schools only, and 38 operated elementary schools only.
 - B. During the 1948-49 school year, 40,500 pupils (more than 1/9 of the total of 350,112 secondary school pupils in third and fourth class school districts) were enrolled in joint secondary schools.
 - C. During the 1949-50 school year, approximately 48,400 pupils were in average daily membership in joint secondary schools.
- V. Data from a group of Pennsylvania 3rd and 4th class school districts with average capacity to support public education show that, as the number of pupils (average daily membership) increases, the total current expense costs, the instruction costs, and the total of all current expense costs other than instruction costs (on a per-pupil basis) tend to decrease. The per pupil costs which are typically related to given numbers of high school pupils in school districts maintaining four-year high schools decrease from \$244 for a school whose average daily membership is 50 pupils to \$163 for a school of 300 pupils. Similarly, the per pupil costs in school districts maintaining six-year high schools decrease from \$209 for only 100 pupils to \$156 for 700 pupils. In school districts maintaining eight-year elementary schools, the per pupil costs decrease from \$124 for 50 pupils to \$93 for 350 pupils.

VI. Data from a group of 3rd and 4th class school districts show that, as the number of pupils transported increases, the per pupil cost of transportation decreases, and that, as the number of miles pupils are transported increases, the per pupil per mile cost of transportation decreases.

Section I

INTRODUCTION

In the opinion of educators,¹ it is desirable to enlarge many school attendance areas (the geographic area served by a single school) in order to make available diversified curricula at a reasonable cost to the taxpayer.

Educators generally agree that the most satisfactory attendance area for a high school is an area coterminous with the natural community and also, if possible, with the fixed boundaries of civil subdivisions. It is sometimes necessary for two or more communities to combine to form a high school attendance area, or for one community to require two or more high schools. Within the community high school attendance areas, smaller elementary school attendance areas and schools should be located in established neighborhood centers.

The consensus of opinion among educators indicates (1) that secondary education should begin with the 7th grade and offer six years of instruction; (2) that there should be 30 pupils enrolled per teacher in a six-year high school, 35 in the three years of junior high school and 25 in the three years of senior high school; (3) that within each high school area there should be located one or more elementary school attendance areas containing not less than 180 pupils each.

Standards for efficient and economical school districts must be adapted to the particular community in relation to its topographic, economic and population factors. Although the preceding requirements may have to be modified because of local conditions, it is generally agreed that pupils should not be transported over roads that present extreme hazards; elementary pupils should not have to walk more than two miles to or from school or ride in a bus more than one hour each morning or evening; high school students should not have to walk more than two and one-half miles to or from school or ride in a bus more than one and one-half hours each morning or evening.

The enlarging of school attendance areas is often facilitated by the enlarging of school districts since, in many cases, school districts contain an insufficient number of pupils for the maintenance of a satisfactory school or schools. A school district, often termed an "administrative unit," should not be smaller than the attendance area for a high school, although on occasion local conditions may justify exceptions to this. An administrative unit or school district should be large enough to provide all essential and desirable administrative and supervisory services except those provided by the state. Such a unit need not necessarily be coterminous with the boundaries of civil jurisdictions, and should not be smaller than the

area included within the boundaries of a natural community.

According to the National Education Association, a good school district provides the services of educational and business administration; supervision of attendance, instruction and transportation; school library service and community library service (if the community has no public library); adult education leadership; physical and health examinations of children; specialists for the identification of atypical children; the services of school psychologists and nurse-teachers; and a research staff. In localities where the schools must of necessity be small, the central staff of the school district should include special teachers in instrumental and vocal music, art and specialized types of vocational education.

In order to perform these services in an optimum manner, with reasonable per pupil costs, a supervisory staff of approximately 30 is required. To support such a staff at reasonable cost, it is generally considered that a school district should have a pupil population of between 10,000 and 12,000. However, the supervisory staff may be decreased and still be efficient and economical, if more than one of these functions is performed by each staff member. In certain cases, these services may be provided by a school district with a pupil population of from 5,000 to 6,000. It is generally believed that a modification which would involve the employment only of a superintendent, a nurse-attendance officer, and a book-keeper-clerk in addition to teachers, would require about 1,750 pupils to establish reasonable per-pupil costs.

In terms of the number of teachers needed for a well functioning school district, the consensus of opinion indicates that at least 40 teachers are required, and that no further economies are gained through size after the unit reaches 250 teachers.

The Regents' Inquiry into the charter and cost of public education in the State of New York sets forth the following essentials in discussing the proper size of a school district for New York:

"Every school district should

1. Contain enough children so that a well-balanced elementary and high school program can be maintained economically.
2. Be so planned geographically that schools can be conveniently located, and transportation, where necessary, easily arranged without requiring long routes.
3. Contain sufficient assessed valuation and taxpaying capacity to carry the greater part of the school program.
4. Coincide as far as possible with the natural community boundaries and, where possible, with local government units, so that cooperative services may be arranged, particularly in connection with health, traffic control, planning, recreation, the joint use of plant, and proper management of the public debt.
5. Keep the schools and the government of the schools close to the people so that the citizens generally, including the parents and the taxpayers, may know what their schools are doing, may have an effective voice in the school program, and may participate in the community use of the school building.

¹ Local School Unit Organization in 10 States, U. S. Department of the Interior, Office of Education, 1939; Education for American Life, The Regents' Inquiry, A New Program for the State of New York, 1938, Luther Gulick, Director; Your School District, The Report of the National Commission on School District Reorganization, National Education Association of the United States, 1948; The Forty-Eight School Systems, The Council of State Government, 1949.

"These last two factors, relation of the school to the natural community and closeness of the school to the people, are of primary educational significance and are not to be sacrificed to the interest of 'efficiency.'" ²

Section II

METHODS OF INCREASING THE SIZE OF PUBLIC SCHOOL ATTENDANCE AREAS AND SCHOOL DISTRICTS

The enlarging of public school attendance areas is often facilitated by the enlarging of school districts since, in many cases, school districts contain an insufficient number of pupils for the maintenance of a satisfactory school or schools.

Historically, school attendance areas have been enlarged through the closing of one-room schools. In recent years the advantages of diversified curricula and services at low cost have led to increased emphasis upon the consolidation of units whose size, although greater than that of the one-room school, had been too small to permit such expansion at reasonable cost. The consolidation of school districts, or of the operations of school districts, may provide more efficient attendance areas without the actual closing of schools within the area. At the same time, the increase in size of the school district provides operating economies in special curricula and services.

Varying methods of increasing the size of public school attendance areas and school districts are currently employed, both in states in which school districts are coterminous with civil subdivisions and in states in which each rural school district is composed of but one local school attendance area and is not necessarily coterminous with any other local governmental unit.

The four methods employed with a view of bringing together sufficient number of pupils are:

- A. Mandatory consolidation.
- B. Voluntary consolidation without state financial assistance.
- C. Voluntary consolidation with state financial assistance.
- D. Voluntary consolidation of school operations.

The mandatory method effects consolidations, either through direct legislative action concerning districts to be consolidated or through statutes which allow the administrative determination of districts to be consolidated. Under these methods, consolidations are generally rapidly effected.

The voluntary methods of consolidation are defined by legislative action but permit, rather than direct, the consolidation of school attendance areas or school districts. Under these voluntary methods, the citizens of the local areas determine, among other factors, the expansion of school programs, the area to be served, and the financial provisions to be made. In certain cases the formulation of local consolidation plans is furthered through action of state agencies.

A. Mandatory Consolidation

Mandatory consolidation of school districts has been used in West Virginia, Florida, Arkansas, and New Mexico, among others. In West Virginia, Florida, and

Arkansas, the consolidation of districts is determined by statute. In New Mexico, statutory provision is made for the administrative determination of districts to be consolidated.

1. West Virginia

The West Virginia legislature, in 1933 provided that a school district shall include all the territory in one county, thereby abolishing all magisterial school districts, subdistricts, and independent districts. This statute gave the county boards of education powers to consolidate schools and to close small elementary schools in certain cases and provided for the joint operation of high schools serving more than one county.³

2. Florida

In 1947, the Florida School Law was amended to establish school districts whose boundaries were coterminous with those of the county. In each such county district, the county school board is charged with dividing the county into "School Community Areas" to constitute attendance areas and, if possible, to coincide with the boundaries of existing precincts.⁴

3. Arkansas

In Arkansas, the county system provides that the school districts within the county be grouped in zones (never less than four, or more than five zones per county). Statutory provision was made in 1948 for the creation in each county of a new school district (which may constitute the "fifth zone") composed of the territory of all school districts in the county which had less than 350 pupils.⁵

4. New Mexico

In New Mexico, legal provision has been made for the consolidation of school attendance areas at the order of the State Board of Education.⁶

B. Voluntary Consolidation Without State Financial Assistance

Among other states, Illinois and California provide for voluntary consolidation without special state financial assistance.

1. Illinois

The statutes in Illinois permit each county to establish a school survey committee for the purpose of studying school reorganization and further provide for the voluntary reorganization of school districts into "community consolidated school districts" upon petition and election.⁷

2. California

California, in 1945, adopted legislation which provided for school district reorganization throughout the state under lay, state commission, regional commissions, and local survey committees. The state commission is designated as a policy-interpreting and reviewing agency, while the local committees are designated as

study and recommending agencies. The adoption or rejection of the individual plans are determined at local elections.⁸

C. Voluntary Consolidation With State Financial Assistance

The state of New York provides an example of a program of voluntary consolidation with state financial assistance. School districts that consolidate are provided with special assistance, such as, funds for transportation and for the construction of new buildings.⁹

To assist in reorganization, a general plan for school district reorganization has been formulated by the Joint Legislative Committee on the State Education System. In the preparation of this plan, local school boards, superintendents of schools, principals, and interested persons were consulted.

In completing the plan, the issue was submitted for discussion to each local area at public hearings. This method provided for the formulation of reorganization programs which could be acted upon locally by the electorates of the areas contemplating consolidations.

D. Voluntary Consolidation of School Operations

Pennsylvania differs from other states in that emphasis is placed on the consolidation of school operations rather than on the consolidation of school districts. Although statutory provisions exist for the consolidation of the school districts into "union" districts, the number of districts which have elected to consolidate through joint operation is vastly greater than the number which have elected to consolidate their individual districts into "union" districts.

This Pennsylvania system of voluntary "joint" operation¹⁰ provides advantages for groups of pupils without sacrificing local control. Under this plan the local school districts retain their autonomy but agree to operate schools jointly.

Section III

PUBLIC SCHOOL ATTENDANCE AREAS IN PENNSYLVANIA

In Pennsylvania, school districts originally were coterminous with other local governmental units. The school code of 1911 defined procedures for the voluntary establishment and maintenance of "joint" schools,¹¹ and, in 1921, statutory provision was made for the voluntary consolidation of school districts into single "union" districts.¹² Further cognizance was taken of the need for enlarging public school attendance areas in the year 1921, when legislative provision was made for annual payments of \$200 for the closing of each one-room school,¹³ and in the year, 1925, when the closing of schools educating fewer than 10 pupils was directed by statute.¹⁴

Legislation providing for the closing of one-room schools has been generally effective. By 1946, approximately 6,881 one-room schools had been permanently closed, and about 3,373 were still in operation. As of the school year 1948-49,

there were over 2,400 one-room schools in operation in the Commonwealth. During the school year 1949-50, Commonwealth payments for closed schools amounted to \$1,803,100. It has been estimated that at the time of permanent closing of all one-room schools, the Commonwealth will be obligated to pay \$2,050,800 per year on account of closed schools.¹⁵ Assuming that money is worth 3 per cent, this annual obligation would have a present value of \$68,360,000.

Prior to Act 403, Section of 1945,¹⁶ the formation of joint districts and "union" districts was not encouraged by the system employed in making state reimbursement payments to local school districts. The school subsidy system of 1945, as amended, has encouraged consolidations, the establishment of economical school attendance areas, and the equalization of educational opportunities in the Commonwealth.

The state school subsidy system in effect immediately preceding the establishment of the reimbursement method of 1945 provided for state reimbursement on account of instructional salaries, vocational education, pupil transportation, high school tuition, and temporary salary increases, as well as on account of permanently closed one-room schools. Reimbursement on account of instructional salaries was based on the so-called "true" valuation¹⁷ of real property per teacher and on the population of the school district and on the minimum mandated salaries of teachers in the districts. Payments on account of vocational education likewise varied according to "true" valuation and class of district. Reimbursements on account of pupil transportation and on account of high school tuition were dependent on this so-called "true" valuation per teacher. Reimbursement for temporary salary increases provided mandated cost of living increases paid by the Commonwealth according to the salaries of teachers.

This reimbursement system, which was established in 1921, and 1923, and was amended from time to time until 1945, discouraged the enlarging of public school attendance areas and school districts since increases in size of district might well result in decreases in reimbursement from the state. In addition, reductions in state reimbursement to school districts often occurred when the districts sent pupils to schools in other districts because of the resultant increases in the so-called "true" valuation per teacher of the sending district. These factors discouraged the formation of "union" districts, the consolidation of operations in joint schools, and the sending of tuition pupils to schools outside of their district of residence.

From 1921 to 1943, amendments were made from time to time in the reimbursement system, generally with a view toward the enlarging of public school attendance areas and school districts. However, the basic defects of the system continued to retard the expansion of many areas.

The school code, as it existed in 1921,¹⁸ provided for mandated minimum salaries which increased as districts changed from one class of district to another through increases in size, consequently increasing the costs of the school districts. At that time, state reimbursement was dependent upon the number of teachers employed by the

¹⁷ "True" valuation was defined as the assessed valuation multiplied by the ratio "market value of property to assessed value of property." This ratio was certified by the local school boards.

¹⁸ 1921, April 28, P. L. 328.

district and the population of the district. In 1923, the reimbursement statute was amended to include "true" valuation of real property per teacher as well as number of teachers and the population of the district.¹⁹

In 1923 and 1925, state reimbursement to districts for transportation (which heretofore applied only on account of joint schools, joint consolidated schools and closed schools), was provided for all fourth class districts and all third class districts coterminous with townships in the Commonwealth.²⁰

In 1925, statutes, commonly referred to as the "ghost teacher" statutes, provided for the inclusion in the reimbursement formula of the equivalent of one teacher for each closed one-room school within the district.²¹ This factor tended to decrease the "true" valuation per teacher and increase the state reimbursement.

High school tuition payments were first made available in 1931.²² Although these payments were designed to promote education in efficient attendance areas, the decreases in "true" valuation per teacher resulting from the sending of district pupils to schools outside the district made it financially unattractive for many districts to discontinue small high schools.

In 1941 and 1943, payments on account of closed schools were extended to include districts which had changed classification by reason of increases in population and to include third class districts coterminous with townships.²³

Although the programs of action contained in the statutes up to this time were generally directed at increasing the size of public school attendance areas and equalizing educational opportunities within the Commonwealth, the method of computing state school subsidies on the basis of "true" valuation, population of district, and numbers of teachers employed by the district, as well as the differences in mandated minimum salaries for teachers among the districts, prevented the full achievement of these objectives.

Act of 1945, May 29, P. L. 1112, and subsequent amendments to the school code have provided a school subsidy system which facilitates the establishment of economical school attendance areas and the equalization of educational opportunities within the Commonwealth. This 1945 act provided that the rate of reimbursement from the state would not vary with the population of a school district but would be dependent upon the assessed value of real property within the district and upon the number of pupils residing within the district. The formation of joint districts was facilitated through this method of counting pupils in the area of their residence, rather than the areas of school attendance and through the liberalization of payments on account of tuition to the member districts of the joint school boards.

In 1947, the mandated salaries of teachers and other professional school employes in the Commonwealth were increased, and one schedule was provided for second, third, and fourth class districts.²⁴ This uniform schedule for second, third, and fourth class districts results in no change in mandated salary in the event that a district changes class through increases in population which often

result from consolidation. In 1949, further increases in minimum mandated salaries were made, and the uniformity of schedules was continued.²⁵

The State Public School Building Authority, established in 1947, provided assistance to local school districts needing new school building.²⁶ In the same year, county school boards were authorized by statute to submit plans for mergers within each county to the State Council of Education for approval and for future action by the localities.²⁷

The use of the market value of a school district, rather than the assessed value in the computation of state reimbursements was established by the General Assembly in 1947.²⁸ Also, in 1949, state reimbursements to local school districts for Public School Building Authority rentals were provided.²⁹

The effectiveness of the state school subsidy system in Pennsylvania since 1945 is reflected in recent increases in the size of public school attendance areas within the state. In 1929, there were 484 high schools in Pennsylvania enrolling 100 or less pupils. In the school year 1949-50, 122 high schools enrolled 100 or less pupils.

During the 1949 school year, 191 joint boards, composed of 542 districts, were operating in Pennsylvania. It is estimated that during the 1950-1951 school year, 50 more joint school boards will start operations. During the 1948-49 school year, 40,500 pupils (more than 1/9 of the total of 350,112 secondary school pupils in third and fourth class school districts) were enrolled in joint secondary schools, and during the 1949-50 school year, approximately 48,400 pupils were in average daily membership in joint secondary schools. On the other hand, under legislation providing for the establishment of "union" districts, only 15 such districts, composed of 44 separate districts, have been formed from 1921 to 1950.

The trend has been toward the joint operation of both high schools and elementary schools. Of the 191 joint boards operating during the 1949 school year, 100 operated both elementary and secondary schools jointly, 53 operated only secondary schools, and 38 elementary schools.

Section IV

NUMBER OF PUPILS AND PER PUPIL CURRENT EXPENSE COSTS

Over the last thirty years the General Assembly has appropriated large sums of money for the purpose of stimulating, rather than mandating the creation of larger attendance areas.

The establishment of enlarged attendance areas is considered desirable in many cases as facilitating diversification of programs, the employment of more experienced teachers, and the lowering of per pupil costs.

It need not be demonstrated that the enlargement of attendance areas facilitates diversification. It is an often observed fact that experienced school teachers move from small to larger districts.

The relationship between per pupil costs and number of pupils in average daily membership is explored in this section.

Investigation discloses that in selected Pennsylvania

²⁹ 1949, May 26, P. L. 1879.

school districts with average capacity to support public education, measured in assessed valuation of taxable property per pupil, the total current expense costs, the instruction costs, and the total of all current expense costs other than instruction tend to decrease (on a per pupil basis) as the number of pupils in terms of average daily membership increases.

Generally, decreases in costs are associated with increases in numbers of pupils in the case of both high schools and elementary schools. Specifically, the types of school organization investigated are: high schools of districts maintaining four-year high schools, and of districts maintaining six-year high schools; elementary schools of districts maintaining eight-year elementary schools, and of districts maintaining six-year elementary schools.³⁰

The total current expenses costs as defined for purposes of this study equal the sum of the following items:

1. Instruction Costs: salaries of principals, clerks, supervisors and teachers, the cost of text-books, books for school libraries, school supplies, tuition payments, the costs of attendance at teachers' institutes, the costs of commencement exercises and exhibits, together with certain other lesser costs.
2. General control: expenses of business administration, child census enumeration, the salaries of the superintendent, treasurer, and school clerk.
3. Auxiliary agencies and coordinate activities: Intra-district transportation of pupils, special provisions for tubercular children and for undernourished children, costs of community lectures, enforcement of compulsory attendance, medical, dental, and nurse service, the costs of operating social centers and recreation centers.
4. Operation of the school plant: expenses of fuel, water, light, and power, the salaries of janitors and other employes who care for the grounds.
5. Maintenance of the school plant: repair of buildings, replacements, furniture and equipment costs, and certain costs of upkeep of grounds and buildings (plumbing and lighting costs).
6. Fixed charges: insurance, rent, taxes on property, and school employes' retirement payments.

A. School Districts Maintaining Four-Year High Schools

Decreases in costs generally accompany increases in numbers of pupils in the high schools of the group of school districts maintaining four-year high schools.

The number of pupils in terms of average daily membership in the high schools of the 123 districts investigated ranged from 29 in the smallest district to 647 in the largest district. The one hundred and three districts cost pattern, while the remaining twenty having more than 300 were widely scattered.

1. Total Current Expense Costs Per Pupil

The relationship between total current expense costs per pupil and increases in number of pupils is shown in Chart 1. Total current expense costs per pupil ranged from \$73.81 to \$467.19. In this chart, each point represents one of the

³⁰ Groups of 123 school districts maintaining four-year high schools, 144 school districts maintaining six-year high schools, 397 school districts maintaining eight-year elementary schools, and 191 school districts maintaining six-year elementary schools. These school districts reflected an average capacity to support public education as measured by assessed valuation per teaching unit. For detail of selection of school districts and computation of cost values, see Appendix A.

103 school districts with less than 300 pupils. The costs associated with selected numbers of pupils are:

Number of Pupils in Terms of Average Daily Membership	Total Current Expense Costs Per Pupil
50	\$244
100	209
150	191
200	179
250	163
300	163

[Chart not reprinted in this appendix. See original report, page 24.]

2. Instruction Costs Per Pupil

The number of pupils in terms of average daily membership and the instruction costs per pupil for the 103 districts having fewer than 300 pupils are shown in Chart 2. The instruction costs per pupil ranged from \$35.78 to \$253.43 in these school districts. The costs for given numbers of pupils as shown by the trend line are:

Number of Pupils in Terms of Average Daily Membership	Instruction Costs Per Pupil
50	\$173
100	151
150	140
200	132
250	126
300	122

[Chart not reprinted in this appendix. See original report, page 25.]

3. Total Current Expense Cost Per Pupil Other Than Instruction Costs

The total of all current expense costs other than instruction costs, on a per pupil basis, ranged from \$23.17 to \$256.01. For the 103 school districts having fewer than 300 pupils, the general relationship between cost and membership is shown in Chart 3. For selected number of pupils this relationship is:

Number of Pupils in Terms of Average Daily Membership	All Current Expense Costs Except Instruction Costs Per Pupil
50	\$63
100	54
150	49
200	46
250	43
300	41

[Chart not reprinted in this appendix. See original report, page 26.]

B. School Districts Maintaining Six-Year High Schools

Decreases in costs generally accompanying increases in numbers of pupils in the high schools of the group of school districts maintaining six-year high schools.

The number of pupils in terms of average daily membership in the high schools of the 144 districts investigated ranged from 32 in the smallest district to 2,036 in the largest district. The one hundred and twenty-two districts having fewer than 720 pupils showed a definite decreasing

cost pattern, while the remaining 22 having more than 720 pupils were widely scattered.

1. Total Current Expense Costs

The relationship between total current expense costs per pupil and increases in numbers of pupils is shown in Chart 4. Total current expense costs per pupil ranged from \$116.80 to \$472.97. The costs associated with selected numbers of pupils are:

Number of Pupils in Terms of Average Daily Membership	Total Current Expense Costs Per Pupil
100	\$209
200	188
300	177
400	170
500	164
600	160
700	156

[Chart not reprinted in this appendix. See original report, page 29.]

2. Instruction Costs Per Pupil

The number of pupils in terms of average daily membership and the instruction costs per pupil for the 122 districts having fewer than 720 pupils are shown in Chart 5. The instruction cost per pupil ranged from \$86.38 to \$350.20 in these school districts. The costs for given numbers of pupils as shown by the trend line are:

Number of Pupils in Terms of Average Daily Membership	Instruction Costs Per Pupil
100	\$158
200	142
300	133
400	127
500	122
600	119
700	116

[Chart not reprinted in this appendix. See original report, page 31.]

3. Total Current Expense Costs Per Pupil Other Than Instruction Costs

The total of all current expense costs other than instruction costs, on a per pupil basis, ranged from \$22.12 to \$157.79. For the 122 school districts having fewer than 720 pupils the general relationship between cost and membership is shown in Chart 6. For selected numbers of pupils this relationship is:

Number of Pupils in Terms of Average Daily Membership	All Current Expense Costs Except Instruction Costs Per Pupil
100	\$49
200	45
300	43
400	41
500	40
600	39
700	39

[Chart not reprinted in this appendix. See original report, page 33.]

C. School Districts Maintaining Eight-Year Elementary Schools

Decreases in costs generally accompanying increases in numbers of pupils in the elementary schools of the group of school districts maintaining eight-year elementary schools.

The number of pupils in terms of average daily membership in the elementary schools of the 397 districts investigated ranged from seven in the smallest district to 1,349 in the largest district. The three hundred and forty-three districts having fewer than 360 pupils showed a definite decreasing cost pattern, while the remaining 54 having more than 360 were widely scattered.

1. Total Current Expense Cost Per Pupil

The relationship between total current expense costs per pupil and increases in numbers of pupils is shown in Chart 7. Total current expense costs per pupil ranged from \$63.04 to \$585.79. In this chart, each point represents one of the 343 school districts with less than 360 pupils. The costs associated with selected numbers of pupils are:

Number of Pupils in Terms of Average Daily Membership	Total Current Expense Costs Per Pupil
50	\$124
100	112
150	105
200	101
250	98
300	95
350	93

[Chart not reprinted in this appendix. See original report, page 35.]

2. Instruction Costs Per Pupil

The number of pupils in terms of average daily membership and the instruction costs per pupil for the 343 districts having fewer than 360 pupils are shown in Chart 8. The instruction cost per pupil ranged from \$41.16 to \$297.95 in these school districts. The costs for given numbers of pupils as shown by the trend line are:

Number of Pupils in Terms of Average Daily Membership	Instruction Costs Per Pupil
50	\$84
100	78
150	75
200	73
250	71
300	69
350	68

[Chart not reprinted in this appendix. See original report, page 36.]

3. Total Current Expenses Costs Per Pupil Other Than Instruction Costs

The total of all current expense costs other than instruction costs, on a per pupil basis, ranged from \$7.34 to \$287.84. For the 343 school districts having fewer than 360 pupils

the general relationship between cost and membership is shown in Chart 9. For selected numbers of pupils this relationship is:

Number of Pupils in Terms of Average Daily Membership	All Current Expenses Costs Except Instruction Costs Per Pupil
50	\$38
100	31
150	27
200	25
250	23
300	21
350	20

[Chart not reprinted in this appendix. See original report, page 37.]

D. School Districts Maintaining Six-Year Elementary Schools

Decreases in costs generally accompany increase in numbers of pupils in the elementary schools of the group of school districts maintaining six-year elementary schools.

The number of pupils in terms of average daily membership in the elementary schools of the 191 districts investigated ranged from 12 in the smallest district to 2,515 in the largest district. The 126 districts having fewer than 360 pupils showed a definite decreasing cost pattern, while the remaining 65 having more than 360 were widely scattered.

1. Total Current Expense Costs Per Pupil

The relationship between total current expenses costs per pupil and increases in number of pupils is shown in Chart 10. Total current expense costs per pupil ranged from \$60.80 to \$292.64. In this chart, each point represents one of the 126 school districts with less than 360 pupils. The costs associated with selected numbers of pupils are:

Number of Pupils in Terms of Average Daily Membership	Total Current Expense Costs Per Pupil
50	\$123
100	116
150	113
200	110
250	108
300	106
350	105

[Chart not reprinted in this appendix. See original report, page 39.]

2. Instruction Costs Per Pupil

The number of pupils in terms of average daily membership and the instruction costs per pupil for the 126 districts having fewer than 360 pupils are shown in Chart 11. The instruction cost per pupil ranged from \$28.31 to \$169.24 in these school districts. The costs for given numbers of pupils as shown by the trend line are:

Number of Pupils in Terms of Average Daily Membership	Instruction Costs Per Pupil
50	\$86
100	81
150	78
200	76
250	74
300	73
350	72

[Chart not reprinted in this appendix. See original report, page 40.]

3. Total Current Expense Costs Per Pupil Other Than Instruction Costs

The total of all current expense costs other than instruction costs, on a per pupil basis, ranged from \$10.46 to \$127.26. For the 126 school districts having fewer than 360 pupils, the general relationship between costs and membership is shown in Chart 12. For selected numbers of pupils this relationship is:

Number of Pupils in Terms of Average Daily Membership	All Current Expense Costs Except Instruction Costs Per Pupil
50	\$38
100	34
150	31
200	30
250	29
300	28
350	27

[Chart not reprinted in this appendix. See original report, page 41.]

Section V

PER PUPIL COSTS OF INTER-DISTRICT TRANSPORTATION

The enlarging of pupil school attendance areas gives rise to costs of inter-district transportation when pupils are sent to schools outside the districts in which they reside. The additional cost per pupil for inter-district transportation must be considered along with the general decrease in inter-district total current expense cost per pupil as greater numbers of pupils are brought together in a school attendance area.

Decreases in the cost of transporting one pupil one mile (contract transportation for secondary school pupils) are generally related to increases in the numbers of miles traveled and to increases in the numbers of pupils transported.²¹

The inter-district contract cost of transporting one pupil one mile twice a day during a school term of 180 days ranged from \$.32 to \$14 in the 151 school districts sending all secondary pupils to schools of other districts and for which complete data were available.

²¹ The cost relationships were established for the 151 school districts maintaining elementary schools only and sending all high school pupils to schools of other districts for which complete inter-district transportation data were available. Since data for school district-owned transportation were available for few districts, contract transportation only was used. For detail of computation of cost relationships, see Appendix B.

The one-way daily mileage of school bus routes ranged from 1.7 miles to 55 miles in these school districts. The relationship between the number of miles pupils are transported as measured by the one-way mileage of the school bus and the transportation costs per pupil as measured by the cost of transporting one pupil one mile twice a day for a school term of 180 days is shown in Chart 13. Each point represents one of the 149 school districts whose one-way school bus mileage is less than 50 miles and whose cost of transporting one pupil one mile twice a day for a school term of 180 days is less than \$8. The dollar values associated with selected numbers of miles are:

Number of Miles Pupils Are Transported	Transportation Costs Per Pupil Per Mile
5	\$3.27
10	2.17
15	1.70
20	1.44
25	1.26
30	1.13
35	1.03
4095
4589
5083

[Chart not reprinted in this appendix. See original report, page 45.]

The number of pupils transported in the 151 school districts ranged from five pupils to 186 pupils. The relationship between the number of pupils transported and the transportation costs per pupil as measured by the cost of transporting one pupil one mile twice a day for a school term of 180 days is shown in Chart 14. On the chart, each point represents one of the 146 school districts transporting fewer than 120 pupils and having a cost of less than \$8. The typical transportation costs are shown by the curved line in Chart 14, and the costs related to given numbers of pupils as shown by this line are:

Number of Pupils Transported	Transportation Costs Per Mile Per Pupil
10	\$2.95
20	2.25
30	1.92
40	1.71
50	1.57
60	1.46
70	1.38
80	1.31
90	1.25
100	1.20
110	1.15
120	1.11

[Chart not reprinted in this appendix. See original report, page 47.]

APPENDIX

APPENDIX A

Computation of the Relationship Between Number of Pupils and Selected Per Pupil Current Expense Costs

The selection of school districts of comparable financial ability to support public education as measured by the Standard Reimbursement Fractions, calculated on the basis of assessed valuation of taxable real property as shown on the county duplicate, was made from the following distribution:

Range of Standard Reimbursement Fraction (1946-1947)	Range of Assessed Valuation Per Teaching Unit Equivalent to Standard Reimbursement Fraction	Number of School Districts
less than .4000	greater than \$216,000	90
.4000 to .5000	\$180,000 to \$216,000	45
.5000 to .6000	\$144,000 to \$180,000	93
.6000 to .7000	\$108,000 to \$144,000	195
.7000 to .8000	\$ 72,000 to \$108,000	456
.8000 to .9000	\$ 36,000 to \$ 72,000	1,137
.9000 and over	\$ 36,000 and less	530

The model group of 1,137 school districts had Standard Reimbursement Fractions of .8000 and less than .9000 (reflecting assessed valuations per teaching unit of not more than \$72,000 and not less than \$36,000), and comprised almost 45 per cent of the total school districts in the state. Included in this group are 81 third class districts and 1,056 fourth class districts, which together represent 65 counties of the state (all counties except Philadelphia and Pike). Of these school districts, 340 maintained their own secondary schools, and, of these, 146 maintained four-year high schools, and 155 maintained six-year high schools. The remaining 39 maintained other plans of high school organization. Nine hundred and seventy-nine of the 1,137 school districts maintained their own elementary schools, and, of this total, 708 maintained eight-year elementary schools, and 249 maintained six-year elementary schools. The remaining 22 districts used other patterns of elementary school organization.

Comparable data for the latest complete school year reported (1947-48) were available for 123 school districts maintaining four-year high schools, 144 school districts maintaining six-year high schools, 397 school districts maintaining eight-year elementary schools, and 191 school districts maintaining six-year elementary schools.

The current expense costs used were the costs of instruction, general control, auxiliary agencies and coordinate activities, operation of school plant, maintenance of school plant, and fixed charges. Inter-district transportation costs, payments to other districts for tuition, and other inter-district payments were excluded from the costs studied.

The numbers of pupils used were the average daily memberships for each of the districts. Average daily membership is equal to the sum of the number of days each pupil was enrolled in a school during a given session

divided by the number of days in that session. The average daily membership ranges for each of the four groups of school districts are shown in Appendix Table A.

The ranges of total current expense costs, instruction costs, and all current expense costs except instruction are shown for the school districts by type of school and plan of organization in Appendix Table B.

For each of the types of schools and the plans of organization, regression lines of number of pupils with each of three per pupil costs were fitted. The formulae for these regression lines are shown in Appendix Table C.

For each of the 12 groups, the coefficients of correlation (all of which are significant) are shown below:

	Four-Year High School	Six-Year High School	Eight- Year Elementary	Six- Year Elementary
Total Current Expense	— .41	— .48	— .38	— .24
Instruction Costs	— .39	— .50	— .38	— .21
All Current Expense Costs Except Instruction	— .25	— .22	— .39	— .26

APPENDIX B

Computation of the Relationship Between Number of Pupils and Per Pupil Cost of Transportation and of the Relationship Between Number of Miles Travelled and Per Pupil Cost of Transportation

Complete inter-district transportation data were available for 151 school districts which had Standard Reimbursement Fractions of .8000 and less than .9000¹ and which maintained elementary schools only, sending all high school pupils to schools of other districts.

The mileage used was one-way daily mileage. In school districts where two or more buses or cars were used, an average weighted by the number of pupils was computed. The school districts in one-way daily mileage ranges are shown in Appendix Table D.

The number of pupils used was the total number of high school pupils transported during the year. The ranges of the number of pupils are shown in Appendix Table E.

In Appendix Table F, the school districts in the ranges of inter-district costs of transporting one pupil one mile twice a day during a school term of 180 days, are shown.

Regression lines showing the relationship between number of miles and the cost of transporting one pupil one mile twice a day during a school term of 180 days; and between number of pupils and cost of transporting one pupil one mile twice a day during a school term of 180 days, were fitted. The equations of the regression lines are, respectively, $y = 1.92929x - .59338$ and $y = 1.86172x - .39176$. The correlation coefficients are $-.64$ and $-.45$, respectively, and are both significant.

A multiple regression line was fitted to these three

variables. This line shows that as both number of miles and number of pupils increase, (no relation exists between number of miles and number of pupils) the cost of transporting one pupil one mile twice a day during a school term of 180 days decreases. The rate of decrease is greater than the rate when either number of miles or number of pupils is alone increased. This equation is $y = 2.4840x_1 - .62628x_2 - .34490$, and the correlation coefficient is $-.78$.

COMMONWEALTH-OWNED FOREST AND REFORESTATION

A Report of the
JOINT STATE GOVERNMENT COMMISSION
to the

GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

Honorable BAKER ROYER, Chairman
Honorable JOHN M. WALKER, Vice Chairman
Honorable W. STUART HELM, Secretary-Treasurer

Letter of Transmittal

To the Members of the General Assembly of the Common-
wealth of Pennsylvania:

Pursuant to House of Representatives Concurrent Reso-
lution No. 74, of the 1949 Session of the General Assembly,
herewith is submitted a report dealing with Common-
wealth-owned forests and reforestation.

In accordance with Act of 1943, March 8, P. L. 13, Sec-
tion 1, the Commission created a subcommittee to aid in
studying forests and reforestation.

* Deceased.

† Appointed to fill the vacancy created by the death of Frederick

L. Homsher.

‡ Resigned.

§ Appointed to fill the vacancy created by the resignation of

Homer S. Brown.

On behalf of the Commission, the cooperation of the members of the subcommittee is gratefully acknowledged.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Reference Table 7. Total Lumber and Wood Consumption, Pennsylvania, 1947

SUMMARY OF FINDINGS

I. As the result of its geographical location and climate, Pennsylvania was originally one of the most heavily forested areas in the United States. Timber formed the foundation of the state's first industry. Through indiscriminate cutting, waste, careless use and fire, the timber resources of the state were reduced until they reached an all-time low of 8,000,000 acres in 1915.

II. At present, Pennsylvania's forest area comprises 15,000,000 acres, which represents about 52% of the land area of the Commonwealth. The Department of Forests and Waters manages 1,730,534 acres of state-owned forest lands and 29,028 acres leased from the federal government for 99 years.

III. The reforestation of Pennsylvania is a joint venture between the Commonwealth, which owns and manages forest lands, and the private individuals who own forest lands or land suitable for reforestation. It is also a long-term venture, since the growing cycle of timber from seedling to mature tree ranges from 75 to 100 years.

IV. The profitability of investments in forests may be estimated on the basis of the long-term trends of annual costs and the expected revenues from the sale of timber. The Department of Forests and Waters believes that the present annual expenditure of \$.50 per acre is not likely to increase in the future; that the cost to the Commonwealth of land suitable for forest development will remain close to the historical price of \$2.46 per acre, unless land is bought in such quantity or in such manner as to bid up land prices; and that the stumpage value of timber will remain approximately at present levels. On these assumptions, which derive considerable support from extensive historical data, the present rate of return, which is slightly in excess of three per cent, may be expected in the foreseeable future.

V. On the average, the private investor's rate of return appears to be the same as that of the Commonwealth. The difference between the tax cost per acre to the private investor and Commonwealth in-lieu payment per acre approximately equals the cost of the services furnished by the Commonwealth without charge to private investors.

VI. The General Assembly has sought to encourage the private landowner to engage in sound forestry practices by differential taxation of forest lands. Seven bills providing for differential tax treatment of forest lands have been passed by the General Assembly. All seven statutes have been declared unconstitutional. The evidence strongly suggests that in the absence of a constitutional amendment, legislation providing for differential forest taxation is futile.

VII. In 1949, the General Assembly appropriated funds for the execution of the first phase of a twenty-year program submitted by the Department of Forests and Waters, which provides for the acquisition of additional forest lands, preparation of an inventory of forest resources, maintenance and extension of roads and trails, protection, education and demonstration of proper forest practices,

research, reforestation and the expansion of the timber marketing program.

VIII. Today, Pennsylvania wood consumption is about 2¼ billion board feet per year, of which less than half is produced in Pennsylvania.

IX. Although the demand for timber is strong, Pennsylvania producers have access to but limited current market information. At present, the Department of Forests and Waters issues a monthly marketing bulletin, and, under the twenty-year program, plans further activity to facilitate the marketing of Pennsylvania's forest products.

SUMMARY OF RECOMMENDATIONS

The Joint State Government Commission recommends that:

I. The long range policy for the administration of Commonwealth-owned or managed forest lands be continued and that the appropriation for the acquisition of forest land be limited so as not to encourage an increase in the price of land.

II. The Constitution be amended to permit classification of forest lands for tax purposes.

Section I

CHANGES IN THE FOREST AREA OF PENNSYLVANIA

Originally, Pennsylvania's 29,000,000 acres were almost entirely forested with heavy stands of virgin white pine, hemlock and hardwoods. "The original forest was composed of many and valuable species often occurring in dense stands. The richness of our forest flora is due to its favorable location with reference to climatic and physiographic factors. Pennsylvania is the meeting ground of many northern and southern species. In the western part of the state one finds outposts of species common to the Mississippi Valley, while in the southeastern part some of the species of the coast region are found. Some of the northern species have their southern limits here, or else follow the mountains toward the south, while some of the southern species have their northern limits here, usually migrating northward through the valleys. The forests in the southeastern and the western parts of the state are composed almost entirely of hardwoods, while the central and northern or mountainous parts are composed of a mixture of hardwoods and conifers. One may find the hardwoods by themselves and the conifers by themselves, or they may occur in mixture."¹

So favorable are the climatic and geographical conditions in Pennsylvania for the growth of trees that it has been estimated that the approximately 175 species of trees native to the state constitutes less than one-quarter of the total number of species which can be grown successfully.²

A. Depletion of the Forests in Pennsylvania

The vast timber tracts, which seemed inexhaustible to the early settlers, provided charcoal for the iron and steel industries, ties for railroads, wood for fuel, lumber for homes and buildings, and the material out of which wagons, carriages and railway coaches, as well as furniture, barrels and boxes were made. As the increasing

population of the state turned forest land into farms and as expanding industry consumed more and more wood, the amount of standing timber in the state grew smaller. The swiftness with which the timber of the state was destroyed is indicated by the fact that, as early as 1791, the Philadelphia Society for the Promotion of Agriculture offered medals for the planting of locust trees for posts and treenails.³

The dwindling forest reserves of Pennsylvania were a source of concern to the conservation minded. Between 1860, when Pennsylvania led all other states in the production of timber, and 1900, when the production of timber in Pennsylvania about equalled its consumption in the state, various efforts were made to halt the depletion of the forests and to promote the acquisition of forest lands by the state. These efforts, while they formed the basis for later conservation programs, did little to re-establish Pennsylvania as a timber producing area of importance.

B. State Efforts to Restore Forests

The Division of Forestry was created in the Pennsylvania Department of Agriculture in 1885. Two years later, under the leadership of Dr. Joseph T. Rothrock, the Commonwealth initiated a policy of establishing state forests through the acquisition of tax delinquent lands and through other purchases. Despite these efforts, by 1915, the wooded area in the state had been reduced to 8,000,000 acres. Since that time, however, Pennsylvania's forest area has nearly doubled and is now estimated at 15,000,000 acres, or approximately 52% of the total area of the state. Today the Commonwealth, when compared with other states, ranks third in the acreage of its state forests, fifth in the acreage of its state parks and sixth in the acreage of community forests. Pennsylvania is 36th in national forests.⁴

Over the years since 1898, the forest land holdings of the Commonwealth of Pennsylvania, as distinct from privately owned forest lands, have been increased until in 1950 they numbered 1,730,534 acres.⁵ To this total should be added 29,028 acres of federal lands under 99 year lease to the state, which brings the total area of forest land under the jurisdiction of the Department of Forests and Waters to 1,759,562 acres. An additional 81,387 acres are under the management of the department as state parks. Other departments also manage Commonwealth-owned land, some of which is wooded but which is not specifically administered as forest land. In addition, there are now some 3,000,000 acres of waste or marginal land in Pennsylvania which are capable of producing economically no other crop than timber, and which could be added to the forest lands of the state.⁶

C. Current Forest Program

Though the forest lands in Pennsylvania have been increased, until 1949, no coordinated long-range program had been developed. In that year, the General Assembly

⁵ See Appendix D, Reference Table I, p. 37.

⁶ M. F. Draemel, Secretary of Forests and Waters, "Twenty Year Plan of the Department of Forests and Waters Relating to State Forests and State Parks," submitted to the Appropriations Committee of the General Assembly of Pennsylvania, September, 1948.

appropriated funds for the execution of the first phase of a twenty year program which had been submitted by the Secretary of Forests and Waters.

The program calls for the acquisition of additional forest land by the state, an inventory of forest reserves (in this connection, an aerial survey is under way), the extension of roads and trails, the expansion of protection facilities, intensification of research and education in forestry, an increase in reforestation projects, and the enlargement of the marketing program which is basic for the development of any industry.

D. Reforestation

Reforestation is a joint venture between the Commonwealth and the private landowner. It is also a long-term venture, since the growing cycle of timber from seedling to mature tree ranges from 75 to 100 years. There are two generally recognized methods of reforestation—"artificial" reforestation and "natural" reforestation. Under the first method, trees are either manually or mechanically planted. Under the second method, growing trees—periodically thinned—reseed the land.

As regards the methods of reforestation, it seems to be reasonably well established that the natural growth method is most suitable to the areas in Pennsylvania where the development of forests is economically feasible. There are, however, some exceptions to the general rule. In Pennsylvania, the most important exceptions occur in the case of areas which have been subjected to strip mining. If forests are to be established in these areas, the trees must be planted.

Section II

PROFITABILITY OF REFORESTATION

A. Profitability as a Yardstick

For the Commonwealth, profitability in the dollar-and-cent sense of the term is not a universally applicable yardstick. The application of the profitability yardstick presupposes that costs and returns of a venture can be adequately measured in terms of money.

In the case of forest ventures some of the returns cannot be readily measured in terms of dollars. For example, forests provide, in addition to a timber crop, ground cover which increases the usable water supply, minimizes soil erosion, reduces the possibility of floods and offers food and shelter for wildlife and recreation areas for the citizens of the state.

Though it is generally agreed that maintenance of the water table, prevention of soil erosion, and flood control are of considerable benefit, the measurement of the benefits, and particularly their allocation, is not beyond controversy. Whatever one's judgment regarding the economic value of these benefits, such value must be added to the profits as commonly measured in forest operations.

B. The Commonwealth

Consideration of the profitability of investments in Commonwealth-owned forests requires an analysis of the long-term trends between land costs and annual charges and revenues from the sale of stumpage timber. Tables I and II, on the following page, show the per acre costs for natural commercial forests (lands which will grow timber

at a profit) and the expected returns under a scientifically managed timber program.

Table I

Costs of Natural Commercial Forests for a 100-Year Growing Cycle (Based upon experience for period 1900-1949)

Costs

Land	\$2.46 per acre
Charges:	
Annual payments in lieu of	
local taxes05 per acre per year
Protection04 per acre per year
Management (administration,	
cultural treatment, roads	
etc.)41 per acre per year
Total Charges50 per acre per year

From: Commonwealth of Pennsylvania Department of Forests and Waters.

Table II

Timber Returns of Natural Commercial Forests for a 100-Year Growing Cycle (Based upon experience for period 1900-1949)

Age of Trees in Years	Total Board Feet in Trees 4" and Over in Diameter at Breast Height Per Average Acre	Board Feet Removed from An Average Acre*
0
30	1,500 (Remove 20%)	300†
50	4,500 (Remove about 22%)	1,000
70	9,000 (Remove about 22%)	2,000
100	18,000	18,000

From: Commonwealth of Pennsylvania Department of Forests and Waters: Based on a timber survey made from November, 1933, to November, 1939.

* Stumpage volume for thinnings and harvest cutting.

† An improvement cutting which yields timber of little or no value.

1. Costs—

The cost figures in the above table were computed by the Department of Forests and Waters on the basis of actual expenditures for the past 50 years. A compilation of expenditures for the year 1949 shows per acre charges to be \$.48.⁷ The increase from 5 to 7½ cents (in 1950) for payments in lieu of local taxes will increase per acre expenses to about \$.50—approximately equal to the average historical cost per acre. These tabulations support the contention of the Bureau of Forests that per acre expenditures on state forest lands tend to be constant over long periods of time. Hence, for the purposes of calculation, a charge of \$.50 will be used.

The cost of future land acquisitions depends upon several factors. The 1,730,534 acres acquired by the Commonwealth since 1898 were purchased at an average price of \$2.46 per acre, well within the legal limit of \$10 per acre.

It may be noted⁸ that the average price paid per acre

⁷ See Appendix D, Reference Table 2, p. 38.

⁸ See Appendix D, Reference Table 3, p. 39.

for 27 acquisitions between 1940 and 1948 is \$3.65. Much of this land contained young timber growth. For purposes of estimation, it is reasonable to assume that the natural timber growth on future acquisitions will be negligible. Under the circumstances, the future cost of land acquisitions may be expected to be close to the average price of \$2.46 per acre of present holdings provided the Commonwealth does not purchase land in such quantities, or in such manner, as to bid up land prices.

2. Returns—

a. Estimated Stumpage Prices

Attempts to present historical stumpage prices from which the expected revenue trend may be estimated are complicated by the paucity of price figures. Stumpage prices for selected years, 1910 to 1949, estimated on the basis of such data as are available, are reproduced below in Table III.

Table III

Estimated Stumpage Price of Saw Timber, Selected Years 1910-1949*

Year	Estimated Price per Thousand Board Feet
1910	\$4.90
1920	12.00
1930	7.71
1940	7.88
1941	7.62
1942	7.80
1943	8.34
1944	9.78
1945	11.40
1946	15.54
1948	10.31
1949	13.00

* For methods of estimation see Appendix B, p. 34.

b. Return Rates

With the above cost and price estimates, it is possible to compute the expected average rate of return over a 100-year growing cycle of investments in forest lands. Table IV, below, shows the rate of return which may be expected at various levels of average stumpage prices per thousand board feet.

Table IV

Estimated Rate of Return at Various Levels of Average Stumpage Prices*

Average Stumpage Price Per Thousand Board Feet	Average Return or Rate of Interest Over a 100-Year Growing Period
\$2.70	.25%
3.07	.5
4.00	1.0
5.29	1.5
7.05	2.0
9.47	2.5
12.79	3.0
17.31	3.5
23.42	4.0

* For method of calculation see Appendix B, p. 34.

Table IV shows that, if the stumpage price of timber at the time of sale is \$12.79 per thousand board feet, the Commonwealth receives a return of 3 per cent from its forest lands. At prices above \$12.79, the return is larger; at prices below \$12.79, smaller. It may be noted that at 1949 stumpage prices (see Table III) the average return is slightly larger than 3 per cent.

3. "Artificial" Reforestation—

The input-output relationship for the artificially reforested land differs greatly from that for naturally reforested land. The cost items incidental to the use of the two methods are identical, except for a planting expense of approximately \$25 per acre. The cost difference, however, is more than compensated for by differences in return which, for naturally reforested land, is estimated at 21,000 board feet per acre and, for artificially reforested land, 62,000 board feet per acre.

Although the superiority of artificial reforestation, when climatically and topographically feasible, is well established, only 4.4 per cent, or 77,000 acres, of the Commonwealth's forest lands are economically suitable for artificial reforestation.⁹

4. Annual Returns from Commonwealth-Owned Commercial Forests—

As was pointed out previously¹⁰ the Commonwealth forests suitable for commercial lumbering operations are still in the developmental stage.

The Department of Forests and Waters believes that, at the present time, the average annual cutting should not exceed 150 board feet per acre. About 1,400,534 acres of Commonwealth-owned forests are suitable for commercial lumbering operation.¹¹ Under a systematic cutting program calling for 150 board feet per acre, the 1949 stumpage price of \$13.00 per thousand board feet would have produced Commonwealth revenues in the amount of \$2,700,000.

As the Commonwealth forests mature, the rate of tree growth will be accelerated, and increased annual cuttings will become feasible. If the forested area remains constant, increased cutting in accordance with accepted forestry practice will increase Commonwealth revenue.

C. Costs and Returns of the Private Investor

1. Costs—

Although the annual charges or costs of private investors in Pennsylvania forest lands appear to be identical (\$.50 per acre) with Commonwealth costs, the components of the two totals differ in some respects.

Effective 1950, the Commonwealth is required to make annual payments of 7½ cents per acre in lieu of taxes. No average tax payment for the private investor is readily computable, but it would appear that typical tax payments range from 10 to 15 cents per acre. Certain auxiliary services, such as fire protection and forest research are furnished by the Commonwealth free of charge to private landowners. The difference between the tax cost per acre to the private investor and Commonwealth in-lieu payments per acre approximately equals the cost of the services furnished by the Commonwealth with charge

⁹ See Appendix D, Reference Table 4, p. 40.

¹⁰ See above, Section I, C.—Current Forest Program, p. 8.

¹¹ See Appendix D, Reference Table 4, p. 40.

to private investors. Hence, total charges per acre are approximately \$.50 per year.

The private investor purchases land in the same market as the Commonwealth, and reasonably can be expected to pay the prevailing price provided his forest purchases are of comparable size.

2. Returns—

What scanty evidence is available suggests that, on the whole, private operators obtain the same stumpage prices as the Commonwealth. The cases which do not conform to this rule seem to be largely due to the fact that, simultaneously with the historic decrease of lumber production in Pennsylvania, disintegration of the market mechanism for forest products has taken place.¹² The disintegration of what used to be an organized market in Pennsylvania has more serious consequences for the typical private operator than for the Commonwealth. The private investor, by virtue of the relatively small size of his tracts, generally is not in a position to offer or sell continuously and hence cannot establish stable contacts with prospective buyers.

3. Cost-Return Relationship—

In view of the approximate equality of the private investor and the Commonwealth from both a cost and return point of view, the rate of return to the private investor will equal that received by the Commonwealth—slightly better than 3 per cent at 1949 stumpage prices.

In this connection, it has been observed that, depending on soil and climate conditions, the nation's forests produce from 3 to 5 per cent on the investment. At the same time, agriculture, a basic industry in this country, over a long period of years has done no better than 2 to 2½ per cent.¹³

Compared to other forms of investment (except tax-free securities) investments in forest lands offer the advantage of a lower federal income tax. The federal government recognizes returns from timber land as capital gains. If the asset is held for a period longer than six months, only one-half of the return is considered taxable income. Because of progressivity of federal tax rates the average return after taxes depends on the amount of acreage. For a plot of 100 acres the average rate of return after taxes is 2.80 per cent at 1949 stumpage prices.¹⁴

As previously noted¹⁵ the typical tax payment per acre is at present 10 to 15 cents. This is a charge which the investor must pay annually for some fifty years¹⁶ before he may expect any monetary return from his woodlot. Furthermore, the uncertainty regarding future tax rates is not an inducement for a long-term investment.

In fact, there is good reason to believe that it has not been the weight of local taxation that has discouraged private investment in forests in the past, but the uncertainty regarding future local tax burdens.

The assessment statutes of the Commonwealth provide that taxable real property shall be assessed at "actual value."¹⁷ The evidence shows conclusively that this statu-

tory requirement is not complied with in a single taxing district within the Commonwealth.¹⁸ In fact, it is the custom in rural Pennsylvania to assess property on the average at about 30%. This average, in turn, hides a multitude of variations in the assessed market value ratios of individual pieces of property. Under the circumstances, the owner of tracts of forest land is deprived of reasonable assurance that his effective tax rate—that is, the dollars of tax payable on his acreage—will remain stable or move with the effective tax rate of the community. Assuming no change in the millage rate, the assessment of forest lands at current market values would reduce the rate of return by one third. Such a condition does not encourage long-term investment.

Many states have seen fit to encourage private investment in forest lands by means of systems of differential taxation of forest lands. These systems either diminish the weight of local property taxes or eliminate the taxes altogether. At present, of the forty-eight states, only twenty-one do not make provision for the special taxation of forest lands.¹⁹ In eight states, the state constitution, usually by a fairly recent amendment, explicitly permits special provisions for taxing timber lands. Nineteen states have accorded special tax treatment to timber lands without special constitutional authorization. Several of these states—Florida, Indiana and Missouri—have constitutional restrictions prohibiting tax exemptions similar to those in Pennsylvania, but forest provisions in general laws have either not been challenged in the courts or, as in the case of Florida, the courts have sustained the constitutionality of the legislation.

In Pennsylvania, the history of attempted differential taxation of forest lands has been a history of conflict between the legislature and the courts. The legislature has repeatedly (in 1887, 1897, 1901, 1905, 1913, 1933, and 1935) enacted bills providing for reduced or deferred taxes on timbered property. In every case, the courts have declared the statutes unconstitutional.

The most recent legislative attempt to encourage private reforestation is represented by the Act of 1935, July 18, P. L. 1196, 32 PS §75, which provided that timber stands in "auxiliary forest reserves" be assessed at not more than \$1.00 per acre and that a tax of 10 per cent of the stumpage value of the trees be imposed at the time of cutting. The act was declared unconstitutional by the Pennsylvania Supreme Court in the case of Clearfield Bituminous Coal Corporation v. Thomas, 336 Pa. 572, (1939).

The court held that this legislation contravened the State Constitution because (1) it exempted property which the Constitution does not permit the legislature to exempt and (2) it represented an invalid classification.

In view of the consistent decisions on the subject which have been made by the Pennsylvania courts since 1906, it is unlikely that legislation providing for differential taxation of forest lands would be upheld in the absence of a constitutional amendment.

Section III

LUMBER DEMAND AND SUPPLY IN PENNSYLVANIA

The demand for lumber in Pennsylvania is far in excess of the supply of Pennsylvania-grown timber.

¹² See below, Section III—Paragraph 4, p. 23.

¹⁴ See Appendix C.

¹⁵ See above, Section II, C., 1. Costs, p. 17.

¹⁶ See above, Table II, p. 12.

¹⁷ Act of 1933, May 22, P. L. 853, as amended 1939, May 16, P. L. 143, 72 PS § 5020-402.

¹⁸ See: Commonwealth of Pennsylvania Tax Equalization Board, *Certifications of Market Value of Taxable Real Estate*, furnished to the Superintendent of Public Instruction, Commonwealth of Pennsylvania, June, 1949.

¹⁹ For rates of forestry taxation in selected states, see Reference Table 5, p. 41.

For example, Pennsylvania produced only 600,080,000 board feet of the total 1,674,093,000 board feet used within the State in 1947. (See Reference Tables 6 and 7.) Miscellaneous wood products increased the Pennsylvania production to 1,014,091,000 board feet and total consumption in 1947 to 2,249,358,000. In other words, of the almost 2¼ billion board feet of wood products consumed within the state, less than half were state-produced. An increased supply of Pennsylvania-grown timber can be expected to find a ready home market.

As growth on the forest lands of Pennsylvania both privately and state owned, reaches maturity, the production of wood will continue to rise. As lumber production in Pennsylvania increases, the need for an organized market for forest products will become increasingly acute.

In connection with this market, one author, discussing large privately owned forests, observes: "Perhaps the greatest obstacle facing the private timberland owner in the North is disorganized and fluctuating markets. The state-

ment appears paradoxical, because the North consumes far more wood than it grows. But timber depletion has led to a scarcity of dependable wood processors. . . . Lacking experience and capital, they saw boards varying in thickness, realize a poor-grade outturn, improperly pile and season the lumber, and fail to get top prices. They are obliged therefore to buy their logs and stumpage cheaply. . . . Many owners have felt that they must acquire their own processing plants if they are to have a ready market for all products of the forest."²⁰

In a number of states, marketing cooperatives have been organized for cooperative marketing of forest products. In Pennsylvania, however, the agricultural cooperative laws specifically exclude timber products.²¹

²⁰ Hardy L. Shirley, "Large Private Holdings in the North," *Trees, Yearbook of Agriculture for 1949*, p. 271.

²¹ The Agricultural Cooperative Law was amended in 1929 to exclude timber products—"agricultural products shall include all agricultural, horticultural, vegetable, fruit, and floricultural products of the soil, livestock and meats, wool, hides, poultry, eggs, dairy products, nuts and honey, but shall not include timber products." 1919, June 12, P. L. 466 § 1; 1929, May 1, P. L. 1201, § 1.

APPENDICES

APPENDIX A

Varieties of Trees Which Can Be Grown Successfully in Pennsylvania

Part I

Tree Species Native to Pennsylvania and Exotic Species Which Have Been Common Within the State for a Long Period

The following listing indicates the nativity of each species, the location in Pennsylvania where the trees occur and the areas in Pennsylvania where the species may be successfully planted.

KEY—n.—north
 s.—south N. A.—North America
 e.—east
 w.—west U. S.—United States
 c.—central
 (thus e. N. A. means eastern North America, etc.)

Common Name	Native	Occurrence in Pa.	Suitable Growth Locations in Pa.

PART II

Exotic Tree Species Adaptable to Pennsylvania's Climate

The approximately 175 tree species native to Pennsylvania constitute less than one-quarter of the total number of species that could be successfully grown in this state from the standpoint of biological possibility. Botanical and forestry literature indicate that at least 800 exotic tree species* would be adaptable to Pennsylvania's soils and climate.

The listing of exotic species that could be expected to grow in Pennsylvania requires consideration, for each species, of climatic and soil requirements, and of probable genetic variability within the species. Unfortunately, information on these points is extremely meager or more often completely lacking.

Climatic Considerations

There is adequate information on the climate of Pennsylvania. Winter temperatures are important limiting factors for tree growth and survival. For the state as a whole minimum temperatures are not excessive; the average annual minimum temperature range is from -15 to +5 degrees Fahrenheit. Of equal significance is the fact that the topography divides the state into four quite distinct climatic regions, each with different potentialities for tree growth.

1. The southeast with moderate temperature extremes has generally ample and dependable rainfall (38-46 inches), and a growing season of 170-200 days.

2. The mountain section has somewhat greater extremes of temperature, a somewhat shorter growing season (130-165 days), and 3-4 inches higher annual precipitation. The summer rainfall, however, is geographically less uniformly distributed than in the southeast.

3. The high northern counties, the coolest part of the

state, with occasionally severe winter temperatures have a short growing season which averages less than 130 days. Annual precipitation is variable throughout this section, ranging from 35 to 45 inches.

4. The western section, with a continental climate, has more changeable temperatures and more frequent precipitation than the other regions. Here the growing season varies from 140-175 days.

Information on the climatic requirements of exotic trees is inadequate and widely scattered. There is scant information on the latitudinal and elevational limits of the natural range of the tree species of Asia, Central America (mountain species) and southern South America. And such information is also incomplete for an appreciable number of European and North American trees. For this reason it is impossible to set definite limits to the climatic extremes under which exotic trees are hardy even in their native habitat. Furthermore, although we do have fair knowledge of broad climatic zones, there is seldom, except for North America and Europe, reasonably exact climatic information on the smaller geographic units, which usually represent the known range of exotic tree species. For most exotic species, we are faced with very limited information on the geographic range, and on sound climatic data even where the range is reasonably well known.

Soil Considerations

Information on soil requirements is also meager. Since Pennsylvania has a reasonably wide variety of soils this is of relatively minor importance in listing these species that could be grown somewhere in the state. It is important, however, for deciding how extensively and in what quantity an exotic could be grown throughout the state.

Genetical Considerations

Most tree species are genetically variable. This is apparent from the relatively large number of taxonomic

* The word tree as used in this report means a woody plant with one main stem at least 12 feet tall. This is the commonly accepted definition.

varieties which have been described; usually an indication of genetic variability within a species in its taxonomic characteristics. Inherently different physiological races or varieties, commonly called "geographic" or "climatic" races, also exist in many tree species, although exact information on this point is available for only a very few American and European species.

Biologically, the most important different between such geographic races is their adaptability to different climatic conditions, although they may exhibit little or no difference in their outward appearance (i.e. in their taxonomic characteristics). The existence and adaptability of such physiological races can often be predicted if reasonably sufficient information is available on the natural latitudinal and elevational distribution of the species.

Previous Culture in the United States

If an exotic species has been grown in the United States under climatic conditions similar to those in Pennsylvania, it is reasonably certain that it will also grow in this state. But the fact that an exotic species has failed in this state, or in a similar eastern climate, does not necessarily prove that some other climatic race of the same species could not be grown successfully in Pennsylvania.

Seed collectors have usually gathered tree seeds from the most convenient, rather than from the climatically, most prominent locality. Some Japanese trees (and possibly some southern South American species) undoubtedly have failed in the eastern United States because they represented low elevational races; mountain races of such species probably would have been hardy. Past failures of some of our western American species in the East, may be attributable to use of the wrong geographic race.

APPENDIX B

Methods of Estimating Stumpage Prices of Saw Timber

In the basic calculations in Tables I to IV, which show costs and revenues over a 100-year growing cycle, revenue is derived chiefly from the sale of saw timber in units of a thousand board feet. Hence, all estimates of stumpage prices shown in Table III are for saw timber in units of a thousand board feet.

1. For the years 1940-1946 the estimated stumpage price of saw timber has been calculated from the average stumpage price received by the Commonwealth and the per cent of total board feet sold in the form of cord wood. These items are shown below.

Year	Total Timber Cut on State Forests (In Thousands of Board Feet)	Total Receipts from Timber Cut	Average Stumpage Price per 1000 Board Feet	Per Cent of Total Bd. Ft. Sold in the Form of Cord Wood
(1)	(2)	(3)	(4)	(5)
1940	9,302	\$52,091	\$5.60	38.8
1941	11,622	61,945	5.33	40.7
1942	12,799	91,257	7.13	11.5
1943	19,105	145,962	7.64	11.0
1944	21,166	183,298	8.66	14.4
1945	17,799	172,294	9.68	18.3
1946	21,666	275,592	12.72	20.8

The Department of Forests and Waters reports that during this period it received approximately \$2.00 per thousand board feet for timber sold in cord units. If the total volume of timber cut is reduced by the volume of timber sold in the form of cord wood, and receipts from cord wood are removed from the total receipts, the remaining board feet and revenue are for saw timber. Division of these items results in an average stumpage price for saw timber.

2. The estimates for 1910, 1920 and 1930 have been calculated on the basis of mill prices† for those years and on the assumption that the relationship between mill prices and stumpage prices did not differ from the relationship which prevailed during 1939-1943

3. The estimated price for 1948 was calculated in the same manner as the price for 1940-1946; however, the volume of timber cut during this year was considerably smaller than for the years 1940-1946. It is probable that the average size and species also differed from the previous years. This may account for the relatively lower price.

4. Price for 1949 represents an estimate supplied by the Department of Forests and Waters.

Calculation of Rates of Return at Various Stumpage Prices

With a land cost of \$2.46 per acre and annual charges of \$.50 per acre and specified cuttings at the 50th and 70th years, the rate of return for a 100-year growing cycle may be calculated from the following formula:

$$2.46 (1+x)^{100} + .50 \left(\frac{(1+x)^{100} - 1}{x} \right) = Y (1+x)^{50} + 2Y (1+x)^{30} + 18Y + 2.46$$

Where x = rate of return, Y = average stumpage price.

In the calculation, it has been assumed that returns at 50 and 70 years are reinvested at the same rate as the initial investment.

APPENDIX C

Calculation of the Rate of Return After Federal Income Taxes on 100 Acres of Timberland Over a Period of 100 Years

Costs:

Investment in Land	\$246.00
Annual cost (yearly investment)	50.00

Returns (Based on 1949 Prices):

At 50 years (less taxes)	\$1,192.00
At 70 years (less taxes)	2,384.00
At 100 years (less taxes)	20,528.00
Residual land value	246.00

The costs and returns are diagrammed below; returns at 50 and 70 years are assumed to accumulate interest at the same rate as initial investments.

† Henry B. Steer, Lumber Production in the United States, 1799-1946, U. S. Gov't Printing Office, Washington, 1948, pp. 116-225.

Years	0	50	70	100
Costs:				
\$246 land investment and \$50 annual cost				
				Final Value of Returns
				Residual Land Value \$246
				Return at 100 years (less taxes) \$20,528
			Return (less taxes) — \$2,384 (1 + R) ⁵⁰	
			2,384	
		Return (less taxes) — \$1,192 (1 + R) ⁵⁰		
		\$1,192		

The following formula gives the rate of return (=R):

$$246(1+R)^{100} + 50 \left(\frac{(1+R)^{100} - 1}{R} \right) =$$

$$1192(1+R)^{50} + 2384(1+R)^{50} + 20,528 + 246$$

By successive approximations: R = 2.83%

APPENDIX D

Reference Table 1

STATE FOREST LAND ACQUISITIONS BY YEARS (As of January 1, 1950)

Year	Number of Acres Acquired	Year	Number of Acres Acquired	Year	Number of Acres Acquired
1898	17,099.9	1917	5,593.5	1935	1,485.2
1900	78,130.7	1918	14,459.8	1936	1,075.9
1901	44,396.5	1919	16,459.3	1937	421.7
1902	175,047.4	1920	59,783.3	1938	—1.7
1903	87,984.5	1921	17,760.8	1939	1,043.9
1904	142,243.1	1922	4,273.7	1940	2,304.1
1905	86,625.3	1923	766.3	1941	158.2
1906	67,848.5	1924	334.4	1942	310.4
1907	50,808.2	1925	172.3	1943	1,069.7
1908	75,230.9	1926	660.4	1944
1909	99,300.6	1927	607.0	1945	47.5
1910	17,183.5	1928	39,639.5	1946
1911	32,426.1	1929	118,001.3	1947	19,774.7
1912	15,987.1	1930	138,443.4	1948	20,443.5
1913	11,777.1	1931	116,335.0	1949	34,533.0
1914	9,354.6	1932	64,814.9		
1915	3,639.5	1933	37,584.6		
1916	8,135.5	1934	49.4	Total ...	1,730,534

From: Commonwealth of Pennsylvania, Department of Forests and Waters.

Reference Table 2

EXPENDITURES ON STATE FOREST LANDS—1949 *

Administration (Harrisburg office)	\$84,000
Forest Protection	68,950
Forest Management	235,937
District Administration	333,462
Payments in lieu of taxes	109,457
Total Expenditures	\$831,806
Expenditures per acre48

From: Commonwealth of Pennsylvania, Department of Forests and Waters.

* Bureau of Forest expenditures not incidental to the growing and harvesting of wood are not included. Two major items excluded are expenditures for the operation of tree nurseries and expenses incurred in protecting private forest lands from fire. No attempt has been made, however, to allocate expenditures for administration which included aid to private woodland owners, educational and public information activities. Therefore, actual costs per acre are probably less than the figure indicates.

Reference Table 4

LANDS ADMINISTERED BY THE BUREAU OF FORESTS

State Forest Land (January, 1950)	1,730,534 acres
Naturally Reforested Land (Commercial and Non-Commercial Forests) * ...	1,653,534 acres
Commercial Forests†	1,323,534 acres
Non-Commercial Forests‡	330,000 acres
Artificially Reforested Land (Commercial Forests)§	77,000 acres
Total Commercial State Forest Land (1,323,534 plus 77,000)	1,400,534 acres

From: Commonwealth of Pennsylvania, Bureau of Forests, Department of Forests and Waters.

* These lands consist chiefly of cut-over forests and a small percentage of open fields that were reforested by seed from cut and standing trees and sprouts from stumps and roots of cut trees.

Planting of seedlings grown in nurseries is not necessary except on occasional open sections that are not fully stocked with valuable trees.

† Commercial Forests are lands which will grow timber at a profit.
‡ Non-Commercial Forests will not grow timber at a profit because of inaccessibility and poor growing conditions. The chief purpose of these forests at present is watershed protection. It is very likely that ultimately a large portion of this area will become productive.

§ These lands were planted with forest trees of commercial importance.

Reference Table 5

RATES OF FORESTRY TAXATION IN SELECTED STATES

Tax on Timber and Classified Lands			
State and Type of Classification*	Fixed Assessment Per Acre	Annual Specific Tax Per Acre	Timber Sever- ance Tax
(1)	(2)	(3)	(4)
Indiana Forest Planta- tions	\$1.00
Iowa Forest Reser- vations	\$4.00
Maine Reforestation Lands	Exempt for a period of 20 years.
Michigan Commercial Forest Reserve	\$.05	Graduated from 2% if harvested in the first year of classification to 10% in the ninth and sub- sequent years.
Michigan Woodlot	Not more than \$1.00.	5%
Oregon Forest Crop Lands	\$.05 west of summit of Cascade Mountains. \$.025 east of summit of Cascade Mountains.	12.5%
Washington Reforestation Lands	\$1.00 west of summit of Cascade Mountains. \$.50 east of summit of Cascade Mountains.	1% for each year property classified. Maxi- mum rate of 12.5%.
Wisconsin Forest Crop Lands	\$.10	10%
Wisconsin Special Class- ification	Graduated from \$.40 to \$.15 during first 8 years of classifica- tion. There- after \$.10.	Graduated from 2% in first year of classification to 10% in the ninth and sub- sequent years.

* The requirements for classification vary from state to state. Of importance in the determination of eligibility for classification are: size of the plot, number of trees per acre, maturity of the timber and restrictions on other uses.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

The study of smoke control by a subcommittee of the Joint State Government Commission was directed by Senate Resolution Serial No. 43, Session of 1949, which reads, in part: "Resolved that the Joint State Government Commission, through a subcommittee, is hereby directed to make a thorough and exhaustive study of the smoke and soot nuisance problem existing in the Commonwealth to the detriment of the health of its citizens and the depreciation in value of property, a study of the various smoke and soot control methods and devices and their relative costs and shall prepare model smoke control plans suitable for use by the various political subdivisions of the Commonwealth . . ."

"Resolved that the subcommittee make a report of its findings and recommendations to the Joint State Government Commission and the Commission report the results of the committee's study and recommendations to the General Assembly on or before the first day of February, one thousand nine hundred and fifty-one, together with any proposed legislative measures the committee might deem necessary or advisable to reduce or eliminate smoke and soot nuisances on a state-wide or local basis."

In accordance with the foregoing resolution, herewith are submitted the findings and recommendations of the subcommittee on smoke control.

(Signed) BAKER ROYER, chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

APPENDIX

Reference Table I. The Regulation of Smoke Emission and Air Pollution by Twelve Selected Ordinances

Reference Table II. Smoke Control Methods of Regulation, Fees and Penalties in Thirteen Selected Areas

SUMMARY OF FINDINGS

I. Smoke is defined as the products of combustion diffused in air. The products of combustion are both visible and invisible. The visible components are soot (carbon

particles and tarry materials) and fly ash (noncombustible particles). The invisible products are compounds of sulphur and oxygen and carbon and oxygen. The most objectionable invisible combustion products are the compounds of sulphur and oxygen, since they combine with moisture to produce acids which act destructively on metal, paint, stone, and animal and vegetable fibers.

II. Because of the important part that coal has played in Pennsylvania's industrial development, smoke has come to be regarded by many as a symbol of prosperity. It should be regarded as a symbol of waste, since it is indicative of incomplete burning of fuel.

III. Damage to real property, damage to personal property and increased operating expenses (such as the expense occasioned by the need for additional illumination) are costs imposed upon the citizens of a community by the visible and invisible products of combustion. The costs of smoke to each individual are estimated to be sometimes as high as \$30 a year.

IV. Smoke was recognized as a source of annoyance as early as the 13th century, and the first legal cognizance of this annoyance was taken in England in 1273. Early recognition was limited to the visible components of smoke and to visible effects. Recently the nature of smoke and the effects of its invisible components, as well as its visible components, have been recognized and analyzed.

V. Of the visible products of combustion, soot results from incomplete combustion. Of the invisible products, some are the result of incomplete combustion and others are the products of complete combustion.

VI. The visible products of combustion may be measured in terms of density and opacity, while the presence of the invisible components of smoke must be established by chemical analysis. The emission of both of these types of products may be abated by:

A. The proper mixing of fuel and air to accomplish complete combustion.

B. The use of "smokeless" fuels, such as oil, gas, and low volatile solid fuels. Restricting use to these types of fuel would greatly alter the established patterns of coal production and coal consumption that prevail in Pennsylvania. As noted in A, above, any fuel can be burned smokelessly if complete combustion is accomplished and if the underisable products of complete combustion are removed from the chimney exhaust. (See C, below.)

C. The use of specialized devices in furnaces and stacks.

VII. In Pennsylvania, enabling legislation permits second class counties, first class cities, second class cities, third class cities, boroughs and first class townships to adopt measures for the abatement of smoke.

VIII. The effectiveness of a smoke control program depends upon:

A. The establishment of one smoke abatement unit for all communities within a given smoke-affected area.

B. The legal authority of political subdivisions to join together for the purpose of establishing a control unit.

C. The establishment of standards to fit local needs.

D. The maintenance of a balance between direct costs to the citizens of the area, the equipment costs to producers and the savings accruing to the community at large.

E. The availability of information.

SUMMARY OF RECOMMENDATIONS

I. That the area for the control of smoke shall not be smaller than one county.

II. That counties be permitted and encouraged to co-operate in the establishment and operation of a joint unit for smoke control, and establish standards of emission at least equivalent to those prescribed by the American Society of Mechanical Engineers.

III. That in local control units, there be established a three-member board with hearing and advisory powers.

IV. That the Commonwealth provide financial assistance to the counties which maintain Commonwealth approved control units for the purpose of payment of salaries of technical personnel; and that the appointment of such personnel be subject to the approval of the Secretary of Health of the Commonwealth.

V. That a State Office of Smoke Control for the establishment of standards and the clearing of information be established in the Department of Health.

Section I

BACKGROUND AND HISTORY OF SMOKE CONTROL

Contrary to the common but erroneous belief that the smoke nuisance began with the industrial revolution, smoke was a recognized source of annoyance in the thirteenth century. Legal notice of the nuisance was taken in England in 1273 when the use of coal was prohibited in London as prejudicial to the public health.¹ This attempt at legal control failed. In 1661, the diarist, John Evelyn, wrote, "The immoderate use and indulgence to Sea-cole alone in the City of London exposes it to one of the fowlest Inconveniences and reproaches that can possible befall so noble and otherwise incomparable City. And that, not from the Culinary fires, which for being weak and lesse often fed below, is with such ease dispelled and scattered above, as it is hardly at all discernible, but from some few particular Tunnels and Issues belonging only to Brewers, Driers, Limeburners, Salt and Sope-boilers and some other private trades. Whilst these are belching forth their sooty jaws, the City of London resembles the face rather of Mount Aetna, the Court of Vulcan, Stromboli, or the Suburbs of Hell, than an Assembly of Rational Creatures and the Imperial Seat of our incomparable Monarch. For when in all other places, The Aer is most serene and Pure, it is here eclipsed with such a clowd of Sulphur, as the Sun itself, which gives day to all the World besides, is hardly able to penetrate and impart it here; and the weary Traveller, at many miles distance, sooner smells, than sees the City to which he repairs."²

An attempt to control smoke was made in 1819 when an investigating committee was named by the British Parliament. On the basis of the reports of this and succeeding committees, legislation was passed which set up standards of measurement, enforcement measures and prohibitions.

The United States, in the beginning of the present century, became conscious of the increasing nuisance of excessive smoke in its industrial areas and a number of authoritative studies were made and reports published.

Prominent among the investigations are those made by the Department of Industrial Research of the University of Pittsburgh in 1912-1915 and by the Chicago Association of Commerce Committee of Investigation on Smoke Abatement and Electrification of Railway Terminals, in 1915. In 1912, the Department of Industrial Research noted that "Most of the larger cities of all industrial nations now have ordinances dealing with the subject. These ordinances, however, vary greatly in purpose, scope, character and stringency. They are, moreover, enforced with degrees of vigor that range all the way from zero to comparative efficiency."³

In the past 35 years smoke abatement movements have assumed the dimensions of civic crusades. Volumes have been written on the subject. Smoke abatement has been made a regular section in a number of technical engineering journals. Countless articles have been published by enforcement officers and others interested in smoke control methods. Smoke abatement has been widely discussed at engineering conventions and at meetings of enforcement officers. Interest in smoke abatement has stimulated the invention and production of new types of furnaces and control mechanisms and their voluntary adoption by industry.

Current interest in smoke control has been reflected in the passage of local smoke ordinances and in state legislation. The city of Boston has operated under state legislation for that area since 1910. In St. Louis, the present smoke control measures were adopted in 1937. Los Angeles' restrictions on smoke date from 1947. Chicago's smoke control laws were adopted in 1928 and since have been amended.

In Pennsylvania, cities, second class counties, first class townships, and boroughs have been permitted to adopt smoke ordinances through a number of legislative acts.⁴ These acts and the political subdivisions which they affect are:

1. The First Class City Law (City Charter), 1929, March 25, P. L. 66, § 1, No. 75, 53 PS 3451, grants general power to make ordinances for the proper management, care, control of city . . . and maintenance of . . . good government, safety and welfare . . . and full powers in matters of police.

2. The Second Class City Law, 1911, June 6, P. L. 667, § 1, 53 PR 9691, grants power by ordinance to regulate the production or emission of smoke. 1901, March 7, P. L. 20, Art. XIX, § 3, Cl. xxxiii, 53 PS 9673, grants power to make regulations to secure the general health of the inhabitants and to remove and prevent nuisances. 1901, March 7, P. L. 20, Art. XIX, § 3, Cl. xxxvi, 53

PS 9678, grants power to regulate the construction and inspection of fireplaces, chimneys, etc. . . and prescribe limits within which no dangerous, obnoxious, or offensive business shall be carried on. 1915, May 13, P. L. 297, § 1, [h], 53 PS 9718, grants power to regulate construction of chimneys, stacks, flues, smoke pipes and ventilators.

The act of 1927, Mar. 9, P. L. 18, § 2, 53 PS 3, provides that until otherwise provided by law, cities of the second class A shall continue to be governed, and shall have all the powers, privileges and prerogatives now

provided by the laws of the Commonwealth relating to cities of the second class.

3. The Third Class City Law, 1931, June 23, P. L. 932, Art. XXIV, § 2403, Cl. 10, 53 PS 12198-2403-10, grants power to regulate by ordinance the production and emission of unnecessary smoke from any source except railroad locomotives.

4. The Second Class County Law, 1943, May 28, P. L. 793, §§ 1, 2, 3, as amended 1947, May 9, P. L. 182, § 1, 16 PS 4061-3, grants detailed powers to regulate smoke and equipment within the county and provides penalties.

5. The First Class Township Code, 1949, May 27, P. L. 1955, Art. XV, § 1502, Cl. xxix, 53 PS 19092-1502, Cl. xxix, grants power to regulate the emission of smoke from any source except railroad locomotive stacks. 1949, May 27, P. L. 1955, Art. XV, § 1502, Cl. xxvi, 53 PS 19092-1502, Cl. xxvi, grants power to prohibit and remove any noxious or offensive manufacture, art, or business or any other nuisance on public or private grounds prejudicial to the public health or safety, and provides penalties.

6. The Borough Code, as amended, 1947, July 10, P. L. 1621, § 40, 53 PS 13321, 13328, 13329, 13363, grants power to Boroughs to regulate the emission of smoke from chimneys, smoke stacks and other sources except locomotive smoke stacks; to prohibit and remove nuisances and noxious and offensive business; and to make regulations necessary for health and cleanliness.

All Pennsylvania ordinances must operate within the sphere defined by the courts. In the past, the courts of the Commonwealth have declared several of the earlier ordinances invalid because their requirements were considered to be unreasonable.

Generally an ordinance may be considered unreasonable if there are no practical methods or devices for control, or if there is some form of discrimination in the ordinance itself. Illustrating this line of thought are two Pennsylvania cases, each dealing with Pittsburgh in which the courts ruled on the validity of local ordinances. Both concerned the second class city law, 1901, March 7, P. L. 20, Art. XIX, Sec. 3, Cl. xxxiii, which authorized regulations to secure the general health of the inhabitants and to remove and prevent nuisances. In the first case, that of Pittsburgh v. W. H. Keech Co., 21 Pa. Superior Ct. 548, (1902), the ordinance was declared unreasonable because the provision containing the penalty for violation stated that "smoke" should not be emitted from any smokestack, etc. The Superior Court held that it was unreasonable to forbid the emission of any smoke. The ordinance was therefore declared void. In the second case, Commonwealth v. Standard Ice Co., 9 Just. 270, 59 P. L. J. 101, (1910), the Pittsburgh ordinance was declared invalid because it would, in effect, have required the use of a mechanical stoker and eliminated hand firing. The ordinance forbade "the emission of dense black or dense gray smoke from any chimney except that of a private residence, excepting for a period of eight minutes in any one hour during which the firebox is being cleaned, or a new fire is being built therein." This was held by the court to be unreasonable.

The majority of the modern smoke control ordinances declare the emission of a certain type or density of smoke to be a nuisance. The general rule is that a municipality

by ordinance, or a state legislature by act can declare something to be a nuisance although it was not previously so recognized at common law, provided the action is not manifestly unreasonable or oppressive. According to the case of Nesbit v. Riesenman, 298 Pa. 475, (1930), the courts may adapt common law rules, as to nuisance, to new conditions, and such power is not inconsistent with the legislature's right to change the common law. (In some states the power to declare smoke a nuisance has been included in the police power, or made part of health and sanitary regulations.)

In Commonwealth v. Baker, 160 Pa. Superior Ct. 640, (1947), it was held that where an ordinance declares a thing to be a public nuisance and also provides a penalty, the penalty may be imposed without proof that a nuisance in fact exists, if the prohibited act has been committed. In Bunkin et al. v. Miller, 9 D & C 743, (1927), an injunction was granted restraining the owner of a laundry from "casting smoke upon the dwellings" of the complainants, contrary to the provisions of a 1904 Philadelphia ordinance. The proof was that dense columns of black smoke came from the chimney of the laundry.

It has been held by the courts that, in the absence of a valid ordinance regulating smoke, smoke is not, per se, a common law nuisance.⁵ It has been established, however, that smoke may be a private nuisance in the event that damage can be shown.⁶ For example, when smoke from a manufacturing plant or mill damages the buildings, soil or crops of an adjoining landowner, or affects his health, the aggrieved may recover damages therefor.⁷ However, the mere existence of smoke is not sufficient. When actual damage can be shown, the injured can obtain an injunction in a court of equity requiring the offender to abate the nuisance. Such injunction usually prohibits further operation of the plant until effective smoke control is accomplished,⁸ or prohibits the use of the type of fuel causing the damage.⁹ The manufacturer is not liable for injury, however, if he is using the most effective known means to prevent smoke and if he is otherwise conducting his business legally.¹⁰

In the case of smoke from railroads, Pennsylvania courts have ruled that an adjoining landowner cannot recover for inconvenience or loss occasioned thereby unless negligence, unskillfulness or malice is proved,¹¹ or that there is more smoke than necessity requires.¹² Damage, alone, will not be adjudged a nuisance, since railroads are affected with a public interest.

The courts have further ruled that in an industrial area, a certain amount of smoke must be tolerated. In Hannum et al. v. Gruber et al., 346 Pa. 417, (1943), it was held that the owners of property residing in an industrial district are entitled to protection from smoke, odors, gases, smudge and noises, only to the extent that these things are unnecessary and unreasonable under the circumstances. A factory in an industrial area is not a nuisance per se, but failure to make a reasonable effort to avoid smoke may constitute a nuisance.

Section II

THE COST OF SMOKE TO THE COMMUNITY

It appears obvious to every dweller in an industrial area that smoke causes him certain expenses which would not arise if the air were clear. Some of these costs can be expressed in terms of dollars, others are of such a nature that they may not be so determined. Such expenses as cleaning, maintenance, illumination, damage to property, etc., may be directly expressed in terms of the dollars they cost each member of the community in laundry and cleaning bills, repairs to buildings, larger electric light bills on dark days, etc. Such items as the loss to the community of citizens who prefer the suburbs to smoky city, with resultant loss to the city in revenue and in property value, are not measurable in dollars although it is widely agreed that they are consequential.

The dollar value of the measurable costs, however, present a standard by which to judge the desirability of abating smoke in a community, even though it does not represent the cost of smoke alone, but of all air-borne dirt, a part of which is the product of combustion. (See Section IV, C. Dustfall Measurements.)

A number of attempts to ascertain the dollar costs of smoke per person have been made. Perhaps the most widely quoted even today is the survey made by the Pittsburgh Institute of Industrial Research in Smoke Investigation Bulletin No. 4, published in 1913. Other similar surveys tend to substantiate the findings of the Pittsburgh study.

The Pittsburgh survey in 1913 offered the following comment on the costs of smoke:

"Because of the important part that coal has played in the industrial development of Pittsburgh and because the coal has been so burned, or rather so poorly burned, that it has given off great quantities of black smoke, Pittsburghers have come to regard smoke as a sign of prosperity.

"That is a false conclusion, a superficial study of good engineering practice will show as combustion with heavy smoke always indicates loss."¹³

The 1913 survey itemized the measurable costs of smoke to Pittsburgh as:

1. Cost to the Smoke Maker	
(a) Imperfect Combustion	\$1,520,740
2. Cost to the Individual	
(a) Laundry Bills	1,500,000
(b) Dry Cleaning Bills	750,000
3. Cost to the Household	
(a) Exterior Painting	330,000
(b) Sheet Metal Work	1,008,000
(c) Cleaning and Renewing Wallpaper ..	550,000
(d) Cleaning and Renewing Lace Curtains	360,000
(e) Artificial Lighting	84,000
4. Cost to Wholesale and Retail Stores	
(a) Merchandise	1,650,000
(b) Extra Precautions	450,000
(c) Cleaning	750,000
(d) Artificial Lighting	650,000
(e) Department Stores	175,000

5. Cost to Quasi-Public Buildings	
(a) Office Buildings	90,000
(b) Hotels	22,000
(c) Hospitals	55,000
	\$9,944,740 ¹⁴

By way of specifying the limitations of the above costs per year, the survey concludes, "It must be kept in mind that the cost of the items given is for the city of Pittsburgh only, and that no attempt has been made to estimate the cost for such items as depreciation in value of property, compulsory absence of certain industries, injury to health, impaired mental efficiency, etc."¹⁵

In 1909, the Smoke Prevention Committee of the Cleveland Chamber of Commerce fixed the loss for Cleveland at \$6,000,000, or \$12.00 per capita.¹⁶

A study of Chicago's losses due to smoke was estimated to be \$17,600,000, or \$8.00 per capita, in 1911.¹⁷

Property damage losses from smoke in the city of Toronto were estimated as recently as 1947 to be \$15,000,000, or about \$20 per person annually.¹⁸

Since the Pittsburgh smoke abatement program has been in effect, it is generally agreed that the damage attributed to smoke have materially decreased.

The citizens of St. Louis, another city which has been through a smoke prevention drive, and has operated for some years with a smoke ordinance, seem to consider the effort worth-while.

The smoke commissioner of St. Louis has observed that prior to the smoke abatement program it was estimated that smoke cost the city and its citizens \$14,000,000 per year of \$17 per person. After the smoke ordinance was adopted, a definite improvement could be noted, although the gain in dollars was difficult to estimate. Offered as indicative of the gain made through smoke abatement was the fact that before the smoke ordinance, the city had spent \$2½ million for renewal of paint and sheet metal, and after the adoption of the ordinance the paint jobs were easier, one coat of paint instead of two was needed, and the wearing qualities were increased at least 25%. In addition, it was stated that "The sheet metal workers of St. Louis expect the metal to last longer (it lasts three times as long in the suburbs as it did in St. Louis before the ordinance.) Fewer buildings need cleaning; housewives report that curtains stay clean longer; the Hotel Association of St. Louis says that savings to them in cleaning and re-decorating were approximately \$153,880, while the Electric Company estimated that the citizens saved about \$75,000 a year in electric light bills."¹⁹

In large installations, the overall efficiency from a given amount of fuel might be entirely satisfactory, but yet it may be possible that the effluent be objectionable in the amount of solid matter other than soot dispersed to the atmosphere. Dark smoke is indicative of incomplete combustion, but the actual heat loss occasioned by the lack of complete combustion of the tarry matter and dark colored particles is not great. (See Section III, C. The Causes of Smoke.)

¹³ "The Economic Cost of the Smoke Nuisance to Pittsburgh," Mellon Institute of Industrial Research, Smoke Investigation Bulletin No. 4, University of Pittsburgh, 1913, p. 44.

When the increases in the costs of materials and services, which have taken place since most of the above estimates were made, are considered, it seems reasonable to assume that, in a city or industrial area where the smoke nuisance is comparable to that of the cities mentioned previously, smoke costs each individual in that area between \$10 and \$30 annually, depending on the amount of particulate matter and sulphur gases contained in the smoke.

When the desirability of lowering the costs of smoke to the individual is considered, the costs of smoke abatement equipment to the producer should be borne in mind and a balance maintained between the cost of smoke to the citizen, and the cost to the producer of smoke abating equipment.

Section III

THE DEFINITION, CAUSES AND PREVENTION OF SMOKE

As used in this report, smoke is defined as the products of combustion diffused in air.²⁰ This definition is widely accepted and covers both the visible and invisible products of combustion.

Smoke represents the products of both complete and incomplete combustion, and it is the latter which most often produces the visible smoke described as "objectionable," which ordinances have sought to abate.

A division of smoke into its visible and invisible parts is required if the problems of smoke control are to be understood.

A. Visible Products of Combustion

The components of visible smoke are largely soot and fly ash. Soot represents the carbon particles generally agglomerated with tarry material and is black in color. Fly ash is the non-combustible material found in solid fuels and is generally gray to white in color, depending on the composition of the fuel. Cinders are the larger portions of fly ash and are non-combustible constituents of coal. The solid or visible particles in smoke may be classified as: (1) grit which can be collected by deposit from the atmosphere and (2) particles so small they may stay suspended in air almost indefinitely.

B. Invisible Products of Combustion

The invisible products of combustion are:

1. Carbon dioxide, which results from complete combustion.
2. Carbon monoxide, which is produced by incomplete combustion.
3. Volatile hydrocarbons (gaseous chemical compounds of carbon and hydrogen), i.e., the combustible gases

²⁰ The Bureau of Industrial Hygiene, in the Department of Health, has maintained a Division of Air Pollution Control since 1949. The Division of Air Pollution Control is specifically concerned with the presence in air of chemical gases and fumes and other toxic materials. It is concerned with smoke control only in instances where the smoke may contain such toxic materials.

Investigations of conditions in given localities are instituted by the Division when deemed necessary or at the request of the citizens of the areas. From its experience, the Division is working toward the establishment of standards of toxicity for various air pollutants. The work is carried forward by the collection of samples of air at various investigation points, and the analysis of these samples to determine the kinds and amount of contaminants contained therein. Recently, the efficient execution of the program of special investigations and formulation of standards has been enhanced with acquisition of a completely equipped mobile laboratory for on-the-spot investigations, a spectrophotometer for determining minute amounts of contaminants, and additional laboratory facilities.

in fuel which are distilled from the fuel but are not consumed because the temperature of the combustion chamber is not sufficiently high, and which are consequently vented as gases into the chimney.

4. Gaseous combustion products of sulphur,

(a) Sulphur dioxide and (b) Sulphur trioxide, which combine with the moisture of the atmosphere to form sulphurous and sulphuric acids.

5. Ammonia in some fuels.

The visible products of combustion, soot, and fly ash, are generally considered the more objectionable and it is principally against them that smoke control ordinances have been drawn. Of the invisible combustion products, the most objectionable are the gaseous combustion products of sulphur which combine with atmospheric moisture to produce sulphurous and sulphuric acids. These acids are corrosive to most materials used in building construction as well as harmful to vegetation and animal fibers.

This report is confined to the smoke from fuels used for domestic and industrial heat and power generation; it does not include the specific air pollution problems created by the venting of chemical fumes and exhaust gases, metallurgical dusts and fumes, oil refinery gases and fumes, and the like. Although these contribute to air pollution, their problems and solutions are specific.

C. The Causes of Smoke

Although the fundamental chemical reactions of combustion are well understood, the mechanism of combustion is complicated by the physical difficulties of getting the chemical components, i.e., the fuel and the air, into intimate contact so that the reaction can take place. The absence of a fully completed reaction is the cause of the dark smoke nuisance. The fluid fuels, gas and oil, are more easily handled and adjustment of air more easily made than for the solid fuels. Poorly operated gas or oil furnaces may produce equally objectionable smoke as ever produced by incomplete combustion of a solid fuel. Coal is the most difficult fuel to burn completely and it is with the problem of the complete combustion of coal that most smoke abatement programs are concerned. The U. S. Bureau of Mines has observed, "To burn completely 1 pound of coal in a boiler furnace requires about 3 pounds of oxygen, or 15 pounds of air. One pound of coal will make a cube with 2¾ inch edges. Fifteen pounds of air at atmospheric pressure and temperature occupies a volume of about 200 cubic feet, which is approximately the volume of a 6 foot cube. The volume of these two cubes shows the relative volumes of coal and air that must be fed into the furnace to obtain complete combustion."²¹

This chemical union, or combustion, of the 2¾ inch cube of coal and the 6 foot cube of air is brought about in three zones in the ordinary hand fired house or small industrial furnace. These are (1) the oxidizing zone, (2) the reduction zone, and (3) the distillation zone. The air enters the bottom of a burning fuel bed through the grate. The oxygen of the air begins to combine with the carbon of the coal according to the following chemical reaction, with the liberation of heat.

²¹ "Combustion in the Fuel Bed of Hand Fired Furnaces," Bureau of Mines Technical Paper 137.

As the air progresses up through the fuel bed, the oxygen is consumed progressively at the surface of each lump of burning coal. This zone of the fuel bed is called the oxidizing zone and varies in depth with the depth of the fuel bed.

As the hot combustion gas from the oxidizing zone rises up through the coal bed, the hot CO_2 comes in contact with more combustible carbon, but there is no oxygen to continue the $\text{C} + \text{O}_2 \longrightarrow \text{CO}_2$ reaction, and the carbon of this, the reduction zone, takes its oxygen from the CO_2 produced in the oxidizing zone. The introduction of more air to the bottom of the fuel bed would increase the rate of combustion in the oxidizing zone but would not make available any more free oxygen for the reduction zone. The chemical reaction in the reduction zone can be shown as:

The amount of carbon dioxide that is converted or reduced to carbon monoxide is dependent on the time of contact and temperature but is limited at any specific temperature by chemical equilibrium. In a hand fired fuel bed, the temperature of the bed is about 2400°F , a temperature which allows rapid conversion to carbon monoxide.

The combustion gases from the reduction zone now enter the distillation zone which corresponds to the depth of the fresh fuel. On entering this zone, the gases are hot carbon monoxide and carbon dioxide which heat and distill the volatile matter from the fresh fuel and carry it from the fuel bed. In the combustion of fuels such as coke and anthracite, which are primarily carbon, the problems of the distillation zone are of little or no consequence. The maximum volatile matter of an anthracite coal is 8 per cent. Bituminous coal, however, may run as high as 40 per cent volatile matter.

Unless steps are taken at this point to mix these volatile products of the distillation zone with additional air for their combustion and keep them above their ignition point, they will enter the flue to the chimney unchanged with a loss of combustion efficiency. These gases are hydrocarbons (i.e., containing both carbon and hydrogen). On combustion, the carbon is converted to carbon dioxide, as is the carbon of a solid fuel. The hydrogen of these gases combines with oxygen to form water vapor.

When one considers that, in a bituminous fuel, 35 per cent of its weight (which can represent 50 per cent of its heat value) may be driven off as combustible gas in the distillation zone, it becomes apparent that this stage of combustion is a critical one for the elimination of smoke and for the elimination of loss in heat. The loss into the flue of 35 per cent unburned volatiles may mean a 50 per cent loss in heating value.

The visible soot and tarry material in smoke accounts for very little of the heat loss mentioned above. It has been estimated that the carbon in the soot accounts for one to five per cent of the carbon burned. It has been estimated that the percentage of heat lost in soot to be

2 per cent for hand fired furnaces and 1 per cent for mechanical stokers.²²

The foregoing discussion of combustion has been concerned with the combustion of carbon and hydrocarbons present in coal. However, in a discussion of combustion in connection with smoke abatement, sulphur, the principal impurity present in coal, must also be considered since it adds appreciably to the smoke nuisance. The sulphur content of Pennsylvania solid fuels is approximately as follows:

Anthracite—.4 per cent to 1 per cent
Coke—.6 per cent to 1.2 per cent
Bituminous—1 per cent to 4 per cent

When sulphur is burned in a furnace, it is combined with the oxygen of the air to form sulphur dioxide which, on further oxidation, forms sulphur trioxide. These oxides are acid gases which combine with water to form acids. Even though some of the sulphur finds its way into the ash, one per cent of sulphur in fuel can yield 60 pounds of acid per ton²³ of coal after combination with water.

It has often been said that any fuel can be burned efficiently and without undue smoke if proper precautions are taken. This presupposes that the furnace with auxiliary equipment, stack, etc., is adequate for its purpose. In the practical operation of a hand fired furnace, the lines of demarcation between the combustion zones mentioned above vary because the fuel is added periodically rather than continuously, resulting in the disturbance of the theoretical balance possible in a uniform bed.

During the addition of coal to a hand fired furnace, it is imperative that the addition be made so that part of the incandescent bed remains exposed. In this manner, the distillation zone is confined to one area, and its volatile products are brought to their ignition temperature by exposure to the incandescent area and are combined with additional air usually admitted through the small slots in the furnace door. In this way, the three requirements for complete combustion, (1) the temperature required to raise the products of distillation to their ignition point, (2) the admission of sufficient air for their combustion, and (3) the mixing of air and distillation products,²⁴ are met. A well constructed furnace is so designed that additional air is mixed with the gaseous distillation products and the mixture burned before it leaves the furnace.

Under theoretical conditions, complete combustion would result in the maximum production of heat and minimum smoke. Incomplete combustion resulting from improper firing and poor design of a furnace will cause a loss in heating efficiency through:

(a) combustible volatile gases vented through the chimney to the atmosphere, and

(b) soot and tarry materials carried through the chimney by these gases.

The loss in heating efficiency due to (b) above is of less importance than the loss due to (a) above.

Impurities such as sulphur, present in Pennsylvania solid fuels, particularly bituminous coal, account for an appreciable amount of the smoke nuisance although they

are not visible and would not be measurable by any of the standards for visible smoke.

D. Prevention of Smoke

1. Furnaces and Auxiliary Equipment

In recent years, the progress in the design of both domestic and industrial coal burning furnaces has been notable. It may be expected that the results of technological progress will become increasingly apparent as old furnaces are replaced and the demand for smoke abatement continues.

The types of anti-smoke furnaces now on the market embody such features as continuous feeding of fuel at a regulated speed, forced air feed to the fuel bed, etc.

Many smoke prevention bureaus conduct educational programs to instruct operators in proper firing methods and provide lists of efficient equipment.

As old furnaces are replaced, the smoke problem will tend to decrease. However, the life of a furnace is long, and its replacement expensive. To permit owners of the older furnaces to comply with smoke regulations the following suggestions are offered by experts in smoke prevention:²⁵

"1. Use a coal which gives off relatively little gaseous material.

"2. Adjust the rate of air flow to insure complete combustion. One way this can be done is by using "over-fire jets" to inject additional oxygen into the furnace gas.

"3. Collect and reinject unburned materials so it is burned. . . .

"The small plant, having relatively large-size particles of fly ash to cope with, may be able to keep fly ash emission within limits by installing a simple dust trap.

"Larger plants, using automatic stokers and maintaining high burning rates, and plants using powdered coal, have to turn to more complex—and more expensive—equipment. For these plants, fly ash collection is actually a major dust collection problem."²⁶

2. Types of Fuel and Their Relation to the Smoke Problem

The smoke nuisance varies with the amount of volatile matter in fuel. However, the exclusive use of low volatile fuel will not necessarily eliminate smoke.

"It is probably not an exaggeration to say that in the popular mind, coal is the fuel usually associated with smoke. As a matter of fact, the fluid fuels, gas and oil, can produce just as dense a smoke, and perhaps a more offensive one, than coal. They have a common property greatly to their advantage, however, in that they are more uniform in character, permitting precise control of feeding devices or "burners" with perfect mixing with air for complete combustion. This control is built into the burner, so that if once adjusted and then let alone, they will continue to function satisfactorily with periodic inspection. With coal, the infinite variety of size, moisture, . . . fusion, ash and fixed carbon, make each application a special study."²⁷

For purposes of this discussion, six types of coal are of interest. These are:

	Fixed Carbon Content	Volatile Matter
(1) Meta-Anthracite	98% or more	2% or less
(2) Anthracite	92% to 98%	8% to 2%
(3) Semi-Anthracite	86% to 92%	14% to 8%
(4) Low-Volatile Bituminous	78% or more	22% or less
(5) Medium-Volatile Bituminous	69% to 78%	31% to 22%
(6) High-Volatile Bituminous	Less than 69%	More than 31%

Source Typical Analyses of Coals of the U. S., U. S. Department of Interior, Bureau of Mines, Bulletin 446, p. 13.

It can be demonstrated that by controlling the type of coal used, a community can effectively decrease its smoke problem. Two of the larger cities which use this approach are Pittsburgh and St. Louis and, both have successful smoke abatement programs.

Pittsburgh forbids the use or sale of solid fuel of which the volatile content is more than 20%. However, if a fuel contains more than 20% volatile matter, it is acceptable under the ordinance if it meets the same standards in regard to smoke prevention as those for a fuel containing less than 20% volatile matter. This means that virtually all hand fired furnaces are required to use a smokeless fuel (either oil, gas or coal containing 20% or less volatile matter) but that mechanically fed furnaces may use the higher volatile coals if they are of the anti-smoke type and are approved by the Pittsburgh Bureau of Smoke Prevention.

Thus, while Pittsburgh restricts the volatile content of fuel, it makes allowances for the use of higher volatile coals under conditions which are acceptable. The Pittsburgh market offers a specially treated low-temperature carbonization coal, processed from a coal of higher volatile content than allowed by the ordinance, which has been approved for use. In addition, Pittsburgh has specified combinations of anthracite with high volatile fuels, or combinations of coke and high volatile fuels, which may be used within the limitations of the ordinance. This is a case where the ordinance restrictions on the type of fuel are not arbitrarily limited to one kind of coal but acceptable substitutes are permitted.

In St. Louis, one of the fuel problems confronting the city at the time of the adoption of the smoke ordinance was the sulphur content of the coal used in that area. To eliminate some of the sulphur and excessive fly ash also present in the coal, the ordinance requires the use of washed coal and limits the amount of volatile matter in coal used in the city to 23%. As in Pittsburgh, control is effected through the coal dealers.

In New York, the smoke problem is not concerned with the volatile content of coal, since virtually all the coal sold in the city contains less than 20% volatile matter. However, complaints against oil burners have recently outnumbered the complaints against coal furnaces showing that unless properly controlled they, too, can be a source of nuisance.

Limiting the types of fuels which may be used would greatly alter the established patterns of coal production and coal consumption that prevail in the Commonwealth.

Section IV

STANDARDS FOR DETERMINING THE EXTENT OF THE SMOKE NUISANCE

The householder judges smoke abatement programs by the color of the sky and the dirt on his window sills. The expert uses the same method but his observations are controlled and his standards are fairly closely defined. The expert's standards are designed (1) to measure the density of smoke as it issues from individual chimneys and (2) to measure the amount of solid material, a part of which is the result of combustion processes, which is deposited on a given area over a certain period of time.

A. Methods of Measuring Smoke Density

Ordinances are generally directed against "black" and "dark gray" smoke. As a result, comparative standards of measurement, adopted for use in judging compliance with the ordinances, are generally limited to the visible products of combustion.

1. Ringelmann Chart

Today the most widely used standard of measuring smoke density is the Ringelmann chart which has been in use for the last half century. This chart, which is the standard required by most smoke ordinances, consists of a series of lined squares of varying black and white composition as follows: Square No. 1 is 80% white and 20% black; Square No. 2 is 60% white and 40% black. Square No. 3 is 40% white and 60% black; and Square No. 4 is 20% white and 80% black. (No smoke is recorded as zero and 100% black smoke is recorded as No. 5.) This chart is placed at a distance from the observer at which the black and white areas seem to merge. The smoke issuing from a chimney is visually compared with the appearance of the squares of the chart, so that the observer may identify its density as No. 2, or No. 3, or whatever square the shade of the smoke most closely resembles. Prohibited densities are designated by reference to the numbers of squares, i.e., "density greater than number 2 on the Ringelmann Chart," or, "density equal to or greater than number 3 on the Ringelmann Chart."

[Chart not reprinted in this appendix. See original report, pages 32 and 33.]

2. Limitations of the Ringelmann Chart

The Ringelmann chart often has been criticized for its obvious limitations. Since it measures only the color density of smoke, a small number of dark particles will be shown to be objectionable, while a large volume of light colored particles will not be classed as undesirable, although the actual solids content of the latter far exceeds the former.

The superintendent of the Pittsburgh Bureau of Smoke Prevention, in discussing the Ringelmann chart observed, "There are many objections that can be brought against the use of a Ringelmann chart. For instance, there is the objection that the depth or size of the smoke stream has an influence on the light coming through. Obviously a column of smoke 1 foot in diameter would give a different reading from a column 10 feet in diameter. Some observers have tried to establish rules to correct and allow for the column depth. This is a matter of judgment and

to establish a rule that will meet all conditions does not seem possible. . . .

"Perhaps one of the most troublesome things is to try to obtain the Ringelmann number of a smoke that has a color other than black. A smoke may be very thick and heavy and yet so light in color as to give a low Ringelmann chart number. The color prevents a true reading and it is a matter of judgment or estimate on the part of the observer as to how dense the smoke is and what proportion of light comes through it. . . ."²⁸

"When we consider all the factors bearing on the accuracy of a Ringelmann chart reading, there is no use in trying to read too closely. It is impractical to try to read between shades. For example, when some observer says he found smoke of No. 3 1/4 or 3 3/4 he better call it No. 3 or No. 4 and let it go at that.

"Whatever may be said against the Ringelmann chart as to its accuracy, nothing can be said against its usefulness when used as a qualitative rather than as a quantitative instrument. It will give simply and quickly a good idea of what a stack is doing. In view of the difficulty of the subject and the present state of the art, it is no wonder that it has become popular and is used by practically all smoke prevention bureaus.

"Just consider that such a chart can be put in the hands of almost anyone, independent of their educational background. In other words, it does not require a college education to use a Ringelmann chart. Compare this with the method of determining smoke by using a pilot tube, collecting a sample of smoke from a stack and then analyzing it. Here an understanding is necessary of the longitudinal stratification of stack draft, a training in both chemistry and physics, along with a chemical laboratory."²⁹

The Ringelmann chart is criticized by smoke control officers as being unfair to the users of large smokestacks since the smoke from a small stack may be as dense as that from a large stack, but the quantity of smoke delivered will be greater in the case of the large stack. Other scientific arguments may be advanced against the Ringelmann chart, but the fact remains that it offers a practical measure of smoke as far as quality (the Ringelmann chart number), the length of time the smoke was emitted, and, by calculation, of quantity.³⁰

"In this matter of smoke and dust abatement it is impossible to overestimate the importance of simple cheap tests. There is always the danger that highly trained engineers, overlooking the human and economic problems involved, will make smoke prevention unworkable by insistence on over-precise methods."³¹

The fact that a certain amount of smoke is unavoidable has been recognized and a limited amount of a specified intensity of smoke is allowed within a designated period of time, or when a fresh fire is being made or flues being cleaned. To date, no more accurate standard of measurement, which at the same time is as simple, practical and cheap as the Ringelmann chart has been put into use.

²⁸ Manual of Instructions on Proper Firing Methods, Smoke Prevention Association of America, Inc., "The Ringelmann Chart" by Sumner B. Ely, p. 8.

²⁹ Ibid., p. 9.

³⁰ While quantity is not directly read from the chart, it may be calculated under the definition of a smoke unit. A smoke unit is defined as No. 1 smoke lasting 1 minute. So, No. 5 smoke for 6 minutes would give 30 units of smoke.

³¹ Philip W. Swain, Stack Smoke and Dust as a Community Problem, Smoke Prevention Association of America, 41st annual meeting 1948, pp. 5 and 6.

More accurate systems of measurement exist but are costly and limited in their usefulness.

3. Other Instruments and Methods of Measuring Smoke Density

The umbrascope is an instrument which has been used by some observers to assist in obtaining Ringelmann chart readings. The umbrascope is a tube into which a half circle of smoked glass may be inserted leaving the other half of the tube area open. An observer can compare the shade of the smoke with the shade of the glass. By inserting different glasses, different density shades can be matched.³²

Instruments for giving periodic recordings of smoke density are available. One of these operates on a principle similar to the "electric eye" which is used to count the number of cars passing a point on the highway. This instrument employs a beam of light which is thrown across the chimney stack to a photo electric cell. When dense smoke is emitted, the beam is broken and an automatic record made. This type of instrument often is used on large furnace installations to let the fireman know that the smoke coming out of the chimney high above him is more dense than allowed by law.

Another instrument for measuring the density of smoke consists of a permanent arrangement of a light beam across the chimney to a "thermopile" which is heated by the light. If the beam of light is completely unobstructed, the recording is zero. If the beam of light is completely intercepted by dense smoke, the recorder gives a reading of 100 per cent smoke density. Unlike the previously mentioned instrument, the thermopile gives continuous readings of the smoke density while the aforementioned only records those times when the upper limit of smoke density has been reached. The thermopile method of measuring smoke density was used during the summer of 1948 in a

test made in the Mechanical Engineering Laboratory at the University of Illinois.³³

The use of the last mentioned devices is confined to large furnace installations.

B. Measuring Invisible Components of Smoke

Although it is recognized that the invisible products of combustion are destructive and undesirable, no simple, easily used, inexpensive method of detecting the emission of these products has as yet been found.

The testing of chimney gases for the undesirable invisible products of combustion is not simple and generally not feasible for the small enforcement staffs of smoke control units, which usually do not have the technical staff for chemical analysis of the gas. Some industries have installed devices in their chimneys which make it possible to take samples of flue gases for analysis. However, the expense of getting samples of flue gas and then analyzing them makes the detection of undesirable flue gases almost impossible for the average smoke control enforcement staff.

C. Dustfall Measurements

To measure the amount of solid particles actually dropped from the atmosphere on a surface of known size over a period of time, several standards have been developed, such as the deposit gauge, the Owens automatic air filter, the impinger dust counter, the Owens jet dust counter and the electric air pollution meter.

The deposit gauge consists of a "large glass vessel of standard dimensions, open at the top and having a funnel-shaped bottom which leads to an otherwise closed collecting bottle. . . . Rainwater and the impurities settling from the air are washed down into the bottle and once a month this is removed and the contents analysed. From

the weights obtained and the catchment area of the gauge the rate of deposit over a given area can be calculated."³⁴

The data provided by the keeping of continuous records of a community's dustfall over a long period are of great value to the community itself as a partial measure of the effectiveness of a smoke abatement program. The records of the City of Pittsburgh for 1912-1913, show that 1031 tons of soot, ash or other solid particles were deposited per square mile in a year's time. (See Table I, page 40.)

The total of 1031 tons per year would give an average of 85 tons of dust deposited per square mile per month in Pittsburgh in 1912-1913. A survey made of the city in October and November of 1937 showed the dustfall to average 65 tons per month and, in 1947, the same months showed an average of 55 tons per month per square mile.³⁵

Dustfall data may not be used for inter-city or inter-area comparisons because the determinants of measurable dustfall may vary from locality to locality. For example, average temperature and variations in temperature affect dustfall. In the southern cities, where the air is warmed by the earth, it rises quickly carrying off with it much of the solid particles, whereas in the north, the earth is colder and the air remains closer to the ground. Wind, rain, the wear of paving by traffic, dust from leaves, open fields and the type of industry present in the community

have varying influences on the amount of air-borne dust. At best, variations in measurable dustfall are indications of changes in dustfall—part of which is produced by smoke—within a given community.

Although smoke contributes the major portion of the particulate matter in the atmosphere, it is not responsible for all the material deposited on the window sills of a neighborhood. A report made by the Chicago Association of Commerce, covering a long study of dustfall in that city, reveals that refuse in alleys, dust in streets and vacant lots, dirt on rooftops, materials from tires, clothes, shoes and buildings contribute large amounts of dirt. When the wind velocity is high, dust is blown from farms and fields many miles away.³⁶

It is on the basis of the measurements of dustfall that Pittsburgh officials say that after eight years of smoke control (1942-50) the following results have been produced:

1. The atmosphere today has 65 per cent less dirt of all kinds than in 1945.
2. No smog (mixture of smoke and fog) for two years.
3. Visibility conditions for aircraft improved 75 per cent.
4. Atmospheric dust reduced nearly as much in the last year as in ten previous years.³⁷

¹ Densities as shown in Ringelmann Chart.

² Railroads and private residences of not more than 5 apartments are excepted from the provisions of the ordinance.

³ Railroads are excepted.

⁴ Residences are excepted.

⁵ Densities prohibited and exceptions are classified according to size of stack as follows:
(Stacks range from small to large)

Stack Class Prohibited Density Exception to Prohibited Density

- | | | |
|---|----|---|
| 1 | #2 | May be exceeded for 6 min. in 60 |
| 2 | #2 | May be exceeded for 6 min. in 60 (Density of #3 permitted for 3 min. in 6 min.) |
| 3 | #2 | May be exceeded for 25 min. in 60 (Density of #3 permitted for 5 min. in 25) |
| 4 | #3 | May be exceeded for 3 min. in 60 |
| 5 | #3 | May be exceeded for 5 min. in 60 |
| 6 | #3 | May be exceeded for 15 sec. in 5 min. |
| 7 | #3 | May be exceeded for 10 min. in 60 |

⁶ Exceptions are as follows:

A. Fires set by or permitted by a public officer in the performance of official duties for weed abatement, prevention of a fire hazard, or instruction of public employees in the methods of fighting fires.

B. Agricultural operations.

C. Orchard or citrus grove heaters if not more than 1 gram of unconsumed solid matter is emitted per minute.

⁷ Emission limits are contained in special table of rules and regulations for special types of combustion.

⁸ All locomotives must use smokeless solid fuel or oil, mechanical stokers, or must be powered by diesel or electric engines when within city limits.

APPENDIX TABLE

Appendix	
Table I. The Injury Experience Rates of Occupations of State Employees for the Five-Year Period, Fiscal Years, 1944 to 1948, Inclusive	

SUMMARY OF FINDINGS

I. The employees of the Commonwealth receive wages or salaries, are entitled to paid vacation periods and sick leave with pay, and in addition, are covered by workmen's compensation insurance and are eligible for superannuation and disability retirement allowances.

II. The financing of workmen's compensation benefits is the exclusive responsibility of the Commonwealth (Commonwealth allocations to the Workmen's Compensation Fund for the calendar year 1949 amounted to \$533,793.07); payments to the State Employees' Retirement Fund are joint responsibility of the Commonwealth and the employee (Commonwealth contributions \$6,449,858, employees' contribution \$12,620,060 for the biennium 1947-49).

III. The compensation of state employees may be modified by changes in:

- a. Wage and salary scales;
- b. Workmen's compensation benefits;
- c. Retirement and disability allowances.

IV. The General Assembly of 1949 had before it five bills designed to liberalize the retirement allowances respectively of fish wardens, game protectors, institutional employes, Liquor Control Board enforcement officers and mine inspectors. Three of these bills—H. B. No. 200, H. B. No. 260 and H. B. 1166—passed both houses but were vetoed by the Governor on the ground that it had not been established that these employes are subjected to extraordinary hazards in the performance of their official duties.

V. The hazards associated with the enumerated occupations, measured in terms of severity rates (total days lost from work by virtue of disabling injuries per thousand employe hours worked) are shown on following page:

Type of Employment Occupation or	Rate Severity
All State Occupations	1.21
Fish wardens08
Game protectors82
Liquor Control Board enforcement officers ..	.11
Mine inspectors14
Employes of penal, correctional and mental health institutions*94

* It may be noted that the employes covered by Senate Bill No. 307 do not represent an occupational group but embrace some fifteen distinct occupations. Hence, no significant occupational severity rate can be computed for the aggregate. However, if the aggregate is viewed as defined in the bill, the severity rate is as shown.

VI. The facts show that severity rates for fish wardens, game protectors, Liquor Control Board enforcement officers, mine inspectors and institutional employes are not higher than the average for all state employes.

VII. Number of employes in the occupational classifications shown under V,* above, and their average salary for 1949 are:

	Number of Employes	Average Salary
All+ Commonwealth Employes	39,455	\$2,620
Liquor Control Board enforce- ment officers	209	3,525
Game protectors	137	3,170
Fish wardens	51	2,454
Mine Inspection, Department of Mines	55	6,600

INTRODUCTION

The Commonwealth of Pennsylvania compensates its employes in a number of ways.

All state employes receive salaries or wages; in addition, they are the beneficiaries of paid vacation periods and sick leave with pay.

* Employes of penal, correctional and mental health hospitals are not included because they do not constitute an occupational group.

All state employes are covered by Commonwealth financed workmen's compensation insurance.

All state employes are eligible for retirement allowances, financed jointly by the Commonwealth and the employe; some employes are eligible for occupational disability allowances.

Under the circumstances, the pattern of compensation of employes can be modified by changes in:

1. Wage and salary scales.
2. Workmen's compensation benefits.
3. Retirement allowances.

During the Session of 1949, five bills were before the General Assembly which contemplated the liberalization of retirement allowances for certain specified state employes.

Senate Bill No. 791 and Senate Bill No. 307 provided for liberalized benefits for mine inspectors and institutional employes respectively—that is, men and women employed by penal, correctional and mental health institutions. Neither bill was reported from committee.

House Bill No. 200, House Bill No. 260 and House Bill No. 1166, in effect, extended the principal provisions of the State Police Retirement System to Liquor Control Board enforcement officers, game protectors and fish wardens respectively. These bills passed both houses but were vetoed by the Governor.

In his veto message¹ the Governor observed: . . . "During the recent Session of the Legislature, the question arose that certain State Government employes in the performance of their duties are subject to conditions detrimental to their health and in many cases are exposed to injuries resulting in disability and premature death. In consequence, a resolution was introduced in the House of Representatives on April 5,* providing that the Joint State Government Commission shall be authorized to make the necessary studies to ascertain what these occupational hazards are, and report its findings to the next regular Session of the General Assembly. The resolution was referred to the Rules Committee on the same date where it remained until April 26, when it was incorporated into a General Resolution, Serial No. 86, and adopted by the House on that date and agreed to by the Senate on April 27.

"It would seem, therefore, that although this bill passed both houses in the closing hours of the General Assembly that the legislators felt the matter should be given further study. First, to determine the question of occupational hazards and whether such an employe should be entitled to additional benefits; second, whether the enactment of legislation pertaining thereto, such as the bill in question, would in anywise be discriminatory or prejudicial to State employes not included in such special provisions . . ."

Section I, below, briefly outlines the pattern of compensation of State employes, with special reference to the State Police Retirement System, which apparently served as the model for House Bill No. 200, House Bill No. 260 and House Bill No. 1166.

Section II deals with the measurement of hazards encountered by State employes following different occupations.

¹ Veto Message No. 33, Session of 1949; see also Veto Messages No. 37 and No. 40, Session of 1949.

* "October 5" in original.

Section I

THE PATTERN OF COMPENSATION OF STATE EMPLOYEES

As has been indicated previously, salaries currently paid, workmen's compensation benefits and retirement and disability allowances are all part and parcel of the compensation of state employees. Significant statutory provisions and economic and fiscal facts relating to different part of the pattern of compensation are shown below.

A. Average Earnings of Selected State Employees

The total number and average salaries of employees in selected state occupations and in all state occupations are shown for 1949 in Table I, below.

Table I

Number of Employees* and Average Salary for Selected Occupations† and All Occupations, 1949

	Number of Employees	Average Salary
(1)	(2)	(3)
ALL COMMONWEALTH EMPLOYEES	39,455	\$2,620
Selected Occupations:		
Liquor Control Board enforcement officers	209	3,525
Game protectors	137	3,170
Fish wardens	51	2,454
Mine Inspectors, Department of Mines	55	6,600

* Only employees who are members of the State Employees' Retirement System are included.

† Employees of penal, correctional and mental health institutions are not included, because they do not constitute an occupational group.

B. Workmen's Compensation Insurance

Benefits under the present workmen's compensation law are based upon the wage of the employe and vary with the extent of the disability within certain maximum and minimum limits set by law.

Compensation for total disability amounts to 66 2/3 per cent of wages for a total of 500 weeks after the seventh day of disability, with a maximum payment of \$25 a week and a minimum of \$12.50 a week. Compensation for permanent injuries such as amputations and disfigurement is paid at the above rate and within the same maximum and minimum limits for periods varying from 15 weeks for the loss of a finger to 215 weeks for the loss of an arm or leg.

Table II, below, shows the annual premiums paid by the Commonwealth to the State Workmen's Insurance Fund.

Table II

Annual Premiums Paid by the Commonwealth to the State Workmen's Insurance Fund on Account of Employees in All Commonwealth Departments

Calendar Year	Amount
1947	\$507,308.80
1948	486,482.23
1949	533,793.07

C. Retirement Provisions of the State Employees' Retirement System and the State Police Retirement System

Special benefits for occupational disability or death are not provided by the Pennsylvania State Employees' Retirement Act. Retirement upon disability may be accomplished, however, regardless of the source of disability, if the employe has had five or more years of service as a member of the retirement system.² Payments upon disability are independent of workmen's compensation benefits.

Since 1938, members³ of the Pennsylvania State Police have been under the State Police Retirement System. The following are the most important differences between the State Police Retirement System and the State Employees' Retirement System:

1. Superannuation retirement age is sixty years for state employees and fifty years for members of the State Police.
2. The superannuation retirement allowance consists of a member's annuity and a state annuity. The State Employees' Retirement System provides for a state annuity of 1/100th of the member's final salary multiplied by the number of years of service. The state annuity for members of the State Police consists of an annuity equal to 2/100th of the member's final salary multiplied by the number of years of service, and an additional annuity "which shall be equivalent to the additional member's annuity which the accumulated deductions standing to the credit of the contributor would purchase, if he retired at age sixty, under the State Employees' Retirement System; . . ." Under both systems, the state annuity shall not exceed fifty per cent of the contributor's final salary.
3. A member of the State Police may retire upon disability regardless of his length of service or the source of his disability.

Disability retirement allowance for a member of the State Police consists of: (a) a member's annuity of equivalent actuarial value to his accumulated contributions and (b) a state annuity equal to 2/100th of his final salary for each year of service, but in any case not less than thirty per cent nor more than fifty per cent of the final salary. This computation for like salaries and like number of years of service will always produce a larger disability allowance than that of a member of the State Employees' Retirement System.

The disability allowance for a member of the State Employees' Retirement System is computed as follows: (a) a member's annuity purchased by his accumulated contributions; (b) a state annuity, which, together with the member's annuity, is sufficient to produce 1/90th of the final salary multiplied by the number of years of service. The minimum disability allowance is 30 per cent of the final salary unless this product exceeds 8/9th of the allowance payable had retirement been deferred to the age of superannuation. In this case, the state annuity granted is the amount

² See "School and State Employees' Retirement Systems," Joint State Government Commission Report, March, 1949.

³ Official Opinion No. 389 of the Attorney General, March 5, 1941, states: "A person employed as a clerk, or in an administrative capacity by the Pennsylvania Motor Police, and not having police power, is also eligible for retirement under the Act of June 29, 1937, P. L. 2433, The Motor Police Retirement Act, supra."

which is sufficient to make the total disability allowance equal to 8/9th of the allowance had retirement been deferred until superannuation age.

4. The State Police Retirement System, unlike the State Employees' Retirement System, makes specific provision for payments upon death resulting from employment. If a member dies as a "direct and proximate result" of injuries received in the course of his employment, or while on disability retirement allowance resulting from such injuries, his widow or children under 18 years of age or dependent parents are eligible for a retirement allowance. The allowance consists of a member's annuity which is the actuarial equivalent of his contributions and a state annuity equal to 50 per cent of his final salary, less any amount received by the dependents under the Workmen's Compensation Law.

Table III, on the following page, shows both the Commonwealth and employee contributions to the Retirement Funds.

Table III

Commonwealth and Employee Contributions to Retirement Funds

	Fiscal Period		
	Fiscal Year Ending in 1948	Fiscal Year Ending in 1949	Fiscal Biennium 1947-49

Section II

RELATIVE HAZARDS OF STATE OCCUPATIONS

The following three yardsticks are commonly used to measure the injury experience of groups of workers:

1. Severity rate—the aggregate days lost from disabling injuries per thousand employe-hours worked.
2. Frequency rate—the number of disabling injuries per million employe-hours worked.
3. Severity average—the number of days lost per disabling injury (total number of injuries divided into total days lost).

Table IV, below, shows the three rates for each major state occupation for the five-year period, fiscal years 1944 to 1948.¹

When evaluating the rates shown in the table, it should be remembered that they do not measure risk in any absolute sense of the word. Comparison of these rates merely shows that, given personnel of a certain type, the performance of one occupation has been more hazardous, measured in terms of injury experience, than the performance of some other occupation.

Table IV

Injury Experience Rates of Occupations of State
Employees for the Five-Year Period, Fiscal
Years, 1944 to 1948, Inclusive

Occupational Groups	Severity Rate (Number of days lost from disabling injuries per thousand em- ploye-hours worked)	Frequency Rate (Number of Dis- abling Injuries per million em- ploye-hours worked)	Severity Average (Number of days lost per disabling injury)

APPENDICES

APPENDIX A

MEASUREMENT OF OCCUPATIONAL HAZARDS

I. Method

In estimating the hazards associated with an occupation, a quantitative analysis of the historical injury experience of employes has been made. If these estimates are to be used in forecasting future accident experience, it must be assumed that the factors affecting accidents—such as distribution of employes by personal characteristics (age, sex, physical condition and the like)—will be relatively similar in the future to the distribution during the period for which the data have been collected.

The historical injury data for Commonwealth employes have been collected from the State Workmen's Insurance Fund and the Bureau of Research and Information, Department of Labor and Industry. Only data on bodily injuries and statutory defined occupational diseases are included. The presence of occupationally induced mental disorders, unless associated with bodily injuries or statutorily defined occupational diseases, is not reflected in the data. Employee hours have been obtained from the departments, boards and commissions of the Commonwealth.

The following three measures of injury experience have been computed for the several occupations:†

† For details, see Appendix B.

1. Severity rate—the aggregate days lost from disabling injuries per thousand employe-hours worked.
2. Frequency rate—the number of disabling injuries per million employe-hours worked.
3. Severity average—the number of days lost per disabling injury (total number of injuries divided into total days lost).

In the computation of these measures of injury experience the standard definitions of the Federal Bureau of Labor Statistics have been employed. A disabling injury is defined as an injury by reason of which the employe is absent from work beyond the day or shift when the accident occurred. Injuries resulting in medical expenses but not in time lost are not considered. The determination of frequency rates requires no assumptions. Standard estimates of days lost for death, permanent total disability, and permanent partial disability, as currently employed by the Bureau of Labor Statistics, have been utilized.

II. Significance Tests

The stability of an injury rate will vary directly with the number of hours of exposure. For example, if the number of hours worked by a given occupational class were 50,000 in each of two different years, the frequency rate might be zero in one year and 100 in the other, while if 50,000,000 hours had been worked in each of the two years, one would expect the rates in the two years to be approximately the same for each year.

In this analysis, a given occupational rate was defined as being not significantly different from the rate for all state occupations if the difference between the two could have occurred by chance with a probability of at least one per cent. Cases in which the difference between an occupational rate and the rate for the state as a whole could have occurred by chance more than once in 100 trials but not more than five times in 100 trials were also noted.

The distribution from which a given frequency rate was drawn was assumed to be the binomial distribution described by the parameters N and P, N being the number of thousands of hours worked and P the probability of an injury occurring in 1,000 hours. The limits of nondiffering rates are defined as the given occupational

$$\text{rate} \pm 2.58 \sqrt{\frac{NP(1-P)}{N}} \text{ —. These limits narrow, i.e.,}$$

approach the given rate, as N approaches infinity. If the average frequency rate for all state occupations falls above the upper limit for a given occupation, the chances are 99 in 100 that the given occupational rate is less than the state average, and conversely, if the state average falls below the lower limit.

The distribution from which a given average was drawn was assumed to be Student's t distribution. The limits of nondiffering averages are defined as the given occupational

$$\text{average} \pm t \sqrt{\frac{S}{N-1}}$$

where N is the number of injuries and S the standard deviation of the distribution of days lost per injury for the given occupation. The .01 probability value of t varies with N-1, the number of degrees of freedom.

The significance of the severity rates is a function of the significance of the other two measures. The .01 limits of the severity rate are approximated by the products

of the .10 limits of the frequency rate and severity average divided by 1000. If, for a given occupation, the frequency rate and severity average are both significantly higher or lower than the rate for the state as a whole, the severity rate will be higher or lower than the state average.

The injury experience rates in Table I are reproduced below with notations showing which rates are significantly higher or lower than the state average.

KEY:

* Significantly different from the state average at the 5% level.

** Significantly different from the state average at the 1% level.

Figures shown without asterisks are not significantly different from the average for all state occupations.

Appendix B

OCCUPATIONAL CLASSIFICATIONS

The injury rates of state occupations have been determined by the methods shown in Appendix A. The sixteen major occupational groups used were adapted from the service classifications given in "Classification and Compensation System of Personnel Service" (established by the Executive Board, September 1, 1933). Modifications in the existing classification system were made for the following reasons:

1. To ascertain the injury experience of certain groups of employees covered by bills introduced during the 1949 session of the General Assembly.

2. To present in greater detail occupations within major service classifications which presumably might show significant differences in injury experience.

3. To establish subclassifications which would reflect differences in environment and in the nature of duties.

In compiling this list of sixteen major occupational groups according to actual duties performed, certain of the official service classifications were consolidated, some separately classified, and some divided on the basis of duties performed.

The service classifications consolidated are:

1. Law, Education, Public Information, Personnel Service and Library Service
2. General Office Services, Typing, Stenographic, Correspondence and Secretarial, Supply and Equipment, Mail and File, General Clerical and Record, Office Appliance Operating
3. Engineering, Scientific and Technical Services

Occupational groups separately classified are:

1. Liquor Store Sales Personnel
2. Domestic Services
3. Military Service—National Guard and Pennsylvania Guard
4. Protective Services—Capitol Police, Guard, Watchman
5. Medical Services
 - a. Physician
 - b. Nurse
 - c. Hospital Attendant
 - d. Hospital Technician

Occupational groups divided on the basis of duties performed are:

1. Administration and Supervision
 - a. Duties performed in offices
 - b. Duties performed in shop or field
2. Medicine
 - a. Physician
 - b. Nurse
 - c. Hospital Attendant
 - d. Hospital Technician
3. Engineering, Scientific and Other Technical Services
 - a. Duties performed in offices
 - b. Duties performed in shop or field
4. Conservation
 - a. Fish Warden
 - b. Game Protector
 - c. Other Field Conservation
5. Investigation and Inspection
 - a. State Police
 - b. Criminal, exclusive of State Police

- c. Liquor Control Board enforcement
- d. Mines
- e. Factories and Buildings
- f. Persons
- g. Tax, Rate, Price, Permit
- h. Products
- i. Other

TAX-EXEMPT LIQUID FUELS

A Survey of the Experience Under the Act of 1949, May 26, P. L. 1880, Which Provides for a Partial Refund of Tax Paid on Liquid Fuel Used for Non-highway Agricultural Purposes

A REPORT OF THE JOINT STATE GOVERNMENT COMMISSION

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA—SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania

House Concurrent Resolution No. 74 of the 1949 Session of the General Assembly directed the Joint State Government Commission to study and investigate taxation and exemption of liquid fuels utilized for nonhighway purposes, methods of exempting, taxing and rebating, and distributing any such taxes. The findings of the Commission are submitted herewith.

To aid in the study of tax-exempt liquid fuels, the Commission appointed a subcommittee in accordance with Act of 1943, March 8, P. L. 13, Section 1. The cooperation of the members of the subcommittee is gratefully acknowledged.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Table VIII. Number of Claims and Total Dollar Amounts Refunded in Each Pennsylvania County for Each of the Four Quarters

SUMMARY OF FINDINGS

I. Pennsylvania has levied a tax on liquid fuels since 1921. At the present time the tax rate is \$.05 per gallon, of which \$.03 is levied on a permanent basis and \$.02 under authorization which expires May 31, 1951.

II. In Pennsylvania, the proceeds from the liquid fuels tax and other highway-user imposts are shared by the Commonwealth, the counties, cities, boroughs, first class townships and second class townships.

III. In 1948 and 1949, allocations to the above named subdivisions were as follows:

	1948	1949
Paid to Counties from Liquid Fuels Tax Fund	\$9,007,482.74	\$9,540,112.37
Paid to boroughs, cities, and first class townships from Motor License Fund	4,430,316.38	4,996,155.84
Paid to second class townships from Motor License Fund . .	4,443,982.47	4,997,788.37

IV. Unlike numerous other states, Pennsylvania, prior to 1949, taxed all liquid fuel sold at retail and permitted no refunds of taxes paid on fuel used for nonhighway purposes. Other states, as a matter of traditional practice, have refunded part or all of the tax paid on liquid fuel not used for highway purposes. The major types of non-highway use for which liquid fuels taxes are often refunded are:

- Agriculture
- Aviation
- Cleaning and dyeing
- Construction
- Industry
- Railroading and navigation

In connection with aviation, the most recent activity which has laid claim to refunding, it may be noted that, while Pennsylvania collects the full tax on motor fuel used for aviation purposes, the proceeds of the tax realized from the sale of motor fuel for aircraft are used to improve airport facilities.

V. The General Assembly of 1949 (1949, May 26, P. L. 1880) made provisions for the refunding of one-half of the amount of liquid fuels taxes paid on fuels used for non-highway agricultural purposes and for the payment of a quarterly filing fee of \$1.50, such filing fee to be deducted from the claim. The quarterly filing fee of \$1.50, in effect, makes it impossible for a farm operator to get a refund on the first sixty gallons of liquid fuels in any one quarter for nonhighway agricultural purposes.

VI. During the first year of operation (July 1, 1949, to June 30, 1950), \$219,034.08 was paid in refunds to 7,617 recipients, an average of \$28.76 per recipient.

VII. The average acreage (including both cultivated and uncultivated land) of the farms of refund recipients was 219 acres, while the average acreage of all farms in Pennsylvania was about 87½ acres.

VIII. Recipients whose farms were smaller than 20 acres in almost all cases received less than \$40 during the year, while most recipients whose farms exceeded 500 acres received over \$100 during the year.

IX. The number of claims filed and the dollar amounts refunded for the period July 1, 1949, to June 30, 1950, are shown below:

Quarter	Claims Number of	Refunded Dollars
Third Quarter, 1949	5,287	\$78,324.70
Fourth Quarter, 1949	3,413	31,642.68
First Quarter, 1950	2,863	19,431.43
Second Quarter, 1950	5,625	89,635.27
Total	17,188	\$219,034.08

X. The farm operators filing claims, by quarters, as percentages of the total number of farm operators in Pennsylvania, were as follows:

Third Quarter, 1949	2.9%
Fourth Quarter, 1949	1.8%
First Quarter, 1950	1.4%
Second Quarter, 1950	2.8%

Section I

THE LIQUID FUELS TAX

A. History and Characteristics of Liquid Fuels Taxes

The first liquid fuels tax was levied by the state of Oregon in the year 1919. Pennsylvania introduced the tax in 1921. By 1929, all forty-eight states and the District of Columbia used this levy to help finance the rapidly expanding network of through ways, access roads and streets.

Although popularly referred to as a "tax," the levy on liquid fuels closely resembles the so-called "special assessment" or "betterment levy," which for generations has been used in many states to finance street and road improvements beneficial to abutting property owners.

As conceived by many legislative bodies, the liquid fuels tax is a price levy imposed upon the highway user with a view of compelling him to pay, at least in part, for the road facilities which he utilizes. If this view is strictly adhered to, it follows that liquid fuel not used for highway purposes should not be subject to the tax.

Relief from the tax can be accomplished by: (1) Exemption of fuel purchased for nonhighway purposes, and (2), refunding of the tax paid on fuel which is not used for highway purposes. A survey of selected states shows that the refunding method is used more extensively than the exemption method.

However, both methods present enforcement problems. These problems seem to be largely overcome by employment of a third arrangement under which the tax is collected in full from all purchasers of liquid fuel, but some portion or all of the tax collected from purchasers who make little or no use of highways is devoted to the financing of special facilities for these purchasers. Pennsylvania uses this arrangement in connection with aircraft operators. These operators pay the full tax, but the proceeds are used to develop airport facilities.

B. The Liquid Fuels Tax in Pennsylvania: Rates and Yields, Disposition of Proceeds, Refunding

1. Rates and Yields—Currently, the liquid fuels tax is levied at the rate of \$.05 per gallon, of which \$.03 is levied on a permanent basis and \$.02 under authorization which

expires May 31, 1951.¹ Diesel fuel is treated under a separate statute, which specifically provides that only diesel fuel used for highway purposes is subject to the levy.²

The yield of the liquid fuels tax, exclusive of tax collected on diesel fuel, is shown below for recent years.

Fiscal Year Ended	Total Receipts from Liquid Fuels Tax
1946	\$48,863,794.58
1947	69,806,865.55
1948	70,170,739.03
1949	78,102,266.18
1950	89,303,381.37

The yield of one half cent of the tax is paid into the Liquid Fuels Tax Fund for distribution among the counties; the remainder is deposited in the Motor License Fund, into which proceeds from motor license and related fees are also paid.

2. Disposition of Proceeds—The disposition of the proceeds from the liquid fuels tax is restricted by Article IX, Section 18, of the Pennsylvania Constitution, which provides in part:

"All proceeds from gasoline and other motor fuel excise taxes, motor vehicle registration fees and license taxes, operators' license fees and other excise taxes imposed on products used in motor transportation after providing therefrom for (a) cost of administration and collection, (b) payment of obligations incurred in the construction and reconstruction of public highways and bridges shall be appropriated by the General Assembly to agencies of the State or political subdivisions thereof; and used solely for construction, reconstruction, maintenance and repair of and safety on public highways and bridges and air navigation facilities and costs and expenses incident thereto. . . ."

In accordance with the constitutional mandate, the proceeds from the liquid fuels tax are reserved for highway purposes. On the state level, the Department of Highways, the Department of Revenue, the State Treasurer, Pennsylvania State Police and the Department of Public Instruction perform some highway-related functions and are allocated monies from the liquid fuels tax proceeds. On the local level, counties, cities, boroughs, first class townships, and second class townships share in the proceeds of the levy.

The allocations to political subdivisions for the period 1946 to 1949, inclusive, are as follows:

Fiscal Year Ended	Paid to Counties	Paid to Bor- oughs, Cities Towns and First Class Townships	Paid to Sec- ond Class Townships
1946	\$5,870,492.12	\$1,061,378.41	\$3,676,804.59
1947	7,235,308.87	4,222,142.70	4,254,029.64
1948	9,007,482.74	4,430,316.38	4,443,982.47
1949	9,540,112.37	4,996,155.84	4,997,788.37

3. Refunding—Until the passage of the 1949 legislation, Pennsylvania statutes did not provide for the exemption or refunding of tax paid on fuels used for nonhighway

¹ 1931, May 21, P. L. 149, as amended 1935, June 21, P. L. 412 and 1949, March 24, P. L. 315.

² 1947, July 2, P. L. 1199.

purposes. In 1949, the General Assembly passed and the Governor approved legislation (1949, May 26, P. L. 1880) which provided for the refunding of one-half the amount of tax paid on liquid fuels used for nonhighway agricultural purposes.³

The statute further provides that claims for refunds must be filed quarterly, and that for each quarterly claim a filing fee of \$1.50 is to be charged, such fee to be deducted from the claim. It should be noted that the payment of the required \$1.50 filing fee, in effect, makes it impossible for a farm operator to get a refund on the first sixty gallons of liquid fuel used in any one quarter for nonhighway agricultural purposes. ($\$1.50 \div \0.25 refund per gallon = 60 gallons.)

Total refunds paid under the 1949 legislation for each of the four quarters of the period beginning July 1, 1949, and ending June 30, 1950, are shown below:

Quarter	Number of Claims	Dollars Refunded
Third Quarter, 1949	5,287	\$78,324.70
Fourth Quarter, 1949	3,413	31,642.68
First Quarter, 1950	2,863	19,431.43
Second Quarter, 1950	5,625	89,635.27
Total	17,188	\$219,034.08

C. Refunding and Exemption Procedures in Selected States

Refunding procedures in the following twenty states have been examined:

California	New Jersey
Connecticut	New York
Delaware	North Carolina
Illinois	North Dakota
Indiana	Ohio
Kansas	Oklahoma
Maryland	Tennessee
Massachusetts	Virginia
Michigan	West Virginia
Missouri	Wisconsin

The states listed above have been selected for comparison because they either have had extensive experience with refunding provisions or are comparable to Pennsylvania in population and industrial stratification.

At the outset, it may be noted that, of the twenty states, only one—Oklahoma—uses the exemption method. All the other states operate with the refunding method.

General, the following major types of activity are covered by refunding provisions:

- Agriculture
- Aviation
- Cleaning and dyeing
- Construction
- Industry
- Railroading and navigation

In addition, the tax paid on fuel burned in stationary engines is frequently subject to refunding.

The treatment of aviation gasoline aside, seventeen of

the nineteen states using the refunding system refund on liquid fuel used for all nonhighway purposes; sixteen of these states refund the full amount of the tax. In North Carolina, only part of the tax is refunded; a tax of \$.07 per gallon is levied, of which \$.05 is refunded on fuel used for nonhighway purposes. In Tennessee, which also levies a \$.07 tax, \$.06 is refunded in the case of fuel used for agricultural purposes.

However, the economic significance of the refunding provisions in the states surveyed must be evaluated in the light of the minimum gallonage of fuel which must be used for nonhighway purposes before a claim for refund can be established. In six of the states reviewed, no refund may be claimed until a legislatively-designated gallonage has been consumed. The states and the minimum gallonage on which refunds claims may be based are listed below:

State	Minimum Gallonage
Tennessee	50
Kansas	40
West Virginia	25
North Carolina ⁴	10
Massachusetts	5
Virginia	5

In connection with the above, it should be carefully noted that the minimum gallonages shown are not comparable to the sixty gallons not subject to refund (due to the filing fee) in Pennsylvania. For example, in Tennessee, a person consuming fifty gallons or more may file a claim for refund on his entire consumption, whereas in Pennsylvania no refund can be granted on the first sixty gallons consumed.

As the above outline of refunding procedures indicates, the practice in most of the states reviewed provides for a full refund of the tax paid on all fuel used for nonhighway purposes. As will be recalled, Pennsylvania refunding at the present time is confined to refunding on fuel used for agricultural purposes only. Under the circumstances, the question may well be raised as to the amounts which would be involved if the General Assembly of Pennsylvania elected to grant a 100% refund of the tax paid on liquid fuel used for all nonhighway purposes.

The federal Public Roads Administration estimates that in 1949 private and commercial nonhighway use of liquid fuels in Pennsylvania amounted to 82,317,000 gallons, of a total consumption of 2,079,163,000 gallons. In other words, private and commercial nonhighway consumption of liquid fuels in Pennsylvania amounted to 4% of total consumption.

On the assumption that the estimates of the Public Roads Administration are substantially correct, a full refund on all fuel used for all nonhighway purposes, if in effect in Pennsylvania in 1949, would have reduced liquid fuel tax receipts by at least three million dollars.⁵

As has been previously observed, the statute provides that claims for refunds must be filed quarterly. In view of this requirement, it is desirable to analyze the effects of the refund provisions upon differently circumstanced

³For formal opinion of the Attorney General concerning the definition of "nonhighway agricultural purposes," see Appendix A.

⁴North Carolina provides for a filing fee of \$1.00, which means that no refund can possibly be claimed on the first 20 gallons. ($\$1.00 \div \0.05 refund per gallon = 20 gallons.)

⁵For table showing private and commercial nonhighway use of liquid fuels and total consumption of liquid fuels in selected states, see Appendix B.

farmers and different farm regions on both an annual and a quarterly basis.

Section II

PENNSYLVANIA LIQUID FUELS TAX REFUNDS ANALYZED ON AN ANNUAL BASIS

In this section, data relating to the number of refunds, classified by size of refund and the amounts of refund, related to both size of farm and number of acres under cultivation, is presented and analyzed.^o The data presented are on an annual basis for the period July 1, 1949, to June 30, 1950.

Table I shows, on an annual basis, the number of refund recipients and the percentages of refund recipients, classified by the size of refunds, and the percentages of the total dollar refund amount attributable to each refund size-group.

Table I shows that the 7,617 refund recipients received payments averaging \$28.76 during the year. The recipients receiving less than \$19.77 (one-half of the total number of recipients) operated 50.62% of the farms for which refunds were made and received 18.65% of the total amount refunded.

The farms of the 7,617 recipients to whom refunds were made during the year ended June 30, 1950, constituted 4.4 per cent of the total of 171,761 farms in Pennsylvania.

Of the 7,167 recipients, 7,264 reported the total acreage of their farms. As reported in the United States Census of Agriculture, 1945, the average size of all farms in Pennsylvania was 87.5 acres, but the average size of farms reported in connection with liquid fuels tax refunds was 219 acres. In Pennsylvania, one half of the farms exceed 70 acres in size, while one half of the farms whose acreage was reported in connection with liquid fuels tax refunds exceeded 163 acres.

TABLE I

Distribution of the Number of Refund Recipients, the Percentage of All Refund Recipients, and the Percentage of Total Dollar Amount of Refunds Classified by Size of Annual Refund in Dollars*

Size of Annual Refund in Dollars	Number of Recipients	Percentage of All Recipients	Percentage of Total Dollar Amount of Refunds

* Source: Appendix C, Reference Table 4.

with the percentage distribution of the total dollar refunds (Column 4), it appears that the share of the total amount refunded increases as the size of farm increases.

The percentage distributions of the number of farms of refund recipients by dollar amount of annual refunds and by acreage under cultivation are shown in Tables IV-A and IV-B, respectively.

In Table IV-A (which adds vertically) and Table IV-B (which adds horizontally), the appearance of larger percentages toward the right side and toward the bottom indicates that annual dollar refunds tend to increase as acreage under cultivation increases. Table IV-B also shows that recipients whose farms were smaller than 20 acres, in almost all cases, received less than \$40 during the year, while most recipients whose farms exceeded 500 acres received over \$100 during the year.

Section III

PENNSYLVANIA LIQUID FUELS TAX REFUNDS ANALYZED ON A QUARTERLY BASIS

The present section deals with the following inquiries:

1. Quarter by quarter, what percentage of Pennsylvania farm operators filed claims for refunds?
2. What percentage of total farm acreage did these operators cultivate?
3. Are there any significant variations in the number of claims when that number is related to farm size or number of acres under cultivation?
4. Does refunding exhibit characteristically different patterns in different regions of the Commonwealth?

Table V, below, shows, for the period July 1, 1949 to June 30, 1950, the farms for which claims were filed as a percentage of both the estimated total number of farms and estimated total acreage of farms in Pennsylvania.

Examination of the table shows that the percentage of farms filing claims for refunds ranged from 1.4% for the first quarter of 1950 to 2.9% for the third quarter of 1949. Similarly, the percentage of total acreage operated by the farms filing claims ranged from 3.8% to 7.2%. It may be noted that the farms for which claims were filed represented a greater percentage of total acreage than of total number of farms, which indicates that existing refunding provisions are more profitable to the operators of larger farms.

Table V

Farms for Which Claims Were Filed as a Percentage of Total Farms and as a Percentage of Total Acreage of Farms in Pennsylvania, July 1, 1949, to June 30, 1950

Quarter	Farms Reporting Acreage	
	Per Cent of Total Farms in Pennsylvania	Per Cent of Total Acres of Farms in Pennsylvania
(1)	(2)	(3)
Third Quarter, 1949	2.9%	7.2%
Fourth Quarter, 1949 . . .	1.8%	4.7%
First Quarter, 1950	1.4%	3.8%
Second Quarter, 1950 . . .	2.8%	6.8%

Table VI shows farm size measured in acres, estimated number of farms in given size-groups, the number of farms in each given size-group for which claims were filed, and the number of farms for which claims were filed in each size-group as a percentage of the total number of farms within the group.

Inspection of Table IV shows:

1. The typical Pennsylvania farm has from 100 to 139 acres.
2. Of the 27,864 farm operators having acreages ranging from 100 to 139,513 filed claims during the first quarter of 1950 and 1,170 during the third quarter of 1949.
3. Expressed as percentages of the total number of farms within this size-group, claims filed, for the two quarters mentioned above, represented 1.8% and 4.2%, respectively, of the farms within the group.

Inspection of columns (7), (8), (9) and (10), taken in conjunction with column (1), shows that as the size of the farm increases, the number of claims filed, as percentages of the total number of farms in given size groups, increases. For example, during the second calendar quarter of 1950, of the 16,735 farms containing from 1 to 9 acres less than one-tenth of 1% filed claims. At the other extreme, of the 959 farms having in excess of 500 acres, 24.5% filed claims.

Table VI

The Distribution of Farms in Pennsylvania by Size, the Distribution of Liquid Fuels Tax Refund Claims During Each of the Four Quarters by Size of Farm and the Percentages of Farms from Which Claims Were Filed to Total Number of Farms in Each Size Group

Size of Farm, Total Acres	Number of Farms, Agricultural Census of 1945	Number of Farms from Which Claims Were Filed ¹				Percentage: Farms from Which Claims Were Filed to Number of Farms, Agricultural Census

¹ Number of Farms Reporting Acreage. ² Less Than one-tenth of One Per Cent.

Table VII, below, relates number of farms from which claims were filed to number of acres which these farms had under cultivation.

Inspection of the table shows that if number of acres under cultivation is substituted for size of farm, the tendency observable in connection with Table VI, columns

(1), (7), (8), (9) and (10), comes into high relief.

For example, during the second calendar quarter of 1950, of the 39,776 farms cultivating from 1 to 9 acres, less than one-tenth of 1% filed claims. However, of the 94 farms cultivating in excess of 500 acres, 87.2% filed claims.

Table VII

APPENDICES

APPENDIX A

DEPARTMENT OF JUSTICE

Harrisburg, Pa.

January 9, 1950

FORMAL OPINION No. 602

Honorable Elmer G. Graham,
Secretary,
Board of Finance and Revenue,
Harrisburg, Pennsylvania

Sir:

We have your request to be advised concerning the interpretation of the Act of May 26, 1949, P. L. 1880 (hereinafter referred to as Act No. 558), which amends Section 17 of the Liquid Fuels Tax Act of May 21, 1931, P. L. 149, 72 P. S. § 2611q.

Act No. 558 provides in part as follows:

"Any person who shall use or buy liquid fuels on which the tax imposed by this act shall have been paid and shall consume the same in the operation of any non-licensed farm tractor or licensed farm tractor when used off the highways for agricultural purposes or non-licensed powered farm machinery for purposes relating to the actual production of farm products shall be reimbursed one-half the amount of such tax." (*Italics supplied.*)

Being in the nature of an exemption, these reimbursement provisions must be construed strictly against the

person seeking the benefits thereof: Section 58 (5) of the Statutory Construction Act of May 28, 1937, P. L. 1019, 46 P. S. § 558.

In order to answer your inquiries, it will be necessary to construe the meaning of the terms "tractor" and "powered farm machinery," since those terms are not defined in the act. The act further qualifies those terms with the words "licensed" or "non-licensed," apparently referring to the registration requirements of self-propelled vehicles contained in the Vehicle Code and the Tractor Code.

"Motor vehicles" are defined in the Vehicle Code as "Every vehicle . . . which is self-propelled, except tractors . . . agricultural machinery . . .": Section 2 of the Act of May 1, 1929, P. L. 905, as amended, 75 P. S. § 2. "Tractor" is defined in the same section as "Every vehicle of the tractor type, as defined in the Tractor Code."

The Vehicle Code contains no definition of agricultural machinery.

Section 401 of the Vehicle Code, 75 P. S. § 91, provides that motor vehicles determined by the Department of Revenue "to be used exclusively . . . upon the farm or farms" owned or operated by the owner of the vehicle are exempt from registration.

Turning to the Tractor Code (Act of May 1, 1929, P. L. 1005) we find in Section 102, as amended by the Act of May 18, 1949, P. L. 1456, 75 P. S. § 862, that a "tractor" is

"Every vehicle of the tractor type which is self-propelled, originally constructed under a distinctive name, make, model or type, by a generally recognized manufacturer, excepting road rollers, ditch diggers, or vehicles used exclusively upon stationary rails or

tracks. In the case of motor vehicles, as defined in the Vehicle Code, which cannot be used as motor vehicles, the secretary may determine in each case whether or not such motor vehicle is of the tractor type, and in making such determination the secretary shall consider the purpose for which such motor vehicle shall be used." (*Italics supplied.*)

"Farm Tractor" is defined by the said 1949 amendment to the Tractor Code as

"Every vehicle of the tractor type which is self-propelled, designed and used primarily as a farm implement for drawing plows, mowing machines and other implements of husbandry."

Section 201 of the Tractor Code, 75 P. S. § 891, exempts from the registration requirement those tractors which are

"... used exclusively by any person upon the farm or farms he owns or operates, or upon highways, connecting by a direct route, any farms or portions of farms under the ownership or operation of such person, to any other farm or to any garage for the purpose of having the same repaired, . . ."

These provisions of the Vehicle Code and the Tractor Code exempt both motor vehicles and tractors respectively from registration if used exclusively in farming. The registration requirements for motor vehicles and tractors are mutually exclusive.

As noted supra, Act No. 558 refers to tractors and powered farm machinery, but contains no express reference to motor vehicles. Since a motor vehicle is not embraced within the term "tractor," it cannot be included within the scope of Act No. 558 unless it is construed to be "powered farm machinery."

According to Section 33 of the Statutory Construction Act, supra, 46 P. S. § 533, "Words and phrases shall be construed . . . according to their common and approved usage . . ." Judicial opinions have expressed this same rule in various ways, e.g., "statutes are presumed to employ words in their popular sense"; such words must be given their "common or popular meanings," or be interpreted "as the ordinary man would understand them."

Thus, the terms "powered farm machinery" must be construed in their common and ordinary meanings. "Powered" means equipped with, or capable of operating with, power, presumably power furnished by gasoline motor. "Powered" is broader than "Self-propelled," and would not necessarily require that the gasoline motor be an integral part of the machinery so long as it furnishes the power therefor. The machinery could obtain its power from a stationary or a portable gasoline engine as well as from a self-contained motor.

In *Voorhees v. Patterson*, 20 Kan. 555, 56 (1878), it was held that a McCormick reaper was a "farm utensil"; and a hay-baler and a silo-filler were held to be "farm machinery" in *Lewis v. Insurance Company of North America*, 234 N. W. 499, 500 (Wis. 1931). In *West v. Springfield F. & M. Ins. Co.*, 178 P. 423 (Kan. 1919), it was held that a corn shredding machine operated by a gasoline engine was within the term "gasoline and steam power machinery." The term "farm machinery" is further restricted in the act to such as is used "in the actual production of farm products." In common parlance, this would clearly include reapers, harvesters, hay-balers, corn

shredders, silo-fillers, and other machinery of a similar nature.

You first inquire as to whether a non-licensed automobile, truck or jeep used exclusively on a farm for the transportation of fertilizer, crops, etc., may be considered as powered farm machinery. The mere fact that such equipment, if used on a public highway, would be required to be registered under the Vehicle Code does not prevent it from being construed as powered farm machinery. In our opinion, such a non-licensed motor vehicle can be construed as powered machinery.

Accordingly, you are advised that a non-licensed automobile, truck or jeep used exclusively on a farm for the transportation of fertilizer and crops, etc., is within the reimbursement provisions of Act No. 558.

You next inquire as to whether gasoline consumed by a sprayer mounted on a licensed truck which furnishes power to the sprayer is reimbursable under this section. You state that the owner of such a truck is engaged in the business of spraying trees for various farms.

Under the provisions of the Tractor Code, the Secretary of Revenue must determine whether a motor vehicle "which cannot be used as a motor vehicle" is "of the tractor type." If the secretary concludes that this is a tractor, then it would be within the reimbursement provisions of Act No. 558. On the other hand, if the truck is deemed to be a licensed motor vehicle and not a tractor, the gasoline used therein would not be reimbursable even when used for agricultural purposes.

The act does not require that the person using the gasoline for agricultural purposes be the owner or operator of the farm on which it is used. For that reason, the reimbursement provisions apparently apply to an independent contractor as well as to the farmer.

You further inquire as to whether the tax paid on gasoline consumed in furnishing power for a saw mill and other equipment used in cutting down trees and preparing lumber for market is reimbursable under this amendment. This raises the question of whether lumber is a "farm product."

In *Commonwealth v. Carmalt*, 2 Binn. (Pa.) 235, 238 (1810), in considering the meanings of the word "farm," the Court said:

"... By a farm we mean an indefinite quantity of land, some of which is cultivated. Most farms contain parcels of land applied to different purposes. Some are used for the cultivation of grass, some of grain, and some remain in wood. It is very common for the proprietors of farms to have a piece of wood land, not contiguous to the place of the their residence, but appurtenant to it. (*Italics supplied.*)"

In *Marple Township v. Lynam*, 151, Pa. Superior Ct. 288, 292 (1943), it was held that a nursery where ornamental and other trees and shrubs were grown was a "farm" within the permitted use of a township zoning ordinance. The Court said:

"The lower court found that the popular connotation of a "farm" is a place of several acres where the owner or tenant resides, a substantial portion of which is devoted to the raising of crops, such as wheat, oats, hay, etc., and some vegetables, such as corn and beans, and generally accompanied by the breeding of certain animals such as pigs, cows,

chickens, etc., the principal use of the produce being to maintain the farmer and his family and only the excess being sold.' Obviously defendants' contemplated use does not come within that definition and the injunction was granted on that ground.

"We cannot agree that the township, in the ordinance in question used the word 'farm' in that sense. But even a farm of that class has its woodlot and if, for example, locust trees are propagated and grown for sale as fence posts or evergreens as Christmas trees, it is still a farm." (*Italics supplied.*)

Contra, *Collins v. Mills*, 30 S. E. (2d) 866, 870 (Ga. 1944).

The foregoing authorities in Pennsylvania indicate that the trees cultivated on a farm and sold are farm products.

In *Ammon v. Bowles*, 154 Fed. (2) 698 (C. C. A. 8th, 1946), the Court decided that portable gasoline engines, the principal ultimate use of which was a source of power to operate various mechanical devices on farms, were "farm equipment" within a maximum federal price regulation relating to "mechanical equipment . . . used primarily in connection with the production and farm processing for market and farm use of agricultural products . . ." Thus, a saw used to prepare such trees for sale or use is functioning as farm machinery; and when it is powered by a gasoline engine, it is powered farm machinery engaged in the actual production of farm products within the meaning of Act No. 558.

You next inquire as to whether the tax paid on gasoline consumed in a lighting system for the purpose of lighting barns and other farm buildings as well as the farmer's home may be reimbursed under this section.

The fact that the gasoline motor furnishes mechanical power to a generator, which in turn furnishes electric power for certain farm machinery, would not prevent the application of the reimbursement provisions.

The use of the electricity produced by the lighting system would determine whether the gasoline was used in "powered farm machinery" for "the actual production of farm products." For example, electric power used in operating a milking machine would meet the reimbursement requirements, whereas power furnished to light the home would not meet such requirements.

Accordingly, reimbursements should be permitted for tax paid on gasoline consumed in a lighting system only for the proportion of gasoline corresponding to the ratio between the amount of electric current used in powered farm machinery for the actual production of farm products and the total amount used for all purposes.

You also ask whether a person is entitled to reimbursement of tax paid on liquid fuels consumed by a licensed combine or corn harvester which is self-propelled. You state that some farmers in Pennsylvania own licensed combines and corn harvesters which are self-propelled while others own non-licensed combines and corn harvesters which are drawn by tractors.

A self-propelled combine or corn harvester could be "licensed" only under the provisions of the Tractor Code, *supra*. It would necessarily be a "tractor" within the definition of that code, and the reimbursement provisions of Act No. 558 relative to "licensed tractors" would apply to such licensed combines or corn harvesters, which are self-propelled.

As to a combine and corn harvester drawn by a tractor, the reimbursement provisions of Act No. 558 would apply to the tractor, whether licensed or non-licensed.

Finally, you inquire as to the correct interpretation of the requirement in Act No. 558 that "every claim [for reimbursement] shall be accompanied by receipts indicating that the liquid fuels tax was paid on the liquid fuels for which reimbursements are claimed." A question arises where the farmer purchases the gasoline, together with other equipment and supplies, from a cooperative association or another firm or credit, paying for all purchases periodically or on an installment basis. Thus he would not be able to submit with his claim for reimbursement an individual receipt for the gasoline purchased showing the tax paid by him thereon.

In our opinion, it would be sufficient compliance with the act for the farmer to furnish you with the current delivery slips for his liquid fuels, showing the amount of Pennsylvania tax payable thereon, because the tax in every instance would have been paid to the Commonwealth by the licensed distributor prior to the time of its purchase by the farmer.

Our conclusions in this opinion may be summarized as follows and you are advised in accordance therewith:

1. A non-licensed motor vehicle used exclusively on a farm in the production of farm products is "powered farm machinery" within the reimbursement provisions of Act No. 558.

2. If the Secretary of Revenue determines that a motor vehicle which cannot be used as a motor vehicle is a tractor, the tax paid on gasoline consumed by it in furnishing power to a sprayer mounted thereon, would be reimbursable.

3. The person seeking reimbursement of liquid fuels tax is not required to be the owner or operator of the farm on which the liquid fuels was used, so long as it was used for requisite agricultural purposes.

4. Tax paid on gasoline consumed in furnishing power for a saw mill is reimbursable when done in connection with the operation of a farm.

5. Tax paid on gasoline consumed in a lighting system may be reimbursed only in proportion to the amount of electric current used in operating powered farm machinery.

6. The tax on all liquid fuels consumed in the operation of licensed or non-licensed combines and harvesters while engaged in the actual production of farm products is reimbursable.

7. The Board of Finance and Revenue has authority to accept current delivery slips of liquid fuels in support of claims for reimbursements, whether the purchaser does not pay cash for his liquid fuels when purchased, and cannot furnish receipts indicating that the liquid fuels tax was paid by him.

Very truly yours,

DEPARTMENT OF JUSTICE,
GEORGE W. KEITEL,
Deputy Attorney General.

T. McKEEN CHIDSEY,
Attorney General.

PARTIAL UNEMPLOYMENT COMPENSATION BENEFITS

A REPORT OF THE JOINT STATE GOVERNMENT COMMISSION

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA, SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

JOINT STATE GOVERNMENT COMMISSION

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

Herewith is submitted a report on partial unemployment compensation benefits, the study of which was di-

rected by House Concurrent Resolution Serial No. 87, of the 1949 Session of the General Assembly.

To assist in the study, a subcommittee was appointed by the Commission in accordance with Act of 1943, March 8, P. L. 13, Section 1. The cooperation of the members of this subcommittee is gratefully acknowledged.

The Commission has examined unemployment compensation statutes of the forty-eight states; made an intensive study of partial benefits payable under different employment conditions in sixteen states, including Pennsylvania, and analyzed the distribution of persons eligible for benefits in Pennsylvania by high quarterly earnings during the base year. The Commission conferred with statewide organizations representing both employers and organized labor concerning partial unemployment compensation benefits.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

L. 1355

SUMMARY OF FINDINGS

I. The forty-eight states of the union have unemployment compensation laws. The Pennsylvania unemployment compensation system was established in 1936. The Pennsylvania system at the time of its establishment provided for benefit payments only if a worker was fully unemployed; in 1945, the statute was amended to provide for benefit payments to partially unemployed persons.

II. In Pennsylvania, a covered employee is compensated for total or partial unemployment as follows: The statute establishes a minimum weekly benefit of \$8, to which a wage earner is entitled whose high quarterly earnings during his base year (the first four of the latest five calendar quarters preceding the date of application for benefits) ranged from \$60 to \$212. The benefit payment increases by \$1 for every \$25 of high-quarterly base year earnings exceeding \$212 until it reaches a maximum of \$25 per week at a high-quarterly earning of \$613 or more. In order to be eligible for benefits for either full or partial unemployment, a covered worker must have received remuneration during his base year in an amount not less than thirty times his weekly benefit rate. The maximum benefit payments for any one benefit year are twenty-four times the full weekly benefit rate to which he is entitled.

In the case of a fully unemployed person whose eligibility has been established, the full benefit rate is payable. In the case of a partially unemployed person, an incentive deduction of \$3 is made from his weekly earnings, and the balance of his earnings is deducted from his full benefit rate. In order to be eligible for benefits for partial un-

employment, a worker must earn less than his full weekly benefit amount.

III. It is the purpose of unemployment compensation systems to make available to a fully or partially unemployed covered worker some statutorily-determined fraction of the income which he would have earned in the covered employment had he been fully employed.

IV. To accomplish the objective indicated under (III), above, two systems are in use—the so-called “wage-loss” type of program and the “day-base” plan.

V. The “wage-loss” system is used by forty-seven states including Pennsylvania; the “day-base” plan is used only in the State of New York. It is possible to incorporate, within the framework of either system, a feature providing for supplemental allowances for dependents, and some states have incorporated such a feature.

VI. Under the “day-base” plan (used in New York), benefit rates are computed in basically the same manner as those under the “wage-loss” system (used in Pennsylvania). However, the payments are computed in a different manner. For purposes of computing the payments, the day-base plan recognizes a seven-day week. Provided a worker earns less than \$24 from his employment during the week, the fourth and succeeding days of unemployment in that week are designated as “effective days.” Four effective days are considered as a week of full unemployment and the full benefit amount is paid to any covered person who has accumulated four effective days.

VII. Examination of the two systems, described under II and VI, above, shows that in both, amounts paid for partial unemployment depend upon amounts paid for full unemployment.

VIII. The day-base plan, in use only in the State of New York, has recently been evaluated by a legislative committee at the direction of the New York General Assembly. This committee has recommended abandonment of the day-base plan.

IX. Generally speaking, evidence shows that the wage-loss system provides more generous benefits for covered employes in the lower earning brackets.

X. The payment of partial unemployment compensation benefits in Pennsylvania began in the week ending January 1, 1946. As of the first half of the year 1950, partial unemployment compensation benefits were 4.70 per cent of the total number of all benefit payments and were 2.71 per cent of the total dollar amount of all benefit payments. The average payment for partial unemployment during the first half of 1950 was \$11.85.

XI. Data on a monthly basis for the time period January, 1949, to June, 1950, show that women usually receive a greater number of benefit payments for partial unemployment than do men. The number of payments to women ranged from 43.92% to 78.67% of the total number of payments while the number of payments to men ranged from 21.33% to 56.08% of total payments.

XII. Of the major industry groups, the highest number of partial unemployment compensation benefit payments between January, 1949, and June, 1950, come under the manufacturing category with the second highest number in the wholesale and retail trade category.

XIII. During the calendar year 1949, the number of persons receiving partial unemployment compensation

benefit payments as a percentage of average number of covered employes was highest in the manufacturing group of industries (6.18%); this group was heavily weighted by the apparel and other finery products industry for which the percentage was 22.67, and by the textile mill products industry for which the percentage was 11.11. The major industry groups having the second and third highest percentages were the mining group and the construction group with 4.31% and 2.90%, respectively.

XIV. During the calendar year 1949, the weekly partial benefit was generally higher in the mining industry group than in other groups and generally lower in the manufacturing group and the wholesale and retail trade group than in other groups.

XV. Data for the time period January, 1949, to June, 1950, inclusive, indicate that more partial unemployment compensation benefit payments were made to persons who were eligible for the maximum weekly benefit amount than were made to persons eligible for any other weekly benefit amount.

Section I

INTRODUCTION

Since 1939 all forty-eight states have been paying benefits to unemployed workers under state unemployment compensation system. Wisconsin, in 1932, was the first state to initiate such a program. A federal system was established in 1935. In order to encourage each state to adopt its own unemployment compensation system, the federal statute provides that an employer's federal unemployment compensation tax may be reduced up to 90 per cent by the payment of a comparable state tax. In addition, federal law provides for grants for administrative purposes to states which have approved unemployment compensation systems.

In all states, benefits are paid to covered wage earners who are totally unemployed, and in all but one state¹ benefits are also paid to eligible partially unemployed workers. The amount of the benefit is generally about 50 per cent of the worker's weekly wage, with a given maximum and minimum, and, after a waiting period, is paid for a specified number of weeks or until a specified sum has been paid to the worker.

Eleven jurisdictions (Arizona, Connecticut, Maryland, Massachusetts, Michigan, Nevada, North Dakota, Ohio, Wyoming, the District of Columbia and Alaska) provide for dependents' allowances in addition to the weekly benefit payable to the unemployed worker. Except in Michigan, the full dependents' allowance which would be paid if the worker were totally unemployed is paid in the event that the worker is partially unemployed. In Michigan, a benefit to a partially unemployed worker eligible for one-half his weekly benefit amount includes one-half of his dependents' allowance.

Compensation for Partial Unemployment

Compensation for partial unemployment in the United States has developed more slowly than compensation for total unemployment. Although benefit payments were being made to unemployed workers in all states by 1939, seven states had made no corresponding provision for partial unemployment benefits at that time. Three years

¹ Montana.

later, the number of states with no partial unemployment benefits had declined to four (New York, New Jersey, Montana and Pennsylvania). Pennsylvania established a system of partial unemployment compensation in 1945. Today, only Montana has made no provision for partial unemployment benefits, although it does pay benefits at the rate for total unemployment to some workers who would receive partial unemployment compensation in other states.

Special problems arise in connection with compensation for partial unemployment. Some workers continue to be employed by the same employer but are working less than full time, and some workers have terminated their regular employment and are working part-time for someone else or at odd jobs. The former situation is commonly designated as "partial unemployment" and the latter as "part-total unemployment." Some workers, such as housewives, students, the physically handicapped and others who do not accept full-time paid employment, are referred to as "partially unemployed" as contrasted with "partially unemployed." Partially unemployed persons do not have full-time work but are working as many hours as employment opportunities permit and are seeking additional work. The identifying characteristic of partial unemployment is its involuntary nature.

The Wage-Loss and Day-Base Systems of Unemployment Compensation

There are two general systems of unemployment compensation: the wage-loss system and the day-base plan. Both systems are used to compensate for total and partial unemployment. The wage-loss system provides for weekly payments of computed amounts which approximate the difference between earnings and the weekly benefit amount for total unemployment. The day-base plan provides for accumulation of days of unemployment until the number of days equivalent to a week of total unemployment has been accumulated, at which time a payment equal to the weekly total unemployment benefit is made.

With the exception of New York, all states use the wage-loss system. Generally, under this system, the worker who has established his eligibility for partial benefits receives his weekly benefit rate for total unemployment less his wages from his partial unemployment in excess of a specified amount. In Michigan, Nebraska and Wisconsin, the worker receives in benefits his weekly benefit amount for total unemployment if his wages that week were less than one-half this amount, or one-half his weekly benefit amount for total unemployment if his wages were one-half or greater.

New York uses the day-base plan, under which benefit rates are computed in basically the same way as those under the wage-loss system. However, the payments are computed in a different manner. For purposes of computing the payments, the day-base plan recognizes a seven-day week. Provided a worker earns less than \$24 from his employment during the week, the fourth and succeeding days of unemployment in that week are designated as "effective days." Four effective days are considered a week of full unemployment. The full benefit amount is paid to any covered person who has accumulated four effective days. The first four effective days in the benefit year constitute the waiting period.

A joint committee of the New York Legislature appointed to study the problem of unemployment insurance

has recommended a new system eliminating the "effective day" concept.² In place of the "effective day" method of computation, the committee suggests the substitution of a system similar to that now in use in Pennsylvania and other states. The committee has stated the following reasons for its conclusion:

1. The term "effective day" is difficult for claimants to understand.
2. The use of this concept discourages an unemployed worker from accepting short-time employment, or
3. Workers are tempted to conceal short-time employment.

Section II

PENNSYLVANIA:

Basic Statutory Provisions Regarding Unemployment Compensation

The Unemployment Compensation Law of Pennsylvania was enacted in 1936. The Declaration of Public Policy reads in part as follows: "Involuntary unemployment and its resulting burden of indigency falls with crushing force upon the unemployed worker, and ultimately upon the Commonwealth and its political subdivisions in the form of poor relief assistance. . . . The principle of the accumulation of financial reserves, the sharing of risks, and the payment of compensation with respect to unemployment meets the need of protection against the hazards of unemployment and indigency."

The Unemployment Compensation Law is administered by the Bureau of Employment and Unemployment Compensation in the Department of Labor and Industry. The system of payment and compensation involves contributions by employers to the Pennsylvania Unemployment Compensation Fund; deposits of money from this fund in the Unemployment Compensation Trust Fund; withdrawals from this latter fund to a compensation account; and payments from this account to eligible unemployed persons.

In order to be eligible for compensation, a covered employee must comply with the following requirements:

- (1) Be totally or partially unemployed.
- (2) Have received remuneration of not less than 30 times his weekly benefit rate during his base year (the first four of the last five completed calendar quarters immediately preceding his benefit year).
- (3) Must be registered for employment at the Pennsylvania State Employment Service and must continue to report there.
- (4) Must be able to work and be available for work.
- (5) Must apply according to the rules of the Bureau and must have a waiting period of one week (the first week in his "benefit year" and for which he does not receive compensation).

An employee is ineligible for compensation if he fails to apply for suitable work or to accept suitable work if offered; if his unemployment is due to leaving work voluntarily without good cause; if his unemployment is due to a stoppage of work which exists because of a labor dispute, as defined by the law; if his unemployment is due to his discharge or temporary suspension from work for

² Report of the Joint Legislative Committee on Unemployment Insurance, Albany, 1950.

³ Article I, Section 3 of the Pennsylvania Unemployment Compensation Law, Act No. 1, Second Extraordinary Session of 1936, December 5, 1936, 1937 P. L. 2897.

willful misconduct connected with the work; or if he is receiving unemployment benefits from another state or under federal law.

An employe may be compensated for total unemployment or partial unemployment. Partial unemployment is recognized for compensation purposes if the individual is working less than his customary full time in any week, and at the same time is earning less than his weekly benefit rate.

The minimum weekly benefit is \$8, which is payable for earned wages of \$60 to \$212 during that quarter of his base year in which he received the highest wages. This rate increases by \$1 for every \$25 increase in wages during the highest quarter up to a maximum of \$25 per week at earnings of \$613 and over.⁴ A partially unemployed person is compensated in the amount of the weekly rate of compensation minus remuneration paid which is in excess of \$3.

Certain classes of employment are not covered by the Unemployment Compensation Law. Employment, as defined in the law, does not include any agricultural pursuit, domestic service or other "casual" labor, as well as certain other employment categories.⁵ An employer is defined as one who ". . . employs any employe in employment subject to this act for some portion of a day during any calendar year. . . ." Subject to approval by the bureau, an employer who is not subject to the act or who employs persons in classes of employment not covered by the act may elect to become subject to the law or to include under the provisions of the law persons in classes of employment not covered.

Partial Unemployment Compensation in Pennsylvania

In 1945, compensation for partial unemployment in Pennsylvania was provided by an amendment to the Unemployment Compensation Law which specified that "an individual shall be deemed unemployed . . . with respect to any week of less than his full-time work if the remuneration paid or payable to him with respect to such week is less than his weekly benefit rate. . . ." (1945, May 29, P. L. 1145). This provision for the payment of partial unemployment compensation benefits became effective in the week ending January 1, 1946. At this time, the weekly benefit rate ranged from \$8 to \$20, and the total amount of benefits ranged from nine to twenty times the weekly benefit rate.

The magnitude of unemployment compensation benefit payments was changed by the Act of 1947, June 30, P. L. 1186, which increased the maximum total amount of compensation from twenty times the weekly benefit rate to twenty-four times the weekly benefit rate. By Act of 1949, May 14, P. L. 1355, the maximum weekly benefit rate was increased from \$20 to \$25.

The benefit procedure in Pennsylvania for partial unemployment compensation closely parallels that for total unemployment compensation.

An employe who is fully employed, partially unem-

ployed, or totally unemployed first files an "Application for Benefits" at his local unemployment compensation office. In the event that the worker is fully employed, this application serves only to establish the one-year period, beginning with the day of the application, which will constitute the worker's benefit year. In the event that the worker is either partially unemployed or totally unemployed, this application establishes not only the benefit year, but also the worker's eligibility for benefits and the first day of the worker's one-week waiting period. The weekly benefit amount of the worker equals 1/25th of his wages earned during that quarter of his base period in which his earnings were highest and is computed to the nearer dollar, but is to be not less than \$8 nor more than \$25.

When a worker becomes partially unemployed, the employer is required to furnish him with a "Low Earnings Report" which is used to establish eligibility for partial benefits. If the employe has not yet established his benefit year through filing an "Application for Benefits," he does so at this time. As noted above, the "Application for Benefits" is used to establish the benefit year and to establish eligibility for benefits, and the "Low Earnings Report" is used in the determination of the partial benefit. An employe will be eligible for partial benefits if he is employed less than his full-time work week and at the same time earns less than the weekly benefit amount he would receive were he totally unemployed. The amount of weekly benefit that the worker will receive while partially unemployed is computed by subtracting from the weekly benefit amount for total unemployment all wages earned during that week in excess of \$3. This computation is always rounded to the next higher dollar. If the employe continues to be partially unemployed, he will regularly receive from his employer "Low Earnings Reports" which will be used in connection with the computation of his partial benefits for the weeks following the waiting week.

Number and Dollar Amount of Benefit Payments for the Period 1946-1950

Table I, page 15, shows the number of benefit payments, the dollar amounts of benefit payments and the average benefit payment, for both total and partial unemployment, from 1946 through the first half of 1950.

Inspection of Table I shows that, during the first calendar year of operation (1946), 47,931 benefit payments were made for partial unemployment, which constituted .91 per cent of all benefit payments. During the first half of 1950, 179,773 benefit payments were made for partial unemployment, constituting 4.70 per cent of all benefit payments during that time period.⁶

The dollar amount of benefits for partial unemployment during the year 1946 was \$601,846, which constituted .63 per cent of the total dollar amount of benefits. During the first half of 1950, the dollar amount of benefits for partial unemployment was \$2,129,434, or 2.71 per cent of the total dollar amount of benefits. The average payment for partial unemployment during 1946 was \$12.56 and for all payments was \$18.10. During the first half of 1950, the average payment for partial unemployment was \$11.85, while the average for all payments was \$20.57.

⁴ If the amount in the fund is less than one and one-half times the highest amount paid out for compensation during any twelve consecutive months, the maximum may be reduced to \$20.

⁵ Service in the armed forces; service for the United States; coverage by the unemployment laws of the United States of any other state; service for the state or political subdivision; service performed for a son, daughter, or spouse; for religious or charitable organization; railroad or maritime service; service for a fraternal beneficiary society or a voluntary employees' beneficiary association; service by a student in school; for a foreign government; student nurse; newspaper vendors under 18; or certain services remunerated solely by commissions.

⁶ In the United States as a whole, partial benefits are generally about 5 per cent of all benefits.

APPENDIX TO THE

Table I

Benefit Payments, Dollar Amount of Benefit Payments, and Average Benefit Payments for the Years 1946 to 1949, Inclusive, and for the First Half of the Year 1950

Year	All Benefit Payments	Benefit Payments for Total Unemployment	Benefit Payments for Partial Unemployment	All Benefit Payments Per Cent	Benefit Payments for Total Unemployment Per Cent	Benefit Payments for Partial Unemployment Per Cent

Percentage Distribution of Partial Unemployment Compensation Benefits to Men and Women

Table II, below, shows, on a monthly basis, the percentage distribution of the number of partial unemployment compensation benefits between men and women, for the period January, 1949, to June, 1950.

Table II

Percentage Distribution of Number of Partial Unemployment Compensation Benefit Payments to Men and Women on a Monthly Basis During 1949 and the First Half of 1950 *

		Percentage of Partial Unemployment Compensation Benefit Payments Made to:		
Year	Month	Men	Women	Total
(1)	(2)	(3)	(4)	(5)
1949	January	21.33%	78.67%	100.00%
	February	27.31	72.69	100.00
	March	38.93	61.07	100.00
	April	29.66	70.34	100.00
	May	28.09	71.91	100.00
	June	34.13	65.87	100.00
	July	40.05	59.95	100.00

1950	August	47.87	52.13	100.00
	September	50.38	49.62	100.00
	October	42.52	57.48	100.00
	November	46.37	53.63	100.00
	December	37.52	62.48	100.00
	January	48.44	51.56	100.00
	February	49.25	50.75	100.00
	March	56.08	43.92	100.00
	April	43.59	56.41	100.00
	May	38.65	61.35	100.00
	June	31.27	68.73	100.00

* Based on sample data, see Appendix B.

Inspection of Table II indicates that women usually receive a greater number of benefit payments for partial unemployment than do men. The table shows the lowest percentage of payments to men, 21.33 per cent in January, 1949, and the highest percentage to men, 56.08 per cent in March, 1950. The corresponding high percentage for women, in January, 1949, was 78.67 per cent, and the low, in March, 1950, was 43.92 per cent.

Percentage Distribution of Partial Unemployment Compensation Benefit Payments Among Major Industry Groups

The percentage distribution of the number of partial unemployment compensation benefit payments in three-month time periods from January through March, 1949,

to April through June, 1950, among major industry groups are shown in Table III.

Examination of the table shows that in each of the six three-month periods, the largest number of benefits were paid to employees of the manufacturing industry. Wholesale and retail trade employees ranked second in five of the six time periods.

An increase in percentage from one time period to the next shows that the major industry group is increasing

in number of payments more rapidly than the other groups or is decreasing less rapidly than the remaining groups. A decreasing percentage from one time period to the next may show either that the group is decreasing more rapidly than the other groups or is increasing less rapidly than the other groups.

Tables IV and V (pages 20 and 21) show the percentage distribution of the number of partial unemployment benefit payments to men and women by major industry group, in

three-month time periods from January through March, 1949, to April through June, 1950.

Relationship Between Number of Employees and Number of Employees Receiving Partial Benefit Payments, and Number of Benefit Payments, by Major Industry Groups

The distribution for major industry groups and for selected individual industries of average number of employees covered under the Pennsylvania Unemployment Compensation Law, the number of employees receiving partial unemployment compensation benefits, the number of partial unemployment compensation benefit payments, the number of employees receiving partial benefits as a per cent of the number of covered employees, and the number of partial payments per partially unemployed worker during the calendar year 1949 are shown in Table VI.

Inspection of Table VI shows that the manufacturing group had the highest percentage of persons receiving partial unemployment compensation benefit payments, while the mining group and construction group were second and third, respectively. The manufacturing group was heavily weighted by the apparel and other finery products industry, in which the percentage of persons receiving partial unemployment compensation benefits was 22.67, and by the textile mill products industry in which the percentage was 11.11. The number of partial unemployment benefit payments per person was highest in the wholesale and retail trade industry group and was second highest in the composite group of all other industries. In the industry categories included in the table, 3.1 payments per beneficiary are shown in the retail general merchandise industry, and 2.2 payments per beneficiary are shown for the apparel and other finery products industry and for the primary metals products industry.

Table VI

Distribution for Major Industry Groups and for Selected Individual Industries of Average Number of Employees Covered Under the Pennsylvania Unemployment Compensation Law, Number of Employees Receiving Partial Unemployment Compensation Benefits, Number of Partial Unemployment Compensation Benefit Payments, Number of Employees Receiving Partial Benefits as a Per Cent of Employment, and Number of Partial Payments Per Partially Unemployed Worker During Calendar Year 1949*

Percentage Distribution, by Industry Groups, of Partial Benefit Payments by Dollar Amounts

In Table VII, page 27, the percentage distribution for major industry groups and for selected industries of the number of partial unemployment compensation benefit weekly payments by the dollar amounts of payments, for persons filing claims under the benefit provisions of the Act of 1949, May 14, P. L. 1355, during the second half of the calendar year 1949, are shown.

Inspection of Table VII indicates that the distribution of the number of partial benefit payments, by dollar amounts, varies from industry to industry. For example, in the mining industry more claimants received benefit payments of \$14 or \$15, whereas in the construction industry the most frequently occurring benefit payments were \$18 or \$19.

Distribution of Weekly Earnings and Benefit Amounts

The dollar amount of a partial unemployment benefit payment when taken in conjunction with the weekly benefit amount for total unemployment reflects the level at which the worker is partially unemployed. Since the weekly benefit amount for total unemployment is determined as approximately 1/25th of the worker's high quarter wages (except at the minimum, \$8, and the maximum, \$25, under existing law) and since in order to qualify for partial unemployment benefits a worker must

be earning less than his weekly benefit amount for total unemployment (disregarding \$3 of earnings) and must be employed less than his regular work week, the worker's earnings during weeks of partial unemployment can be estimated and the degree of his underemployment can be approximated. These estimates generally apply only when the worker is earning less than half his customary wage because the weekly benefit amount which determines the existence of compensable partial unemployment is approximately one-half of the customary weekly wage.

The percentage distributions of the number of partial unemployment compensation benefit payments by estimated weekly earnings and by both average weekly wage during highest quarter of base period and weekly benefit amount for total unemployment for persons whose claims were filed between July, 1949, and June, 1950, inclusive, under the Act of 1949, May 14, P. L. 1355, are shown in Table VIII, page 29.

Inspection of Table VIII shows that the largest number of payments (43.77%) was made to persons whose weekly benefit amount was \$25 and whose estimated average weekly wage was \$47.20 or greater. The highest percentage of partial unemployment compensation benefit payments (14.07%) was made to persons whose estimated earnings were \$10 but less than \$12 per week.

APPENDIX TO THE

Table VII

Percentage Distributions for Major Industry Groups and for Selected Industries of the Number of Partial Unemployment Compensation Benefit Weekly Payments by the Dollar Amounts of Payments During the Second Half of the Calendar Year 1949 for Persons Filing Claims Under the Benefit Provisions of the Act of 1949, May 14, P. L. 1355 *

Section III

A COMPARISON OF PARTIAL UNEMPLOYMENT BENEFITS AND PROCEDURES IN SIXTEEN SELECTED STATES

Basic Statutory Provisions for Unemployment Compensation in Selected States

The most important factors which determine the magnitude and duration of benefit payments for partial unemployment are the magnitude and duration of benefit payments for total unemployment.

As regards compensation for total unemployment, the wage requirements, the statutory fraction on the basis of which benefits are calculated and the weekly minimum and maximum benefits for sixteen selected states are shown in Table IX⁷, page 32.

Table IX

Wage Requirements, Methods of Computing Weekly Benefits and Spread of Weekly Benefits in Sixteen Selected States*

State	Wage Requirements in Base Period ^a for Eligibility for Unemployment Compensation	Method of Computing the Weekly Benefit Amount	Minimum and Maximum Weekly Benefit Amounts
(1)	(2)	(3)	(4)
Alabama	Thirty times the weekly benefit amount (at the minimum benefit, this is \$120) with \$75.01 or more in one quarter.	1/26th of high quarter wages	\$ 4-\$20
California	Not under \$300, and must be the lesser of: 1. Base period wages equal to 1½ times the high quarter wages or 2. Thirty times the weekly benefit amount. (At the minimum benefit, this is \$300.)	^b	\$10-\$25
Connecticut	\$240 and wages in at least two quarters	1/26th of high quarter wages	\$ 8-\$24

⁷ These states were selected on the basis of: (1) diversity of legal provisions relating to unemployment compensation, and (2), industrial competition. The states are: Alabama, California, Connecticut, Illinois, Kentucky, Maryland, Massachusetts, Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Texas and West Virginia. See pp. 264-265 of "First Report on the Tax and Financial Problems of the Commonwealth of Pennsylvania to the General Assembly," Joint State Government Commission of the General Assembly of Pennsylvania, January, 1941.

Table IX (Continued)

State	Wage Requirements in Base Period ^a for Eligibility for Unemployment Compensation	Method of Computing the Weekly Benefit Amount	Minimum and Maximum Weekly Benefit Amounts
(1)	(2)	(3)	(4)
Illinois	\$300	1/20th of high quarter wages	\$10-\$25
Kentucky	\$300	^b	\$ 7-\$20
Maryland	Thirty times the weekly benefit amount (at the minimum benefit, this is \$180) including \$156 in high quarter.	1/26th of high quarter wages	\$ 6-\$25
Massachusetts	\$150	1/20th of high quarter wages	\$ 6-\$25
Michigan	Fourteen weeks of employment at \$8.01 or more (\$112.14)	^b	\$ 6-\$24
New Jersey	Thirty times the weekly benefit amount (at the minimum benefit, this is \$270.)	1/22nd of high quarter wages	\$ 9-\$22
New York	Thirty times the weekly benefit amount (at the minimum benefit, this is \$300) including \$100 in high quarter.	1/23rd of high quarter wages	\$10-\$26
North Carolina	\$200	^b	\$ 6-\$25
Ohio	\$240	^b	\$10-\$25
Pennsylvania	Thirty times the weekly benefit amount (at the minimum benefit, this is \$240.)	1/25th of high quarter wages	\$ 8-\$25
Rhode Island	\$100	1/20th of high quarter wages	\$10-\$25
Texas	\$200 and wages in at least two quarters	1/26th of high quarter wages	\$ 7-\$20
West Virginia	\$300	^b	\$ 8-\$25

* Source: Bureau of Employment Security, U. S. Department of Labor, "Handbook on State Unemployment Insurance Laws," January 1, 1950.

^a The base period is, in each state, a period of one year, defined variously as the first four of the last five or six quarters immediately preceding the benefit year, or the calendar year, next to the last calendar year or one year period immediately preceding the benefit year.

^b Varying fractions are used at different wage levels.

In order to compute partial benefits for a covered wage earner, the following supplemental information is required:

(1) definition of partial unemployment in terms of earnings;

APPENDIX TO THE

(2) amount of earnings disregarded when computing benefits for partial unemployment; and
(3) statutory provisions regarding rounding of benefit payments as computed.

Table X shows the requirements of the sixteen selected states as well as provisions for dependents' allowances, if any.

Table X

Principal Provisions for Partial Unemployment Benefits in Selected States *

State	Partially Unemployed if Earnings are less than	Amount of Earnings Disregarded in Computing Benefit	Weekly Benefit Rounded to	Other Provisions
(1)	(2)	(3)	(4)	(5)
Pa.	Weekly benefit amount	\$3.00	Higher dollar
Ala.	" " "	2.00	Nearer dollar
Cal.	" " "	3.00	Higher dollar
Conn.	Weekly benefit amount + \$3.	3.00	" "	Dependents' allowances ^a
Ill.	Weekly benefit amount	2.00	" "	Reduction for unavailability ⁷
Ky.	Weekly benefit amount ¹	1/5 of earnings	Nearer dollar	Less than 24 hours weekly ⁸
Md.	Weekly benefit amount	2.00	" "	Dependents' allowances ^a
Mass.	" " "	None	Higher dollar	Dependents' allowances ^a
Mich.	" " "	"	"	Dependents' allowances ^a
N. J.	Weekly benefit amount + \$3.	3.00	Higher dollar
N. Y.	\$24.01 ²	None ²	"	Benefit for 4 "effective days" ²
N. C.	Weekly benefit amount + \$2. ¹	2.00	Nearer 50c	Less than 60% full-time ⁸
Ohio	Weekly benefit amount	2.00	Higher dollar	Dependents' allowances ^a
R. I.	Weekly benefit amount + \$3. in subsidiary earnings ³	3.00 ³	" "
Texas	Weekly benefit amount + \$3. in subsidiary earnings	3.00	" "
W. Va.	Weekly benefit amount + \$6.	6.00	" "

¹ There is also a time limitation. See Column 5.

² Partial unemployment is counted for each week in which claimant earns \$24 or less. The count is by "effective days," defined as the 4th or subsequent day of total unemployment in such a week, and is cumulative. No more than 4 "effective days" may be counted for any week, and a week's benefit is paid for each accumulation of 4 "effective days."

³ All earnings from the regular employer must be counted.

⁴ The full weekly benefit is paid if earnings are less than 1/2 weekly benefit.

⁵ Benefits are according to a schedule in \$1.00 intervals.

⁶ Dependents' allowances are paid at the same rate as for total unemployment in Conn., Md., Mass., and Ohio. In Mich. a worker eligible for 1/2 his weekly benefit amount also receives 1/2 his dependents' allowances.

⁷ Reduction amounts to 1/4 of the weekly benefit amount for each day.

⁸ Claimant is eligible for partial unemployment benefits only when time worked has not exceeded the stated limits, (in Kentucky, 24 hours weekly) and (in North Carolina 60% of a full-time work-week).

Computation of Partial Unemployment Compensation Benefits Under the Statutory Provisions of Sixteen Selected States

The benefit provisions of the sixteen selected states (including Pennsylvania) are compared at ten levels of high quarter earnings and base year earnings. These high quarter earnings, together with the base year wages on the basis of which compensation computations have been made, are shown below.

High Quarter Wages	Base Year Wages
\$60	\$240
185	275
230	450
330	1,150
370	1,250
450	1,550
525	1,850
575	1,950
725	2,550
800	3,000

In connection with the above wage data, it should be noted that, during recent months, about one-fourth of the applicants for unemployment compensation benefits in Pennsylvania showed high quarter wages of \$800 and base year wages of \$3,000. Again, during recent months, about one-half of the applicants had high quarter wages greater than \$525 and base year wages greater than \$1,850.

In order to standardize calculations of benefits for workers employed one day a week, two days a week and three days a week, certain assumptions regarding the worker and his work and wage pattern were made as follows:

1. He was employed part-time by his regular employer.
2. He had no dependents.
3. He had previously fulfilled waiting period requirements.
4. The full-time work week was forty hours subdivided evenly among five days.
5. Hourly and daily wages were determined from the high quarter earnings.

The partial unemployment benefits payable in the sixteen selected states for a worker who is employed one day a week, two days a week and three days a week, with daily earnings of \$12, high quarter earnings of \$800 and base year wages of \$3,000, are shown in Table XI, page 39.

Examination of Table XI shows that as regards a worker who is employed one day per week, partial benefits paid in Pennsylvania (\$16) are exceeded only by the partial benefits payable in the states of West Virginia (\$19) and New York (\$20). Again, if a worker is employed two days a week, the weekly benefit rate in Pennsylvania is exceeded only by the rates of New York and West Virginia.

In Table XII, page 40, weekly benefit payments and duration of benefits are shown for a partially unemployed claimant who has daily earnings of \$8, with \$525 in high quarter earnings and \$1,850 in base year earnings.

It may be noted that when a worker is employed one day or two days a week, nine states pay benefits which are higher than those paid in Pennsylvania. Those nine states are: California, Illinois, Massachusetts, Michigan, New Jersey, New York, Ohio, Rhode Island and West Virginia.

The weekly rates of partial benefits in the sixteen selected states for a worker at each of the eight other wage levels are presented in Table XIII (see page 41).

Table XI

Weekly Partial Unemployment Benefits and Total Benefit Amount of a Worker Earning \$12 Daily, with \$800 in High Quarter Earnings and \$3,000 in Base Year Earnings, in Sixteen Selected States

State	Partial Weekly Benefit Rate if Worker Is Employed			Total Benefit Amount
	1 Day Week	2 Days Week	3 Days Week	
(1)	(2)	(3)	(4)	(5)
Alabama	\$10.00	\$400.00
California	16.00	\$4.00	650.00
Connecticut	15.00	3.00	630.00
Illinois	15.00	3.00	650.00
Kentucky	10.00	440.00
Maryland	15.00	3.00	650.00
Massachusetts	13.00	1.00	575.00
Michigan	12.00	480.00
New Jersey	13.00	1.00	572.00
New York	20.00	13.00	676.00
North Carolina ...	15.00	3.00	500.00
Ohio	15.00	3.00	650.00
Pennsylvania	16.00	4.00	600.00
Rhode Island	13.00	1.00	650.00
Texas	11.00	480.00
West Virginia	19.00	7.00	575.00

Table XII

Weekly Partial Unemployment Benefits and Total Benefit Amount of a Worker Earning \$8 Daily, with \$525 in High Quarter Earnings, and \$1,850 in Base Earnings, in Sixteen Selected States

State	Partial Weekly Benefit Rate if Worker Is Employed			Total Benefit Amount
	1 Day Week	2 Days Week	3 Days Week	
(1)	(2)	(3)	(4)	(5)
Alabama	\$14.00	\$6.00	\$400.00
California	18.00	10.00	598.00
Connecticut	15.00	7.00	470.00
Illinois	19.00	11.00	\$3.00	650.00
Kentucky	14.00	7.00	440.00
Maryland	14.00	6.00	462.00
Massachusetts	17.00	9.00	1.00	555.00
Michigan	23.00	11.50	460.00
New Jersey	17.00	9.00	1.00	572.00
New York	17.00	12.00	6.00	598.00
North Carolina ...	13.50	5.50	390.00
Ohio	17.00	9.00	598.00
Pennsylvania	16.00	8.00	504.00
Rhode Island	17.00	9.00	1.00	494.00
Texas	15.00	7.00	370.00
West Virginia	18.00	10.00	2.00	460.00

Examination of the weekly benefit rates or payments, exclusive of dependency allowance, presented in Tables XI, XII and XIII permits the following generalizations with respect to the level of benefit payments under comparable conditions in Pennsylvania and the selected states:

1. Benefit payments in Pennsylvania are always higher than or equal to payments made in Alabama and Maryland.
2. Benefit payments in Pennsylvania are generally higher than or equal to payments made in Connecticut, Kentucky, North Carolina and Texas.
3. Benefit payments in Pennsylvania are usually equal to or lower than payments in California, Illinois, Massachusetts, Michigan, New Jersey, New York, Ohio, Rhode Island and West Virginia.

However, it must be noted that the position of Pennsylvania relative to the other fifteen states is negatively weighted by inclusion of a three-day work week. If benefits for one day and two days of employment are considered, the rank of Pennsylvania relative to the other states is considerably higher.

APPENDIX B—SAMPLE DATA

Analysis of partial unemployment compensation benefit payments in Pennsylvania from January, 1949 to June, 1950, is based upon an approximately 2 per cent sample taken by the Research and Statistics Section, Bureau of Employment and Unemployment Compensation, Department of Labor and Industry, Commonwealth of Pennsylvania.

A test of the standard error of the means shows that the mean of the sample does not differ significantly from the mean of the universe. On the basis of Chi square tests, randomness of the sample could not be established. Hence, although generalizations are made concerning points of concentration of sample data, no numerical probabilities should be associated with these statements.

The data shown in the following tables are sample data.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

* Appointed February 6, 1951.

† Appointed to fill the vacancy created by the death of Frederick L. Homsher.

‡ Term expired.

§ Deceased.

|| Resigned.

¶ Appointed to fill the vacancy created by the resignation of Homer S. Brown.

In accordance with the directive of the General Assembly contained in Senate Resolution Serial No. 40 and House of Representatives Concurrent Resolution No. 74, Session of 1949, the Joint State Government Commission has made a study of the administration and financing of public assistance in the Commonwealth, and presents herewith its report on that phase of the study dealing with aid to the blind.

A subcommittee to assist in the study was appointed by the Commission under authority of Act of 1943, March 8, P. L. 13, Section 1. On behalf of the Commission, the cooperation of the subcommittee is gratefully acknowledged.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Section I

THE LEGISLATIVE HISTORY OF BLIND PENSIONS

A. State and Federal Legislation Relating to Payments to the Blind—

Prior to 1933, the Pennsylvania Constitution did not permit legislative appropriations for blind pensions. In November of that year, Article III, Section 18, of the Constitution was amended to read: "No appropriations, except for pensions or gratuities for military service and to blind persons twenty-one years of age and upwards, shall be made for charitable, industrial, or benevolent purposes to any person or community nor to any denominational or sectarian institution, corporation or association." (Italics supplied to indicate material added by amendment.)

In 1934, the General Assembly passed the first blind pension act,¹ providing a pension for an applicant who:

- (1) had attained the age of 21 years and upwards;
- (2) resided in the Commonwealth and had resided there continuously for at least ten years immediately preceding the date of application;
- (3) was not at the time of application an inmate of any prison, jail, workhouse, insane asylum, or public reform or correctional institution;²
- (4) was not at the date of making application suffering from a mental or physical infirmity which in itself would make the applicant a charge upon any other institution or agency of the Commonwealth and which had so incapacitated him prior to the loss of sight that such persons was a public charge prior thereto;
- (5) had not sufficient means to enable the applicant to maintain himself and was incapable of or lacking the opportunity of self-support, and
- (6) had less than 3/60th or 10/200th normal vision and by reason thereof was unable to earn a livelihood except through special training and in occupations which could successfully be carried on by blind persons.

The Act of 1935, July 9, P. L. 621, removed the requirement of a means test and reduced the residence requirement from ten to five years. This act provided that

"... every blind person ... shall be entitled to receive from the Commonwealth a pension of thirty dollars (\$30) per month: Provided, That any blind person with an actual income of twelve hundred dollars (\$1,200), or upwards, and any blind person having real property with an assessed valuation of over five thousand dollars (\$5,000) is not entitled to such pension: And provided further, That where a blind person has an income of less than twelve hundred dollars (\$1,200) per year the pension shall be fixed in such amount so that the combined income and pension shall not exceed twelve hundred dollars (\$1,200) a year."

The Act of 1935 also revised the definition of blindness to read, "... has 3/60th or 10/200th, or less, normal vision."

In August, 1935, the federal Social Security Act was passed. Title X of that act, as interpreted by the Social Security Board, provided for federal participation in state

payments to the needy blind on the condition that a state agency, when determining eligibility, must give uniform consideration to both the needs and resources of an applicant. Under the act, the federal government participates in grants to the needy blind up to \$50 per month by contributing three-fourths of the first \$20 of the average monthly payment and one-half of the remainder.

Beginning in February, 1936, the Commonwealth received provisional federal grants-in-aid for its blind pension program. It was expected that Pennsylvania would revise its statutes to comply with provisions of Title X of the Social Security Act. However, the 1937 Session of the General Assembly enacted the "Public Assistance Law"³ which included the major provisions of the Blind Pension Act of 1935. Federal participation was withdrawn in January, 1938, on the ground that the magnitude of the pension was not related to the needs of recipients as required by statute.⁴

In 1945, the maximum pension was increased from \$30 to \$40 per month, and the residence requirement was reduced from five years to one year.⁵

In 1947, the income ceiling was raised to \$1,596 per year.⁶

Since 1939, the Department of Public Assistance has attempted unsuccessfully to obtain federal participation in the Pennsylvania blind pension program. In December, 1948, the Department proposed to establish an aid-to-the-blind program in addition to the blind pension program. This proposal was rejected by the Social Security Administration as being contrary to the equality provisions of federal social security legislation.

It has been estimated by the Department of Public Assistance that the Commonwealth, from 1938 to 1948, lost federal participation in the amount of \$30,335,000. The current rate of loss is about \$9,000,000 per biennium.

In this connection, it may be noted that only two other states, Missouri and Nevada, have blind aid programs which do not comply with the provisions of Title X of the federal Social Security Act.

B. The Social Security Act Amendments of 1950—

The amendments to the Social Security Act passed in August, 1950, contain several provisions which modify the equality requirements contained in Section 1002, Title X of the act.

Under the 1950 amendments, the Social Security Administrator is authorized to approve a state plan for aid to the blind which does not meet the requirements of equality, provided it meets all other federal requirements. This provision is operative until June 30, 1955. The amendment reads:

"(a) In the case of any State ... which did not have on January 1, 1949, a State plan for aid to the blind approved under title X of the Social Security Act, the Administrator shall approve a plan of such State for aid to the blind for the purposes of such title X, even though it does not meet the requirements of clause (8) of section 1002(a) of the Social Security Act, if it meets all other requirements of such title X for an approved plan for aid to the blind; but payments under section 1003

¹ 1934, January 17, P. L. 246 (Sp. Sec. 1933-1934).

² In the case of Behr, to use, v. Russell, Secretary of the Department of Public Assistance, (38 D. & C. 177, [1940], Dauphin County), the court held that this exclusion did not apply to public institutions maintained by a county institution district.

³ 1937, June 24, P. L. 2051.

⁴ Origin and Development of Public Assistance in Pennsylvania, Commonwealth of Pennsylvania, Department of Public Assistance, December 1, 1946, p. 15.

⁵ 1945, May 31, P. L. 1205; 1945, May 1, P. L. 370.

⁶ 1947, July 8, P. L. 1448.

of the Social Security Act shall be made, in the case of any such plan, only with respect to expenditures thereunder which would be included as expenditures for the purposes of such section under a plan approved under such title X without regard to the provisions of this section.

"(b) The provisions of subsection (a) shall be effective only for the period beginning October 1, 1950, and ending June 30, 1955."

In addition, the 1950 amendments provide that, effective October 1, 1950, and continuing to June 30, 1952, a state blind aid plan may disregard \$50 per month of earned income. Beginning July 1, 1952, this amount of earned income must be disregarded for a plan to meet continued federal approval.

C. Property Limitations of Pennsylvania's Blind Pension Act—

As noted previously, a blind person in Pennsylvania is ineligible for a blind pension if he receives an annual income in excess of \$1,596 or owns real property with an assessed valuation of more than \$5,000.

In 1936, the Department of Justice advised the Department of Welfare, which at that time administered blind pensions, that "it was the intention of the legislature to declare ineligible any person who owned proper either real, personal, or mixed of the unencumbered value of \$5,000 or over." Until 1949, the law was administered in accordance with the advice of the Department of Justice.

However, recent court decisions have reversed the interpretation of the Department of Justice. In the case of the Commonwealth v. Hicks, Common Pleas Court of Blair County, October Term, 1948, No. 239, the court ruled that when the legislature used the term "real property," it impliedly excluded any other kind of property. On June 26, 1950, the Supreme Court of Pennsylvania affirmed the decision of the lower court (365 Pa. 153 [1950]).

Section II

A COMPARISON OF BLIND AID IN PENNSYLVANIA AND SELECTED STATES, AND CHARACTERISTICS OF PENNSYLVANIA'S BLIND PENSION RECIPIENTS

A. Grants to the Blind—Pennsylvania and Other States—

For the calendar year 1949, Pennsylvania's blind pension payments totalled \$7,300,000, distributed among some 15,000 pensioners. The cost of the blind aid program to Pennsylvanians, on a per capita basis, amounted to \$.70, as compared with a national average of \$.32.

Table I, page 8, shows the number of blind aid recipients, the number of blind aid recipients per 100,000 population, and the average payment per recipient for selected states and the nation as a whole.

Examination of Table I, Column (4), shows that the average monthly blind payment in Pennsylvania was \$39.87, whereas for the nation as a whole the average payment per recipient amounted to \$46.20.

Again, examination of Column (3) shows that whereas the recipient rate per 100,000 population was 61.5 for the nation as a whole, the recipient rate for Pennsylvania was 148.1. In other words, whereas the average payment

in Pennsylvania was below the national average, the recipient rate was considerably in excess of the national average. In fact, for the year under review, the recipient rate for Pennsylvania was the highest among the forty-eight states.

Table I

Number of Blind Aid Recipients, Number of Blind Aid Recipients per 100,000 Population and Average Payment Per Recipient—United States and Selected States, December, 1949

Source: Social Security Bulletin, Volume 13, No. 9, September, 1950, U. S. Bureau of the Census, 1950 Census of Population, Advance Reports, Series PC-9, No. 1, November 5, 1950.

Geographic factors aside, variations in the relative number of blind persons receiving aid in the different states are due to differences in definitions of eligibility and efficiency of administration.

As regards the geographic factor, the available evidence suggests that the frequency rate of blindness for Pennsylvania does not differ materially from the comparable rate for the nation as a whole. For example, in 1940, Pennsylvania had an estimated 1.51 blind persons per 1,000 population as compared with a national average of 1.75.

As regards definitions of eligibility, it may be noted that Pennsylvania's definition of blindness for blind pension purposes is more restrictive than that of other states.⁵ Pennsylvania's restrictive definition, other factors being the same, should be reflected in a low recipient rate. However, in Pennsylvania the provisions of the support laws do not apply to the blind, whereas most other states apply relative support provisions in the case of blind persons. It is reasonable to assume that exemption from the support laws tends to increase Pennsylvania's blind pension recipient rate.

The evidence concerning the efficiency with which the Pennsylvania program is administered, though not conclusive, suggests that some recipients would not receive pensions by a more rigorous application of legislative standards.

Again, it may be noted that the Auditor General, when making eligibility examinations, postaudits the cases of

⁷ Sec. 344, Public Law 734, Eighty-first Congress, Chapter 809, Second Session.

⁵ In virtually all other states, payments are limited to persons with 20/200 central visual acuity or less in the better eye with correction, or comparable visual field defect.

but "a few" blind pensions recipients. As far as can be ascertained the sample of cases postaudited is less than one per cent of the total cases.

B. Characteristics of Pennsylvania's Blind Pension Recipients—

With a view of facilitating the appraisal of Pennsylvania's blind pension program, a comprehensive survey of the characteristics of the Commonwealth's pensioners has been made.

The remainder of the present section comprises the principal findings of the survey with respect to living arrangements, income and property of blind pension recipients.

1. Living Arrangements—

It appears that the living arrangements of blind pension recipients are significant in connection with an appraisal of the present program, because, in contrast with grants to assistance recipients, blind pensions are in no way affected by the support laws. There seems to be no explicit statutory suspension of the support laws in the case of the blind, but the Department of Justice has consistently ruled that the term "indigent persons," as used in this law does not include blind pension recipients.⁹

Again, from time to time, blind assistance programs have been proposed for Pennsylvania, and a major provision of such plans has been extension of the support laws to cover the needy blind.

Table II

Number and Percentage Distribution of Pennsylvania Blind Pension Recipients by Living Arrangement, April, 1950

Living Arrangement	Number	Percentage
(1)	(2)	(3)
Living in Household Group with Relatives Designated in Support Laws	9,989	65.35%
Living in Household Groups with Friends and Relatives other than Those Designated in Support Laws	2,579	16.87
Living Alone	1,390	9.09
Living in Public Institution	589	3.85
Living in Private Institutions	537	3.51
Living as a Roomer and/or Boarder	203	1.33
TOTAL	15,287	100.00%

Table II shows the number and percentage distribution of all blind pension recipients in Pennsylvania by living arrangement.

Of the total blind pension recipients, 1,942, or 12.7%, have relatives designated in the support laws who are receiving some type of public assistance. In about three-fourths of these cases, the blind pension recipient is living with such relatives. The proportion of recipients having relatives designated in the support laws who are receiving

⁹For example, see Letter of Advice dated November 2, 1938, to The Honorable Arthur W. Howe, Jr., Secretary of Public Assistance, signed by J. P. Wanner, Deputy Attorney General.

some type of assistance, shows wide variation among the counties. The range is from 4.4% in Montgomery County to 31.6% in Huntingdon County.

2. Property—

It will be remembered that at present, while there is a \$5,000 assessed value limitation on real property, there is no limitation on the amount of other types of property which may be owned by blind recipients.

Table III, page 12, shows the number of Pennsylvania blind pension recipients owning property and the average value of the property owned, by the major type of property.

Inspection of Table III shows that about half (52.2%) of the blind pension recipients owned property of some type. The average value of the property owned is \$977. Five hundred and twenty-seven recipients have property valued at \$3,000 or more. Eighteen recipients have property valued in excess of \$5,000.

Intercounty variations as regards ownership of property are pronounced. The proportion of blind pension recipients owning property ranges from 71.6% in Carbon County to 31.6% in Franklin County. Other counties with a relatively high proportion of property owners among blind pension recipients include: Montgomery, 75.5%; York, 73.8%; Lehigh, 73.2%; and Pike, 72.7%. Counties with a relatively low proportion of property owners among blind pension recipients include: Greene, 32.4%; Susquehanna, 34.8%; Forest, 36.8%; Mercer, 38.3%; Clarion 38.8%; Somerset, 39.9%; and Perry, 40.0%.

Table III

Number of Blind Pension Recipients and Average Value of Property Owned by Major Type of Property, April, 1950

Types of Property	Number of Recipients with		
	Number of Recipients	Average Value of Property Owned	Property Valued at \$3,000 or More
(1)	(2)	(3)	(4)
Stocks, Bonds and Other Intangible Property	337	\$1,651	71
Resident Real Estate	2,412	1,371	200
Currency and Bank Accounts	1,650	1,340	196
Nonresident Real Estate ...	328	1,335	35
Cash Value of Insurance ...	3,248	395	25
No Property	7,312
TOTAL	15,287	\$977	527

* It should be noted that except for real estate, "value" is the equivalent of "market value"; in the case of real estate, "value" is the equivalent of "assessed valuation."

As regards intercounty variations in the average value of property owned, the range is from about \$560 in Centre and Perry counties to almost \$2,000 in Sullivan and Cameron counties. These examples show the entire range. The great majority of counties are relatively close to the statewide average of \$977. Only seven counties show an average value of less than \$600, while nine show an average value greater than \$1,200.

3. Income—

Under existing standards, blind pension recipients with an income not exceeding \$1,116 per year receive the maximum blind pension of \$40 per month. In the case of recipients whose income is more than \$1,116 per year, the annual pension is reduced by one dollar for every dollar of annual income in excess of \$1,116. When the annual income approaches \$1,596, the pension ceases. Departmental regulations call for the establishment of a "fiscal year" for each pensioner beginning with the date of the first pension payment. Income is estimated for this twelve-month period. The monthly pension amount is determined on the basis of the average monthly expected income. During the course of the fiscal year, the pension is adjusted or discontinued if the actual income differs from the estimated amount.

Table IV, page 13, shows the number of pensioners and average amount of estimated annual income by major source.

Inspection of Table IV shows that 10,302, or about two-thirds of blind pension recipients, were expected to receive no income during their respective fiscal years. For the 4,985 recipients who have an estimated income, the average amount is \$395 per year.

Table IV

Number of Blind Pension Recipients and Average Amount of Estimated Annual Income by Major Source of Income—1949-1950

Major Source of Income	Number	Average Amount of Income
No Income	10,302
Cash Earnings	883	\$539
Cash Equivalent of Maintenance		
Earnings	26	362
Earnings from Own Enterprise	259	395
Real Property	570	285
Personal Property	298	128
Pensions, Compensations, and		
Trust Funds	1,785	468
Contributions	329	337
Other	835	281
TOTAL	15,827	\$395

The income distribution for blind pension recipients is shown in Table V.

Table V

Number of Blind Pension Recipients in Pennsylvania by Estimated Annual Net Income—1949-1951

Estimated Annual Income	Number of Recipients
(1)	(2)
0	10,302
\$1- 99	891
100- 199	853
200- 299	790
200- 399	573
400- 499	371
500- 599	274

600- 699	273
700- 799	305

Over 1,116	136
TOTAL	15,287

Section III

ALTERNATE BLIND AID PLANS AND FEDERAL PARTICIPATION

A. Types of Plans—

Two basically different plans may be used to aid the blind or, for that matter, any group or groups of handicapped persons.

Under the so-called budget plans, eligibility for aid as well as magnitude of grant, if any, is established by computing the difference between a person's needs and a person's income. If the difference, "needs minus income," is zero or negative, the applicant is not eligible for a grant. If the difference is positive, the applicant is eligible and the difference is the amount of the grant. Under budget plans it is necessary to determine the income and needs of every applicant. In Pennsylvania, a budget plan is used in connection with the administration of all assistance programs.

Under the so-called pension plans, eligibility for aid, as well as magnitude of grant or pension, if any, is established by subtracting from the "maximum grant" or pension, all income in excess of exempt income. If the maximum grant minus the income in excess of exempt income equals zero, or is negative, the applicant is not eligible for a pension. In all other cases, provided other eligibility conditions are satisfied, the applicant is eligible and the difference between the maximum grant and the income in excess of exempt income equals the pension.

In Pennsylvania, aid to the blind is made available on the basis of a pension plan.

There is nothing in the structure of either plan that in any way predetermines the magnitude of payments to recipients or the number of participants.

Both magnitude of payments to recipients and the number of participants are determined by the detailed specifications which may be written into either plan. For example, under both plans it is possible to include or exclude support by relatives. The limit on such assets as personal and real property may be set at any desired level. Again, under budget plans need may be defined in a manner that will produce average payments which are greater than average payments under pension plans.

There are but two basic differences between the two plans:

(1) The administration of pension plans requires but an investigation of an applicant's resources, whereas administration of budget plans requires an investigation of both resources and needs.

(2) Under budget plans similarly circumstanced persons are always treated similarly.

B. Dual Programs—

1. Budget Grants and Pensions, with Elective Option—

There is reason to believe that under the 1950 amendments to the Social Security Act, some federal participa-

tion could be obtained if the Department of Public Assistance evolved a combination program which established a budget plan for the needy blind and retained the present pension plan for those blind persons who could not qualify for aid under a budget plan.

Under such a program, the blind individual might be given the option to elect either the budget or the pension plan.

Evaluation of the pertinent data discloses that under existing assistance standards there is no inducement for blind pension recipients to transfer to a blind assistance program. At present, any blind individual is free to choose general assistance if he wishes to take advantage of this plan. However, the number of blind persons receiving general assistance is inconsequential. Assuming that 3,000 pensioners would transfer to the budget or assistance plan, the total federal contribution would not exceed \$1,000,000 per year.

In passing, it may be noted that the establishment of a dual program does not require legislative action.

2. Flat Grants and Pensions, with Elective Option—

Again, there is reason to believe that the Social Security Administrator would approve and financially participate in a modified dual budget-pension program which would provide for a flat grant and a pension. Such a program, in essence, would guarantee every blind person a legislatively-stipulated standard of living, defined in terms of a specified sum of money per year or per month.

The basic difference between this approach¹⁰ and the dual program previously discussed resides in the fact that the device of the flat grant, from which specified resources would be deducted, as under other budget plans, make it possible to offer the blind a financial inducement to elect a plan for which federal financial participation is available.

Such a program might take the following form: Exclude as at present, all blind persons from the provisions of the support laws. Retain all present provisions of the blind pension statute, including the proviso calling for a maximum payment of \$40 per month. Provide for a flat budget grant of, say, \$50 per month and deduct from this amount both earned income in excess of \$50 per month, whether paid in cash or in kind and all unearned cash income. Allow the blind to elect either the budget plan or the pension plan.

On the assumption that a blind person will select the plan which will give him the larger dollar amount, about 12,490 persons will select the budget plan, and 2,797 will prefer the pension plan. The annual cost of the two plans constituting the dual program would be \$8,800,000, of which \$4,500,000 would be borne by the federal government and \$4,300,000 would be financed by the Commonwealth.

It should be noted that the chief disadvantage of the program as a means of assuring continued federal participation stems from the fact that blind persons are permitted to make a selection between plans. The blind may not reasonably be expected to select a plan that will not be advantageous from a pecuniary point of view.

Assuming an increase in the pension from \$40 to \$50,

most blind persons would probably select the pension plan. Hence, to assure continuance of most pensioners on the budget plan, the budget grant might have to be increased from \$50 to \$60. Such a move would increase the cost of the program from \$8,800,000 to \$10,000,000, of which sum \$6,130,000 would have to be financed by the Commonwealth.

C. The Present Program and Federal Participation—

The two programs discussed above provide for two plans each and give blind persons the option to select the plan that fits his economic circumstances and his preferences. As above noted, the first program is unlikely to result in consequential federal participation. In the case of the second program, the degree of federal participation depends upon the relationship between the dollar amount of the pension and the dollar amount of the flat budget grant.

It appears that the Social Security Administrator would—at least until June 30, 1955—participate in the financing of part of the cost of Pennsylvania's present blind pension program.

As will be recalled,¹¹ the amendments to the Social Security Act which temporarily modifies the so-called "equality clause," in effect, provides that:

(1) The Administrator shall approve a plan although it does not meet the requirements of the equality clause;

(2) Federal participation is available only in the case of payments to that group of recipients which meets the requirements of the equality clause.

It appears that federal participation would be available if the Pennsylvania Department of Public Assistance established uniform and reasonable standards for segregation of the blind into two groups: (1) the group that could meet the standards and hence the requirements of the equality clause and thereby become eligible for federal participation; (2) the group that could not meet these standards and whose grants would have to be financed exclusively out of Commonwealth resources.

Table VI, below, shows, at different pension levels, the total annual payments to the blind, and the division of cost between the Commonwealth and the federal government.

Table VI

Total Annual Blind Payments and State and Federal Shares at Selected Blind Pension Levels

Monthly Pension	Total Annual Payments	Federal Government Share	State Share
(1)	(2)	(3)	(4)
\$30	\$5,490,000	\$2,578,000	\$2,192,000
35	6,404,000	2,901,000	3,503,000
40	7,319,000	3,223,000	4,096,000
45	8,234,000	3,545,000	4,689,000
50	9,149,000	3,867,000	5,282,000

The table is compiled on the basis of the following conditions, which reflect federally acceptable practices. The

¹⁰ Senate Bill No. 974, Session of 1949, adopted this approach. The bill passed the Senate on third reading, but was not reported from the Committee on Welfare of the House.

¹¹ See page 4.

Department of Public Assistance will ask and receive federal participation for payments to all blind persons without income or whose earned income per month does not exceed \$50, whose resident real property has an assessed valuation not exceeding \$5,000, whose personal property, other than furnishings and personal belongings does not exceed \$2,000, and who are not inmates of public institutions.

CHILD PLACEMENT AND ADOPTION

A REPORT OF THE JOINT STATE GOVERNMENT COMMISSION

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA, SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

Robert E. Woodside, Judge of the Court of Common Pleas of Dauphin County

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

Herewith is submitted a report on child placement and adoption in Pennsylvania as directed by House Concurrent Resolution No. 74, Session of 1949.

In the more than 250 years since the first legal provision was made for the public care of dependent children in the Commonwealth, many diverse means of caring for dependent children have been developed. Since child care was originally regarded as a purely local problem, the methods of administering and financing child placement vary from county to county.

Although the problems of child placement and adoption are interrelated, public interest in recent years seems to have centered upon placement of children for adoption. In view of the focus of public interest, most of the recommendations contained in this report deal with adoption placement. However, the report covers, in addition to adoption placement, the wider field of child placement.

To facilitate the study and investigation of child placement and adoption, the Commission, in accordance with Act of 1943, March 8, P. L. 13, Section 1, created a subcommittee and appointed five advisors. The cooperation of the advisors and the members of the subcommittee is gratefully acknowledged.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Map IV. Agencies Placing Children for Adoption in Pennsylvania, by Type, 1950

SUMMARY OF FINDINGS

I. In 1949, approximately 36,000 children in Pennsylvania were under institutional care or in foster homes, and 4,000 were placed in adoptive homes.

II. Of the 36,000 in institutions and foster homes, some 3,800, or about 11%, were handicapped and delinquent children; 12,200, or 34%, were in institutions for dependent and neglected children; 9,900, or approximately 27%, were under the care of the county institution districts, primarily in foster homes; and 10,300, or approximately 28%, were under the care of private child-caring agencies, primarily placed in foster homes.

III. The public cost of child care in Pennsylvania in 1949, amounted to some \$14,000,000. Of this total, \$12,000,000, or 87%, was borne by the counties or the county institution districts; 13% of the cost was borne by the Commonwealth, either through state aid to private institutions and agencies, the operation of state-owned institutions, or public assistance payments for the care of certain children removed from their homes by court order. The Commonwealth also grants financial aid to dependent children in their own homes. In 1949, this type of child aid amounted to approximately \$31,000,000 in addition to the million and a half dollars contributed to institutions, agencies, etc.

IV. The "Mallery Amendment" of 1949 (1949, April 28, P. L. 767), permits continuation of public assistance payments to children who are removed from their own homes by court order and placed in foster homes or children's homes maintained by a county institution district.

V. Participating in the placing of children, including placements for adoption, are the county institution districts, Juvenile Courts, private child-caring agencies and individuals.

VI. At the present time, adoption placement is not a Commonwealth responsibility. Under existing law, the Orphans' Court (in Philadelphia County, the Municipal Court) has permissive power to investigate the parties concerned in adoption proceedings.

VII. The standards of parties placing children for adoption vary widely.

VIII. Generally, the time involved in consummation of an adoption placement varies from a few months to several years; sometimes children pass through numerous foster homes in the adoption placement process.

SUMMARY OF RECOMMENDATIONS

The Joint State Government Commission recommends:
With regard to Adoption Placement,

I. That a state-wide Adoption Placement Service be established in the Department of Welfare,

II. That standards for agencies and institutions placing children for adoption, and for prospective adoptors, be established by the Department of Welfare,

III. That there be annual licensing, by the Department of Welfare, of private and public agencies meeting the standards prescribed; and the placing or taking a child

for adoption by or from an unlicensed agency be prohibited; that relatives be permitted to take a child provisionally, but required to apply to the Department of Welfare for a preliminary certificate of approval,

IV. That provision be made for appeal from the decision of the Department of Welfare to the Juvenile Court,

V. That a parent or parents be permitted, by petition to the Juvenile Court, to surrender custody of a child to the Department of Welfare or a licensed agency or institution for purposes of adoption, and

VI. That preference be given by the Department of Welfare to prospective adoptors designated by the natural parent or parents;

With regard to Jurisdiction in Adoption Proceedings,

That adoption proceedings be placed under the jurisdiction of the Juvenile Court;

With regard to Assistance Payments to Dependent Children,

That the provision of the "Mallery Amendment" (1949, April 28, P. L. 767) be clarified to facilitate continuation of assistance payments to all children removed from their own homes by court order.

Section I

HISTORICAL BACKGROUND OF CHILD CARE IN PENNSYLVANIA

The problem of dependent children has been a matter of public concern in Pennsylvania since colonial days. The "Great Law," passed by the first General Assembly in 1682, provided that the justices of the peace should care for any person who fell into a state of poverty, including poor orphans. These first poor laws thus made townships responsible for the care of their poor.

The State first participated in the care of the poor in 1751 when the Pennsylvania Hospital of Philadelphia was created by Act of Assembly. This legislation marked the beginning of a trend toward public and private financing of charitable agencies and institutions whos has become the basis of the Pennsylvania system for the care of children outside their own homes.

During the eighteenth and nineteenth centuries, dependent children were cared for in almshouses—along with the mentally ill, the blind, the physically handicapped, and the able-bodied poor. Gradually there developed a concern for better care for some of the persons in almshouses, especially children, and separate institutions were established for their care.

The Orphan Society of Philadelphia, founded in 1816, was the first private, nonsectarian agency in Pennsylvania to provide special institutional care for dependent or neglected children.

In 1883, a charter was granted the Children's Aid Society of Pennsylvania, with headquarters in Philadelphia. The purpose of this organization was to find free family homes for dependent and neglected children. This agency was one of the first to make offers of assistance to public officials charged with the care of dependent children. Many directors of the poor subsequently referred children to the society for foster home placement. Also, in 1883, the General Assembly prohibited the maintenance of normal children over two years old in almshouses.

The forerunner of our present-day Juvenile Court was

established in 1903.¹ The act removed jurisdiction over matters relating to neglected and dependent children from the directors of the poor and lodged it with the court.

In 1913, the General Assembly passed the Mothers' Assistance Act,² which provided for financial assistance to mothers of proven character with children under sixteen years of age whose fathers were deceased or confined to mental institutions. The Mothers' Assistance Act provided for a county-state program financed equally from county and state funds.

The Pennsylvania Department of Welfare was created in 1921.³ The department was charged with the supervision of all agencies and individuals engaged in arranging for the care of children outside their own homes.

In August, 1935, the United States Congress passed the Social Security Act.⁴ This act enabled the federal government to cooperate with state public welfare agencies in the establishment, expansion and financing, especially in predominantly rural areas of child welfare services for the care of homeless, dependent and neglected children in danger of becoming delinquent.

Pennsylvania, in the 1930's, passed the Juvenile Court Law in its present form, providing the machinery for "all proceedings affecting dependent, neglected and delinquent children,"⁵ and established the Rural Child Welfare Unit⁶ in the Department of Welfare to administer the federal grant allotted, under the Social Security Act, for the payment of part of the administrative cost of local child welfare services and development of community child-welfare organizations, in rural and other areas of special need.

In 1937, the Pennsylvania General Assembly passed the Public Assistance Law,⁷ whereby the Commonwealth, through a newly-created Department of Public Assistance, assumed responsibility for the care of the needy including children, residing in their own homes. In addition, the act transferred the administration of Mothers' Assistance (re-titled Aid to Dependent Children) from the county boards of trustees to the Department of Public Assistance. Companion legislation, the County Institution District Law, created in every county⁸ an institution district charged with responsibility for the public care of children outside their own homes, and abolished local poor boards.

Section II

GOVERNMENTAL PARTICIPATION IN THE CARE OF CHILDREN IN PENNSYLVANIA

The following public agencies participate in the care of dependent children outside their own homes in Pennsylvania:

1. The Department of Welfare, which acts in a supervisory and advisory capacity.
2. The Department of Public Assistance, which provides funds to the county institution districts for the maintenance of children receiving public assistance

¹ 1903, April 23, P. L. 274.

² 1913, April 29, P. L. 118.

³ 1921, May 25, P. L. 1144; then called the Department of Public Welfare.

⁴ 42 U. S. C. A. 301 et seq. 49 Stat. 620 et seq. (C. 531, August 14, 1935).

⁵ 1933, June 2, P. L. 1433.

⁶ By order of the Governor. See History of Child Care in Pennsylvania (Commonwealth of Pennsylvania, Department of Welfare, [April, 1940]) p. 11.

⁷ 1937, June 24, P. L. 2051.

⁸ 1937, June 24, P. L. 2017.

funds when removed from their own homes at the direction of the court.

3. The county institution districts, which, through local taxes, contribute money to pay all or part of the cost to the county of maintaining children in foster homes, in institutions, or in homes for children.

4. The Juvenile Courts, which have exclusive jurisdiction in all proceedings affecting dependent, neglected and delinquent children.

Generally, the county institution districts, the Juvenile Courts, or their agents, and private agencies are responsible for the actual placement of a child.

In addition, the General Assembly customarily makes biennial appropriations to private children's agencies and institutions.

By custom, dating back to colonial days, some private agencies and institutions receive biennial lump sum grants from the Commonwealth. Only nonsectarian and incorporated organizations are eligible to receive such aid.

In 1949, thirty-five children's agencies and institutions received grants-in-aid from the state, totaling \$348,200. The allocation of these grants is shown in Table I.

Table I

State Aid to Children's Agencies and Institutions for the Biennium 1949-1951

Map I shows the geographical distribution of these appropriations within the Commonwealth.

Generally speaking, the amount of money appropriated to these institutions and agencies is determined on the basis of the difference between their receipts and expenditures.

[Map not reprinted in this appendix. See original report, page 13.]

A. The Department of Welfare—

The Department of Welfare has specified powers with respect to all "supervised institutions,"⁹ all "children's institutions,"¹⁰ and all children's boarding homes which are licensed by the state. The department is authorized to make and enforce rules and regulations for the visitation, examination and inspection of all institutions for children. The Division of Supervising and Licensing is charged with

⁹ "Supervised Institutions" include all institutions and associations, and societies within the Commonwealth into whose care delinquent, dependent or neglected children are committed and all houses and places maintained by such institutions, associations, or societies in which such children may be kept or detained (1929, April 9, P. L. 177).

¹⁰ "Children's Institutions" are defined as any incorporated or unincorporated organization, society, corporation, or agency, public or private, which receives, cares for, or places children in foster family homes either at board, wages, or fees; or any individual who for hire, gain or reward receives a child unless he is related to the child by blood or marriage within the second degree; or any individual not in the regular employ of a court or an organization, society, association, or agency, duly certified by the department, who in any manner becomes a party to the placing of children in foster homes, unless he is related to such children by blood or marriage within the second degree, or is a duly appointed guardian (1929, April 9, P. L. 177).

carrying out the department's supervisory responsibility. The staff of the division assigned to this work consists of six field representatives and a supervisor.

In addition, the department establishes regulations for the investigation, placement and supervision of dependent children by local public authorities and by private child-caring agencies.

The Division of Rural Child Welfare, in the Department of Welfare, is responsible for the administration of the federal grants under the Social Security Act in those counties which have affiliated themselves with the division.¹¹

As of July 1, 1950, a surplus of federal funds, built up from previous years, was available to Pennsylvania in the amount of \$143,050.98, in addition to the yearly grant, making a total of \$465,640.98 currently allocated to the state.

The Division of Rural Child Welfare administers the federal grants to affiliated counties. The grants cover the administrative costs of county child welfare services. Generally, the full salary of the county child welfare secretary and part of the salaries of any additional child welfare workers are paid from federal funds.

Seventeen of Pennsylvania's sixty-seven counties are now affiliated with the Division of Rural Child Welfare and receive federal grants. Of this number, fifteen have established eligibility on the basis of their rural-total population ratio, while two—Beaver and Cambria—have been affiliated by virtue of the fact that they are areas characterized by special need. Affiliation with the division is voluntary. It appears that twenty-nine other counties are eligible for federal grants on the basis of the rural-total population ratio.¹²

Table II below, shows the seventeen counties now affiliated with the Division of Rural Child Welfare and the twenty-nine counties eligible for affiliation on the basis of their rural-total population ratio. Several other counties might qualify as areas of special need.

Table II

of Rural Child Welfare, 1949

Counties Eligible for Affiliation	Rural Population as Percentage of Total Population
(1)	(2)
*Adams	85.0%
Armstrong	70.9
†Beaver

¹¹ Briefly, the conditions of affiliation are: (1) 50 per cent of the county population must be determined rural by the most recent census, or the county must be found to be an area of special need; (2) county child welfare services must be organized under the County Commissioners as local authorities of the county institution district; (3) County Commissioners must be willing to appoint an advisory committee of local citizens to confer with them and with the Child Welfare Secretary employed by the Commissioners; (4) County Commissioners must agree to employ personnel from state civil service lists; (5) County Commissioners must report to Division of Rural Child Welfare on their expenditures, and must hold conferences with the field supervisor whenever desirable; (6) the County Commissioners remain the final authority as to the acceptance of children for care.

¹² The 1950 amendments to the Social Security Act restrict the definition of rural population for purposes of the grant to those under eighteen years of age. Final data of the 1950 census are not yet available for the determination of the counties eligible under the new provision. However, the Division of Rural Child Welfare does not consider that the new provision will cause much change in the eligibility of the counties listed in Table II.

* Affiliated, on basis of rural-total population ratio.

† Affiliated, on basis of special need.

‡ On November 7, 1950, the citizens of Union County voted for affiliation with the Division of Rural Child Welfare.

It has been suggested that wider use of the federal grants could be made if all eligible counties were affiliated with the Division of Rural Child Welfare and that a saving could be made to the state if the two divisions in the Department of Welfare which serve dependent children outside their own homes were combined to form one division.

For the period 1936 to 1951, federal allocations to Pennsylvania for rural child welfare services are shown in Table III, page 19.

B. The Department of Public Assistance—

In addition to the \$31,000,000 expenditure for the care of children in their own homes, the Department of Public Assistance makes payment in certain cases for the care of children who were receiving public assistance grants when

removed from their own homes by court order. Under the "Mallery Amendment"¹³ the public assistance payments for the support of these children are continued although they are no longer cared for in their own homes.

Payments to the county institution districts under the 1949 amendment to the Public Assistance Law were first made in September, 1949. At that time, three counties received payments totalling \$131. By December, 1949, ten

counties¹⁴ were receiving payments totalling \$906.43. By December, 1950, thirty-five counties were receiving \$59,-831.13 in state public assistance funds.

Under the regulations of the Department of Public Assistance, a county institution district, in order to receive public assistance payments, must meet standards approved by the Department of Welfare. As of November 1, 1950, the Department of Public Assistance was advised that the

* Counties with standards for Child Care not approved by Department of Welfare.

Inspection of Table IV shows that only about one-half of the counties receive payments under the Mallery Amendment. This situation is due to the following factors:

1. The practice of some Juvenile Court is to commit children to agencies other than the county institution district.

2. Few children in public assistance families, where commitment is deemed necessary, seem to have been brought to the attention of the Juvenile Courts.¹⁵

3. Sixteen counties in Pennsylvania are not eligible for such payments because they do not meet the standards of the Department of Welfare.

4. County institution districts which place children in institution district itself are not eligible to receive public assistance payments for children so placed.

C. The County Institution District—

The county institution district is the local unit respon-

¹⁵ Between 1937 and 1950, the duties of the county boards of assistance with respect to children on public assistance have not been uniformly defined. However, by regulation issued by the Department of Public Assistance to the county assistance boards on January 1, 1951, the department defines as part of its function "to protect the welfare of children receiving assistance when there are indications that the children are being abused or neglected, and the situation is serious. If the adults responsible for the care of the children fail to take action to improve conditions, the Department (of Public Assistance) refers the matter directly to a child welfare agency. If the situation remains serious, the Department refers the case to the Juvenile Court. If there is no child welfare agency in the county, the case is referred to the Juvenile Court as the protective agency."

sible for the care of all public charges, except those supported from state and federal funds, and certain individuals requiring institutional care provided by the state. The County Commissioners are the executive and administrative officers of the county institution district.

The officers of the county institution district are authorized¹⁶ to levy and collect taxes on real estate at the same time and in the same manner as other county taxes. With the approval of the Pennsylvania Department of Internal Affairs, the county institution districts may borrow money and negotiate short-term bonds for the purchase of real estate and the erection of buildings.

The County Commissioners (in Philadelphia, the Department of Public Welfare), as the officers of an institution district,¹⁷ are responsible for the care of any dependent, having settlement in the county, who is not otherwise cared for. The county institution district places dependent children in foster homes or institutions and finances all or part of the cost of their maintenance.

D. The Juvenile Court—

The Juvenile Court Law of 1933,¹⁸ as amended, gives the court¹⁹ exclusive jurisdiction in all proceedings affecting dependent,²⁰ neglected²¹ and delinquent²² children.

The powers of the court may be exercised (1) upon petition of any citizen, resident of the county, setting forth that a child is neglected, dependent or delinquent and is in need of care, guidance or control, or (2), upon commitment by a magistrate, alderman, or justice of the peace of a child arrested for any indictable offense, other than murder, or for violation of any other laws of the Commonwealth, or the ordinances of any city, borough or township.

The judge, after an inquiry into the facts, determines whether the best interests of a child and of the Commonwealth require the care, guidance and control of such child, and makes an order accordingly. The court may:

(1) Allow a child to remain in his home under the care of his parent or parents, or place the child in a suitable family home, subject, in either case, to the supervision and guardianship of a probation officer; require the child to report to the probation officer as often as deemed necessary; and require the child to be returned to the court for further proceedings whenever necessary.

(2) Commit a child to the care, guidance and control

¹⁶ 1937, June 24, P. L. 2017.

¹⁷ According to rules, regulations and standards established by the state Department of Welfare.

¹⁸ 1933, June 2, P. L. 1433, as amended, 1947, May 23, P. L. 292.

¹⁹ "Court" means the Municipal Court of Philadelphia, the Juvenile Court of Allegheny County, and the Court of Quarter Sessions in all other counties.

²⁰ A dependent child is one who is homeless or destitute, or without proper support or care, through no fault of his or her parent, guardian, custodian or legal representative; who lacks proper care by reason of the mental or physical condition of the parent, guardian, etc.

²¹ A neglected child is one who is abandoned by his parents, guardian, custodian, or legal representative; who lacks proper parental care by reason of the fault or habits of his or her parents, guardian, etc.; whose parent, guardian, custodian or legal representative neglects or refuses to provide proper or necessary subsistence, education, medical or surgical care, or other care necessary for his or her health, morals or well being; whose parent, guardian, custodian or legal representative neglects or refuses to provide the special care made necessary by his or her mental condition or in a situation dangerous to life or limb, or injurious to the health or morals of himself, herself or others.

²² A delinquent child is one who has violated any law of the Commonwealth, or ordinance of any city, borough or township, who by reason of being wayward or habitually disobedient is uncontrolled by his parents, guardian, etc.; who is habitually truant from school or home; or who habitually so deports himself as to injure or endanger the morals or health of himself or others.

of some reputable citizen of good moral character, subject to the supervision of a probation officer.

(3) Commit a child to some suitable institution or to the care of an incorporated association or society whose object is the care, guidance and control of delinquent, dependent and neglected children.

(4) Commit a child to an industrial or training school or county institution or school maintained for such purpose.

(5) Commit any child over the age of sixteen years to any state industrial school or home for the reformation and correction of youths above the age of sixteen.

The court may make an order upon the parent or parents to contribute to the support of the child as it may determine. When a child is placed in a suitable family home and the payment of board is required, the court may direct that the board be paid by the county until provision is made for the placing of the child in a suitable family home without payment of board.

In the case of the commitment of a child, the court may order the county to pay for the board, clothing, necessary medical and surgical attendance, the child's maintenance generally and the necessary expenses of placing and replacing the child. In addition, the court may fix the amount which shall be paid for the child, provided that, in all cases of commitments to houses of refuge that are not exclusively under state control, the amount of the order for maintenance, etc., shall be fixed according to existing legislation governing the payment of expenses of children committed to such institutions.

The statute directs the court to place a child, insofar as possible, under the care of persons having the same religious belief as the parents of the child, or with some association or society which is controlled by persons of such religious belief, and as far as possible, to provide, in making placement orders, that the care of the child is as nearly as possible that which should have been given by his or her parents. In all cases where it can be done, the child is to be placed in a suitable family home to become a member of the family by legal adoption or otherwise.²³

Section III

LOCAL ADMINISTRATION OF THE CARE OF CHILDREN OUTSIDE THEIR OWN HOMES IN PENNSYLVANIA

As the result of varying interpretations of the statutes which provide for the care of children outside their own homes, child placement in Pennsylvania is administered locally by more than a dozen groups or combinations of groups.

For example, the phrase in the Institution District Act, "children who are in or committed to their charge," has been interpreted by some local authorities to mean that the county institution district is an independent public agency for child placement. Again, in some counties, it seems to be the prevailing view that the Juvenile Court has jurisdiction over dependent children only if and when a proceeding is necessary to obtain custody and, except for such cases, the institution district places children without court order. In other counties, the Juvenile Court is regarded as the sole public child placement agency.

As a matter of practice, children are being placed by

the County Commissioners (as administrators of the county institution district), by County Commissioners and private agencies, by private agencies who act as agents for the County Commissioners, by County Commissioners and private agencies acting as agents for the County Commissioners, by private agencies alone, by County Commissioners affiliated with the Division of Rural Child Welfare of the Pennsylvania Department of Welfare, by the Juvenile Court, by the Juvenile Court and the County Commissioners, by the Juvenile Court and private agencies, by the Juvenile Court, County Commissioners and private agencies, and by the Juvenile Court, City Department of Welfare (Philadelphia) and private agencies acting for both. Twelve counties has no organized child placement service.

The administrative patterns of child placement activities, on a county basis, are presented graphically on Map II. In connection with these patterns as shown in the map, it should be remembered that there are, in addition, numerous private agencies throughout the state.

Illustrated on Map II is the broad general outline of child placement administration with the divisions—resulting from the varying interpretations given the Institution District Act and Juvenile Court Act—which have emerged in the several counties. They are as follows:

1. Counties with organized child placement service:
 - a. Service performed directly by County Commissioners—

Centre	Perry
Lackawanna	Westmoreland
Montour	
 - b. Service performed by County Commissioners and Private Agencies—

Crawford	Luzerne
Cumberland	Northumberland
Dauphin	Warren
Delaware	York
Erie	
 - c. Service performed by Private Agencies acting as agents for County Commissioners

Berks	Lebanon
Blair	Lehigh
Elk	Monroe
Franklin	Northampton
Lancaster	Venango
 - d. Service performed by County Commissioners and Private Agencies acting as agents for County Commissioners—

Montgomery	
------------	--
 - e. Service performed by Private Agencies—

Clinton	McKean
---------	--------
 - f. Service performed by County Commissioners affiliated with Division of Rural Child Welfare of Pennsylvania Department of Welfare—²⁴

Adams	Mifflin
Bedford	Snyder
Bradford	Susquehanna
Columbia	Tioga
Huntingdon	Wayne
Indiana	

²³ 1933, June 2, P. L. 1433.

²⁴ For conditions of affiliation with Division of Rural Child Welfare, see above, Section II, Page 15.

- g. Service performed by County Commissioners affiliated with Division of Rural Child Welfare and by Private Agencies—

Beaver	Fayette
Cambria	Washington
Clearfield	

- h. Service performed exclusively by the Juvenile Court—

Bucks	Lawrence
Carbon	

- i. Service performed by Juvenile Court and County Commissioners—

Mercer	Potter
--------	--------

- j. Service performed by Juvenile Court and Private Agencies—

Allegheny

- k. Service performed by Juvenile Court and Private Agencies acting as agents for County Commissioners—

Lycoming	Somerset
----------	----------

- l. Service performed by Juvenile Court, County Commissioners and Private Agencies—

Butler	Schuylkill
Chester	

- m. Service performed by Juvenile Court, City Department of Welfare and Private Agencies acting for both—

Philadelphia

2. Counties without organized child placement service:

Armstrong	Jefferson
Cameron	Juniata
Clarion	Pike
Forest	Sullivan
Fulton	Union
Greene	Wyoming

[Map not reprinted in this appendix. See original report, page 31.]

Section IV

NUMBER OF CHILDREN IN PENNSYLVANIA UNDER CARE OUTSIDE THEIR OWN HOMES AND EXPENDITURES FOR THE MAINTENANCE OF SUCH CHILDREN IN PENNSYLVANIA AND IN OTHER STATES

A. Number of Children Under Care in Pennsylvania—

Table V, page 37, shows, for the period 1940-1949, the number of children under care outside their own homes in Pennsylvania, and the agencies providing care.

Inspection of Table V, (2), (5), (8), (11) and (14), shows that the number of agencies varied from year to year. Under the circumstances, generalizations, particularly when they are based upon relatively small numerical differences, must be regarded as provisional.

Examination of Column (17) shows that the total number of children under care appears to have decreased from 39,542 in 1940 to 36,410 in 1949. The decline reflected by

the data does not appear unreasonable in view of the fact that the general employment situation has improved, the coverage of aid to dependent children has been extended by the inclusion of children living with specified relatives, and adoptions have increased from 2,963 in 1944 to 4,082 in 1949.

Again, examination of Columns (12), (13), (15) and (16) shows that of the 36,410 children under care in 1949, 3,278—or 9 per cent—were in institutions for delinquent children and 570—or 1.6 per cent—were cared for in institutions for the physically handicapped.

B. Expenditures for Children Under Care in Pennsylvania—

Although the number of children under care has apparently decreased between 1940 and 1949, Table VI, page 39, shows that both state and local expenditures for the care of such children have increased over the same period.

Examination of Table VI, Column (9), shows that combined state and local expenditures for children under care outside their own homes have increased from \$6,583,932 in 1940 to \$14,081,812 in 1949.

In 1949, local expenditures amounted to \$12,196,323, or 86.6 per cent of combined state and local expenditures.

The state expenditures of \$1,885,489 for 1949 were divided as follows among participating institutions: private children's institutions and agencies \$587,255; state-owned children's institutions \$1,296,498; county institutions districts, \$1,736.

Map III, on page 41, shows local financing of care of children outside their own homes in Pennsylvania during 1949.

Map III illustrates the variety of county financing methods. In some counties, all funds for the care of children outside their own homes are provided by the county institution district. In other counties, these funds are provided

exclusively by the county. Again, in other counties, the funds are provided jointly by the county and the county institution district. In three counties there were no local expenditures for the care of children outside their own homes.

[Map not reprinted in this appendix. See original report, page 41.]

C. Financial Responsibility for Child Care in Other States—

From an examination of the expenditures for child care in the forty-eight states, it appears that in seven states—Arizona, Delaware, Maine, New Mexico, Rhode Island, Utah and Washington—the financial responsibility for child care rests exclusively with the state government. In eight states—Georgia, Indiana, Iowa, Nevada, New Hampshire, Ohio, Texas and Wyoming—the financing of child care is purely a local function. In the remaining thirty-three states, the responsibility is shared by state and local government.

Eighteen of the states, in which financial responsibility for child care is divided between state and local governments, have developed specific formulae for the division of costs. Eleven—Alabama, Colorado, Illinois, Kansas, Maryland, Michigan, Montana, New Jersey, North Carolina, North Dakota and Vermont—divide costs evenly. In the other states which have a definite per cent-of-costs program, the percentage of costs assumed by the state range from 33½ per cent in Wisconsin to 75 per cent in Mississippi.

In states in which no specific formula is used for the sharing of costs, state funds are used after local funds have been exhausted or for purposes for which local funds are not available.²⁵

Section V

CHILD PLACEMENT IN OPERATION IN SEVEN
SELECTED PENNSYLVANIA COUNTIES

It has been pointed out previously that child placement practices vary from county to county. Under the circumstances, the applicability of any generalization is necessarily limited. To facilitate a few realistic close-up views of placement practices, the procedures used in seven counties²⁰—Philadelphia, Allegheny, York, Indiana, Lebanon, Carbon and Fulton—are detailed below.

Allegheny and Philadelphia counties were selected to represent metropolitan Pennsylvania, Fulton and Lebanon counties rural Pennsylvania, York County urban and rural Pennsylvania, Carbon as an anthracite county and Indiana as a bituminous county.

A. Administration of Child Placement in Seven Selected Counties—

The major administrative child placement patterns which obtain within the Commonwealth are operative in the seven sample counties.

1. Philadelphia County—

A Philadelphia child may come to the public attention in a number of ways: his parents may ask help from a private agency or apply directly to the court; an agency may learn of the needs of a child through interested individuals, or may have accepted a child for care on a temporary basis, only to have the situation develop into one requiring long-time care; and finally, the child may come to the attention of the court through process of law.

Private agencies are anxious that a dependent, or neglected child be brought to the attention of the court, because, if foster care is necessary it is the court which can and usually does set in motion the procedure by which local public funds are obtained for the child's support by private agencies and institutions.

Public and private agencies and officials responsible for child placement and the flow of public funds for the care of children outside their own homes in Philadelphia are shown graphically in Chart I.

Assuming that the child has come to the attention of the Court, the Probation Department makes an investigation of the child's situation. If the court determines that the child requires care away from its own home, the whereabouts and condition of the child's parents are ascertained. This is a determining factor in deciding to whose care the child should be committed. If the condition of the parents is "whereabouts known," the child is committed directly by the court to a private agency or institution for care. At the same time, the court orders the County of Philadelphia to pay for the child's support.

If the parents are deceased, institutionalized, incarcerated, or whereabouts unknown, the child is committed to the care of the City Department of Public Welfare, which, in turn, may place him for care with a private agency or institution. In this instance, the Department of Public Welfare is made responsible for the child's support.

If the status of the parents changes, the financial support of the child is shifted from the city to the county and vice versa, even though City Council, the taxing authority in Philadelphia, is the source of both moneys.

Three independent governmental agencies plus thirteen private child-caring agencies and thirty-seven private children's institutions participate in this placement process.

[Chart not reprinted in this appendix. See original report, page 47.]

Four independent governmental agencies are involved in the collection of support orders: The judges of the Municipal Court, the County Commissioners of Philadelphia, the Clerk of the Court of Quarter Sessions—all elected officials—and the Department of Public Welfare. This information is presented graphically in Chart II, page 50.

[Chart not reprinted in this appendix. See original report, page 50.]

If the child is considered to be a charge of the County of Philadelphia and a parent or relative is ordered to reimburse the County for the child's support, the Clerk of the Court of Quarter Sessions is authorized to receive moneys in payment of such orders. This money is transmitted to the Treasurer of the City of Philadelphia. If the payment of such an order becomes delinquent, the Clerk of the Court of Quarter Sessions advises the Division of Children's Agents of the County Commissioners, who attempt to enforce the support orders against parents or relatives. If this Division is unsuccessful in obtaining payment, it files an attachment with the Municipal Court. If the child is considered to be a responsibility of the City of Philadelphia and a parent or relative is ordered to reimburse the city for the child's support, the Department of Public Welfare is authorized to receive moneys in payment of such orders. This money is transmitted to the Treasurer of the City of Philadelphia. This same Department will attempt to enforce the payment of delinquent orders and, if unsuccessful in obtaining payment, files an attachment with the Municipal Court.

The Division of Children's Agents or the Department of Public Welfare seldom consults with private agencies or institutions caring for children when the parents are delinquent in support order payments, although the private agencies or institutions have contact with the children and so might be able to clarify the parents' situation for the collection agencies. Further, if the parents are paying support orders and the income of the parents changes there is little possibility in the Philadelphia system that the orders will be revised. The Department of Accounts under the Clerk of the Court of Quarter Sessions takes the position that it is responsible only for the collection of orders once established. Private agencies and institutions take the position that they are not responsible for the establishment or collection of support orders.

2. Allegheny County—

Generally speaking, in Allegheny County, when the care of Children outside their own homes is considered to be temporary in nature, it is the private agency which makes the placement in a private boarding home or institution. When foster care of children is considered other than temporary in nature, the responsibility for such placement devolves on the Juvenile Court of Allegheny County, which is the sole public authority for the care of children outside their own homes. In carrying out this function, the court utilizes the services of private institutions and individuals.

The Juvenile Court interprets its authority to embrace

²⁰ For details of seven county survey, see Appendix C and D.

the determination of the suitability of individuals and institutions to provide or continue to provide foster care and the determination of the needs, placement and supervision of children in foster care.

Once a child is placed in a private boarding home or institution, his situation is reviewed by the court at least twice yearly. If the court finds that paid boarding home care appears more suitable than institutional care, then the court will try to effect a change in placement. Institutional care is usually used by the court only for children who present a behavior problem, where brothers and sisters are placed at the same time, where a health problem needs correction or a paid boarding home is not immediately available. The court may, if it is not satisfied with the care that its wards receive in a particular institution, remove all such children to another institution or to a paid boarding home.

In addition, a department of the court is responsible for the collection of support orders placed against parents and relatives for the support of children under placement. Probation officers are required to inform the collection department concerning the whereabouts and financial status of parents.

3. York County—

In York County four agencies are involved in the placement of children under care: the County Child Welfare Department under the County Commissioners; the Children's Home, a private nonsectarian institution; Catholic Charities of York, a private sectarian agency; and the Family Service Bureau, a private nonsectarian agency.

A child may be brought to the attention of any one of these agencies. To receive care outside his own home a commitment by the court is not necessary. In December, 1949, 62 per cent of the children under care in York County were under the supervision of the County Welfare Department. If this agency accepts a child for care entailing financial responsibility, the case must be approved by the County Commissioners. If a child in a family which is being aided by the Family Service Bureau requires care outside his own home, the child will be placed directly by this agency in the Children's Home of York. At the same time, financial support may be asked of the County Commissioners. The Catholic Charities may also accept a child for care and request support from the county. The County Commissioners may place a child directly in the Children's Home. Upon commitment by the court, a Protestant child is committed to the care of the County Child Welfare Department and a Catholic child to the care of the Catholic Charities of York.

In cases where a child is accepted for care by the County Child Welfare Department other than by court order, and a parent is considered to be in a position to provide partial support, an agreement for support is made up by the Probation Officer of the court and the District Attorney. This agreement can be readily revised if the income of the parent or relative changes. The Probation Officer is responsible for collecting such an order as well as any support orders placed by order of court. The County Child Welfare Department keeps the Probation Office currently advised of the whereabouts of the parents of children under care. These support orders by agreement are not made for children placed in the Children's Home or under the care of the Catholic Charities of York.

Children placed in the Children's Home by the Family Service Bureau and the County Commissioners receive no public supervision. The Catholic Charities of York is not required to report to any public authority as to the needs and resources of children under its care at public expense.

4. Indiana County—

In Indiana County, the county institution district is affiliated with the Division of Rural Child Welfare of the State Department of Welfare. The County Child Welfare Services, a public agency, is the only agency caring for children outside their own homes in this county. By reason of Rural Child Welfare affiliation, cost of administration is met, in part, from federal funds. Here, when a child is considered to need care outside his own home, he is referred to the County Child Welfare Services. Generally, considerable effort is made to remedy conditions in the child's own home before placement is recommended. However, when remedial efforts fail and placement is considered to be the only solution, the case must be approved by the County Commissioners before the child is accepted for care. In such instances, the agency is responsible for keeping in contact with the parents, particularly to review the parents' earnings and living conditions. The agency determines whether or not the parent or relative can give partial support to the child while under care. Only extreme cases are referred to the Juvenile Court for commitment and establishment of court orders.

The County Child Welfare Services attempts to place children in foster homes which meet their needs. This agency supervises children under placement whether in a paid boarding home or in an institution.

Indiana County receives partial federal financing and state supervision but administers the program locally.

5. Lebanon County—

In Lebanon County, four agencies are responsible for the care of children outside their own homes: the Family and Children's Service of Lebanon County, a private agency; the Church Home and Orphanage, a sectarian institution; Catholic Charities of Harrisburg; and the Lutheran Children's Bureau of Philadelphia, both sectarian child-caring agencies.

In Lebanon County, the County Commissioners have delegated their child welfare function to a private agency, the Family and Children's Service of Lebanon County. This agency is affiliated with the Children's Aid Society of Pennsylvania and through this source receives its share of state aid granted the parent affiliate. Eighty per cent of the children under care in Lebanon County are under the supervision of the Lebanon County Family and Children's Service.

Generally speaking, in this county, for a child to receive care outside its own home an order of the Juvenile Court is required. In a few instances the Commissioners do accept a child for care without a court order if the child is a full orphan or the parents can pay the full cost of care. Investigations are made for the court by the Family and Children's Service, Catholic Charities, or Lutheran Children's Bureau, if the known religious affiliation of the child's parents is Protestant, Catholic or Lutheran, respectively. The court on the same basis com-

mits the child to the care of one of the above-mentioned agencies.

The Family and Children's Service may place the child depending upon his or her individual needs in a paid boarding home, the Church Home and Orphanage, or other institution for care. As part of the case work process, the agency determines the amount of support expected from a parent or relative. If the parent or relative is unresponsive to this obligation, the situation is referred to the Probation Officer of the Juvenile Court for the formal establishment of a support order. The Family and Children's Service, however, remains responsible for the collection of such an order. The agency keeps in contact with parents and relative and adjusts support orders on the basis of current income. If support from parents is involved when a child is committed to the care of the Lutheran Children's Bureau of Philadelphia or the Catholic Charities of Harrisburg, it is the responsibility of the Probation Officer of the Juvenile Court to collect such support orders.

The Family and Children's Service exercises continuing supervision over the care of the children it places in paid boarding homes. This supervision includes an evaluation of the placement in terms of the child's needs. This agency requires quarterly reports from institutions in which it has placed children for care. The Lutheran Children's Bureau and the Catholic Charities are not required to report regularly to any public authority in Lebanon County as to the placement plan developed for the child and the problems surrounding his needs, in spite of the fact that his maintenance is being provided from public funds.

The policy-making body for the Family and Children's Service is a board of private citizens, one of whom is a Lebanon County Commissioner. By this means the County Commissioners maintain a certain measure of control over their agent, a private corporation, to which they make a special appropriation for administrative costs.

6. Carbon County—

Carbon County was affiliated with the Division of Rural Child Welfare of the state Department of Welfare from 1937 to 1943, when it withdrew from this affiliation. Since 1943, the placement of children in foster care has become a function of the Juvenile Court, which is now the sole authority for child placement in the county. The court, in carrying out this responsibility, utilizes the services of private individuals in the county and private institutions outside the county. No local, private child-caring agencies operate within the limits of Carbon County.

The court staff attempts to determine the needs of the children to be placed in order ascertain whether care in a paid boarding home or in an institution will best meet these needs. Most of the children are visited by one of the two staff members; the children in institutions outside the county do not receive as frequent staff supervision as that given children in foster homes located within the county.

The court staff is also responsible for the collection of support orders—comparatively few in number—placed by the court against parents and relatives. In Carbon County a deduction is made from the amount of the support order to meet the administrative cost of collecting the money, writing a check and mailing the check to the payee.

About one-fourth of the children under care in Carbon County have been placed with grandparents, brothers, sisters aunts and uncles with the county providing support. It would appear that many of these cases could be transferred to the care of the County Board of Assistance under the Aid to Dependent Children program.

7. Fulton County—

Fulton County is fairly typical of Pennsylvania counties without organized child welfare services.

In Fulton County, the Commissioners act as a placement agency. As of December, 1949, all the children placed by the Commissioners were in institutions outside the county. It appears that once a child is placed the interest of the county ceases. The case of a placed child is apparently not re-evaluated unless a relative of the child institutes action.

B. County Payments for Foster Care—

Table VII, page 58, shows payments for foster care in the seven selected counties during 1949, by type of care.

Examination of the table will show that in the seven selected counties, weekly payments for the care of children residing in paid boarding homes varied from \$4.62 in Indiana County for children over two years of age to \$12.60 for all children in Philadelphia. For the care of children in institutions, Allegheny County pays \$8.05 weekly, although the charge of the institution may be higher, while Carbon, Indiana, Lebanon and York counties pay the full charge set by the institution. In each of the seven counties, payments for the care of children, whether in boarding homes or institutions, were higher than the allowance per person for Aid to Dependent Children under the public assistance program, which ranged from \$5.35 weekly in Fulton County to \$6.98 weekly in Philadelphia.

Table VII

County Foster Care Allowances by Type of Care in Seven Selected Counties—1949

County	Weekly Allowance Per Child		Average Weekly Allowance Per Person Receiving Aid to Dependent Children†
	In Boarding Homes	In Institutions

* Clothing and medical care paid in addition.

† Cases requiring special care.

‡ Medical care paid in addition.

§ Institutional charge is met in these counties.

By law, the Department of Public Assistance is required to report at least annually to the Governor on the cost of living in the various counties. In its 1949 report, the department found that the minimum costs of food, clothing and incidentals for children under five years to children eighteen years of age ranged from \$3.96 to \$6.50 weekly. When a proportionate share of shelter and fuel costs is added to this, the total minimum cost ranges from \$5.85 to \$8.39 weekly. These figures do not take into consideration any reimbursement for the services that the boarding home parents render in assuming responsibility for the care of a child. Shown below are minimum weekly costs for food, clothing, incidentals, fuel, light and shelter for children, by age, in a four-person family.

Age of Child	Food	Clothing	Incidentals	Fuel & Light	Shelter	Total
Under 5 years	\$2.51	\$.93	\$.52	\$.76	\$1.13	\$5.85
5-11	3.42	1.34	.63	.76	1.13	7.28
12-18	4.19	1.57	.74	.76	1.13	8.39

C. Characteristic of Children Under Care Outside Their Own Homes in Seven Selected Counties of Pennsylvania

The characteristics of children under care outside their own homes—age, sex, race, length of time under care, status of parents, adoptability, etc.—have been ascertained for the seven sample counties.²⁷

1. Age of Children Under Care

In the seven counties in which child care practices have been reviewed, 75 per cent of the children under care whose maintenance is being paid in whole or in part from public funds are of school age. Table VIII, on the opposite page, shows the percentage distributions, by age, of children under care in the seven selected counties.

Examination of Table VIII shows that, of the seven counties surveyed, only Indiana, Lebanon and Philadelphia counties were maintaining children less than one year old.

In Lebanon County, 23.6 per cent of the total number of children under care were less than five years old. As regards children in this age group, the percentage in York County was 19.6 per cent; in Philadelphia, 19.5 per cent; in Indiana, 16.4 per cent; in Carbon, 9.5 per cent; and

²⁷ To gather the information relating to the characteristics of children under care, it has been necessary to secure the cooperation of public and private agencies in the seven counties. All agencies have cooperated, with the exception of the Catholic Children's Bureau in Philadelphia. Since this agency cares for almost half of the dependent and neglected children in Philadelphia whose maintenance is paid in whole or in part by the City or County of Philadelphia, the facts concerning Philadelphia's dependent and neglected children as set forth in this report may not be representative.

in Allegheny, 4.9 per cent. In Fulton County, all of the children under care were from 13 to 18 years old.

Table VIII

Percentage Distributions, by Age, of Children Under Care in selected Counties, as of December, 1949

* The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau of Philadelphia declined to furnish pertinent facts regarding children under its care.

2. Sex and Race of Children Under Care

Table IX, page 63, shows the percentage distributions, by sex and race, of children under care in the seven selected counties.

Examination of the table shows that, excluding Philadelphia, for which complete data are not available, the percentage of children of the white race under care ranges from 87.1 per cent of the total number of children under care in Allegheny County to 100 per cent in Carbon, Fulton and York counties. Except in Allegheny and Philadelphia, the metropolitan counties, this closely parallels the proportion of such children in the total child population in the counties.

As regards the sex of children under care, examination of the table shows that, except in Allegheny County where 57.5 percent of the children under care were girls, more boys than girls required care outside their own homes. Excluding Fulton County, the highest percentage of males in the total number of children under care—64.7 per cent—is shown for York County.

Table IX

Percentage Distributions, by Race and Sex, of Children Under Care in Selected Counties as of December, 1949

† Children up to eighteen years of age—estimated from 1940 Census data.

‡ Bureau of Census, U. S. Department of Commerce, 1940.

3. Legitimacy of Children Under Care

The percentage distributions of legitimate and illegitimate children under care in the seven selected counties are shown in Table X, below.

Table X

Percentage Distributions of Legitimate and Illegitimate Children Under Care in Selected Counties, as of December, 1949

Counties	Children Under Care*		Total Child Population†	
	%		%	
	% Legitimate	% Illegitimate	% Legitimate	% Illegitimate

Philadelphia‡	66.4	33.6	94.6	5.4
York	88.2	11.8	96.2	3.8

* From Joint State Government Commission Survey.

† Estimated from data from Bureau of Vital Statistics, Department of Health, Commonwealth of Pennsylvania, 1950, and Mortality Tables, Life Insurance Fact Book, Institute of Life Insurance, 1948, p. 82.

‡ The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau of Philadelphia declined to furnish pertinent facts regarding children under its care.

Examination of Table X shows that, excluding Philadelphia, for which complete data are not available, the number of illegitimate children under care as a per cent of the total number of children under care ranges from 10.8 per cent in Carbon County to 20.5 per cent in Indiana County.

4. Sources Referring Children to Care

The percentage distributions of children under care, by

type of referral, in the seven selected counties are shown in Table XI, on opposite page.

Table XI shows that about 38 per cent of the children under care in Allegheny County were referred to the court by private social agencies. In this county, when a child needs temporary care outside his own home, a private agency will assume responsibility for his care. However, if the situation develops into one requiring long-term care, the agency will petition the Juvenile Court to assume responsibility.

In Carbon County, which has no family service agency, about 60 per cent of the children under care were brought to the attention of the court by the police. In Fulton County, all children placed under care outside their own homes were referred to agencies through the Juvenile Court or County Commissioners. In Indiana and York counties, approximately 69 per cent and 61 per cent, respectively, of the children under care were referred to the agencies by individuals.

Of the children under care in Philadelphia for whom data were obtained, approximately 58 per cent were referred to the agencies by the Municipal Court.

It will be noted that, in the seven counties surveyed, the percentage of the children under care referred to the agencies by the county boards of assistance, ranged from zero in Fulton and Lebanon to 11.0 in Indiana County.

5. Agency Reasons for Accepting Children for Care

The percentage distributions of children accepted for care by agencies in the seven counties surveyed, by reason for acceptance, are shown in Table XII, on opposite page.

Inspection of the table shows that in four of the counties Allegheny, Carbon, Indiana and York—the greatest percentage of children accepted for care were accepted by virtue of the inability of parents or relatives to provide adequate care. The major reason for acceptance in the other three counties was a court commitment of a dependent or neglected child, which in Fulton County is the sole reason for a child's being placed under care.

* The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau of Philadelphia declined to furnish pertinent facts regarding children under its care.

6. Type of Care Received by Children

Table XIII, page 69, shows the percentage distributions, by type of care received, of children under care in the seven selected counties.

Table XIII shows that in four of the seven counties—Indiana, Lebanon, Philadelphia and York—the greatest percentage of children under care were in paid boarding homes. In the remaining three counties, a majority (in the

case of Fulton County, all) of the children under care were in institutions. It will be noted that in Carbon County, a comparatively high percentage—23 per cent—of the children were living with relatives. If Carbon County's procedures were revised to establish a closer working relationship with the County Board of Assistance, most of the children in this group probably could be transferred to state public assistance under the aid to dependent children program.

APPENDIX TO THE

Table XIII

Percentage Distributions, by Type of Care Received, of Children Under Care in Selected Counties, as of December, 1949

7. Length of Time Children Were Under Care

A study of the length of time children had been under care in the seven selected counties shows that this time range is from less than one year to more than sixteen years. The percentage distributions of children under

care in the selected counties, by length of time period children are under care, are shown in Table XIV, page 70.

Examination of the table shows that in three of the counties—Carbon, Fulton and Philadelphia—more children had been under care from 2 to 3.9 years for any other of the time-groups. Of Lebanon County's children under

Table XIV

care, 23.4 per cent had been under care from 4 to 5.9 years. It will be noted that, with the exception of York County, all of the counties show a majority of the children under care for two years or more. In York County, 49 per cent of the children had been under care less than one year.

8. Marital Status of Parents of Children Under Care

The percentage distributions of fathers of children under care in the selected counties, by marital status, are shown in Table XV, and of mothers in Table XVI.

Examination of Table XV shows that in all but one county—York—more than 50 per cent of the fathers of children under care were unmarried, separated, divorced, widowers or deceased.

Concerning the status of mothers of children under care in the seven selected counties, again in all but York County more than 50 per cent were unmarried, separated, divorced, widowed or deceased.

Table XV

Percentage Distributions of Fathers of Children Under Care in Selected Counties by Marital Status, as of December, 1949

APPENDIX TO THE

9. Condition of Parents of Children Under Care

Tables XVII and XVIII, pages 74 and 75, present percentage distributions, by conditions, of the fathers and mothers of children under care in the seven selected counties.

As regards the condition of fathers of children under care in the seven selected counties, examination of Table

XVII shows that the percentage of fathers whose condition was classified as other than "whereabouts known" ranges from 23.5 per cent in York County to 66.7 per cent in Fulton County.

As regards the condition of mothers of children under care, the percentage whose condition was classified as other than "whereabouts known" ranges from 17.6 per cent in York County to 58.1 per cent in Carbon County.

Table XVII

10. Financial Status of Parents of Children Under Care

The percentage distributions of mothers and fathers of children under care in the seven selected counties, by financial status, are shown in Tables XIX and XX, pages 77 and 78.

As regards the financial status of fathers of children under care, employed fathers partially supporting such children, voluntarily or by court order, and employed fathers not supporting such children constituted from 32.8 per cent of the total number of fathers of children under care in Philadelphia to 54 per cent in Carbon County.

Excluded is Fulton County, where none of the fathers of children under care was known to be employed. Fathers whose financial status was unknown vary from 31.1 per cent in Carbon County to 50 per cent in Fulton County.

Employed mothers partially supporting children under care, voluntarily or by court order, and employed mothers

not supporting such children constituted from 4.1 per cent of the total in Indiana County to 23.4 per cent in Philadelphia. With the exception of Fulton and Philadelphia counties, the largest group of mothers of children under care were unemployed or without known financial resources.

Table XIX

Percentage Distributions of Fathers of Children Under Care in Selected Counties by Financial Status, as of December, 1949

APPENDIX TO THE

11. Adoptability of Children Under Care

While public attention has centered around the problem of securing adoptive homes for children under care by public and private agencies, not all of the children under care are "adoptable." A child may be "unadoptable" because of a number of factors—the withholding of consent by parents or guardian, physical or mental condition of the child, his age, his behavior pattern, etc.

It should be remembered that data concerning the adoptability of children have been gathered from the various child-caring agencies in the the selected counties. These agencies use varying criteria for determining the adoptability of a child. The percentage distributions of children under care in the selected counties, by adoption status as determined by the child-caring agencies, are shown in Table XXI, page 80.

Table XXI shows that from approximately 35 per cent

of the children under care in Philadelphia to approximately 77 per cent in Indiana County are considered by the agencies to be unadoptable. The range excludes Fulton County, where no determination was made concerning adoptability of the children under care.

The percentage distributions of the unadoptable children under care in the selected counties, by reasons for which they are considered unadoptable, are shown in Table XXII, page 81.

As Table XXII indicates, the major reasons for a child's being considered unadoptable are: the refusal of parents or guardian to consent to adoption, the child's age—most adoptors seek infants or very young children—and the physical or mental condition of the child. From 65 per cent of the unadoptable children in Allegheny County to 100 per cent of such children in Carbon and Lebanon counties are considered unadoptable for these reasons.

Table XXI

Percentage Distributions of Children Under Care in Selected Counties, by Adoption Status as Determined by Agencies, as of December, 1949

*The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau of Philadelphia declined to furnish pertinent facts regarding children under its care.

The consent factor is discussed in Section VI, Adoption Placement, page 89.

The children considered unadoptable by reason of their age range from ten to eighteen years old.

12. Degrees of Interest Shown by Parents of Children Under Care

The interest of parents in children who are under care outside their own homes is difficult to measure. However, some measurement of the degree of interest may be made from an examination of the frequency of visits made by parents to children under care. The percentage distributions of parents of children under care, by number of visits, are shown in Tables XXIII and XXIV.

Table XXIII

Percentage Distributions of Fathers of Children Under Care in Selected Counties, by Frequency of Visits, as of December, 1949

Visits—Last Quarter of Calendar Year				
County	No Visits	1-3 Visits	3 or More Visits	Deceased
(1)	(2)	(3)	(4)	(5)

York	23.5	49.1	19.6	7.8

Source: Joint State Government Commission Survey.

* The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau declined to furnish pertinent facts regarding children under its care.

In all of the seven counties surveyed, half or more than half of the fathers of children under care paid no visits to their children during the last quarter of the calendar year 1949. As regards mothers of children under care, a comparable situation obtains in only three counties.

D. Number of Dependent and Neglected Children Under Care in Seven Selected Counties, and Public Expenditures for Their Care—

Table XXV, page 85, shows the number of dependent and neglected children under care in the seven selected counties, and details information concerning expenditures for the care of these children during 1949.

Examination of Table XXV indicates that, of the seven counties surveyed, Fulton County had the smallest number of children under care and expended the lowest total amount for the care of dependent and neglected children. However, it is interesting to note that county expenditures per child were highest in Fulton County.

Philadelphia had the highest number of children under care, expended the highest total amount for their care and expended the highest per capita amount for care of dependent and neglected children. Philadelphia ranked second in amount of expenditure per child.

Section VI

Adoption Placement

The placement of children for adoption is a phase of the larger problem of child placement which includes all children in need of care outside their own homes.

Adoption is the legal process which terminates the paternal rights of natural parents and establishes a person as the child and heir of adopted parents. In Pennsylvania, prior to 1855, adoptions were possible only by special acts of the General Assembly. In 1855, the General Assembly passed the first general statute permitting adoption by decree of court. Successive statutes broadened the field, and in 1925, the General Assembly repealed all prior acts relating to adoption and codified the law. This act has since been amended a number of times.²⁸

Adoption placement is not a Commonwealth responsibility, although permissive authority has been given the Orphans' Court (in Philadelphia, the Municipal Court) to investigate the parties concerned in adoption proceedings. In Pennsylvania, adoption placements are made by county institution districts, Juvenile Courts, private child-caring agencies and individuals. The placement standards of these groups vary widely.

The time involved in consummation of an adoption placement generally varies from a few months to several years, with a child sometimes passing through a number of foster homes in the process.

In 1949, the Children's Bureau of the Federal Security Agency formulated the following eight adoption placement precepts designed to protect the child, the natural parents and the adopting parents.²⁹

1. The termination of parental rights is as important as the establishment of new parental ties by adoption and should be as securely safeguarded.

2. Consent to adoption should be obtained from natural parents, or, if their parental rights have been legally relinquished or terminated, from a person or agency having legal responsibility for the child and the right to consent to adoption.

3. Placement for adoption should be made only by an agency authorized to make such placements by the state department of welfare.

4. Adoption proceedings should be in a court of record having jurisdiction over children's cases, in the home state of the petitioner for adoption, and preferably in the local community in which they live and where the child is properly before the court.

5. Court proceedings should be closed to the public, and the records, because of their confidential nature, should be protected.

6. In every proposed adoption of a child, the court should have the benefit of a study and recommendation made by the state department of welfare or its licensed agent.

7. A period of residence in the adoptive home, prefer-

²⁸ 1925, April 4, P. L. 127, as last amended, 1947, June 30, P. L. 1180.

²⁹ Essentials of Adoption Law and Procedure, (Federal Security Agency, Social Security Administration, Children's Bureau, [1949]).

ably for at least six months, should be required before hearing on the petition so that the suitability of the proposed adoption may be determined.

8. In the event that a final decree is not entered, provisions should be made for the removal of a child from a home found to be unsuitable, and for his care and guardianship after removal.

A. Termination of Parental Rights and Consent to Adoption—

All forty-eight states require the consent of certain parties before an adoption may be approved by court. Ordinarily, a child may not be adopted without the consent of his natural parents, or, in the case of illegitimacy, without the consent of his mother. Every state prescribes certain conditions under which parental consent is not required. Generally, consent is not required when parents (a) have abandoned or neglected the child; (b) have been deprived of the child's custody by a court of competent jurisdiction; (c) have voluntarily surrendered the child to an authorized child welfare agency; (d) are habitual drunkards; (e) cannot be found or are unknown; (f) have been deprived of civil rights or imprisoned for a felony; (g) are mentally incompetent.

In Pennsylvania, consent to adoption is necessary from: (a) the person to be adopted if he or she is over twelve years of age and of his spouse, if any; (b) the adopting parent's husband or wife, unless they adopt jointly; (c) the parents or surviving parent of the person to be adopted, or in the case of illegitimacy, the mother; and (d) the legal guardian if the person to be adopted has no parents living or whose consent is necessary.

Under Pennsylvania statutes, consent to an adoption is not required when a parent has been adjudged a person of unsound mind, an habitual drunkard, or has abandoned the child for a period of at least six months. Further, consent of parents if not required if the person to be adopted is eighteen or more years old, (1925, April 4, P. L. 127, as amended, 1947, June 30, P. L. 1180).

Table XXVI shows the number of children under care in the selected counties during 1949, whose parents would not consent to adoption.

*The facts shown for Philadelphia may not be representative since the Catholic Children's Bureau of Philadelphia declined to furnish pertinent facts concerning children under its care.

B. Adoption Placement by Authorized Agencies—

States, such as Pennsylvania, which do not restrict the placing of children for adoption to authorized agencies, permit any individual, agency or institution to place children for adoption. Investigation of the home is made only after petition for adoption is filed. Under these circumstances, the child frequently has been living in the home long enough to have become established and judges are reluctant to refuse to decree the adoption, even though the home may not be satisfactory.

State legislatures have sought to remedy this situation by enactment of three types of placement statutes which (1) outlaw independent placements, (2) require judicial or administrative approval before an independent placement may be made, and (3) authorize administrative investigation once a child has been placed independently.³⁰

Ten states—Alabama, Arizona, California, Montana, New York, North Dakota, South Dakota, Texas, Virginia and Wisconsin—provide that no person except a natural parent, guardian, relative or authorized agency may place a child in a home in contemplation of adoption. The exceptions made for natural parents and relatives open the door to all types of independent placements.

Eight states—Colorado, Georgia, Indiana, Iowa, Maine, New Jersey, Tennessee, and Utah—prohibit all independent placements, except when made with relatives. In two of these states—New Jersey and Utah—the attorney general has nullified the statute by ruling that the prohibition does not apply to natural parents.

Michigan, Missouri, Nebraska, and Ohio have sought to control independent placements by requiring approval of the welfare department or a court order before the child is placed in a home in contemplation of adoption. Except in Michigan, no provision is made for an investigation before the order is issued.

Maryland, Massachusetts, New Hampshire, and Rhode Island require that, when a child is placed independently for adoption purposes, either the person who places or the person who receives the child must notify the state welfare department. The department is given authority to investigate the case, and, if it finds the home unsuitable, may take the child into its custody. In Massachusetts, Maryland and New Hampshire the investigation is discretionary with the department. In Rhode Island, the investigation is mandatory.

The evidence seems to support the conclusion that a state cannot eliminate independent placements simply by outlawing them. The solution to the problem appears to lie in a requirement that all placements be made through authorized agencies, (see Appendix A).

Pennsylvania law does not require or authorize the state Department of Welfare to license, certify or approve agencies to place children for adoption—any individual, agency or institution, incorporated or unincorporated, may place children for adoption. The agencies placing children for adoption in Pennsylvania, which follow the same general pattern as agencies caring for children outside their own homes, are shown on Map IV. [Map not reprinted in this appendix. See original report, page 93.]

The types of agencies placing children for adoption, and the spheres of their operation shown on Map IV, may be

³⁰ "Moppets on the Market: The Problem of Unregulated Adoptions," *The Yale Law Journal*, LIX, 1950, pp. 715-736.

summarized as follows: fifteen counties have no adoption placement agencies, seventeen have public agencies, eight have private agencies acting in behalf of a public agency, two have private agencies, twenty-two have public and private agencies, one has a public agency and a private agency acting for a public agency, and two have private agencies and private agencies acting in behalf of public agencies.

With the possible exception of one agency in Allegheny County and one in Luzerne County, Pennsylvania has no agencies whose primary function is to place children for adoption. The adoption placement service offered by the agencies generally is incidental to other functions, such as family, child-care, maternity or children's home services. Some of the agencies become so immersed in their primary function that only limited attention is given to adoption placement.

In the seven counties surveyed, it appears that of the total number of adoptions effected in the counties, relatively few were the result of agency placement. Table XXVII, on the following pages, shows the number of adoptions which were the result of agency placements in the selected counties.

No uniform standards for the determination of fitness of the child or the prospective adopter are available. As regards children available for adoption, suitability may be determined by a consideration of such factors as intelligence level, appearance, age, and background of child and parents. Suitability of prospective adopters may be judged by such factors as residence, religion, health, age, economic condition, marital status, housing, family composition and race. These standards vary from agency to agency and from county to county. The variation in standards is illustrated in Appendix B, which lists the absolute standard and working standard for Catholic, Jew, non-sectarian and Protestant agencies in Pennsylvania.

C. Location and Jurisdiction of Court Handling Adoption Proceedings—

Since most adoptions concern minor children, the jurisdiction of adoption proceedings is often vested in a court accustomed to handling children's cases. However, in Utah, where the juvenile courts have had forty-five years' experience handling children's cases, adoption is under the jurisdiction of the district courts. In New York, adoptions are handled by the county court, surrogate's court and children's court, the latter having jurisdiction over an adoption proceeding only when the child is dependent, neglected or delinquent.

* Declined to furnish information.

† Failed to return survey forms.

About one-third of the states limit venue in adoption actions to the county or district in which the petitioner lives. Many states permit the action to be brought also in the county or district where the child resides. Some states provide that, when the child is in the custody of a child welfare agency, the proceedings may be brought where the agency is located.⁸¹

In sixty-six counties of Pennsylvania, the Orphans' Court has jurisdiction in adoption proceedings while the Juvenile Court has jurisdiction over dependent and neglected children up to the age of eighteen years. It is only in Philadelphia that a single court has jurisdiction over dependent and neglected children as well as adoption proceedings. Here the Municipal Court acts as the Juvenile Court and in addition, hears adoption petitions.

The Pennsylvania adoption statute provides that any adult may present a petition for adoption in the county in which he resides or, upon allowance from the court, in the county in which the person to be adopted is resident.

D. Restrictions on Hearings and Records—

Generally, adoption hearings are confidential and the records are not available to the public. In Pennsylvania, the adoption statute provides that the hearing on an adoption petition may be before the judge in chambers. The Pennsylvania law further provides that the adoption decree and all other papers pertaining to the case and the testimony, if written out, shall be kept in the files of the court as a permanent record and shall be withheld from inspection except upon an order of the court.

E. Recommendations to Court and Pre-Adoption Residence—

In recent years, a development in the law of adoption has been the requirement of a "social investigation" before the court may act on the petition. The investigation includes an inquiry into the child's family history, environment and physical and mental condition and into the suitability of prospective adoptors. However, six states—Colorado, Idaho, Mississippi, Oklahoma, South Carolina and Wyoming—make no provision for a social investigation of any sort. In six states—Maine, Maryland, Montana, Nebraska, Nevada and Pennsylvania—such an investigation may be made at the discretion of the court. Thirty-five states make a social investigation mandatory. Of the thirty-five states requiring investigation, about two-thirds place responsibility for making or arranging for the investigation on the state department of welfare, or require that it be made by an authorized public or private child-welfare agency. In the remaining states, the court may designate an officer of the court, an agency or any "suitable person" to make the investigation.

About one-fourth of the states provide that a child spend a trial period of six months in the prospective adoptive home, during which time the agency which made the original social investigation visits the child at intervals, reporting its determination at the end of the period.⁸²

Pennsylvania law provides that the court shall hear any testimony as to the facts set forth in the petition or necessary to inform the court as to the desirability of a proposed adoption and "may also make or cause to be made an investigation by some person or agency specifically

designated by the said court or judge to verify the statements in the petition and such other facts as will give the court full knowledge as to the desirability of the proposed adoption."⁸³

Pennsylvania law prohibits a decree of adoption unless the person to be adopted shall have lived with the petitioner for six months prior to the decree, except in instances where the child is related to the petitioner by blood or marriage. It is not required that the child live in the home of the petitioner prior to the hearing on the adoption petition, or that the child shall be under the supervision of the State Department of Welfare.

F. Provisions if Adoption Is Not Decreed—

The adoption statutes of several states make no provision for the disposition of the child if the adoption petition is denied. As a result, judges may often grant an adoption or allow the child to remain in the adoptive home although the court finds the placement undesirable.

Pennsylvania adoption law contained no provision for removal of a child or for his future custody in cases where an adoption petition was denied or withdrawn, until 1949, when the Orphans' Court Act was amended as follows: "The jurisdiction of the several orphans' courts, whether separate or otherwise, shall extend to and embrace . . . The determination of the custody of any minor in those cases where a proceeding for the adoption of such minor or a petition for the appointment of a guardian of the person of such minor is before the court, and for such purpose orphans' courts are hereby empowered to issue writs of habeas corpus directed to the person or persons having possession of such minor in the manner provided by law." (1949, May 2, P. L. 793.)

Section VII

Adoption Placement in Seven Selected Pennsylvania Counties

In the seven sample counties, an attempt has been made to ascertain the characteristics of all children placed for adoption, and the practices employed to facilitate adoption placement, see Appendices C and D.

However, some of the Orphans' Courts took the position that the confidential nature of the adoption records precluded their use for purposes of the survey. Under the circumstances, the survey was necessarily confined to adoption placements made by child-caring agencies and institutions. The data presented for Philadelphia and Allegheny Counties may not be representative since the Catholic Children's Bureau of Philadelphia and the Florence Crittenton Home in Pittsburgh declined to furnish facts regarding children under their care.

As regards the adoption placements made by all co-operating agencies, it should be noted that some of these agencies—particularly in Philadelphia and Allegheny counties—place children outside their respective counties. In the computations subsequently shown, all out-of-county adoption placements are disregarded.

A. Age of Children Adopted Where Adoption Placement Was Made by Child-Caring Agency or Institution

* The facts shown for Philadelphia and Allegheny Counties may not be representative since the Catholic Children's Bureau of Philadelphia and the Florence Crittenton Home in Pittsburgh declined to furnish pertinent facts regarding children under their care.

Inspection of Table XXVIII shows that, except in Carbon and Fulton counties, the majority of agency-placed children adopted during 1949 were from one to three years old, the percentage ranging from 46.4 per cent of the adopted children placed by child-caring agencies or institutions in Philadelphia County to 80 per cent in York County.

B. Sex and Race of Children Adopted in 1949 Where Adoption Placement Was Made by Child-Caring Agency or Institution

Table XXIX, page 104, shows the percentage distributions, by sex and race, of children adopted in the selected counties during 1949, where adoption placement was made by child-caring agencies or institutions.

Table XXIX shows that, except in Allegheny County, all of the children adopted in the selected counties during

1949, where adoption placement was made by a child-caring agency or institution, were white children. In Allegheny County, the percentage of children of all other races in the adoption group was 4.5 per cent.

It should be noted that three child-caring agencies in Philadelphia which care for children of other races than white placed no children whose adoption was consummated in the Municipal Court of Philadelphia during this year.

C. Legitimacy of Children Adopted in 1949 Where Adoption Placement Was Made by Child-Caring Agency or Institution

The percentage distributions of legitimate and illegitimate children adopted in the selected counties during 1949, where adoption placement was made by child-caring agencies or institutions, are shown in Table XXX, page 105.

* The facts shown for Philadelphia and Allegheny Counties may not be representative since the Catholic Children's Bureau of Philadelphia and the Florence Crittenton Home in Pittsburgh declined to furnish pertinent facts regarding children under their care.

Examination of Table XXX shows that from 44.4 per cent to 100 per cent of the children adopted in the selected

counties during 1949, where adoption placement was made by child-caring agencies and institutions, were illegitimate. In six of the seven counties, half or more than half were illegitimate. Reference to Table X, page 64, indicates that these percentages far exceed the percentages of illegitimate children in the number of children under care in the counties. Several factors may account for this difference: Illegitimate children may be more readily determined to be adoptable or, inasmuch as the study was concerned with those children supported in whole or in part from public funds, many of the adopted children placed by agencies may have been supported from other than public funds prior to adoption.

D. Sources Originally Referring Adopted Children for Agency Care

Table XXXI, page 107, shows the percentage distributions, by type of original referral, of children adopted in 1949 in the selected counties. Again, these distributions pertain only to those children who were placed in adoptive homes by child-caring agencies and institutions.

It will be noted, from inspection of Table XXXI, that in five of the seven counties, more than half of the children adopted in 1949 who were placed for adoption by child-caring agencies and institutions were originally placed under agency care by their parents. The exceptions are Fulton and Lebanon counties.

APPENDIX TO THE

E. Time Spans Between Original Placement and Consummation of Adoption

The length of time spent "under care" and the time element of adoption processes have been the subject of widespread discussion.³⁴ Table XXXII, page 108, shows the average length of time involved in determination of adoptability, placement for adoption, filing of adoption petition and final consummation of adoption in the se-

lected counties for children adopted from child-caring agencies and institutions during 1949.

Inspection of the table shows that the average time span between the date children were received into care and the date adoption was consummated ranged from one year, ten months in Lebanon County to seven years, eight months in Fulton County. The highest average time spans are shown for the intervals between the date children were received into care and the date they were determined to be adoptable and between the date of placement for adoption and the date of filing of the adoption petition. It will be

Table XXXII

Average Length of Time Involved in Determination of Adoptability, Placement for Adoption, Filing of Adoption Petition and Final Consummation of Adoption for Children Adopted in Selected Counties During 1949, Where Adoption Placement Was Made by Child-Caring Agencies or Institutions

Philadelphia ...	7,068	584	28†	4.8
York	217	71	5	7.0

Source: County Commissioners; Bureau of Vital Statistics, Department of Health, Commonwealth of Pennsylvania; and child-caring agencies and orphans' courts.

* Does not include children placed by Florence Crittenton Home of Pittsburgh.

† Does not include children placed by Catholic Children's Bureau of Philadelphia.

agency-placed adoptions and the number of agency-placed adoptions as a fraction of the total number of adoptions, for the selected counties.

Examinations of the table shows that, in all counties, the number of children adopted was considerably smaller than the number of children under care and that the number of adoptions in which placement for adoption was made by child-caring agencies and institutions was but a fraction of the total number of adoptions.

APPENDICES

APPENDIX A

Proposed Plan For A State-Wide Adoption Placement Service In Pennsylvania

1. The Commonwealth of Pennsylvania shall provide, by appropriate legislation, for the formulation, administration, and financing of a State-wide Protective Adoption Placement Program.
2. The Plan shall be formulated and administered by the Department of Welfare.
3. The Plan shall include the following specific provisions:
 - a. A State-wide Adoption Placement Service shall be provided.
 - b. All administrators and employees of the Commonwealth, engaged in administering the Plan, shall be fully, covered by a Merit System which shall regulate their employment, promotion, wages or salaries, and dismissal.
 - c. The Department of Welfare shall formulate standards, rules, and regulations for agencies and in-

stitutions which desire to engage in any aspect of the placement of children for adoption and shall license, annually, the agencies and institutions which meet these standards. The adoption placement services of licensed agencies and institutions shall be integrated with the State Adoption Placement Service.

- d. All costs incident to the administration of the State-wide Adoption Placement Program by the Department of Welfare shall be borne by the Commonwealth, excepting those costs incident to the maintenance of children in foster homes or institutions prior to and while in the course of adoptive placement by the Department of Welfare, which costs shall be borne by the County Institution District of the child's settlement, and excepting those costs of child placement for adoption by licensed agencies and institutions, including maintenance prior to placement for adoption, which costs shall be borne by the agency or institution under whose jurisdiction the child has come for the purpose of being placed for adoption.
4. All persons will be prohibited from taking a child for the purpose of adoption from any individual, including the child's own parents, or any unlicensed agency or institution, excepting as otherwise provided.
5. All persons, including a child's own parents and unlicensed agencies or institutions, shall be prohibited from placing or participating in the placement of any child, with any person for the purpose of adoption by the taker, excepting as otherwise provided.
6. A person or persons related to an adoptable child by consanguinity or affinity as grandparent, uncle, aunt, brother, or sister may take it for the purpose of adoption if both of its parents are deceased, if both parents or its surviving parent has abandoned it, or if it has been placed by its parents or a parent for that purpose, and the parents or parent of a child may place it with said relative for the purpose of adoption provided that, within one month after placement, application shall be made by the taker to the Department of Welfare for the issuance of a Preliminary Certificate of Approved Placement, which the Department of Welfare shall issue or refuse to issue if, after investigation, it shall determine that the adoption of the child by the applicant would or would not be for the child's best interests.

If the Department of Welfare shall determine that the adoption of the child by the related taker would not be for the child's best interests, it shall remove the child and place it for adoption.

Any relative or parent, aggrieved by the refusal of the Department of Welfare to issue a Preliminary Certificate of Approved Placement, may appeal to the Juvenile Court of the child's settlement and the Court, if it determines that the placement will be for the best interests of the child, shall direct the Department of Welfare to issue a Preliminary Certificate of Approved Placement.

If the Court determines that the placement will not be for the best interests of the child, it shall order the surrender of the child to the Department of Welfare for the purpose of adoption placement.

7. The parents, surviving parent, or non-abandoning parent of a legitimate child, or the mother of an illegitimate child, if it is in their, his, or her custody, being desirous of placing said child for the purpose of adoption with designated persons not related to said child by consanguinity or affinity as grandparent, uncle, aunt, brother, or sister may request the Department of Welfare to approve the proposed placement and issue a Preliminary Certificate of Approved Placement or, if the child is in the custody of the Department of Welfare or a licensed agency or institution for the purpose of being placed for adoption and has not been placed, said parents or parent may request the Department of Welfare or licensed agency or institution having custody of the child to place it with designated persons not related to it in the degrees specified above and issue a Preliminary Certificate of Approved Placement, and the Department of Welfare or licensed agency or institution shall, after investigation of the proposed adoptive placement, reject or approve the request, whichever it deems shall be for the best interests of the child.
Any parent, aggrieved by the refusal of the Department of Welfare or a licensed agency or institution to comply with such request, may appeal to the Juvenile Court of the child's settlement within thirty days after notice of the refusal of its request, and the Court, if it deems that placement with the designated persons for the purpose of adoption will be for the best interests of the child, shall approve the placement of the child by the parents and direct the Department of Welfare to issue a Preliminary Certificate of Approved Placement, or direct the Department of Welfare or licensed agency or institution having custody of the child for the purpose of adoption placement to place it with the designated persons and to issue a Preliminary Certificate of Approved Placement.
8. It is intended, by provisions 6 and 7, that the choice by natural parents of designated persons to be the adoptive parents of their children, in the manner and under the circumstances set forth therein, shall be given first consideration by the Department of Welfare or any licensed agency or institution requested to approved the placement of a child by its parents, or to place a child with persons designated by its parents, and that no other persons shall be considered as potential adoptive parents unless and until the Department of Welfare or said licensed agency or institution has first deemed the persons, designated by the natural parents, to be inadequate adoptive parents.
9. Any person or persons who, contrary to the prohibitions established by law against the placing or taking of a child for the purpose of adoption and without intent to evade them, have taken a child for the purpose of adoption shall, immediately on learning of the illegality of the child's placement, make application to the Department of Welfare for the issuance of a Preliminary Certificate of Approved Placement. Whereupon the Department of Welfare, if satisfied that the child was taken by the applicants for the purpose of adoption without intent to evade the prohibitions and that the best interests of the child will be served by the adoption of the child by the appli-

cants, shall issue a Preliminary Certificate of Approved Placement, or if it is determined that the child was taken with intent to evade the prohibitions or that the best interests of the child will not be served by adoption by the applicants, the Department of Welfare shall refuse to issue the Preliminary Certificate of Approved Placement, remove the child from the custody of the applicants and place it for adoption.

The applicants may appeal to the Juvenile Court of the child's settlement from the refusal of the Department of Welfare to issue a Preliminary Certificate of Approved Placement, within thirty days after notice of the refusal to the applicants. On appeal, after hearing, the Juvenile Court shall preliminarily determine if the child was taken for the purpose of adoption with intent to evade the prohibitions established by law. If the Court determines this to be so, it shall refuse to direct the issuance of a Preliminary Certificate of Approved Placement and shall order the child to be turned over to the Department of Welfare. If the Court determines to the contrary, it shall then determine if the adoption of the child by the applicants will be for its best interests and, if it so determines, shall direct the Department of Welfare to issue a Certificate of Approved Placement or, if it does not so determine, order the child to be returned to the Department of Welfare and placed for adoption.

10. Any person, either parent, relative, non-relative, or employee or agent of any agency or institution, who takes, places, or participates in any manner in the taking or placing of a child for the purpose of adoption contrary to the prohibitions established by law against the placing or taking of a child for the purpose of adoption, shall be guilty of a crime and shall be punished by a fine and imprisonment.
11. The Department of Welfare or any licensed agency or institution having custody of an adoptable child shall, prior to placement of the child for that purpose, issue to the taker a preliminary Certificate of Approved Placement.
12. In every case in which the Department of Welfare or a licensed agency or institution has issued a Preliminary Certificate of Approved Placement, it shall study the quality of the placement during a period of six months following its issuance and, at the end of that period, shall determine if the proposed adoption of the child by the takers will be for the best interests of the child. If it approves of the adoption of the child by the takers, it shall endorse its final approval on the Preliminary Certificate of Approved Placement. If it disapproves, it shall notify the takers, cancel the Preliminary Certificate of Approved Placement, remove the child from the custody of the takers, and place it for adoption.

The person who had taken the child for adoption, or the parent who had placed the child, or at whose request the child had been placed for adoption with the takers by the Department of Welfare or a licensed agency or institution, may appeal to the Juvenile Court of the child's settlement from the refusal of the Department of Welfare or a licensed agency or institution to approve, finally, the proposed adoption and the cancellation of the Preliminary Certificate of

Approved Placement, within thirty days after the date of the notice of the cancellation to the takers.

The Juvenile Court shall, after full hearing, make such determination of this appeal as, in its opinion, will be for the best interests of the child. If the appeal is sustained, it shall direct the Department of Welfare, or licensed agency or institution to whom the request had been made, to endorse its final approval on the Preliminary Certificate of Approval or, if not sustained, shall order the return of the child to the Department of Welfare or the licensed agency or institution which had placed the child, or to the parent.

13. A stepparent, having had as a member of his or her household, for a period of six months, a stepchild whom he or she wishes to adopt shall, before presenting his or her petition to a Court for the adoption of said stepchild, obtain from the Department of Welfare a Certificate of Approved Placement. Appeal from the refusal of the Department of Welfare to issue a Certificate of Approved Placement, within thirty days after notice of said refusal, shall be to the Juvenile Court of residence of the stepparent. On appeal, after full hearing, the Juvenile Court shall determine if the adoption of the child by the stepparent will be for the best interests of the child. If it approves of the adoption of the child by the stepparent, it shall direct the Department of Welfare to issue a Certificate of Approved Placement. If it disapproves of the adoption of the child by the stepparent, it shall sustain the ruling of the Department of Welfare.
14. The parents, surviving parent, or non-abandoning parent of a legitimate child, or the mother of an illegitimate child, may petition the Juvenile Court of their, his, or her residence setting forth that they, he, or she desires to enter into an agreement with the Department of Welfare or a licensed agency or institution, a copy of which agreement is attached to the petition, whereby the custody of the child is surrendered to the Department of Welfare or a licensed agency or institution for the purpose of the child's being placed for adoption, and that the Department of Welfare or the licensed agency or institution to which the child is surrendered shall have authority to place the said child for the purpose of adoption and to consent to the adoption of the said child on behalf of and in place of the surrendering parents or parent.

The Court, after full hearing, if satisfied that the transfer of custody for the purpose of adoption placement and the appointment of the Department of Welfare or a licensed agency or institution as custodian for that purpose is for the best interests of the child, may approve the agreement by appropriate order, certified thereon.

The agreement may be rescinded thereafter, and the parents' or parent's rights to the custody of the child may be reinstated when the rescission is mutually agreed to by the parties to the original agreement and approved by the Court, or by the Court if the parties do not mutually agree, provided however, that the agreement may not be rescinded after the child had

been placed for adoption, excepting by mutual agreement of the parents with whom the child has been placed for adoption, the agency or institution which had placed the child and the Juvenile Court, a judge of which had approved the original agreement.

15. The Department of Welfare or any licensed agency or institution having a child in its custody, which it has placed or wishes to place for adoption, may present its petition to the Juvenile Court of its domicile, setting forth that the child has been abandoned by one or both of its parents and that it is for the best interests of the child that the abandonment by the parents or parent be judicially determined, and requesting that the child's adoptable status be legally established.

The Court, after full hearing and by appropriate order, may establish the abandonment of the child and appoint the petitioner to consent to the proposed adoption in the place and instead of the abandoning parents or parent whose abandonment of the child has been judicially determined.

Any parent, whose abandonment of a child has been judicially determined, may petition the Juvenile Court which made the original determination, prior to the placement of the child for adoption but not thereafter, to reinstate its rights to custody of the child and to revoke the judicial finding of abandonment. The Court, if it deems the best interests of the child will be thus served, may revoke its previous order.

16. An appeal to the Juvenile Court, provided for under provisions 6, 7, 9, 12, 13, and 15, shall be a supersedeas.
17. Every petition in adoption must contain or have attached to it at the time of its presentation, a Certificate of Approved Placement issued by the Department of Welfare or a licensed agency or institution.

No court shall entertain a petition in adoption or make a decree in adoption unless a Certificate of Approved Placement, which complies fully with the provisions of the law regulating the placement of children for adoption, is attached to the petition in adoption.

This requirement, however, shall not delimit the authority of the court, in its consideration of an adoption petition, to refuse to decree the adoption of a child when the court determines that its adoption, by the petitioners, will not be for the best interests of the child, and to determine the custody of the child when a decree of adoption has been refused.

The authority of Juvenile Courts of the counties of the Commonwealth to place children for adoption as now provided by law shall not be impaired, provided, however, that the provisions hereinbefore set forth regulating the placement of children for adoption by licensed agencies and institutions and the Department of Welfare shall apply to Juvenile Courts, except that when a Juvenile Court shall act in the capacity of an adoption placement agency, appeal shall be to the Superior Court of Pennsylvania, and provided further that a Juvenile Court may refer a child within its jurisdiction to a licensed agency or institution or the Department of Welfare of Pennsylvania for adoption placement.

Appendix B

STANDARDS FOR ADOPTORS BY CERTAIN AGENCIES IN PENNSYLVANIA MAKING PLACEMENTS FOR ADOPTION—1950

Agency	Absolute Standard	Working Standard
RESIDENCE		
Catholic Agency	Prospective adoptors must live in Catholic diocese which includes ten counties.	Same as absolute standard.
Jewish Agency	Prospective adoptors must live within 100 mile radius of agency.	Same as absolute standard.
Non-Sectarian Agency	Prospective adoptors must live in county or one of nine surrounding counties.	Same as absolute standard.
Protestant Agency	Prospective adoptors must live in county or adjoining state.	Same as absolute standard.
RELIGION		
Catholic	Both prospective adoptors must be of Catholic faith in "good standing." A letter so stating from a priest is necessary.	Same as absolute standard.
Jewish	Both prospective adoptors must be of Jewish faith. A letter so stating from a rabbi is necessary.	Same as absolute standard.
Non-Sectarian	None.	Do not accept prospective adoptors who are either Jewish or Catholic.
Protestant	Both prospective adoptors must be in "good standing" in the church. A letter so stating from a pastor is necessary	Same as absolute standard.
ECONOMIC CONDITION		
Catholic	None.	Have no minimum income figure below which will not give prospective adoptors consideration. Bank account and insurance are considered.
Jewish	Minimum income of \$3,500 in adoption family if one child being adopted; \$4,000 if two children being adopted.	Accept less than \$3,500 if the situation points to an increase to \$3,500 by the time the child reaches two years of age.
Non-Sectarian	Never accept prospective adoptors whose income is below \$2,400. If the adopting father is earning only \$2,400, he must have prospects for advancement. If the occupation of the adopting father is a farmer, a lower figure will be considered.	Little if any deviation is permitted.
Protestant	None.	Generally an income of \$40 to \$50 per week is looked for. Other factors as bank account, insurance, and property ownership are also considered.
MARITAL STATUS		
Catholic	None.	None.
Jewish	None.	No minimum number of years for adoptors to be married is required. However, the agency would question adoptors who have been married less than one year unless sterility can be established.
Non-Sectarian	Require prospective adoptors to be married at least three years.	Little deviation.
Protestant	None.	Consider length of marriage if prospective adoptors are very young, i.e. under twenty years of age.

Appendix B—Continued

STANDARDS FOR ADOPTORS BY CERTAIN AGENCIES IN PENNSYLVANIA MAKING PLACEMENTS FOR ADOPTION—1950

Agency	Absolute Standard	Working Standard
HEALTH		
Catholic	A physician's certificate as to the general health of the prospective adoptors is necessary. No specific tests are required.	Same as absolute standard; do not accept blind adoptors and question crippled ones.
Jewish	Prospective adoptors must submit written medical verification of sterility. A full physical examination, Wassermann test, and a physician's statement concerning general health is also necessary.	Same as absolute standard, except blind adoptors are not accepted and crippled adoptors are questioned.
Non-Sectarian	A physician's opinion as to the physical and mental condition of the prospective adoptors is necessary. No special tests are required.	Same as absolute standard. Blind and crippled adoptors are accepted.
Protestant	A physician's certificate of the general good health of the prospective adoptors is necessary. A Wasserman test is also required.	Same. Blind and crippled adoptors are accepted.
AGE		
Catholic	None.	Seldom place children with adoptors both of whom are over 40 years of age.
Jewish	For infant adoptions: adopting mother: 35 years; adopting father: 42 years.	Adoptors' ages may vary one year. There is a flexible age limit for adoptors adopting children over 2 years of age.
Non-Sectarian	For infant adoptions: adopting mother: 38 years; adopting father: 43 years. Both adoptors of children over 2 years should not be over 50 years.	A small age deviation of 2 to 3 years is permitted for children of all ages.
Protestant	None.	Try to keep the age limit of adoptors adopting infants under 40 years.
HOUSING		
Catholic	Never accept prospective adoptors whose place of abode is only small apartment, unless shown that they are planning to move. Separate room for child is necessary, if not a baby.	Living with inlaws is satisfactory, but the "relationship is considered."
Jewish	None, except if the prospective adoptors living with relatives are living in a home which they own and the relatives are living with them.	The house or apartment should be large enough to give the child his own room after infancy.
Non-Sectarian	Must have a separate room for the child.	Exception is made only if the prospective adoptors can show they are moving to larger quarters or the prospective adoptee is a mere baby.
Protestant	None.	A separate room for the child is necessary only if the child is not a baby.
FAMILY COMPOSITION		
Catholic	None.	None.
Jewish	Do not place more than two children for adoption with any one adopting family.	Accept prospective adoptors if they have a child of their own, but not if they have previously adopted a child from a private source.
Non-Sectarian	Accept prospective adoptors if they have one or two children of their own only if they can show they cannot have others and if children have been adopted, they were received through a social agency.	Same as absolute standard.
Protestant	None.	None.

Appendix B—Continued

STANDARDS FOR ADOPTORS BY CERTAIN AGENCIES IN PENNSYLVANIA MAKING PLACEMENTS FOR ADOPTION—1950

Agency	Absolute Standard	Working Standard
RACE		
Catholic	None.	None.
Jewish	Will only consider prospective adoptors who are Hebrews.	Same as absolute standard.
Non-Sectarian	None.	Try to "match the color" of adoptors and children.
Protestant	None.	None.
OTHER		
Catholic	Require of prospective adoptors letters of reference from parish priest and three non-relatives concerning social and marital adjustment.	Same as absolute standard.
Jewish	Require of prospective adoptors a letter of reference from a rabbi.	Same as absolute standard.
Non-Sectarian	None.	None.
Protestant	Require of prospective adoptors letters of reference from pastor and three non-relatives concerning social and marital adjustments.	Same as absolute standard.

Appendix C

PROCEDURES RE SURVEY OF CHILD PLACEMENT AND ADOPTION IN SEVEN SELECTED PENNSYLVANIA COUNTIES

To obtain a representative picture of the placement practices actually in use in Pennsylvania, and of the characteristics of the children being placed, whether for care or for adoption, the Commission conducted a survey of seven Pennsylvania counties. The counties were chosen to represent the various methods of administration in current use for the care of dependent and neglected children as well as the various economic activities within the state. Allegheny and Philadelphia were selected to represent metropolitan Pennsylvania, Fulton and Lebanon—rural Pennsylvania, York—a combination of urban and rural, Carbon—an anthracite producing county, and Indiana—a bituminous producing county.

The relatively small number of children under care in Carbon and Fulton counties permitted the use of information for all of the children in those counties. In the other counties, the pertinent factors relating to children under care were ascertained and analyzed on the basis of a random sample.

As regards adoption, the sample method was not used but the information concerning all children in the selected counties was considered.

Tables VII through XXIV and Tables XXVI through XXXII present data on child placement and adoption obtained from the Joint State Government Commission Survey in the selected counties.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the
Commonwealth of Pennsylvania:

In Accordance with the directive of the General As-
sembly as contained in Senate Resolution Serial No. 40

* Appointed February 6, 1951.

† Appointed to fill the vacancy created by the death of Frederick
L. Homsher.

‡ Term expired.

§ Deceased.

¶ Resigned.

|| Appointed to fill the vacancy created by the resignation of
Homer S. Brown.

and House Concurrent Resolution No. 74, Session of 1949, there is presented herewith a report dealing with the administration and financing of public assistance in Pennsylvania.

In accordance with the Act of 1943, March 8, P. L. 13, Section 1, the Commission created a subcommittee to aid in the study of Pennsylvania's public assistance programs. Cognizant of the complexities of the problem, the subcommittee in turn appointed a steering committee to determine and direct the major lines of investigation. On behalf of the Commission, the cooperation of the subcommittee and its steering committee is gratefully acknowledged.

It was considered that Pennsylvania's blind pension program, which is administered by the Department of Public Assistance, presents problems not common to the three assistance programs dealt with in this report. Hence, the results of a study of the blind pension program have been embodied in a separate report.

The field investigation of a random sample of assistance cases, drawn by the Commission staff, was made by the Pennsylvania State Police. The Commission appreciates the splendid cooperation of the Pennsylvania State Police.

BAKER ROYER, Chairman.

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

Table F-1: Number of Payment Errors and Average Amounts Involved in Payment Errors, by Program and by Type of Major Error

SUMMARY OF FINDINGS

I. During the biennium 1949-51, total public assistance expenditures from state funds in Pennsylvania will approximate \$198,000,000. Estimated expenditures of the Department of Public Assistance represent 27 per cent of the budgeted General Fund expenditures of the Commonwealth for the 1949-51 biennium.

II. Public assistance expenditures in Pennsylvania are made on the basis of standards formulated by the State Board of Public Assistance, which consists of the Auditor General, the State Treasurer and seven citizens appointed by the Governor with the advice and consent of two thirds of all the members of the Senate.

III. Per inhabitant expenditures for public assistance grants, assistance recipient rates and average payments per recipient for each of the three assistance programs in Pennsylvania and the United States are summarized below.

	Pennsylvania	United States
Per Inhabitant Expenditures for Public Assistance Grants—1949		
General Assistance	\$2.61	\$1.86
Old Age Assistance	4.06	9.15
Aid to Dependent Children	5.01	3.14

	Penn- sylvania	United States
Assistance Recipient Rates—December, 1949		
General Assistance	11.2	9.8
(Recipients per 1,000 population)		
Old Age Assistance	115	241
(Recipients per 1,000 population 65 years of age and over)		
Aid to Dependent Children	46	33
(Recipients per 1,000 population 18 years of age)		
Average Payments per Recipient— December, 1949		
General Assistance	\$25.60	\$19.38
Old Age Assistance	39.80	44.76
Aid to Dependent Children	35.65	29.23
(Total expenditures divided by number of children receiving aid)		

IV. Contrary to the practice in all but two other states, local governments in Pennsylvania do not participate in the financing of any of the assistance programs.

V. During recent years, general assistance recipients represented approximately one half of one per cent of the total population of the Commonwealth. Approximately 4 per cent of the recipients were partially or fully employed; about one per cent had full-time employment. Fully employed assistance recipients earned approximately \$125 per month.

VI. Over the period 1938 to 1950, public assistance grants have increased more than has the cost of living. For a four-person family receiving general assistance or aid to dependent children, the purchasing power of the 1950 grant is 43 per cent greater than the purchasing power of the 1938 grant. In the case of the grant to a single old age assistance recipient, the comparable percentage is 12.

VII. Individuals living in assistance families of six or more members have no incentive to seek gainful employment. Again, these recipients have little opportunity to practice and improve their skills because counties do not take advantage of work relief programs authorized by law. In 1950, only 3 per cent of the 15,700 employable assistance recipients were employed on work relief projects.

VIII. It is estimated that during the biennium 1949-51 net assistance overpayments to recipients amounted to \$16,000,000. Of this amount, \$10,000,000 is financed from Commonwealth taxes.

INTRODUCTION

The public assistance report is divided into three parts. Part I briefly outlines the growth of the problems of indigency in Pennsylvania, describes the administrative machinery which has been developed to cope with the problems, details the dollar cost imposed upon the community by indigency and the financing of the cost, and presents interstate comparisons of the levels and methods of financing of public assistance expenditures.

Part II presents facts and analyses which have a direct bearing upon future policy.

Specifically, Part II presents:

1. The relationship between changes in assistance grants and changes in the cost of living.

2. The characteristics of the men and women who constitute the general assistance case load.

3. The relationship between assistance grants and private employment opportunities, as well as work relief programs.

4. Relationships between public assistance expenditures and local participation in the financing of assistance.

5. Effects, in terms of local tax rates, of alternative plans for local financial participation.

Part III outlines the educational and experience background of the staff charged with the administration of public assistance and attempts an over-all appraisal of the operating efficiency of the agencies concerned with the administration of public assistance in the Commonwealth.

PART I

Section I

THE BACKGROUND

Prior to 1932, aid to indigent citizens was primarily a local responsibility. The most common unit for the administration of poor relief was the county, operating through poor boards. However, in some areas, townships, boroughs and cities, singly or in combination, organized administrative units.

Except for relatively small Commonwealth contributions made available under the Mothers' Assistance Act of 1913¹, poor relief was financed by local property taxes. In 1929, total local tax collections and appropriations for the relief of the indigent amounted to \$8,215,718².

The Woodward Act of 1932³, which established the State Emergency Relief Board charged with aiding those who were indigent in consequence of lack of employment, shifted a large measure of administrative and financial responsibility from local units of government to the state. The State Emergency Relief Board appointed county relief boards, usually consisting of seven members, which administered the program on the local level.

An appropriation of \$12,000,000⁴ was made to the State Emergency Relief Board for the period September, 1932, through March, 1933, to be allocated among the counties on the basis of an index of need. In 1932, total local poor tax collections and appropriations amounted to \$11,810,270⁵.

In 1934, two groups—the aged and the blind—were removed from the jurisdiction of the poor boards⁶. Responsibility for the administration of the programs for the blind and the aged was vested in the trustees of the Mothers' Assistance program, but aid to the blind was financed exclusively by the Commonwealth⁷.

In 1936, cash unemployment relief was substituted for relief in kind throughout the Commonwealth.

The era of local relief financing and local relief administration ended in 1937 with the passage of the Public Assistance Law⁸. At that time, the state Department of Pub-

⁸ 1937 June 24, P. L. 2051.

lice Assistance and the State Board of Public Assistance were established⁹, and the State Emergency Relief Board, county poor boards and boards of trustees of the Mothers' Assistance Fund were abolished.

Currently, the Department of Public Assistance, under standards formulated by the State Board of Public Assistance, administers the following five programs designed to aid economically or physically handicapped citizens:

1. old age assistance;
2. aid to dependent children;
3. aid to the permanently and totally disabled¹⁰;
4. general assistance;
5. blind pensions¹¹.

The federal government participates in the financing of the first three programs; general assistance and blind pensions are financed exclusively by the Commonwealth.

Section II

THE ADMINISTRATION OF PUBLIC ASSISTANCE PROGRAMS

A. The State Board of Public Assistance—

All assistance programs are administered by reference to policies and standards established by the State Board of Public Assistance. The Board consists of the Auditor General, the State Treasurer, and seven other citizens appointed by the Governor with the advice and consent of two-thirds of all the members of the Senate, for overlapping six-year terms. The statutory powers and duties of the board are:

(1) "To approve or disapprove and adopt rules, regulations, and standards, consistent with law, recommended by the Department of Public Assistance and local boards, as to eligibility for assistance and as to its nature and extent."

(2) "To establish for the department and local boards rules and regulations concerning the administration of this act as provided by law."

(3) "To study the work of the Department of Public Assistance and, from time to time, to recommend to the Governor changes in the administrative policy or in the law."¹²

The policies formulated by the State Board are carried out by the Department of Public Assistance through county boards of assistance.

B. The Department of Public Assistance—

The principal statutory duties of the Department of Public Assistance are:

(1) "To allocate to the several assistance programs funds with which to provide assistance and funds for administrative expenses."

(2) "To establish, with the approval of the State Board of Public Assistance, rules, regulations and standards, consistent with law, as to eligibility for assistance and as to its nature and extent."

(3) "To exercise general supervision of the local boards, and to establish for such boards rules, regulations and standards as to accounting and as to forms,

records and reports so as to effect reasonable uniformity."¹³

The organization of the Department and its relationship with other agencies are shown in Chart I.

C. County Boards of Assistance—

The public assistance law provides for a county board of assistance in each county, composed of men and women engaged or interested in business, social welfare, labor, industry, education and public administration. Boards in counties of the first and second class are composed of eleven members; in other counties, of seven members. The county boards are appointed by the Governor with the advice and consent of two-thirds of all members of the Senate for overlapping terms of three years. No member of a board may serve for more than two consecutive terms. Employees are appointed by the boards from civil service lists prepared by the State Civil Service Commission.

Among the specific responsibilities delegated to the county boards are:

(1) "To administer public assistance in the county and determine the eligibility of applicants in accordance with law and the general principles and policies determined by the State Board of Public Assistance."

(2) "To take measures to promote the welfare and self-dependence of individuals and families eligible for assistance."

(3) "To hear and determine appeals from actions of its employees affecting the rights of those applying for or receiving assistance."

(4) "To make recommendations to the Department of Public Assistance as to rules, regulations, and standards as to eligibility for assistance, and as to its nature and extent."

(5) "To study report and interpret its policies, problems and work, to the Department of Public Assistance, and to the public."¹⁴

D. The Auditor General—

In addition to participating in the formulation of assistance policies as a member of the State Board, the Auditor General makes so-called "eligibility audits" of selected assistance cases. However, the Auditor General does not have authority to remove assistance recipients from the rolls. Under a regulation approved by the Attorney General, the Department of Public Assistance is the sole judge of the eligibility of a recipient. The regulation is justified by reference to the Federal Social Security Act, which requires that a single state agency administer the assistance programs—old age assistance, aid to dependent children, and aid to the permanently and totally disabled—partially financed by the Federal Government.

E. The Operation of Assistance—

Aside from provisions which apply only to specific assistance programs, eligibility for public assistance is dependent upon two factors: residence and need.¹⁵ A person establishes residence in Pennsylvania for purposes of assistance if he resides in Pennsylvania for at least one year or if he was last a resident of a state with which Pennsylvania has a reciprocal agreement. Certain ex-

¹⁵ The eligibility conditions for public assistance programs in Pennsylvania are reproduced in Appendix A.

CHART I
ORGANIZATION OF THE DEPARTMENT OF PUBLIC ASSISTANCE

ceptions to this regulation occur. If a recipient leaves Pennsylvania for purposes of employment and subsequently returns to Pennsylvania, he is deemed not to have lost Pennsylvania residence and is immediately eligible for assistance if other conditions are met.

The determination of need is summarized in the following quotation from departmental regulations:

"Need" is defined as a condition in which a person's income and other available resources are less than the sum of allowances the Department has set up to meet defined minimum living requirements.

"In order to determine, or re-determine, whether an individual is in need, the Department considers the following factors in accordance with the specific policies and procedures which govern them:

(a) Those living costs which it recognizes by allowances for specified items of living requirements.

(b) Income and other resources available to the individual. . . .

"To all persons who are found to be in need and who meet all other conditions of eligibility for assistance, the Department grants assistance."¹⁸

The specified items of living requirements established by the department consist of allowances for food, clothing, incidentals, and shelter maintenance and, in addition, special allowances for transportation, medical supplies, special diets, and other items applicable to specific cases. Schedules of amounts for food, clothing and incidentals, based upon the number of persons living in a household, are uniform throughout the state. The current schedules for food, clothing and incidentals are reproduced in Table I.

¹⁸ Regulations of the Department of Public Assistance: Determination of Need and the Amount of Grant for Old Age Assistance, Aid to Dependent Children, and General Assistance, Section 3200.

APPENDIX TO THE

Table I

MAXIMUM MONTHLY ALLOWANCE PER PERSON FOR FOOD, CLOTHING, AND INCIDENTALS BY
NUMBER OF PERSONS IN THE HOUSEHOLD*, AS OF OCTOBER 16, 1950

Number of Persons in Assistance Unit	1	2	3	4	5	6	7	8	9 and over
Maximum Allowance	\$24	\$29	\$31	\$33	\$35	\$37	\$39	\$41	\$43

* An "assistance unit" comprises all individuals in a common dwelling who are receiving assistance.

† For assistance recipients who live in areas covered by Pittsburgh's anti-smoke ordinance, the shelter maintenance allowance shown in Schedule 1 may be increased to an amount sufficient to cover the higher cost of the smokeless coal which must be used in these areas. The additional allowance may not exceed \$1 per month for 1 person, \$2 per month for 2 or 3 persons, and \$3 per month for 4 or more persons.

Source: Regulations of Department of Public Assistance, Section 3220.

If a recipient has no income, the amount of his cash assistance grant equals the total assistance allowance. If he has income, the income is subtracted from the total allowance. Certain types of nonrecurring income and income from specified sources and designated for specific purposes are not subtracted from the total allowance.

Real and personal property owned by the applicant for assistance represent resources and affect his eligibility.

Real property owned and occupied by the applicant does not affect eligibility if the applicant acknowledges the liability of the property for reimbursement. The individual who owns real property in which he does not live is ineligible for assistance unless he disposes of his property. Some types of personal property, such as household furnishings and personal effects, do not enter into eligibility determination unless of unusual value. Insurance policies of a cash value in excess of amounts specified by the department must be assigned to the department if the individual is to be eligible.

The Pennsylvania support law places legal responsibility for the support of a needy person on his spouse, parents and children if these relatives are financially able to contribute. The department has established a schedule of expected contributions from a recipient's legally responsible relatives based on the income of the relative and the number of persons in his family. If the relative refuses to contribute the amount requested by the department, recourse is had to court action.

A person who is considered wholly or partially employable is required, as a condition of eligibility, to register for work with the local office or the State Employment Service. Gainful employment does not make a person ineligible for assistance if the remuneration from such employment is less than his assistance allowance.

Section III

COSTS AND FINANCING

The Federal Government does not provide grants-in-aid for general assistance programs. Pennsylvania is one of the three states¹⁵ which finance general assistance expenditures entirely from state funds. In the remaining states, financial participation is divided between the state and local governments.

The cost of old age assistance, aid to dependent children and aid to the permanently and totally disabled in Pennsylvania are financed jointly by the State and Federal Governments.

As regards Federal financial participation, the Federal Social Security Act requires that a state, in order to be eligible for Federal moneys, must provide: (1) that the program shall be in effect in all political subdivisions of the state, and if administered by them, be mandatory upon them; (2) for financial participation by the state; and (3), for the establishment or designation of a single state agency to administer the plan or for the establishment of a single state agency to supervise the administration of the plan.

The Social Security Act specifies for every type of assistance: (a) the maximum grant per recipient for which Federal funds may be made available, and (b), the Federal participation fractions on the basis of which Federal funds will be made available for each type of grant.

In the case of old age assistance and aid to the permanently and totally disabled, the maximum grant per individual per month for which Federal participation is available is \$50.

In the aid to dependent children program, the maximum grants per individual per month for which Federal participation is available are: \$27 for the needy parent or rela-

¹⁵ Pennsylvania, Utah and Arizona.

tive with whom the child or children live, \$27 for the first child and \$18 per child for additional children.

The Federal participation fractions are:

(a) $\frac{3}{4}$ of the first \$20 per month per recipient of old age assistance and aid to the permanently and totally disabled;

(b) $\frac{3}{4}$ of the first \$12 per month per recipient of aid to dependent children;

(c) $\frac{1}{2}$ of the difference between the amounts indicated under (a) and (b) above and the maximum grants for which federal funds may be made available.

By virtue of the nature of the Federal participation fractions, the extent of Federal financial participation in aggregate expenditures for assistance grants varies from year to year depending upon the size of the individual grants, and, in the case of aid to dependent children, the family composition. In 1950, Federal participation was approximately 61 per cent for the old age assistance program and approximately 41 per cent for the aid to dependent children program. Experience is too limited to determine the amount of Federal participation in aggregate expenditures for aid to the permanently and totally disabled. However, it is expected that the proportion will be approximately equal to Federal participation in old age assistance.

In addition to participating in expenditures for grants, the Federal Government shares in the costs of assistance administration. The Federal proportion is one-half the amount expended for "proper and efficient administration" of the approved state plans.

All Commonwealth moneys for public assistance purposes are appropriated from the General Fund. The appropriation to the Department of Public Assistance for the biennium 1949-51 was \$161,100,000, an amount equal to 22 per cent of the entire General Fund budget. In addition, the legislature appropriated \$25,000,000 from "surplus funds," if any, in the event the original appropriation was insufficient. It is estimated that state expenditures for public assistance purposes for the biennium 1949-51 will exceed the total of these two amounts by about \$12,000,000.

In Table III, public assistance expenditures in Pennsylvania, by program and source of funds, are shown for the period 1932 to 1950.¹⁹

Examination of the table shows that from 1932 to 1950 total expenditures for general assistance grants increased from approximately \$11,000,000 to about \$32,000,000. Total expenditures for old age assistance, which were included in expenditures for general assistance in 1932, amounted to approximately \$42,000,000 in 1950. Total expenditures for aid to dependent children increased from approximately \$1,000,000 in 1932 to about \$54,000,000 in 1950.

Section IV

INTERSTATE COMPARISONS OF THE LEVELS AND METHODS OF FINANCING OF PUBLIC ASSISTANCE EXPENDITURES

A. Per Capita Expenditures for Public Assistance Grants—

Per capita, or per inhabitant, expenditures for assistance grants for each program and for all programs in selected states are shown in Table IV, page 30, for the year 1949.

¹⁹ For average expenditures per recipient per month for the period 1932 to 1950, inclusive, see Appendix B.

Table III

Source: Division of Research and Statistics, Department of Public Assistance, Commonwealth of Pennsylvania.

* Total for years 1932-1936 does not include expenditures by local Poor Boards for outdoor relief.

† September-December Total.

The table shows that, as regards the three programs, per capita expenditure variation among the states is least pronounced in connection with aid to dependent children.

As regards general assistance, per capita expenditures in Pennsylvania are about 40 per cent above the national average; in fact, they are higher than in any neighboring state except New York. Pennsylvania's per capita old age expenditures are less than half the national average but greater than per capita expenditures in New Jersey, Delaware, Maryland and West Virginia. Per capita aid to dependent children expenditures in Pennsylvania are almost 60 per cent greater than in the nation as a whole and outrank per capita expenditures for this program in all neighboring states as well as in Illinois and California.

The variation of per capita public assistance expenditures, both among states and among the three programs, is due to: (1) variations in the level of payments to assistance recipients and/or (2) differences in the ratio of the number of indigent citizens who are aided to the total population of the state.

§ Louisiana.

¶ New Jersey and Delaware.

|| New Jersey.

Inspection of Columns (2) and (4) shows that general assistance and aid to dependent children rates for Pennsylvania are higher than for the nation as a whole. Pennsylvania's rate for general assistance is exceeded by the rates of but two neighboring states—New York and Ohio. For aid to dependent children, the recipient rate for Pennsylvania is larger than comparable rates for Illinois and California, and for all neighboring states except West Virginia.

Column (3) of Table V shows that Pennsylvania's old age recipient rate is less than half the rate for the nation as a whole. In this connection, it may be noted that states whose statutes place responsibility upon relatives for the support of aged assistance recipients generally have a lower recipient rate than states without such support law provisions. As of December, 1949, the average old age recipient rate for the twenty states which do not have support law provisions in their assistance statutes was 388, as compared with an average rate of 180 for the twenty-eight states, including Pennsylvania, which requires relatives to contribute to the support of assistance recipients.

Table VI, on the opposite page, presents the average payment per recipient for the three assistance programs in selected states as of December, 1949.

Inspection of the table shows that the average payment per recipient in Pennsylvania is above the national average for the aid to dependent children and general assistance programs, and below the national average for old age assistance. The interstate variation of average payments per recipient is less pronounced than the variation among states as regards recipient rates.

Table VI

AVERAGE PAYMENT PER ASSISTANCE RECIPIENT, BY PROGRAM, SELECTED STATES, DECEMBER, 1949

State	General Assistance	Old Age Assistance	Aid to Dependent Children *
(1)	(2)	(3)	(4)
United States	\$19.38	\$44.76	\$29.23

C. Source of Public Assistance Funds—

Considering the nation as a whole, funds for public assistance purposes are supplied by all levels of government—Federal, state and local. However, Federal financial participation is limited to old age assistance and aid to dependent children. In some states, local governments participate financially in all assistance programs; in others—e.g., in Pennsylvania—no local participation is required.

The percentage distribution of expenditures for general assistance for selected states for the year 1949 is presented in Table VII.

Table VII

PERCENTAGE DISTRIBUTION OF EXPENDITURES
FOR GENERAL ASSISTANCE BY SOURCE OF
FUNDS, SELECTED STATES, 1949

State	Percentage Distribution	
	State Funds	Local Funds
(1)	(2)	(3)
United States	63.0%	37.0%
Pennsylvania	100.0	...
New York	79.8	20.2
New Jersey	28.3	71.7
Delaware	50.0	50.0
Maryland	53.0	47.0
West Virginia	43.3	56.7
Ohio *	100.0	...
Illinois	75.8	24.2
California	100.0

Source: Social Security Bulletin, September, 1950.

* Distribution between state and local funds not available.

Except in Ohio, where local participation is inconsequential, among the selected states only Pennsylvania finances general assistance exclusively out of state funds. In the nation as a whole, 37 per cent of general assistance funds are supplied by local governments.

In most states, the degree of local participation in aid to dependent children and old age assistance programs is substantially less than the degree of local participation in general assistance programs. As regards the weighted average for the forty-eight states, local governments finance about 11 per cent of aid to dependent children expenditures and about 4 per cent of old age assistance expenditures. In approximately one-half of the forty-eight states, there is some measure of local participation in both programs.

D. Public Assistance Expenditures and State Income Payments—

Variations in assistance payments among the states gain in significance when assistance payments are related to income levels.

Table VIII, page 36, shows, for selected states, total and state expenditures for assistance, including administration, as percentages of the income of the residents of the states.

Examination of Table VIII, Column (2), shows that, as regards total expenditures for public assistance as a per cent of income payments, Pennsylvania ranks slightly below the average for the forty-eight states. Examination of Column (3) shows that, as regards public assistance expenditures from state funds as percentages of income of residents, Pennsylvania ranks above the average for the forty-eight states.

PART II

The preamble to the Act of June 24, 1937, which established the present administrative basis for all public assistance programs, reads in part: "to promote the welfare and happiness of all the people . . . in such a way and such a manner as to encourage self-respect, self-dependency. . . ." ²⁰

This policy directive of the General Assembly poses a problem for the State Board of Public Assistance. "Happiness," as commonly conceived, presupposes a decent level of living. In other words, the Board is directed to underwrite a decent standard of living without destroying personal effort and initiative.

Part II is devoted to a review of the levels of living prescribed by the State Board of Public Assistance for assistance recipients, the economic position of assistance recipients, the economic incentive to seek "self-dependency," and of work-relief programs. In conclusion, Part II presents an analysis of the relationship between general assistance expenditures and local participation in the financing of assistance grants.

Section I

CHANGES IN PUBLIC ASSISTANCE STANDARDS.
CHANGES IN COST OF LIVING, 1938 TO 1950

The State Board of Public Assistance is charged with the responsibility of determining or approving the "standards" of public assistance. The "standard" or "level" is the standard or level of living, or more specifically, amounts of various commodities which the recipient is able to purchase with his assistance grant.

If the assistance grant remains constant during a period of rising commodity prices, standards fall. Conversely, a constant dollar grant over a period of falling prices raises the standard.

The standard is based upon a "basket of goods" which is

²⁰ 1937, June 24, P. L. 2051, as amended 1943, May 21, P. L. 434.

selected by reference to considerations of health and remains relatively constant over time. Assuming that a constant standard is desired, the dollar grant would be changed only when a change in price of the items in the "basket of goods" occurs.

The maximum allowance schedules for food, clothing, incidentals and shelter maintenance, which define the current standard set by the State Board of Public Assistance, have been shown previously.²¹

Until 1947, general assistance and aid to dependent children grants were made on the same schedules, but old age assistance grants were based upon a separate schedule. Since 1947, one schedule has been used for the determination of maximum grants for all three programs.

During the period from 1938 to 1950, numerous changes were made in maximum grant schedules.²² These changes [Chart not reprinted in this appendix See original report, page 43.]

have produced a substantial increase in the standard of assistance in 1950, as compared with the standard which prevailed in 1938 for general assistance and aid to dependent children. Between 1938 and 1950, the maximum allowance for food, clothing, incidentals and shelter maintenance has increased more than the increase in the cost of these items.²³

The relationship between actual maximum grants for a four-person family receiving general assistance or aid to dependent children and the 1938 maximum grant to such a family adjusted for changes in the cost of living is graphically presented in Chart II, on opposite page.

In Chart II, the solid line shows the actual maximum monthly grant for a four-person family on general assistance or aid to dependent children for the years 1938 to 1950. The broken line represents the maximum monthly allowance for such a family in effect in December, 1938, adjusted for changes in the cost of living since that time. Hence, the distance between the broken and solid lines measures the change in assistance standards. At the end of 1950, the standard for a four-person family on general assistance or aid to dependent children was about 42.7 per cent above the standard of 1938.²⁴

The relationship between the actual maximum grant for a single old age recipient and the 1938 maximum grant to such a recipient adjusted for changes in the cost of living is graphically shown in Chart III, on opposite page.

[Chart not reprinted in this appendix See original report, page 45.]

Examination of Chart III shows that at the end of 1950, the standard for a single old age recipient was about 11.7 per cent above the standard in effect in 1938. That is to say, the increase in the maximum monthly grant for an old age recipient since 1938 has only slightly exceeded the increase in cost of the commodities upon which the maximum allowance schedules in 1938 were based.

At the present time, as compared to 1938, the old age assistance recipient is on a standard about 11.7 per cent greater than the 1938 standard, while the general assistance and aid to dependent children family is on a standard of assistance about 42.7 per cent above that in effect in 1938. The differences under review may be ex-

plained in part by examining the origin of the standards established in 1938 when the unified public assistance law became effective. At that time, according to the 1938 annual report of the Department of Public Assistance, the "schedules now [that is, in 1938] in use for general assistance and aid to dependent children were established in October 1936 when the State Emergency Relief Board inaugurated cash relief on a State-wide basis."

As regards the standard for old age assistance, \$30 per month, it appears that this maximum allowance was carried over from the state old age assistance program established by the General Assembly in 1934.²⁵

Section II

THE CHARACTERISTICS OF GENERAL ASSISTANCE RECIPIENTS

The analysis of the characteristics of general assistance recipients is based, in the main, upon a random sample of the general assistance case load of the last week of June, 1947. During this month, postwar employment was at a very high level, and relatively few workers were idle due to labor stoppages. Moreover, the size of the case load tends to be "average" in June. Seasonal swings usually occur during the winter and late summer months. It is believed that persons who received general assistance during June, 1947, are representative of that portion of the State's population that may be expected to have recourse to general assistance even during the most prosperous period.

A second random sample was selected from the case load during the final week of June, 1949. Generally speaking, the 1949 sample has been used to test stability of the 1947 findings and to ascertain secular trends.²⁶

The data which form the basis for this section may be divided into two groups—those which pertain to the assistance case and those which describe characteristics of the individuals constituting the case. In general, the case contains all individuals in one household who receive general assistance.

Two views of the relative magnitude of the general assistance load in several regions are presented in Table IX.

Table IX

Number of Persons Receiving General Assistance and Percentage of Total Population Receiving General Assistance, Allegheny County, Philadelphia County, and Remainder of State, June, 1947 and June, 1949*

Region	June, 1947			June, 1949		
	No. of Persons on General Assistance	Percent-age Dis-tribution of Gen-eral As-sistance Recipi-ents by Region	Per Cent of Total Popu-lation on Gen-eral As-sistance	No. of Persons on General Assistance	Percent-age Dis-tribution of Gen-eral As-sistance Recipi-ents by Region	Per Cent of Total Popu-lation on Gen-eral As-sistance
(1)	(2)	(3)	(4)	(5)	(6)	(7)
State Total	49,859	100.0%	0.48%	65,148	100.0%	0.62%
Allegheny County	10,171	20.4	0.67	9,357	14.4	0.62
Philadelphia County	13,967	28.0	0.65	20,676	31.7	0.96
Remainder of State	25,721	51.6	0.37	35,115	53.9	0.51

* Population is State Planning Board estimate for August, 1948.

²¹ See above, pages 19-22.

²² See Appendix C, Appendix Table C-5.

²³ For a description of the methods used in calculating changes in costs, see Appendix C, page 107.

²⁴ For two adults receiving general assistance, the increase in standards was about 45.0 per cent; for two adults and one child, about 40.8 per cent.

²⁵ For details regarding changes in grants, see Appendix C, Appendix Table C-4.

²⁶ For sampling methods and tests of sample, see Appendix D.

About one third of the state's population, 3.5 million out of a total population of 10.5 million, reside in the two predominantly urban counties of Allegheny and Philadelphia, and about 50 per cent of the general assistance population is centered in these counties. Hence, in 1947 (see Column 4), the proportion of the total population receiving general assistance was larger in these urban areas than in the remainder of the state. Column (7) indicates that a comparable situation existed in 1949, although Allegheny County showed an improvement as compared to 1947, while the proportion of population receiving general assistance in Philadelphia increased substantially over 1947.

A. Characteristics of General Assistance Cases—Case Size and Length of Time on Assistance—

Although the average general assistance case in 1947 was composed of 1.7 persons, Table X shows that more than three fourths of all cases consisted of only one person.

Table X

Percentage Distribution of Total Cases by Number of Recipients in Case, 1947

Number of Recipients in Case	Percentage Distribution of Cases in State
1	76.6%
2	12.1
3	2.3
4	2.0
5	1.5
6-15	5.5
Total	100.0%

The distribution of cases by number of persons in the case does not show a marked geographic variation, although nonurban areas tend to have slightly fewer, single-person cases.²⁷ In 1949, the proportion of single-person cases was about 71 per cent of total cases.

As regards administrative costs, it should be noted that, in general, given a certain number of recipients, the larger the number of persons per case, the smaller the cost of investigation.

Again, since per-person food and shelter allowances vary inversely with the number of persons in the household or shelter group, the per-person allowance decreases as the number of persons increases. For example, under current schedules, the monthly allowance for food, clothing and incidentals for an adult ranges from \$17 when the household consists of twelve or more persons to \$27 when the recipient lives alone. If two recipients in Philadelphia who formerly lived alone were to reside together, the maximum shelter allowance for each would be reduced from \$32 to \$19.50.

In 1947, 54 per cent of total general assistance cases consisted of single persons residing alone. This percentage shows a decided geographic variation. Single-person cases not living with other individuals (either recipients of other categories of assistance or nonrecipients) constitute a sig-

nificantly larger proportion of total cases in the urban counties.²⁸

The average length of time on general assistance was approximately four and one half years for the case load of June, 1947. That is, during the period 1932 to 1947, an average of four and one half years was spent on general assistance by the cases on the rolls in June, 1947. The distribution of cases by the length of time on assistance between 1932 and 1947 is shown in Table XI, page 51.

Inspection of Table XI shows that about 30 per cent of the 1947 cases had received assistance less than a full year, while over 5 per cent had been twelve or more years on the assistance rolls. For the case load of June, 1949, the distribution of cases by time on assistance did not differ materially from the 1947 distribution.

Table XI

Percentage Distribution of Total Cases by Length of Time on Assistance, 1947

Length of Time	Per Cent of Total Cases
Less than 1 year	30.4%
1 less than 2 years	10.9
2 less than 3 years	7.7
3 less than 4 years	6.3
4 less than 5 years	4.8
5 less than 6 years	5.1
6 less than 7 years	5.5
7 less than 8 years	6.2
8 less than 9 years	4.9
9 less than 10 years	6.1
10 less than 11 years	3.9
11 less than 12 years	2.6
12 to 15 years	5.6
Total	100.0%

It may also be noted that length of time on assistance is related to the number of recipients in the assistance case. Medium-sized cases, containing from three to five persons, have averaged less time on assistance than either the small or large cases.²⁹

B. Characteristics of General Assistance Recipients—Sex, Race, Age and Residence—

The sex and race distribution of recipients of general assistance in June, 1947, is shown in Table XII, on page 52.

Table XII

Percentage Distribution of General Assistance Recipients by Sex and Race, 1947

Region	Male White	Female White	Male Negro	Female Negro	Total
(1)	(2)	(3)	(4)	(5)	(6)
State Total	33.3%	35.3%	13.0%	18.4%	100.0%
Allegheny County	26.9	26.4	19.6	27.1	100.0
Philadelphia County ..	18.0	16.1	27.0	38.9	100.0
Remainder of State ..	44.1	49.2	2.8	3.9	100.0

The table shows that in Allegheny County approximately one half of the recipients of general assistance

²⁷ See Appendix D, Table D-1.

²⁸ See Appendix D, Table D-2.

²⁹ For details, see Appendix D, Table D-3.

were white, while in Philadelphia only about one third of the recipients of general assistance were white. In the remaining counties as a group, about 93 per cent of the recipients were white. It appears that, over time, these proportions do not change significantly.

In the three geographic areas shown in Table XII, female recipients outnumbered male recipients. The largest preponderance of females occurred in Philadelphia, where they constituted 55 per cent of total recipients.

Table XIII, page 53, shows the number of general assistance recipients in designated race and sex groups as percentages of the total number of persons constituting these groups.

The table shows that in Allegheny County 5.24 per cent of the female Negro population were general assistance recipients. In Philadelphia one fourth of one per cent of the female white population were general assistance recipients. These percentages—.524 and .25—represent the highest and lowest frequencies in the occurrence of indigency within the groups shown in the table.

Table XIII

Percentages of Population Groups (Classified According to Sex and Race) Receiving General Assistance, 1947

Region	Male White	Female White	Male Negro	Female Negro
(1)	(2)	(3)	(4)	(5)
State Total34%	.36%	2.32%	3.05%
Allegheny County40	.38	3.90	5.24
Philadelphia County30	.25	2.55	3.19
Remainder of State33	.37	1.04	1.44

Note: Population groups based on 1950 census data adjusted to reflect sex and race proportions existing in 1947 in metropolitan counties and in 1940 for remainder of state.

Comparison of Columns (2) and (3) of Table XIII with Columns (4) and (5) shows that, whereas the proportions of white males and white females receiving general assistance are about identical, a larger proportion of Negro females than Negro males received general assistance.

Table XIV shows the ratios of females to males by race and age.³⁰

Table XIV

General Assistance Recipients, Ratio of Females to Males by Race and Age, 1947

Age	Ratio of Females to Males	
	White	Negro
(1)	(2)	(3)
Under 20	1.05	.97
20-39	1.52	1.51
40-5999	1.93
60 and over91	1.53

It appears that, as regards general assistance recipients up to forty years of age, the ratio of females to males is approximately the same for white and Negro recipients. However, for recipients above forty years of age, the ratio of females to males among Negro general assistance recipients greatly exceeds the ratio for white recipients. The divergence does not appear to be a random occurrence, inasmuch as the 1949 general assistance case load showed similar characteristics.

³⁰ The age distribution for general assistance recipients is given in Appendix D, Table D-4.

The residence requirement for general assistance in Pennsylvania is one year unless the applicant for assistance was last a resident of a state with which Pennsylvania has a reciprocal agreement. It was noted previously³¹ that Pennsylvania's general assistance recipient rate and average payment per recipient are above the comparable measures for the nation as a whole and higher than most neighboring states. Under the circumstances, it might be expected that the general assistance case load would contain families or individuals who have migrated to Pennsylvania for the purpose of obtaining better-than-average assistance allowances.

Examination of the sample data discloses that relatively few general assistance recipients have migrated to Pennsylvania within the past decade. For the case load of June, 1947, about 6 per cent of the recipients had a residence status in Pennsylvania of five years or less, and the residence status of about 9 per cent of the recipients was nine years or less. In other words, about 9 per cent of the recipient of general assistance in 1947 had moved to Pennsylvania sometime between 1938 and 1947, while the remaining 91 per cent of the recipients had not resided elsewhere during that nine-year period.

It should also be noted that during the war years a considerable number of individuals moved to Pennsylvania to take advantage of employment opportunities in the state's industrial centers. If a portion of these individuals subsequently received general assistance, the percentages given in the preceding paragraph are larger than would be the case during a "normal" period.

C. Characteristics of General Assistance Recipients—Employability and Skills—

Department regulations call for classifying general assistance adults into one of three employability groups: wholly employable, partially employable and unemployable. The classification criteria are not clearly defined and the matter of actual classification is left largely to the judgment of visitors and supervisors.

In applying employability classifications, it would seem that the visitors have been inaccurate. Instances were found in the sample cases where recipients classified as "unemployable" were holding part-time jobs and where "partially employable" individuals were employed full time. It seems that the employability classifications refer to but one job or a very limited number of similar jobs and do not encompass the entire range of available opportunities. A physical impairment that renders an individual unemployable as regards heavy manual labor may not handicap him for less strenuous occupations. Yet, under current procedures, recipients classified as "unemployable" are not required as a condition of continued assistance to seek employment nor to register with the Pennsylvania State Employment Service.

In connection with employment matters, it may be noted that the regulations of the Department appear to be in conflict with the statutes dealing with assistance recipients, and employment. Section 5 of the Act of 1939, June 27, P. L. 1184, provides:

"Any person, copartnership, association or corporation, desiring one or more permanent or temporary employes, and any State or Federal employment office having demand for any such employes, may apply to any county

³¹ See pages 31-33

board of assistance for the number of persons required, whereupon it shall be the duty of the county board, unless it deems the proposed employment improper, to notify the required number of employables receiving assistance, and not exempted hereby, to report for work at a time and place designated in the notice. In the event that such assignment results in full time permanent employment, the persons so employed shall be dropped from the assistance rolls when they receive their first pay. . . ."

Section 3184.6 of the regulations of the Department of Public Assistance, dated August 1, 1950, provides that:

"A person who has employment is eligible for assistance if he meets all the conditions of eligibility, and if: . . . (3) he is working on a full-time job and/or part-time job but his wages are less than the Department's total assistance allowances for himself and his dependents."

In 1947, about 73.5 per cent of general assistance recipients were adults and, hence, classified as to employability. The percentage distribution of adults by employability classification was as follows:

Wholly Employable	16.8 per cent
Partially Employable	22.3 per cent
Unemployable	60.9 per cent

Total Adults 100.0

Multiplying the above percentages by .735 gives ratios in terms of the total number of recipients.

Wholly Employable	12.3
Partially Employable	16.4
Unemployable	44.8
Children	26.5

Total Recipients 100.0

In 1949, 20.1 per cent of general assistance adults were wholly employable; the proportion of partially employable adults remained the same as in 1947. On the basis of total recipients, the 1949 figures are:

Wholly Employable	13.3 per cent
Partially Employable	14.9 per cent
Unemployable	37.9 per cent
Children	33.9 per cent

Total Recipients 100.0

The relations between employability classifications and the age of general assistance recipients, and between employability classifications and the industry in which assistance recipients had been employed, are shown in Appendix D, Tables D-5 and D-6.

It is a condition of eligibility for general assistance that wholly and partially employable persons will "actively seek employment." Aside from registration with the Pennsylvania State Employment Service, it appears to be left to the judgment of the individual visitor whether or not the recipient is actively seeking employment.

Current Department regulations provide that, if income from full- or part-time employment is insufficient to meet the minimum needs of the individual or family, as determined by departmental schedules, assistance to make up any difference may be authorized.

The percentage distribution of adults receiving general assistance in 1947, by employment status, was as follows:

Fully employed	1.3 per cent
Partially employed	3.0 per cent
Unemployed	95.7 percent

Considering only the wholly employable and partially employable, about 10.4 per cent of the total of these two groups were employed.

The 1949 proportions are almost identical with those shown above for 1947.

As might be expected, in view of the relatively large number of employable individuals receiving assistance during prosperous periods, their skills are of a low order. The distribution of adults by skills is shown in Table XV.

Table XV

PERCENTAGE DISTRIBUTION OF GENERAL ASSISTANCE ADULTS BY SKILL, 1947

Region	Skilled Occupations and Professions	Clerical, Sales, and Service	Unskilled	Total
(1)	(2)	(3)	(4)	(5)
State Total	12.0%	28.5%	59.5%	100.0%
Allegheny County	9.3	30.4	60.3	100.0
Philadelphia County	7.2	37.9	54.9	100.0
Remainder of State	15.7	22.8	61.5	100.0

D. Characteristics of General Assistance Cases and Recipients—Special Expenditures and Income—

1. Special Expenditures—In addition to allowances for food, clothing, incidentals and shelter maintenance, some individuals on assistance, by virtue of their particular circumstances, are given supplemental grants to cover specific needs.

Expenses actually incurred for special diets, laundry, and transportation to and from a source of medical care are allowed in cases of illness. The special expense items allowed for illness appear to be relatively stable over time, both as to the average amount received and the proportion of the general assistance load receiving this type of special aid. In both 1947 and 1949, about 10 per cent of the general assistance cases were receiving an allowance to cover expenses occasioned by illness. The average allowance was about \$6.25 per month. One- and two-person cases account for almost all of the special allowances for the ill.

Expenditures for employment cover transportation, tools and special clothing for employed recipients. No allowance is made for these items, but part of the income received from employment is not considered when the grant is computed. In both years under review, about one per cent of the cases showed expenditures for employment. The average expenditure for employment was \$10 in 1947 and \$8.50 per month in 1949.

Payroll deductions include wage taxes withheld at the source and union dues if a union checkoff is in force. Only a very small number of cases showed this item—about one-half of one per cent of the total cases in both years. The amount of payroll deductions averaged \$4.50 per month.

Income for specific purposes covers contributions for diagnostic and remedial services for handicapped children, recreational services for children, necessary items of household equipment and various other specified purposes from relatives not legally required to contribute to the support of the recipient, nonrelated persons and organizations. Such income is not considered when computing the general assistance grant. Income for specific purposes entered in about 3 per cent of total general assistance cases in both years. The average amount was about \$12 per month.

2. Source and Amount of Income—Both the proportion of cases receiving income and the average amount of income received increased in 1949 as compared to 1947. In the earlier year, about 15 per cent of the cases were receiving income averaging \$40.50 per month. In 1949, the average had risen to about \$54.50 per month and the proportion of cases receiving income to about 18 per cent.

Table XVI, page 61, presents distributions of the average income per month by source, of recipients receiving income in 1947 and 1949. Inasmuch as the table is based upon data for individuals, the average amounts shown are smaller than those referred to in the preceding paragraph which deals with income per case.

The individuals covered in Table XVI represent about 9 per cent of all general assistance recipients in both 1947 and 1949.

Table XVI

AVERAGE AMOUNT OF INCOME PER MONTH AND

* A small number of recipients reported income from several sources. These are classified by major source.

† Includes income from property, workmen's compensation, old age and survivors' insurance, railroad retirement, public retirement, serviceman's readjustment allowance, public welfare agency, and private welfare agency.

Section III

ASSISTANCE GRANTS, ECONOMIC INCENTIVES
AND "SELF-DEPENDENCY"

Generally speaking, a citizen has an economic incentive if, by the exercise of reasonable effort, he can reasonably expect to improve his standard of living.

The section presents data bearing upon the earning capacity of general assistance recipients and the size of assistance grants. In addition, it relates changes in assistance grants to changes in average weekly earnings of production workers in major industries.

A. Assistance Grants and Earning Capacity of Assistance
Recipients in 1947—

The survey of the Joint State Government Commission of men and women on general assistance in 1947³² shows that during that year the relatively few fully employed general assistance recipients earned in the neighborhood of \$125 per month. Examination of their work records, their skills and their age suggests that they are not likely to improve their earning capacity.

Again, in 1947, the average assistance grant for a family consisting of two adults and four children was about \$125 per month. Hence, a family in these circumstances could not possibly improve its standard of living even though one member of that family elected to take full-time employment.

In this connection it should be noted that the majority of public assistance families of six or more individuals have but one employable member. Again, it should be noted that on the basis of the 1947 data, 26 per cent of general assistance recipients lived in families which had from six to fifteen members.

In other words, the evidence shows that in 1947 the recipients of assistance in families of six or more members had no economic incentive to seek employment.

B. Changes in Assistance Grants and Changes in Average
Weekly Earnings of Production Workers: 1947-1950—

Table XVII, page 65, shows the maximum assistance allowances for large families located in different geographic areas of the Commonwealth for November, 1947, and November, 1950.

Inspection of Column (4) of Table XVII shows that the increase in assistance grants to large families between November, 1947, and November, 1950, ranged from 27.4 per cent to 37.7 per cent.

Table XVIII, page 66, shows average weekly earnings of production workers in major industries as of November, 1947, and November, 1950.

Inspection of Column (4), Table XVIII, shows that the relative changes in average weekly earnings of production workers between 1947 and 1950 ranged from minus 3.2 per cent in anthracite mining to plus 19.6 per cent in manufacturing.

The relationship between percentage changes in assistance grants and percentage changes in average weekly earnings of production workers strongly suggests that the incentives of assistance recipients to actively seek work have been lessened between 1947 and 1950.

³² See above, Section II, page 47.

Table XVII

Maximum Assistance Allowances for Large Families,
November, 1947, and November, 1950

Family Size, Composition and County of Residence	Maximum Allowance November, 1947	Maximum Allowance November, 1950	Percentage Increase, 1950 Over 1947

Economic Statistics Bureau of Washington, D. C.

* Percentage decrease.

With regard to the economic incentive factor, it may be noted that the Department of Public Assistance permits each employed individual an "employment deduction" of \$10 per month. This amount of earnings, whether from part- or full-time employment, is considered exempt income and does not reduce the grant.

Section IV

EMPLOYABLE PUBLIC ASSISTANCE RECIPIENTS
AND RELIEF-WORK PROGRAMS

The Act of June 27, 1939,⁸³ directs the organization of relief-work projects, makes it mandatory upon able-bodied recipients of assistance to work on such projects and directs county boards of assistance to furnish lists of employable assistance recipients to designated agencies.

The act provides in part:

"Section 3. Each county board of assistance shall make available each month to the governing body of the county and of each political subdivision or school district within the county as well as each district office of the State Department of Highways, State institution, or other State agency and each State or Federal employment office within the county, or an adjoining county, and each regularly organized charitable organization and institution, in whole or in part supported by tax money, operating in the county, the number of such persons who are available for employment, classified by occupation and political subdivision.

"Section 4. It shall be the duty of such governing bodies and of the person in charge of each State district office, institution and other agency, and of each such regularly organized charitable organization and institution, to furnish employment for as many such employable persons, and for as long a period, as the care, maintenance, improvement and policing of the highways, streets, buildings, grounds, parks, playgrounds and streams and their respective supervision will permit; and to designate to the county board of assistance the number of persons that can be used and the character of the work for which they are required. Thereupon the county board, if it determines that the work proposed is not contrary to the provisions of section eight of this act, shall notify the required number of such employables to report for work for a specified number of hours each week, at a time and place designated in the notice. Such services shall be rendered free of charge to the State, political subdivision or charitable organization, except for the cost of transportation, if such distance exceeds one mile, in which case such employable person shall be required to report to some designated point from which transportation shall be furnished, in return for the assistance being received."

Table XIX shows the number of recipients available for relief-work programs and the number of recipients actually employed on relief-work projects, by calendar quarter, from December, 1946, to September, 1950, see page 69.

Inspection of Columns (2) and (4) of the table shows that the number of recipients who have been employed

⁸³ 1939, June 27, P. L. 1184.

on relief-work projects is small as compared with the number of employables receiving assistance. As of September 30, 1950, less than 3 per cent of the employable assistance recipients in the state were employed on relief-work projects.

A few counties accounted for the great majority of the 448 workers on relief-work projects as of September 30, 1950. Counties which have consistently employed assistance recipients include Carbon, Indiana, Jefferson, Lackawanna, Somerset and Wyoming. Bedford, Blair, Bradford, Huntingdon, Lehigh, Luzerne and Montour counties had relief-work projects in operation for one or more months.

Of the 2,438 employable assistance recipients available for work in Allegheny County on September 30, 1950, only seven were engaged on relief-work projects. In Philadelphia, 6,291 employable recipients were available but no relief-work projects were in operation. Other counties with a sizeable number of employable recipients but without relief-work projects in operation included: Cambria, Chester, Clarion, Crawford, Dauphin, Delaware, Erie, Fayette, McKean, Montgomery, Northampton, Northumberland, Susquehanna, Washington and Westmoreland.

Section V

THE RELATIONSHIP BETWEEN EXPENDITURES FOR PUBLIC ASSISTANCE AND LOCAL PARTICIPATION IN THE FINANCING OF ASSISTANCE

It has been said from time to time that the per capita expenditures for public assistance, particularly general assistance, tend to decrease as the percentage of cost, financed locally, increases. For example, the United States Congress Joint Committee on the Economic Report observes:

"The 17 States that spent less than 50 cents per inhabitant for general assistance in 1948 include 11 in which this type of assistance is financed entirely from local funds. Only California, among the States where the localities meet the full cost of general assistance, spent more per inhabitant than the United States average of \$1.36."³⁴

A. Determinants of General Assistance Expenditures—

Close examination of the relationship under review shows that the per capita expenditures for general assistance vary with:

1. per capita income;
2. proportion of income derived from agriculture;
3. degree of local participation in the financing of general assistance.

Increases in per capita income tend to be associated with increases in per capita general assistance expenditures. Increases in the proportion of income derived from agriculture tend to be associated with decreases in per capita general assistance expenditures. Increases in the percentage contribution of local government tend to be associated with decreases in per capita general assistance expenditures.

The interaction of the three determinants of per capita general assistance expenditures are illustrated by the following examples:

In 1947, Florida and California derived 8.1 per cent of their income from agriculture. In both states, general assistance was financed entirely at the local level; yet Florida had a per capita general assistance expenditure of \$.33, while California's per capita general assistance expenditures was \$1.35. The difference in general assistance expenditures is partially accounted for by the fact that California's per capita income exceeded Florida's by \$517.

In 1947, Colorado's per capita income was \$1,447, while Michigan's was \$1,425. Local government in the two states made comparable percentage contributions toward the financing of assistance: 50.8 per cent in Colorado and 57.7 per cent in Michigan. However, Michigan's per capita general assistance expenditures exceeded Colorado's by \$.28. The difference is partially explained by the fact that the proportion of Colorado's income which was derived from agriculture was 19.6 per cent, while only 5.1 per cent of Michigan's income was derived from agricultural activities.

Again, in 1948, Utah had a per capita income of \$1,231, of which 11.2 per cent came from agriculture. Vermont

³⁴ United States Congress Joint Committee on Economic Report—Selected Government Programs which Aid the Unemployment and Low-Income Families. (1949)

had a per capita income of \$1,229, with a comparable share of 15.0 per cent derived from agriculture. However, Utah's per capita general assistance expenditures exceeded Vermont's by \$1.28. The difference is explained, in part, by the absence in Utah of local financing. In Vermont, local units financed 97 per cent of all general assistance expenditures.

Generally speaking, examination of the 1947-49 experiences of a number of states shows that changes in: (1) per capita income; (2) the ratio; "income from agriculture to total income;" and (3), percentage contributions of local governments toward general assistance expenditures, will produce the changes shown below in general assistance expenditures.³⁵

1. A change of \$100 in per capita income payments will change per capita general assistance expenditures by about \$.10 in the same direction.

2. A change of five points in the proportion of income arising from agriculture will change per capita general assistance expenditures about \$.10 in the opposite direction.

3. A change of fifteen points in the local participation factor will change per capita general assistance expenditures about \$.10 in the opposite direction.

B. Pennsylvania Changes in Financial Responsibility for General Assistance and Variations in Local Capacity to Finance General Assistance—

Contemplated shifts in financial responsibility for general assistance—or for that matter, for any assistance program—call for an evaluation of the capacity of local government to finance whatever share of the cost of the program is shifted to them.

Assuming that part or all of the cost of general assistance is to be shifted from the Commonwealth to the counties, the fiscal capacity of Pennsylvania's counties in relation to the cost imposed upon them becomes a matter of concern.

In Pennsylvania, the backbone of county finance is taxable real property. However, the burdens imposed upon the counties by shifts in financial responsibility for general assistance cannot be compared by relating cost shifted to counties and county assessed valuation of taxable property. County assessed valuations are unreliable measure of the value of taxable real property.³⁶ If significant comparisons of burden are to be made, the county costs consequent upon a shift in financial responsibility for general assistance must be related to the market value of taxable real property.

Chart IV, on the opposite page, shows, in terms of the market values of taxable real property, the tax rates which would have been necessary to finance the general assistance expenditures which were made in the counties during the year 1949. It will be noted that the rates range from .15 mills for Bucks County to 4.54 mills for Montour County. The Commonwealth average is 1.20 mills.

[Chart not reprinted in this appendix. See original report, page 75.]

C. Pennsylvania: Alternative Plans, and Their Probable Effects, for the Shifting of Part of the Cost of General Assistance to the Counties—

³⁵ For method and detail, see Appendix E.

³⁶ For intercounty variations in the assessed-market value ratios of taxable real property, see Appendix E.

It has been pointed out previously that a shift in financial responsibility for general assistance usually produces changes in expenditures.

PLAN I:

Plan I proceeds on the basic assumption that it is desirable, from a policy point of view, to shift to the counties one half of the cost of general assistance granted to persons who are not permanently unemployable.

It is believed that persons classified in 1949 as permanently unemployable will be eligible for aid to the totally disabled.

Under such a plan, the cost to the counties in any one year would depend upon: (1) the number of general assistance recipients who are not permanently unemployable, and (2), the magnitude of the payments made to those eligible for grants. The second factor is subject to direct legislative and administrative control; given an established policy, the magnitude of the first factor depends largely upon economic conditions.

To visualize the implications of such a plan, particularly of effects upon county tax rates, let it be assumed that total general assistance is of the magnitude of the load which obtained in 1949, which involved a Commonwealth expenditure of approximately \$27,500,000. Approximately \$6,900,000 of the total expenditure was accounted for by grants to the permanently unemployable. Hence, approximately \$20,600,000 represents expenditures for grants to fully or partially employables.

A shift in the financial responsibility for one half of the load would have reduced total expenditures by an estimated \$2,750,000.³⁷ Hence, a plan contemplating a shift to the counties of one half of the financial responsibility for assistance to unemployables would have imposed a financial obligation of approximately \$8,940,000 upon the counties. Inasmuch as the market value of real property taxable by the counties, as determined by the State Tax Equalization Board, is \$22,925,531,078, the average tax rate required to finance the county share of the load would have been about .39 mill. In other words, a parcel of real property which has a market value of \$10,000, on the average, would have been subject to a tax of about \$3.90.

However, it should be understood that the general assistance tax rates in specific counties would show marked variations from the state average of .39 mill.³⁸

If it is desirable, as a matter of policy, to reduce the variation in county tax rates for general assistance, the plan could be modified to provide that grant expenditures in excess of expenditures that can be financed by the imposition of a tax rate of .39 mill should be the responsibility of the Commonwealth.

As regards the effects of this modification, it is estimated, on the basis of the 1949 load, that:

1. In each of 33 counties, the yield of a tax of .39 mill upon the market value of taxable real property would have exceeded one half of the cost of general assistance grants.

2. In each of 34 counties, the yield of a tax of .39 mill upon the market value of taxable real property would not have produced sufficient revenue to finance one half of the cost of general assistance grants.

3. In the 34 counties referred to under 2, above, the dif-

³⁷ For details regarding the calculation of the reduction factor, see Appendix E.

³⁸ See above, Chart IV, page 75.

ference between one half of the cost of general assistance grants and the yield of a .39 mill tax upon the market value of taxable real estate would have amounted to \$2,270,000. Under the plan, as modified, this difference would have been financed by the Commonwealth.

4. The financing by the Commonwealth of the difference referred to under 3, above, would have reduced the aggregate county contribution toward the financing of general assistance under the shift, from \$8,940,000 to \$6,740,000, and would have reduced the county participation ratio from 36.1 per cent to 26.4 per cent of total expenditures.

PLAN II:

Plan II is similar to Plan I as modified. It proceeds on the assumption that it is desirable, as a matter of policy, to shift all of the cost of general assistance grants to employables to the counties, subject to the condition that no county be required to levy a tax rate for assistance in excess of a legislatively stipulated maximum rate.

It is estimated³⁹ that under this plan the reduction factor would increase from \$2,750,000 to \$5,270,000. Hence, the grant cost to be borne by the counties would be \$15,370,000 instead of \$8,940,000 as under Plan I. The average county tax rate, in terms of the market value of taxable real estate, necessary to produce \$15,370,000 is .67 mill.

As regards the effects of Plan II, it is estimated on the basis of the 1949 load that:

1. In each of 33 counties, the yield of a tax of .67 mill would have exceeded the cost of general assistance grants.

2. In each of 34 counties, the yield of a tax of .67 mill upon the market value of taxable real property would not have produced sufficient revenue to finance the cost of general assistance grants.

3. In the 34 counties referred to under 2, above, the difference between the cost of general assistance grants and the yield of a .67 mill tax upon the market value of taxable real estate would have amounted to \$3,900,000. Under the plan, if .67 mill were the legislatively-stipulated maximum rate, this difference would have been financed by the Commonwealth.

4. The financing by the Commonwealth of the difference referred to under 3, above, would have resulted in an aggregate county obligation of \$11,750,000, and a county participation ratio of 49.5 per cent of total expenditures.

D. Fitting Alternative Financing Plans Into the Contemporary Administrative Pattern—

The types of plans outlined above can be utilized in connection with the financing of all assistance programs: aid to the aged, aid to dependent children, aid to the permanently and totally disabled and general assistance.

Whatever the primary objective involved in contemplated changes in financing method, some technical, administrative and policy factors call for consideration.

1. Technical Considerations: From a purely technical point of view, it may be noted that expenditures under different assistance programs show pronounced differences as regards variations over time.⁴⁰ In descending

order of stability over time, the programs rank as follows: old age assistance, aid to dependent children, general assistance. There is good reason to believe the new aid to totally and permanently disabled program will become about as stable as the old age assistance program.

In view of the budgetary procedures used by local governments, a program calling for relatively stable expenditures presents fewer technical difficulties for local governments than a program under which expenditures fluctuate widely.

2. Administrative Considerations: Currently, the Federal Government participates in the financing of old age assistance, aid to dependent children and assistance to the totally and permanently disabled. Under the circumstances, local financial participation in any of these programs would necessitate the collaboration of three levels of government.

3. Policy Considerations: As will be recalled,⁴¹ within the counties, responsibility for the administration of all assistance programs is lodged in county boards of assistance whose members are appointed by the Governor with the advice and consent of two thirds of all the members of the Senate.

At present, the county boards do not have the power to levy taxes and must administer all programs in conformity with the policies established or approved by the State Board of Public Assistance.

Assuming that it was decided to shift part or all of the cost of any assistance program to the counties, the question as to what body should raise the necessary moneys would have to be faced. In view of the fact that the county boards are appointive rather than elective, it would appear that the business of imposing the necessary taxes might have to be assigned to the county commissioners. The legislative imposition of such a duty would in turn raise the question of the proper relationship between county boards of assistance and county commissioners.

Again, it is a well established precept that public bodies should not be placed under obligation to levy taxes unless they have discretion as to the volume of expenditures. Hence, a shift in financial responsibility from the Commonwealth to the counties would probably call for participation by the tax levying authority in the formulation of assistance standards.

PART III

In Part III, an attempt is made to evaluate the operating efficiency of the agencies and departments charged with the administration of public assistance programs: the Department of Public Assistance, county boards of assistance and the Auditor General.

The Department of Public Assistance is charged with the over-all administration of the program. The county boards are charged with the details of administration within individual counties. The Auditor General makes so-called "eligibility audits" of selected cases in order to determine whether or not grants have been made in conformity with the specifications of the State Board of Public Assistance and the supplemental regulations of the Department of Public Assistance.

Details aside, it is the job of the Department of Public Assistance and the county boards to apply the eligibility

³⁹ For estimation techniques, see Appendix E.

⁴⁰ See above, Table III, page 27.

⁴¹ See above, Section II, page 13.

rules of the State Board of Public Assistance to the cases of applicants for public assistance. In effect, this means to ascertain the applicants' needs, in terms of dollars, in accordance with State Board rules, to establish the applicants' resources, in terms of dollars, in conformity with State Board rules, and to subtract resources from needs. It is the Auditor General's duty to audit the operations by checking both the facts and the arithmetic.

To facilitate appraisal of the operating efficiency of the parties involved, Section I, below, briefly outlines the educational background, job experience, salary and turnover rates of public assistance personnel, exclusive of the personnel employed by the Auditor General in connection with eligibility audits. Section II presents in summary form the results of a recheck on public assistance cases made by the Joint State Government Commission in collaboration with the Pennsylvania State Police.

Section I

PUBLIC ASSISTANCE PERSONNEL

A. The Federal Mandate—

Under the Federal Social Security Act, a state, in order to be eligible for Federal financial participation in any assistance program, must provide such methods of administration relating to the establishment and maintenance of personnel standards on a merit basis as the Federal Government deems necessary for the proper and efficient operation of the program. The merit system for the Department of Public Assistance employees established by the State Civil Service Act of 1941 has been approved by the Federal Security Agency.

B. Pennsylvania Public Assistance Personnel—

1. Total Number of Civil Service Employees—In October, 1949, the personnel concerned with the interpretation of assistance policies and the determination of eligibility of individuals for assistance numbered 2,289. Of these employees, 31 were located in the state office and 2,258 were operating within the counties.

The number of employees, by job classification, is shown below:

State Office	
Director of Assistance	1
Supervisor of Field Service	1
Senior Field Representative	5
Field Representative	12
Division Chief of Assistance Policies	1
Assistant in Policy	2
Director of Relief Work Program	1
Supervisor of Medical Program	1
Senior Supervisor	5
Supervisor	1
Junior Supervisor	1
Total	31

County Offices	
Administrative	
Executive Director	66
Assistant Executive	2
Social Service	
County Supervisor	13

Principal Supervisor	1
Advanced Supervisor	12
Senior Supervisor	21
Supervisor	46
Junior Supervisor	261
Advanced Visitor	2
Senior Visitor	738
Visitor	1,096
Total	2,258

2. Duties of Visitors and Supervisors and Civil Service Requirements—Visitors and supervisors are responsible for ascertaining the facts upon which eligibility for assistance is determined and for processing the facts in accordance with regulations. It is the duty of the visitor to make periodic investigations to ascertain changes in circumstances, if any, of recipients.

The educational and special experience qualifications which have been established by the Department of Public Assistance in collaboration with the Pennsylvania Civil Service Commission for the position of visitor and supervisor are as follows:

Supervisor: Full-time, paid employment of from six to ten years, depending upon the grade, during the last ten to fifteen years, including four to eight years of special experience. Special experience is defined as employment relating to the duties and responsibilities obtained in one or more of the following related fields: public assistance or welfare work, private welfare work, social group work and other public services. One year of high school may be substituted for one half year of employment and one year of college for one year of employment, but only college education may be substituted for part of the special experience. Graduate training in social welfare work may be substituted for special experience.

Visitor: Full-time, paid employment varying from five to six years according to the grade, including three to four years of special experience. Special experience is defined as work relating to the duties and responsibilities obtained in one or more of the following fields: public and private welfare work, teaching in accredited schools, registered or public health nursing, vocational counselling, credit investigation, personnel placement and rehabilitation. One year of high school may be substituted for one-half year of employment and college training may be substituted for special experience.

3. Educational Background of Visitors and Supervisors—The type and extent of educational training of supervisors and visitors are shown in Table XX.

Table XX shows that the great majority of both visitors and supervisors received liberal arts or educational training. Training in business and commerce ranks second.

4. Job Experience of Visitors and Supervisors—The type of job experience of public assistance supervisors and visitors is shown in Table XXI.

Table XX

None	382	20.7%	39	10.2%
Clerical	430	23.3	83	21.8
Business	40	2.2	5	1.3
Industry and Commerce	209	11.3	41	10.8
Technical	42	2.3	9	2.4
Professional Social Work	140	7.6	66	17.3
Educational and Ministry	458	24.8	115	30.2
Professional	78	4.2	13	3.4
Administrative and Supervisory	49	2.7	9	2.3
Other	16	.9	1	.3
TOTAL	1844	100.0%	381	100.0%

* Includes 77 supervisors in Allegheny County, 98 in Philadelphia County, 179 in all counties except in Allegheny and Philadelphia, and 27 in State Locations.

Examination of the table shows that some 20 per cent of visitors had no previous experience, and that another 48 per cent had experience in clerical or educational occupations. As regards supervisors, 30 per cent had educational experience and almost 22 per cent clerical experience. About 17 per cent of the supervisors had previous experience in social service work. Few visitors or supervisors show experience in occupations where they might have gained investigatory training.

3. Salaries of Public Assistance Visitors—Prior to September 16, 1950, visitors in the Department of Public Assistance were paid the following annual salaries:

Visitor	\$2,124-\$2,496
Senior Visitors	2,496- 2,820
Advanced Visitor	2,820- 3,168

The cost of living increase of September, 1950, has resulted in the following salaries being currently paid visitors in the Department of Public Assistance:

Visitor	2,328-\$2,700
Senior Visitor	2,700- 3,024
Advanced Visitor	3,024- 3,204

6. Visitor Turnover—Turnover is defined as the number of voluntary resignations during a one-year period. The percentage rate of turnover is the total number of such resignations divided by the average number of employees working during the year.

Table XXII shows visitor turnover rates for the years 1948 and 1949.

Table XXII

Turnover Rate of Visitors

	Average Number of Employees During Year	Total Number of Resig- nations	Percentage Rate of Turnover
1948:			
State Total	1,528	364	23.8%
Counties			
Allegheny	266	51	19.2
Berks	21	5	23.8
Cambria	25	3	12.0
Chester	17	3	17.6
Delaware	34	9	26.5
Luzerne	72	11	15.3
Montgomery	18	12	66.7
Philadelphia	448	196	43.8
Washington	23	7	30.4
Westmoreland	19	3	15.8
All Other Counties	585	64	10.9

1949:

State Total	1,643	283	17.2
Counties:			
Allegheny	271	34	12.6
Berks	23	2	8.7
Cambria	27	5	18.5
Chester	18	4	22.2
Delaware	38	7	18.4
Luzerne	72	11	15.3
Montgomery	21	14	66.7
Philadelphia	494	159	32.2
Washington	22	5	22.7
Westmoreland	23	5	21.7
All Other Counties	634	37	5.8

During 1949 in the state as a whole, the rate of turnover among visitors was 17.2 per cent. This was a decrease from 1948 when the rate was 23.8 per cent. However, in 1948, turnover rates in Montgomery, Philadelphia, Washington and Delaware counties exceeded 25 per cent. In 1949, this situation continued in Montgomery and Philadelphia counties.

Section II

THE OPERATING EFFICIENCY OF THE ADMINISTRATION OF PUBLIC ASSISTANCE

The operating efficiency of the administration of public assistance can be measured in terms of the accuracy and promptness with which the standards of the State Board of Public Assistance are applied to individual cases.

The application of the standards to the facts is, in the first instance, the responsibility of the visitor who works out of the county office. Presumably, the visitors' determinations are subject to immediate review by his supervisor. An audit unit, working out of the Department of Public Assistance in Harrisburg, re-examines cases selected at random and the Auditor General, in turn, reviews, on a sample basis, the net result of the determinations of county and departmental personnel.

As regards the review of the Auditor General,⁴² it seems that this officer does not examine the facts of any case unless on perusal of records in county offices, individual case records are found which appear to be incomplete or to contain conflicting entries.⁴⁴

A. Restitution—

When any of the administrative checks outlined above uncover assistance overpayments, the department, subject to certain conditions, attempts to recover the amount of the overpayment. The department distinguishes four types of overpayment for which restitution is not required:

"a. Overpayments resulting from circumstances which were beyond the recipient's control.

"b. Overpayments to recipients who have fulfilled their obligation for reporting and who cannot be expected to

know that their grants were in excess of amounts allowable.

"c. Any overpayment amounting to less than \$5. Restitution proceedings to collect amounts less than this are administratively wasteful.

"d. Overpayments which occur under such circumstances that it would be unreasonable to seek restitution."⁴⁵

However, it should be noted that, according to departmental regulations:

"Restitution is required only while the debtor is not receiving old age assistance, aid to dependent children, or general assistance and while he has resources more than sufficient to meet current living expenses as well as any unusual or emergency expenses. Payments which would reduce the debtor's available resources below current assistance standards are never required."⁴⁶

The amounts of overpayments for which restitution claims were set up and the amounts and percentages of collections on restitution claims are shown in Table XXIII.

Table XXIII

Public Assistance Restitution Overpayments and Amounts Collected, 1947-1950

Year	Restitution Overpayments	Collections	Collections as Per Cent Overpayments
	(1)	(2)	(3)
1947	\$1,316,602	\$371,052	28.2%
1948	1,718,150	415,313	24.2
1949	1,830,001	396,612	21.7
1950*	2,880,515	453,121	15.7

Source: Department of Public Assistance.

* First ten months.

It may be noted, from an inspection of Column (3) of the table, that in all four years collections were less than 30 per cent of restitution overpayments. Furthermore, collections as percentages of overpayments have been decreasing since 1947.

B. Re-examination of Selected Public Assistance Cases by the Joint State Government Commission—

The operating efficiency of the agencies concerned with the administration of public assistance, particularly the efficiency of the Department of Public Assistance and county boards of assistance, is not only adequately measured in terms of overpayments such as are reflected in restitution claims. All social and humane considerations aside, underpayments are as serious a reflection upon operating efficiency as are overpayments.

For the purpose of approximating both underpayments and overpayments, the Joint State Government Commission in collaboration with the Pennsylvania State Police, has reinvestigated a representative sample⁴⁷ of public assistance recipients.

The Commission staff prepared the schedules used in the re-investigation.⁴⁸ The Pennsylvania State Police made the

⁴² For a discussion of turnover rates, see: W. E. Mosher and J. D. Kingsley, *Public Personnel Administration* (Harper, New York [1941]) p. 341.

⁴³ The General Assembly makes no direct appropriation to the Auditor General for expense incurred in connection with eligibility audits. The Department of Public Assistance allocates funds to the Auditor General for this purpose. In 1949, the amount so allocated was \$269,320, and expenditures for this purpose were \$254,541.19.

⁴⁴ For correspondence between Joint State Government Commission and the Auditor General bearing upon this matter, see Appendix F.

⁴⁵ Commonwealth of Pennsylvania, Rules and Regulations of the Department of Public Assistance, Section 381.1, May 1, 1950.

⁴⁶ *Ibid.*, Section 381.7, July 1, 1949.

⁴⁷ For method of sample selection, see Appendix F, page 133.

⁴⁸ For sample of schedule used, see Appendix F, page 134.

actual investigation of the facts. The Commission staff compared and analyzed the facts as established by the Pennsylvania State Police with the facts as shown in the case records.

Table XXIV, on opposite page, summarizes the findings of the re-investigation.⁴⁹

Examination of Table XXIV shows that the estimated net overpayment for all assistance programs amounted to \$7,953,000 for the year 1949. The share of the estimated net overpayment financed by means of Commonwealth taxes amounted to \$5,075,000.

⁴⁹ For details, see Appendix F, Appendix Table F-1, page 173.

TABLE XXIV

Estimated Net Overpayments to Recipients of Old Age Assistance, Aid to Dependent Children, and General Assistance, 1949

APPENDICES

APPENDIX A

ELIGIBILITY CONDITIONS FOR PUBLIC ASSISTANCE PROGRAMS IN PENNSYLVANIA, JANUARY, 1951

Eligibility Factors	General Assistance	Old Age Assistance	Aid to Dependent Children	Aid to the Permanently and Totally Disabled
(1)	(2)	(3)	(4)	(5)
Age	Under 65 years.	65 years or over.	Child must be under 18 years if regularly attending school.	18 to 64, inclusive.
Citizenship	Must be a citizen or must have filed first papers within two years prior to January 1, 1940.	No requirement.	No requirement.	Must be a citizen or must have filed first papers within two years prior to January 1, 1940.
Special Categorical Condition	None.	None.	Child must be deprived of parental support or care because of death, continued absence from home, or physical or mental incapacity of one or both parents.	Applicant must have a physical or mental impairment, disease or loss likely to continue throughout his lifetime; and this condition makes it unlikely that he will be able to engage in any gainful occupation, or homemaking without pay.
Disposition of Resources Prior to Application	If applicant has transferred any real or personal property within two years prior to application, he must have received "fair consideration" in return for the transfer.	If applicant has transferred any real or personal property within two years prior to application he must have received "fair consideration" in return for the transfer. If an applicant transferred property valued at less than \$500, this does not come within this provision.	If applicant has transferred any real or personal property within two years prior to application, he must have received "fair consideration" in return for the transfer.	If applicant has transferred any real or personal property within two years prior to application, he must have received "fair consideration" in return for the transfer.
Employment	An employable person is required to seek employment related to his capacity for work. When a job within his capacity is available, the person is not eligible for assistance if he refuses employment. An employed person is eligible for assistance if his wages are less than the Department's allowances for him or his family.	No requirement.	An employable person is required to seek employment related to his capacity for work. When a job within his capacity is available, the person is not eligible for assistance if he refuses employment. An employed person is eligible for assistance if his wages are less than the Department's allowances for him or his family.	Applicant must be unemployable.
Need	An individual's income must be less than the sum of the allowances the Department has set up as minimum living requirements. In determining the extent of need and the amount of the grant, the Department recognizes certain living necessities such as food, clothing, fuel and shelter.			
Living Arrangement	May not reside in any tax-supported institution.	May not reside in any tax-supported institution.	Child must be at home under care and control of father, mother, grandfather, grandmother, brother, sister, uncle or aunt in a place of residence maintained by one or more of such relatives as his or their own home.	May not reside in any tax-supported institution.
Property	Residence Real Property—Ownership of residence real property does not affect eligibility if it is not of unusual value and provided the individual acknowledges the liability of the property for reimbursement. Nonresidence Real Property—The applicant who owns real property in which he is not residing is ineligible unless he takes adequate steps to sell it promptly at whatever price the property brings when it is offered for sale on the open market. Personal Property—Generally, personal property which is immediately convertible into cash is considered available to meet current living expenses. The cash value of insurance sufficient to purchase \$500 paid-up whole life insurance policy or \$300 in the form of an irrevocable burial reserve is exempt from this provision.			
Residence	One year in Pennsylvania, except that, if applicant has resided in Pennsylvania less than one year, assistance may be granted if he was last a resident of a state with which Pennsylvania has reciprocal arrangements to grant assistance without regard to length of residence.			
Support by Relatives	Under the provisions of the support law, the Department requires that a spouse, parent or child, if financially able, contribute to the support of an assistance applicant.

APPENDIX C

ADJUSTMENT OF SELECTED 1938 GRANTS FOR CHANGES IN THE COST OF LIVING

The 1938 grants have been adjusted for changes in the cost of living on the basis of the United States Bureau of Labor Statistics Consumers' Price Index of the prices paid for commodities purchased by moderate income families living in large United States cities.

A similar index for Philadelphia and Pittsburgh, based on United States Bureau of Labor Statistics data, fluctuated within 2 per cent of the all-city index during the 13 years considered.

The consumers' price index used is reproduced below.

APPENDIX TABLE C-1

Consumers' Price Index for Moderate Income Families in Large Cities, by Group of Commodities (December 15, 1938 = 100)

Date	All Items	Food	Clothing	Shelter Maintenance ¹
(1)	(2)	(3)	(4)	(5)
December 15, 1938 ..	100	100	100	100
December 15, 1939 ..	99	98	100	100
December 15, 1940 ..	100	100	101	101
December 15, 1941 ..	110	116	114	104
December 15, 1942 ..	120	136	125	104
December 5, 1943 ..	124	141	133	105
December 15, 1944 ..	127	141	141	105
December 15, 1945 ..	130	145	148	105
December 15, 1946 ..	153	191	175	107

December 15, 1947 ..	167	213	189	115
December 15, 1948 ..	171	211	199	120
December 15, 1949 ..	167	203	184	123
December 15, 1950 ..	178	222	195	127

Source: United States Department of Labor, Bureau of Labor Statistics, "Monthly Labor Review," August, 1940 to February, 1951.
¹ Includes rent, fuel, light, and ice.

As a matter of actual adjustment operation, the 1938 maximum grant for a four-person family receiving general assistance or aid to dependent children, as well as the 1938 maximum for an individual residing alone and receiving old age assistance, has been broken into three major parts: food, clothing and shelter maintenance. Each part has been adjusted for changes in cost, and the adjusted parts have been recombined.

In connection with this adjustment, it may be noted that the behavior of indices for items entering into the budgets for children differ somewhat from the behavior of indices for items entering into the budgets of adults and families.

Tables C-2 and C-3, below, show indices for the items entering into the budgets of adults and children, respectively.

APPENDIX TABLE C-2

Index of Costs of Food Requirements for an Adult and a Child Living in a Large City (1939 = 100)

Year	Moderately Active Man	Child 6-12 Years of Age	Difference	Difference as Per Cent of Index for Adult
(1)	(2)	(3)	(4)	(5)
1939	100.0	100.0	0.0	0.0
1940	102.2	102.6	0.4	0.4
1941	111.0	112.7	1.7	1.5
1942	132.5	133.8	1.3	1.0
1943	155.3	156.0	0.7	0.5
1944	153.5	153.3	0.2	0.1
1945	159.1	159.4	0.3	0.2
1946	173.4	172.8	0.6	0.3
1947	200.7	201.0	0.3	0.1
1948	211.6	212.4	0.8	0.4
1949	207.0	207.1	0.1	0.0

Sources: Pennsylvania Department of Public Assistance, "Current Living Costs as Related to Standards of Public Assistance in Pennsylvania," December, 1939-December, 1949, and United States Department of Labor, Bureau of Labor Statistics, "Monthly Labor Review," 1940-1950.

APPENDIX TABLE C-3

Index of Costs of Clothing Requirements for an Adult and a Child Living in a Large City (1944 = 100)

Year	Male Adults	Male Child 6-11 Years of Age	Difference	Difference as Per Cent of Index for Adult
(1)	(2)	(3)	(4)	(5)
1944	100.0	100.0	0.0	0.0
1945	116.7	115.8	0.9	0.8
1946	133.3	126.3	7.0	5.3
1947	133.3	126.3	7.0	5.3
1948	141.7	131.6	10.1	7.1
1949	125.0	126.3	1.3	1.0

Sources: Pennsylvania Department of Public Assistance, "Current Living Costs as Related to Standards of Public Assistance in Pennsylvania," 1944 to 1949, and United States Department of Labor, Bureau of Labor Statistics, "Monthly Labor Review," October 1940-October 1950.

APPENDIX TO THE

Columns (5) of Tables C-2 and C-3 show the differences between the indices of items entering into budgets for adults and children, respectively, as percentages of the indices of items entering into budgets for adults. Examina-

tion of Column (5) in the two tables shows conclusively that the differences are not of sufficient magnitude to affect consequentially the adjustment of selected 1938 grants for changes in the cost of living.

APPENDIX TABLE C-4

* For a four-person family receiving general assistance or aid to dependent children.

† For an individual residing alone and receiving old age assistance.

‡ Includes rent, fuel, and light.

APPENDIX TABLE C-5

Estimated Effects of Changes in Maximum Allowances for General Assistance, Aid to Dependent Children and Old Age Assistance Since 1938

Allowances, by Programs, Which Were Changed	Year of Change	Nature of Change	Reason for Change	Estimated Effects
(1)	(2)	(3)	(4)	(5)
Shelter maintenance,* general assistance, aid to dependent children.	1939	Reduction.	None given.	Compensated for change in costs.
Food, general assistance, aid to dependent children.	1942	Increase.	To compensate for change in cost	Compensated for change in costs.
Food, old age assistance.	1942	Increase.	To compensate for change in cost.	Partially compensated for increased costs. Net result, a decrease in standards.
Food, larger families, general assistance, aid to dependent children.	1942	Increase.	To adjust for inequities to larger families.	Data inadequate for reliable estimate.
Shelter maintenance,* general assistance, aid to dependent children.	1942	Increase.	To bring allowances more nearly in line with average costs.	Increased standard.
Shelter maintenance,* old age assistance.	1942	Increase.	To increase standard.	Increased standard.
Food, general assistance, aid to dependent children, old age assistance.	1943	Increase.	To partially compensate for increased costs and for elimination of Federal Food Stamp Plan.	Increased standard.

APPENDIX TABLE C-5 (Continued)

Allowances, by Programs, Which Were Changed	Year of Change	Nature of Change	Reason for Change	Estimated Effects
(1)	(2)	(3)	(4)	(5)
Shelter maintenance,* general assistance, aid to dependent children, old age assistance.	1943	Decrease.	None given.	Decreased standard.
Shelter maintenance,* general assistance, aid to dependent children.	1944	Increase.	To increase standard.	Increased standard.
Food, general assistance, aid to dependent children, old age assistance.	1944	Increase.	The revised allowances were related to living costs.	Increased standard.
Clothing, general assistance, aid to dependent children.	1944	Increase.	The revised allowances were related to living costs.	Increased standard.
Household supplies, general assistance, aid to dependent children.	1944	Introduction.	None given.	Increased standard.
Food, general assistance, aid to dependent children, old age assistance.	1946	Increase.	To compensate for increased costs.	Increased standard.
Clothing, school-age children, general assistance, aid to dependent children.	1946	Increase.	Clothing inadequacies most detrimental to school-age children.	Increased standard.
Shelter maintenance,* general assistance, aid to dependent children.	1946	Increase.	None given.	Compensated for increased costs.
All categories.	1947	Complete revision.	To eliminate program discrepancies, and to adjust for increased costs.	Compensated for increased costs, general assistance, aid to dependent children; decreased standard, old age assistance; changed relative food and clothing standards as between children and adults.
Food, clothing, shelter maintenance,* general assistance, aid to dependent children, old age assistance.	1948	Increase.	To adjust for increased costs.	Compensated for increased costs; relative food and clothing standards changed as between children and adults.
Shelter maintenance,* general assistance, aid to dependent children, old age assistance.	1949	Decrease.	None given.	Decreased standard.
Food, clothing, general assistance, aid to dependent children, old age assistance.	1950	Decrease.	To compensate for decreased costs.	Compensated for decreased food costs except food standard remained higher than in 1948 for children 12-18 years old; clothing standard remained higher than in 1948 for all groups.
Most special allowances.	1950	Elimination.	None given.	Decreased standards for recipients of special allowances.
Special diet allowances.	1950	Restoration.	To promote rehabilitation to make treatment at home possible, and to provide required diets for chronic diseases.	Increased standards.
Food, general assistance, aid to dependent children, old age assistance.	1950	Increase.	(No relevant data received since August, 1950.)	Compensated for increased food costs except food standard increased for children under 5.

S. Department of Labor, Bureau of Labor Statistics, "Monthly Labor Review," August, 1940 to October, 1950.

* Includes rent, fuel and light.

APPENDIX D

GENERAL ASSISTANCE SAMPLES:
METHOD OF SELECTION AND TESTS
OF REPRESENTATIVENESS

The 1947 and 1949 general assistance samples were selected by the use of identical methods and subjected to identical tests.

The samples are stratified random samples. All cases were selected at random from the public assistance check lists. The number of cases selected from each county represents a constant proportion of the total case load. Hence, the distribution of cases by county is subject to no error, other than that included by the indivisibility of a case. In several instances, cases were closed prior to the mailing of the assistance check, and the check returned to the Department of Public Assistance. These cases were replaced by other randomly selected from the same county. The number of cases totaled 1,832 in 1947 and 2,137 in 1949.

Total monthly grants and number of recipients for all cases on the assistance rolls during the final weeks of June, 1947, and June, 1949, have been obtained from the Department of Public Assistance. The average grant per case and the average per capita grant for the general assistance population were ascertained and the samples tested for representativeness by comparing the values estimated on the basis of the samples with the comparable values for the population. The results are summarized below.

Year	Measure Tested	Sample Mean	.95 Probability Range of Sample Mean	Population Mean
1947	Per Capita Grant	23.69	23.32—24.05	23.63
	Per Case Grant	39.47	38.34—40.60	39.25
1949	Per Capita Grant	29.71	29.22—30.20	29.80
	Per Case Grant	57.87	56.45—59.28	56.78

The summary shows that for the measures tested, the mean value computed from the sample does not differ from the mean value for all cases receiving assistance.

Population means are not available for other case or individual characteristics. Since the samples are representative of the entire relief load for pre-case and per capita grants and were selected at random, it is assumed that they are also representative as regards all other characteristics.

GEOGRAPHIC COMPARISONS

In certain of the tables in this appendix, comparisons are made among the following counties and groups of counties:

1. All counties;
2. Philadelphia County;
3. Allegheny County;
4. All counties except Philadelphia and Allegheny;
5. Six anthracite coal counties: Carbon, Columbia, Lackawanna, Luzerne, Northumberland and Schuylkill;
6. Ten rural counties; Bedford, Fulton, Greene, Indiana, Juniata, Perry, Pike, Somerset, Susquehanna and Wyoming.

As used here, the term "rural" refers to a relative ab-

sence of industry but does not necessarily indicate agricultural importance. The counties selected were the lowest ten in per capita "value added" by industry in 1947. Anthracite counties are the six highest in per capita anthracite coal output. It should be noted that the rural and anthracite counties are subgroups of group 4—all counties excluding Allegheny and Philadelphia.

APPENDIX TABLE D-1

Percentage Distribution of Total General Assistance Cases by Number of Recipients in Case, Selected Regions, 1947 and 1949

APPENDIX E

DETERMINANTS OF THE LEVEL OF GENERAL ASSISTANCE EXPENDITURES

The problems implicit in the explanation of interstate variations in per capita assistance expenditures and the prediction of expenditures under changed conditions presupposes the isolation of the factors which determine the level of per capita assistance expenditures.

A close examination of the relevant data shows that during recent years both interstate and interyear variations in per capita general assistance expenditures have been associated with differences in the magnitude of the following factors:

1. Per capita income payments measured in dollars.
2. Proportion of total income payments derived from agriculture, measured in percentage terms.
3. Proportion of total general assistance expenditures financed by local governments, measured in percentage terms.

If the historical relationships can reasonably be expected to be stable in space and time, estimates off per capita general assistance expenditures can be made on the basis of the values of the above three factors. A multiple linear regression of the three independent variables on the dependent variable, per capita expenditures, provides a basis for such estimates.

Concerning the observations used, it should be noted that, in a number of states, the division of financial responsibility for general assistance between state and local governments is mandated by a statutory formula which, in effect, produces an inverse relationship between expenditures and the local participation factor. It is common procedure to require local governments to levy a specified rate on locally taxable property, the state furnishing the difference between total expenditure and the yield of the specified rate. In view of the fact that property assessments are relatively constant over time, it follows that the local participation factor is completely determined by the level of expenditures. Hence, to avoid bias, it was necessary to eliminate all states in which such formulae were used.

Only observations for states in which the local participation factor was greater than 95 per cent or less than 5 percent were utilized. Under the circumstances, 73 observations are available: 22 states in 1947, 25 in 1948 and 26 in 1949.

For these 73 observations, the multiple regression surface is given by the following formula:

$$V_1 = .000976X_2 - .02126X_3 - .00729X_4 + .48659$$

where: X_1 = per capita general assistance expenditures

X_2 = per capita income

X_3 = proportion of income derived from agriculture

X_4 = local participation percentage

The multiple correlation coefficient is .73.

The partial correlation coefficient associated with the dependent variable are:

$$r_{12 \cdot 34} = .45$$

$$r_{13 \cdot 24} = -.41$$

$$r_{14 \cdot 23} = -.54$$

All measures of correlation are significant.

CALCULATIONS OF ESTIMATED "SAVINGS" ON ACCOUNT OF LOCAL PARTICIPATION IN GENERAL ASSISTANCE EXPENDITURES

Two estimates of "savings" consequent upon shift in financial responsibility for general assistance are presented below. Both estimates are based upon the 1949 general assistance expenditure in the amount of \$27,517,938. Of this total, an estimated \$6,879,484 was paid to permanently unemployable recipients. The first estimate is based on the assumption that one-half of the cost of expenditures to recipients not permanently unemployable is shifted to the counties. The second estimate is based on the assumption that the total cost of expenditures to those recipients not permanently unemployable is shifted to the counties.

A modification is introduced in both plans to provide that expenditures in excess of expenditures that can be financed by the imposition of a specified tax rate on the market value of locally taxable real property shall be the responsibility of the Commonwealth.

From the multiple correlation formula, it may be noted that the coefficient of X_3 , the local participation factor, is .00729. This indicates that a "saving" of \$.00729 per capita can be expected for each increase of one point in the local participation factor, with other variables constant. In terms of the total population of 10,462,628, this "savings" is \$76,273.

Plan I

If the counties are to finance one-half of the payments to those recipients not permanently unemployable, the following conditions must be satisfied.

$$27,517,938 - (.00729) (10,462,628) (P) = R$$

$$6,879,484 + 2PR = R$$

where P = local participation percentage

R = total load reduced by savings on account of local participation

Solution of the equations gives

$$P = 36.10977$$

$$R = 24,763,752$$

Therefore, the estimated county share of the total reduced load is .3610977 (24,763,752) = \$8,942,134; and the total "savings" from the original load of \$27,517,938 is \$2,754,186.

The county reduced load of \$8,942,134 is equivalent to a tax rate of about .39 mill on the market value of real property taxable by counties. However, this is the average millage rate; in 33 counties the yield of a .39 mill tax on market value would exceed the estimated reduced expenditures, while in 34 counties, expenditures would ex-

ceed the tax yield. Therefore, state financing of the excess of expenditures over tax yields in the 34 counties showing "deficits" will produce a reduction in the "savings" or a "dissaving" from the original reduced load since the local participation percentage will be reduced. It follows from this condition that the dissaving attributable to the 34 counties with "deficits" will be the responsibility of the state and, therefore, that the only increase in the total county load comes about from the dissaving on account of the 33 counties whose tax yields are sufficient to cover expenditures.

It greatly simplifies the calculation and introduces only a negligible error to assume that no county is changed from a "nondeficit" to a "deficit" county by reason of the dissavings. With the foregoing assumption, the new local participation factor (P_1) and the new reduced load (R_1) and the new county amount (C_1) are given by the following formulae.

$$27,517,938 - (.00729) (10,462,628) (P_1) = R_1 = \frac{100 C_1}{P_1}$$

$$C - D + F (36.10977 - P_1) (.00729) (10,462,628) = C_1$$

where:

C = county amount before transfer of "deficit" to state = 8,942,134

D = total "deficits" before dissaving = 2,266,254

F = ratio of expenditure in nondeficit counties to total expenditures on account of nonpermanently unemployables = .09356*

Substitution of the above constants gives two equations in two unknowns for which the solution is

$$P_1 = 26.44968$$

$$R_1 = \$25,500,553$$

Therefore, the new county amount = .2644968 (25,500,553) = \$6,744,815.

Plan II

Calculations under the assumption that the counties finance the entire cost of expenditures to recipients who are not permanently unemployable follow the same pattern as outlined for Plan I. The solutions are shown below.

First reduced load	\$22,249,056
Local Participation percentage	69.079 +
County amount	\$15,369,572
"Savings" from 1949 load	5,268,882
Millage rate67
Load of 33 "nondeficit" counties	\$2,875,962
"Deficits" of 34 counties	3,895,172

Final reduced load	23,741,971
Local Participation percentage	49.506 +
Final county amount	\$11,753,755
"Savings" from 1949 load	3,775,967

APPENDIX F

COMMUNICATION FROM THE AUDITOR GENERAL RELATIVE TO "ELIGIBILITY AUDITS"

Under date of July 5, 1950, the Auditor General, in response to a request from the chairman of the Joint State Government Commission, submitted an outline of the pro-

* Since all savings and dissavings are distributed among counties proportionately, F is constant at all points.

cedures used by the Bureau of Public Assistance Audits, Department of the Auditor General, in connection with its "eligibility audits" of public assistance cases.

Since the outline did not include a reference to the technique used in connection with the selection of the sample of cases to be reviewed, the chairman of Joint State Government Commission, under date of July 10, 1950, requested information concerning the sample selection from the Auditor General. The following is the revised outline submitted in response to this request.

"1. The auditing of county relief rolls to determine eligibility of Public Assistance recipients is the responsibility of the Bureau of Eligibility Audits, Auditor General's Department. The entire personnel of this Bureau, with the exception of the Bureau Director, her Secretary and Statistician, spend their entire time in the field. Every effort is made to audit each county once a year.

"2. Each year, the Auditor General tries to audit 30% of the public assistance case load in each county.* To perform this work, he currently has an auditing staff of forty-nine persons, consisting of twenty-three case readers and twenty-six investigators. Eighty per cent of the investigating staff are men. This staff is a 'roving' group except in Philadelphia and Allegheny Counties where permanent crews are maintained. In addition to Philadelphia and Allegheny Counties, which are separate districts, there are six other auditing districts—a total of eight. Thus, at any one time, eight simultaneous county audits are being made, each under the direction of a crew leader representing the Auditor General.

"3. Selection of cases to be audited is made by the Auditor General's Department from the Active Assistance File in each office or district office of a county assistance board. Thirty per cent of the total county case load, exclusive of blind pensions, is audited. If it is found that the case record shows all eligibility conditions have been met, the case is stamped and signed by the case reader and returned to the active files.

"A duplicate list of the Active Assistance file in each county or district office is prepared in advance by a member of the auditing crew. Every 3rd, 5th, 11th or X number case in file is pulled by the crew leader and checked on her list. This eliminates duplication when making later audits. Specific cases are pulled and audited at the request of the Auditor General following complaints by groups or individuals.

"4. An 'Auditor General's Exception' is taken to cases in which a condition of eligibility has not been established. Exception is taken after thorough investigation by an investigator of the auditing unit. A desk exception may be taken without investigation if proof of eligibility is not contained in the case record. Thirty days to clear this exception are allowed the county assistance office, which may request and receive an extension of this time period to sixty days. If the Executive Director of the county board and the crew leader cannot agree upon action on the exception, the case becomes

'controversial' and is referred to the Director of Eligibility Audits, Auditor General's Department.

"5. A 'controversial' exception is cleared between the Director of Eligibility Audits, Auditor General's Department and a representative of the State Department of Public Assistance. A record of all exceptions, by county, is kept in the Bureau of Eligibility Audits of the Auditor General's Department.

"6. If few exceptions are found in Old Age Assistance cases, the normal percentage of such cases usually read may be decreased and the percentage of General Assistance and Aid to Dependent Children increased. If it is found that exceptions generally run higher than 25% or 30% in a county, the time limit set for such audit is extended."

SELECTION OF ASSISTANCE CASES FOR PURPOSES OF RE-EXAMINATION

The assistance cases to be re-examined were selected at random for each program from the Treasury Department check listings covering payments for the last half of December, 1949. The sample consisted of 448 cases distributed among the three assistance programs as follows: old age assistance, 151 cases; aid to dependent children, 149 cases; general assistance, 148 cases. The number of recipients included in these cases totaled 1,035.

All payments errors relate to the period December 16 to 31, 1949.

As regards the significance of the sample, the tabulation below shows that the chances are 19 out of 20 that for each program the mean grant computed from the sample is not significantly different from the average grant for all cases.

Program	Sample Average Grant	.95 Probabil- ity Range of Sample Mean	Popu- lation Average Grant
Old Age Assistance	\$41.18	\$38.81—\$43.55	\$40.24
Aid to Dependent Children	94.38	87.15—101.61	93.72
General Assistance	65.66	58.88— 72.44	63.17

Although the sample is adequate for aggregate estimates, it is not of sufficient size to yield reliable estimates as to the distribution of payment errors among counties or other geographic units.

SCHEDULE USED IN CONNECTION WITH THE RE-EXAMINATION OF PUBLIC ASSISTANCE CASES

The attached schedule was used in connection with the re-examination of a sample of public assistance cases.

It will be noted that the schedule provides for two entries under every factor bearing upon eligibility.

Briefly, the procedure used in making the re-examination was as follows:

1. The Joint State Government Commission requested the Department of Public Assistance to furnish the Commission with the actual case records of assistance recipients which had been selected by the Commission staff on the basis of the sampling procedure, outlined above.

* Note: It appears that the Auditor General does not take a 30% sample of the total case load, but "tries" to select a 10% sample of each of the three assistance programs.

2. The information was transcribed from the case record to the schedule.

3. The schedule was furnished to the Pennsylvania State Police with instructions to:

a. Make an on-the-spot investigation of all factors shown on the schedule.

b. Record the established facts on the schedule.

d. Return the completed schedule to the offices of the Commission.

4. Upon receipt of the completed schedule, the Commission staff audited all entries and computed under- and overpayments.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

* Appointed February 6, 1951.

† Appointed to fill the vacancy created by the death of Frederick L. Homsher.

‡ Term expired.

§ Deceased.

|| Resigned.

¶ Appointed to fill the vacancy created by the resignation of Homer S. Brown.

Pursuant to the directive of the General Assembly expressed in House of Representatives' Concurrent Resolution No. 74, Session of 1949, the Joint State Government Commission has studied the retirement systems of the Commonwealth with a view of ascertaining the magnitude of the costs involved in their operation. Herewith is presented a report embodying the results of this study.

To assist in the survey of the Commonwealth's retirement systems, the Commission, under authority of Act of 1943, March 8, P. L. 13, Section 1, appointed a subcommittee. On behalf of the Commission, the cooperation of the subcommittee members is gratefully acknowledged.

BAKER ROYER, Chairman.

INTRODUCTION

Section I of the report outlines the structural characteristics of retirement systems in general as well as the characteristics of the three Commonwealth retirement systems.

Section II shows the historical cost of these systems to the Commonwealth.

Section III presents estimates of the Commonwealth costs which would arise if changes in the State Employees' Retirement System suggested from time to time were enacted into law. Similar estimates cannot be made for the Public School Employees' Retirement System because of the extensive changes which were made in the system by the General Assembly of 1949. Basic data consequent upon these changes were not available in time to permit a report on their effects to the current session of the General Assembly.

A comprehensive comparative study of school and state employees' retirement systems was submitted to the General Assembly of 1949. See *School and State Employees' Retirement Systems—A Comparison*, Report of the Joint State Government Commission to the General Assembly of the Commonwealth of Pennsylvania, March, 1949.

Section I

THE STRUCTURE OF RETIREMENT SYSTEMS

A. Structural Characteristics of Retirement Systems—

Definition: A retirement system is a plan which provides for specified benefit payments to qualified employees upon termination of their employment, the payments usually being financed jointly or separately by employers and employees.

Basic Factors of Retirement Systems: Five basic factors enter into the structure of retirement systems:

1. Eligibility for membership.
2. Financial responsibility.
3. Eligibility for benefits.
4. Method of computation of benefits.
5. Method of benefit payment.

Although these factors are separate and distinct and can be modified individually, a change in any one factor usually changes some other factor.

1. Membership Eligibility—

Entry into a retirement system is generally restricted to some limited group of persons who become eligible for entry by virtue of their employment and/or the time period over which a given employer-employee relationship obtained.

2. Financial Responsibility—

Retirement systems are generally supported by contributions from employers or employees, or both. Systems may be operated on a pay-as-you-go basis, or on an actuarial basis.

When a retirement system is operated on an actuarial basis, the costs of all future payment obligations arising in connection with contemporary members is estimated and anticipated. Since most of these payments will not become due until future years, the contributions necessary to finance benefit payments can be spread over time. The specific amounts which must be periodically set aside depends upon estimated payment obligations and the rate of interest which the amounts set aside can earn.

3. Eligibility for Benefits—

A member of a retirement system may establish eligibility for benefits in one of three ways. "Superannuation benefits" may be made available either on the basis of the age of the member or his years of service. "Withdrawal benefits"—that is, benefits payable prior to the attainment of a certain age and/or before a specified number of years of service has been rendered—usually depend upon length of service. However, systems which require members to make contributions toward the financing of their retirement benefits usually provide that a member, on withdrawal from service, is entitled to a payment or a series of payments equivalent to his contribution plus accumulated interest. "Disability benefits" may be made available upon medical certification of disability; sometimes eligibility for this type of benefit depends upon completion of a given number of years of service.

4. Method of Computation of Benefits—

In actuarial systems, the value of benefits to the credit of any member at the time of his retirement equals the sum of all contributions to the accounts of that member made by the member and/or his employer, plus accumulated interest.

5. Method of Benefit Payment—

Benefit payments to retired members are usually made in equal monthly amounts. Some systems permit the retiree to select a benefit payment arrangement that will cover him and designated beneficiaries as well.

B. Commonwealth Retirement Systems—

The Commonwealth of Pennsylvania operates the Public School Employees' Retirement System, the State Employees' Retirement System and the Pennsylvania State Police Retirement System. The definitions of the basic factors for each of the three Commonwealth retirement systems are shown in Table I, page 7.

Table 1
The Retirement Systems of the Commonwealth, as of December 31, 1950

BENEFITS											
System	Membership	Financial Responsibility	Withdrawal Benefits			Disability Benefits			Superannuation Benefits		
			Qualification for Benefits	Amount of Benefits	Method of Payment	Qualification for Benefits	Amount of Benefits	Method of Payment	Qualification for Benefits	Amount of Benefits	Method of Payment
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
Public School Employees' Retirement System	Full time employees of the public schools, State Teachers' Colleges and similar institutions. Teachers, nurses, other professional employees, clerical help, janitors, etc. Present employees: employed before July 1, 1919, contributed for time since July 1, 1919. New entrants: contributions start after July 1, 1919.	Responsibility for member's annuity contributions by member plus 4% interest paid by the State. Responsibility for State's annuity divided between: (a) the Commonwealth (b) the school district	(a) An employee may withdraw, without option of state annuity, after leaving state employment, regardless of age or length of service. (b) An employee of the 1/140 class of membership only may withdraw after 25 years' service with an option of a state annuity. (c) Death of employee.	(a) Total accumulated deductions (including interest) on an annuity or deferred annuity which is the actuarial equivalent of the accumulated deductions. (b) Withdrawal may take either: (i) Full accumulated deductions (including interest). (ii) or annuity purchaseable with deductions plus a state annuity having the present value of the retirement annuity for which he would be eligible if he had reached supernaturation age. (c) Total accumulated deductions (including interest) paid to estate or named beneficiary.	(a) Lump-sum payment, single life annuity, or equivalent. (b) Same as (a), above. (c) Lump-sum payment.	Eligibility attained after 10 years' service, upon certification of disability by medical board. (a) A state annuity is added to the member's annuity so that the annual allowance is 1/90 of the final salary for each year of service; (b) generally it is at least 30% of the final salary ²	Single life annuity or a reduced annuity with balance from contributions to be paid on annuitant's death to a named beneficiary.	Sixty-two (62) years of age or older or a member of the 1/140 class who has completed thirty-five (35) years of service. Compulsory retirement at age seventy (70).	(a) State's Annuity: <i>Alloerance benefits granted before 1949.</i> An annuity whose annual payment is (i) 1/140 part of final salary for each year of service; (ii) plus 1/160 part of final salary for each year of prior service; (iii) each year of prior service. May be drawn under various options. (For Member's Annuity, see (c).) (b) <i>Alternate rate withdrawn in 1937</i> . Before 1937 members had the choice of an annuity on the rate of 1/160 part of final salary for each year of service, instead of the 1/140 part. Since 1937 all new employees are under various options. Total State's annuity not to exceed 50% of final salary. (c) <i>Member's Annuity</i> . An annuity purchasable by the member's accumulated deductions (including interest)	Single life annuity or choice of options.	
State Employees' Retirement System	Holders of a state office or position, paid on a yearly, monthly, per diem or hourly basis. Must be employed 100 days or 750 hours per year. Also certain county employees paid by State. Original members: employed before Jan. 1, 1925; contributed for time since Jan. 1, 1925. New Members: Contributions start after Jan. 1, 1925. ^a	Responsibility for member's annuity same as school employees' system. State's annuity: Commonwealth responsibility. (a) The Commonwealth (b) Part of the tax on foreign casualty insurance premiums.	(a) Same as school employees' system. (b) A member may withdraw: (i) on involuntary separation after 10 years' service; (ii) on voluntary separation after 25 years' service; (iii) after 5 regular sessions of the General Assembly. (c) Same as school employees' system.	(a) Same as school employees' system. (b) Same as (a), above. (c) Same as (a), above.	(a) Lump-sum payment, single life annuity, or equivalent option. (b) Same as (a), above. (c) Lump-sum payment.	Eligibility attained after 5 years' service upon certification by physician of disability.	Same as school employees' system.	Single life annuity. Payment made to estate if annuitant dies and there is a difference between the amount he has received and his accumulated deductions at time of retirement.	Sixty (60) years of age or older.	(a) State's Annuity: <i>Regular benefits withdrawn in 1937</i> . Before 1937 members had the choice of an annuity on the rate of 1/160 part of final salary for each year of service, instead of the 1/100 part. Since 1937 all new employees are under various options. Total State's annuity not to exceed 50% of final salary. (b) <i>Member's Annuity</i> . An annuity purchasable by the member's accumulated deductions (including interest)	Single life annuity or choice of equivalent options.
Pennsylvania State Police Retirement System	Pennsylvania State Police. Original members: employed prior to Jan. 1, 1925. New members: employed subsequent to Dec. 31, 1924.	Responsibility for member's annuity same as school employees' system. (a) The Commonwealth (b) Part of the tax on foreign casualty insurance premiums.	(a) Same as school employees' system. (b) An employee may withdraw: (i) on involuntary separation after 10 years of service; (ii) on voluntary separation after 23 years of service. (c) Same as school employees' system.	(a) Same as school employees' system. (b) Same as (a), above. (c) Same as (a), above.	(a) Lump-sum payment, single life annuity, or equivalent. (b) Same as (a), above. (c) Lump-sum payment.	Immediate eligibility on disability.	An annuity which is the sum of: (a) member's annuity; (b) plus state's annuity of 2/100 of final salary for each year of service; (c) in any case not less than 30% or more than 50% of final salary.	Single life annuity or choice of options.	Fifty (50) years of age or older. ^a	(a) State's Annuity (i) An annuity of 2/100 of final salary for each year of service; (ii) plus annuity of 2/100 final salary for each year prior to member's annuity. Total of (i), (ii), and (iii) shall not exceed 50% of final salary. (b) Member's Annuity. Annuity purchasable by the member's accumulated deductions. Rate of contribution is the same as that required by members of the State Employees' System.	Single life annuity or choice of options.

¹ The two classes of membership in each of the systems has brought special terminology into use. The term *prior service* is used to designate service before July 1, 1919 for Present Employees; or service before January 1, 1925 for Original Members.

² A member transferring between the State System and the School System may leave his funds in the system from which he separated, and upon supernumeration age may receive retirement benefits from that system, in addition to the benefits of the system he entered.

³ The minimum annual allowance is 30% of final salary or 8/9 of the annual allowance to use.

⁴ Judges in service the 2nd Monday of January, 1930, and members of the General Assembly who were members September 1, 1947, may elect to become original members. For Pennsylvania State Police, the original age provided retirement at age 60 during the first year the system was in operation. The age was reduced one year for each calendar year the system was in existence, until the minimum age had become 50 years. The age was supplemented up to January 1, 1931; Act of 1923, June 27, P. L. 458, as amended and supplemented up to January 1, 1931; and Act of 1937, June 23, P. L. 2423, as amended and supplemented up to January 1, 1931.

As regards the definition of the basic factors in the Commonwealth retirement systems, examination of the table shows with respect to:

1. Membership Eligibility—

All of the Pennsylvania systems recognize two classes of membership. The membership class of an employee depends, in general, upon the date on which he entered the service of the Commonwealth and the date of the establishment of the retirement system. In the Public School Employees' Retirement System, the groups are known as "present employees" and "new entrants." In the State Employees' and Pennsylvania State Police Retirement Systems, the two classes are known as "original members" and "new members."

2. Financial Responsibility—

The three Commonwealth retirement systems are operated on the actuarial basis, under which future obligations are estimated and anticipated, and periodic allocations are made to meet future obligations.

Specifically, the State Employees' Retirement System is supported by contributions of members and Commonwealth appropriations. The Public School Employees' Retirement System is financed by contributions of members and school districts, as well as Commonwealth appropriations. The Pennsylvania State Police Retirement System is supported by contributions of members, by appropriations from the Commonwealth, and by the allocation of a portion of the revenues from the state tax on foreign insurance companies.

3. Eligibility for Benefits—

Members of all three systems are eligible for benefits on:

- a. Retirement for superannuation;
- b. Withdrawal retirement;
- c. Retirement for disability.

4. Method of Computation of Benefits and Method of Benefit Payment—

When a member retires, he is paid an annuity. An annuity is an amount payable each year (in these systems, in monthly installments) for a given period. The retiree receives a single life annuity unless he selects one of the options described below. In the case of a single life annuity, the period during which payments are made is the remainder of the life of the retiree. The present value of an annuity is the amount of money which would have to be on hand now so that, with interest accumulated over the years, each installment could be paid during the expected life of the retiree.

The annuity to be paid consists of two parts, a member's annuity and a state's annuity.

The member's annuity is calculated in the following way: the sum of the member's contributions together with the interest paid by the State on these contributions is determined. Knowing the attained age of the retiree at the time of retirement, the actuary can estimate the life expectancy of the retiree. The size of the retiree's annuity is then determined so that the present value of his annuity, paid over the expected life of the retiree, will equal the amount of the member's contributions plus interest.

The state's annuity consists, in general, of a specific

fraction of the "final salary" for each year of service (exceptions are outlined in Table II, page 15). "Final salary" means the average salary over the last ten years of service for members of the Public School Employees' Retirement System, and the average salary over the last five years of service for members of the other two systems.

The member's annuity and the state's annuity are then added together to determine the total annuity payable to the retiree.

A retiree may wish to leave some portion of his claims to one or more other persons. In this case, certain alternatives are available. These alternatives are computed on an actuarial basis so as to represent the same total expected claim as the single life annuity, had that been selected. The alternatives are given below:

Option 1—a single life allowance reduced in amount by virtue of the proviso that upon the death of the member any balance remaining in the member's account is to be paid to a beneficiary designated at the time of retirement.

Option 2—a life allowance payable to the member throughout his life and continuing in the same amount to a beneficiary designated by the member.

Option 3—a life allowance payable to the member throughout his life and continuing in one-half the amount to a beneficiary designated by the member.

Option 4—any arrangement of benefits designated by the member which is certified by the actuary and approved by the retirement board. The actuarial value of the arrangement of benefits under this option may not exceed the actuarial value of the single life annuity.

The numerical calculation of an annuity may be illustrated by reference to a public school employee who took advantage of the 1949 option to change to the 1/140 class. Suppose the employee began work in 1917. Under the circumstances, the teacher will be considered a "present employee" with two years of prior service. If this teacher retires in 1951, having attained the minimum superannuation retirement age of 62, and if the final salary (the average of salaries over the last ten years) is \$2,800, his annuity will be computed as follows:

(a) Member's annuity: This will depend upon the member's contributions. Suppose that to his account there are sufficient funds to provide an annuity of \$400 per year.

(b) State annuity for over-all service:

$$34.\$2,800.\frac{1}{140} = \$680$$

(c) State annuity for prior service:

$$2.\$2,800.\frac{1}{140} = \$40$$

(d) State annuity consisting of the difference between the state annuity for service since 1919 and the member's annuity:

$$32.\$2,800.\frac{1}{140} - \$400 = \$640 - \$400 = \$240$$

TOTAL ANNUITY:

Member's annuity	= \$400
States's annuity = \$680 + 40 + 240	= 960
	<hr/>
	\$1,360

Section II

THE COSTS OF COMMONWEALTH RETIREMENT SYSTEM

A. Introduction

Any change in the factors which determine the structure of a retirement system is usually accompanied by a corresponding change in the expected monetary cost of the system to the employer, the employee, or both. A liberalization of the membership eligibility requirements results in increased expected costs, inasmuch as more persons are expected to receive benefits. If the division of financial responsibility is modified, the cost to the various participating parties will be altered. Any reduction in the eligibility requirements for benefits of a given size will be accompanied by increased costs, insofar as additional members qualify for and claim such benefits. Costs will also rise as a result of an increase in the amount of benefits paid under given circumstances, since larger payments will be made to the same number of recipients. Benefits, paid by different methods, could be made actuarially equivalent, so that a change in the method of payment may effect only administrative expenses.

B. Monetary Costs to Employer and Employees

In the three Commonwealth retirement systems, monetary or dollar costs are borne by both the employee and the employer, inasmuch as the employee pays for the member's annuity and the school district and/or the Commonwealth pays for the state's annuity. When a change in the definition of a factor is effected, the monetary cost of the change may fall upon the employee, the employer, or both, depending on the provisions of the law.

C. Annual or Biennial Payments in Relation to the Present Value of Total Costs

The present value of total dollar costs means the total amount of money which would have to be on hand now so that, with interest accumulated over the years, each commitment could be liquidated as it comes due. Annual or biennial payments could be made in any number of ways. In general, the practice in Commonwealth systems has been for the State and the school districts to make contributions in terms of a percentage of the payroll for the members of each system. This percentage is such that under current conditions it is expected to remain constant, but, in the past, it has been revised as conditions changed. The biennial contributions (except for overhead) by the Commonwealth to each of the three systems during the period 1935-1949 are listed in Columns (2), (4) and (6) of Table II, page 15. In the case of the Public School Employees' Retirement System, the school districts make additional contributions on behalf of their employees.

Table II

Commonwealth Contributions to the Retirement Systems Exclusive of Commonwealth Administrative Expenses

Biennium	School System		State System		Police System	
	State Contributions	Contribution per employed member*	State Contributions	Contribution per employed Member*	State Contributions	Contribution per employed member*
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1935-37	\$5,985,000.00	\$88.46	\$1,550,000.00	\$124.37
1937-39	6,050,000.00	85.14	1,500,000.00	58.91	\$100,000.00	\$62.97
1939-41	5,950,000.00	82.38	2,324,970.00	75.29	150,000.00	98.04
1941-43	5,950,000.00	83.08	2,347,000.00	85.68	150,000.00	97.47
1943-45	6,450,000.00	90.45	2,800,310.00	111.19	150,000.00	103.88
1945-47	8,192,000.00	117.64	4,457,050.00	166.80	325,970.18	229.72
1947-49	13,291,400.00	192.50	6,022,497.00	169.01	393,490.97	235.91

* Using membership at mid-point of biennium.

D. Changes in Factors, 1935-1949

Table III, page 17, shows the number of members and their average salaries for each of the three systems from 1935 to 1949. While the numbers of employed members in the school system and police system have remained nearly constant during the period considered, the employed membership of the state system has nearly trebled, largely by virtue of the liberalization of the eligibility requirements. The increases in the average salaries of the

school and police employees have been more pronounced than the increase in the average salary of the members of the state system. Increases in salary have increased retirement costs for both the employer¹ and the employee, since the state's annuity depends upon the size of the "final salary," and since each member's contribution remains a constant percentage of his salary.

¹ The term "employer" as used here includes both the Commonwealth and the school district in the case of members of the Public School Employees' Retirement System.

Table III

Membership and Average Salary in State, School, and Police Systems, 1935-1949

Year	School System		State System		Police System	
	Members in Active Service*	Average Salary	Members in Active Service†	Average Salary	Members in Active Service†	Average Salary
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1935	65,840	\$1,538	13,360	\$1,588	(Not yet created)	
1936	67,655	1,572	12,463	1,640

* As of June 30. † As of May 31.

Table IV, page 19, lists the legislative changes in factors, exclusive of changes in membership and salary levels, which were made during the period 1935-1949. All legislative changes made during a given biennium are shown in a single column and the changes relating to a given system are shown in a single row.

Table V, below, presents a classification of the 1935-49 legislative modifications of retirement system factors on the basis of their effects upon monetary costs and the distribution of these costs between employers and employees. The classifications are made on the assumption that the contemplated beneficiaries take advantage of the modification.

Table V

Distribution of Selected Factor Changes Made During the Period 1935-1949, by Expected Effect on Costs to Employer and Employee*

Increased or Changed Monetary Costs Accruing to:	Number of Changes Providing:	
	Monetary Costs Increased	Monetary Costs Decreased
(1)	(2)	(3)
Employer only	13	5
Employee only	None	None
Both	19	2

Source: Table IV, page 19.

* Four acts in Table IV are expected to have no effect or an indeterminate effect on costs.

Columns (3), (5) and (7) of Table II, page 15, list the biennial Commonwealth contributions per employed member for the three systems during the period 1935-1949. Changes in per-member contributions reflect the combined results of all factors changes other than changes in membership, as well as changes in expected monetary costs, resulting from the revision of estimates on the basis of the most recent data.

The effect upon costs of isolated statutory changes is here illustrated with reference to Acts No. 503, No. 560 and No. 561, Session of 1949.

Act No. 503 (1949, May 23, P. L. 1654) granted present contributors of the State Employees' Retirement System the privilege of transferring from the 1/160th contribution class to the 1/100th contribution class if this transfer was made during the time period June 1, 1949, to December 31, 1949. Provision was made that, if a member so transferring pay in full (in lump sum or in installments through payroll deductions) to the retirement system a sum equal to the difference between the sum of the amounts that would have been deducted had the member been in the 1/100th class at the time of joining the system and the sum of the amounts actually deducted, then the state annuity of that member should be the same as though the member had elected to contribute in the 1/100th class at the time of joining the system. This statute further provided that members who had previously transferred from the 1/160th class to the 1/100th class should also have this privilege of making back payments. The costs occasioned by the provisions of this statute are estimated to be \$230,000 for the biennium 1951-53. The present value of total cost is estimated to be \$1,285,000.

The provisions of Acts No. 560² and No. 561³ extend to officers and employees of the Department of Public Instruction, state teachers colleges, Thaddeus Stevens Trade School, Pennsylvania State Oral School for the Deaf and the Pennsylvania Soldiers' Orphans School the privilege of withdrawing from the Public School Employees' Retirement Fund and transferring their membership to the State Employees' Retirement Fund, on the condition that they pay back dues at rates applicable to members of the State Retirement System.

The additional cost to the State Employees' Retirement System occasioned by Acts No. 560 and No. 561 is estimated as \$480,000 for the biennium 1951-53. The additional cost to the State for this biennium is \$280,000 since State contributions on account of these employees would otherwise be made to the Public School Employees Retirement Fund. The

Table IV
Statutory Modifications of the Factors of Commonwealth Retirement Systems

System	Legislative Session								
	1935	1937	1939	1941	1943	1945	1947	1949	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
Public School Employers' Retirement System	123*—Extended retirement fraction election for present employees. 268*—Special exceptions made in law for persons employed 1932-33. 318*—State annuity for certain employees who separated from school service before the retirement system became operative.	314*—Regulated retirement of certain employees. 488*—Extended time for return to service.	190*—Retirement fraction election time for present employees extended. 273*—Power given to certain districts to reduce salaries in some cases, provisions for retirement and options while in effect.	294*—Fourteen years' employment sufficient for disability retirement. 278*—Increased requirements for disability benefits for ex military personnel. 282*—Provided for payments by school district of member's contributions for member in military service.	None	167*—Minimum of \$20/month for persons who left the school service before July 1, 1919, and taught not more than two years thereafter. 168*—Raised minimum to \$25/month. 204*—Extended retirement fraction election time for present employees. 331*—Terminated interest on accumulated deductions on the date of separation from service. 371*—Extended time for rejoining after military service.	120*—Provided State contributions on behalf of new members. 127*—Provided credit for military service for persons who resigned but returned within one year after discharge, on payment of member's contributions. 333*—Extended service allowance of certain employees. 340*—Validated transfer from School to State system.	183*—Fraction changed from 1/160 to 1/140. Retirement benefits after 35 years' service. Withdrawal benefits after 25 years' service. 335*—Increased allowances for certain persons already retired. 341*—Provided retirement minimum \$1,200 for 40 years' service or proportionate amount for lesser service, for members in 1/140 class. 360*—Extended time for withdrawing and transferring membership in certain cases.	
State Employers' Retirement System	173*—Annuities regulated.	179*—1/160 class closed. All new members on 1/100 rate; further regulated retirement rights, benefits, etc.	None	312*—Further defined "New Member." 116*—Provided for credit for military service if member's contributions are paid; increased requirements for disability benefits for ex military personnel.	None	370*—Extended time for rejoining after military service. 376*—Terminated interest on accumulated deductions on the date of separation from service.	463*—Defined "years of service," and "accumulated deductions." 172*—Persons loaned to U. S. to be credited for such service. 488*—Validated transfer from State to School system.	181*—Provided that disability allowance, if able to be gainfully employed, not to be greater than an amount which, added to salary, equals \$300/month. 445*—Allowed return to system with credit within 20 years. 503*—Extended time of transfer from 1/160 to 1/100. 561*—Permitted transfer from School system to State Employers' system.	
State Police Retirement System	453*—System established.	None	None	117*—Provided for credit for military service if member's contributions are paid; increased requirements for disability benefits for ex military personnel.	None	72*—New formula for computing amount of foreign casualty insurance tax to go to the State Police Fund. 336*—Extended time for making up payments for time in military service.	267*—Increased amount of the State annuities and payments. Death benefits and disability benefits changed. 315*—Credited money from the foreign casualty insurance tax to the State annuity.	567*—Raised participation factor amount of foreign casualty insurance tax paid into State Police Fund.	

* Act number.

present value of additional total costs to the State Employees' Retirement System, on the basis of current membership, is estimated to be \$2,656,000, and the present value of additional cost to the State, on the basis of current membership, is estimated as \$1,559,000.

Section III

ESTIMATED COSTS OF PROPOSED CHANGES IN THE STATE EMPLOYES' RETIREMENT SYSTEM

A. Past Proposals—

Bills introduced between 1941 and 1949 contemplating changes (except in membership and salaries) in the State Employees' Retirement System are classified in Table VI with respect to their elements and legislative history. The table does not include those bills embodying changes which were enacted into law.

Table VI

Number of Bills Contemplating Changes in Elements of State Employees' Retirement System, 1941-1949

Element to Be Changed	Number of Bills	Not Reported from Committee	Passed Second Reading in House of Introduction	Passed Third Reading and Final Passage in House of Introduction	Recommended or Dropped from Calendar
(1)	(2)	(3)	(4)	(5)	(6)
Amount of Superannuation Benefits	7	6	1
Superannuation Age	3	2	..	1	..
Loans to Contributors from own Contributions	5	2	..	2	1
Withdrawal of Accumulated Deductions, Age 60-65	1	1
Total	16	11	1	3	1

Source: Histories of Senate and House Bills, 1941 to 1949.

Examination of the table shows that, during the period 1941 to 1949, seven bills were introduced which contemplated a change in the amount of superannuation benefits; of these seven bills, only one passed second reading in the house of introduction. Three bills were introduced which contemplated changes in the superannuation age; of these, one passed third reading and final passage in the house of introduction.

The as-yet-unenacted proposals have dealt with a small number of elements, although they have varied somewhat in detail.

Among the seven bills proposing changes in the amounts of superannuation benefits, two bills—H. B. No. 210 (1947) and S. B. No. 749 (1949)—proposed a minimum superannuation annuity (member's annuity plus state's annuity) of \$1,200. One of these bills—H. B. No. 210 (1947)—proposed that this minimum should apply to all superannuation retirees with twenty-five or more years of service. No change in the members' rates of contribution was provided for in either bill. Subsection C, below, presents an estimate of the cost, to the state, of providing a minimum annuity of \$1,200 for twenty-five or more years of service and a proportionate part of \$1,200 for lesser years of service.

Two of the three bills dealing with a change in the

superannuation age—S. B. No. 175 (1943) and H. B. No. 983 (1945)—proposed a reduction of the minimum superannuation age for honorably discharged war veterans only. The other bill—S. B. 38 (1949)—proposed optional superannuation retirement for any member with thirty-five years of service. This bill makes no provisions for increased members' contributions. Inasmuch as data with respect to the veteran status of employees were not available, the cost of the latter proposal only has been estimated and is discussed in Subsection D below.

The cost of the adoption of both the minimum annuity proposal and the superannuation with thirty-five years of service proposal is slightly greater than the sum of their separate costs, inasmuch as a few persons retiring under the thirty-five years of service proposal would have annuities below the minimum amounts in the absence of the \$1,200 minimum. Estimates of the total cost of making both changes are presented in Subsection E, page 32.

The State Employees' Retirement System would not be expected to incur additional costs by permitting withdrawal of accumulated deductions by persons aged 60-65, nor by permitting loans to contributors from their own contributions.

B. Procedure Adopted in Estimating the Monetary Costs of Proposed Changes—

One approach to estimating the monetary costs of changes in a retirement system calls for prediction, on the basis of past rates of the number of the current members who will receive benefits of various sizes during the coming years. From this prediction, the annual costs for the coming years and the present value of total costs can be estimated for different interest rates.

The second approach calls for the computation of costs both for current membership and for all future members. The annual monetary cost for the coming years cannot be expected to remain constant from year to year, even if the total membership, salary distribution, and exit rates (in terms of proportions by attained age) remain constant, due to the fact that the system is still in the developmental stages and to the variation in employment policies. For example, 250 members might retire in one year, and only 150 the next year. In order to determine a representative annual cost which can be expected to remain constant, if the present total membership, salary distribution, and exit rates remain constant, a hypothetical stable membership distribution by age and years of service was constructed on the basis of the withdrawal, death, disability, and superannuation rates found to be characteristic of the membership.

On the basis of this stable membership pattern, the expected change in annual cost to the Commonwealth was determined for each of the proposals. The annual cost to the State of the adoption of the minimum annuity proposal, for example, is the amount the State would have to pay in a given year to cover the cost of the increases in annuities payable, to all persons retiring in that year, for the remainder of their lives. An estimate of annual cost depends, in part, on the interest rate assumed to be earnable on investments. It appears that a rate of 4 per cent was used in the determination of the table of the cost of annuities used by the actuary. This table was used to obtain a conditional estimate of the annual cost. A chart was constructed which shows how the annual

cost would vary if the earnable interest rate was less than 4 per cent.

The present value of the total cost of the change is the amount which would have to be on hand now, so that, with the interest which is earned on this amount, the annual cost due to the change could be met every year in the future.⁴ This present value has been expressed for different interest rates. If a given interest rate is expected to prevail through future years, the corresponding present value of the total cost of the change in the system is given by the appropriate chart.

C. Estimated Monetary Cost of Establishing a Minimum Superannuation Retirement Annuity of \$1,200 After Twenty-five Years of Service—

The estimated annual monetary cost of establishing a minimum superannuation annuity of \$1,200 after twenty-five years of service, and a proportionate part of \$1,200 for lesser years of service is given in Chart I, page 30, for different interest rates. The estimate is based on a constant membership and salary structure. If the membership and/or salary levels continue to increase, the annual cost of establishing a minimum annuity will also increase.

The estimated present value of total costs due to the establishment of such a minimum annuity is presented in Chart II, page 31, for different interest rates. Again, if membership and/or salaries increase, the present value of total costs will also increase.

The estimates shown in Chart II are based on the assumption that the minimum annuity would be available to members already retired as well as to future superannuation retirees, but not to persons who withdraw before reaching the superannuation age.

(Charts not reprinted in this appendix. See original report, pages 30 and 31.)

D. Estimated Monetary Cost of Permitting Superannuation Retirement After Thirty-five Years of Service—

The minimum age for superannuation retirement is now sixty years for members of the State Employees' Retirement System. However, a member under sixty years of age, with twenty-five or more years of service may withdraw voluntarily with a state's annuity having the same present value as the superannuation state's annuity to which the member would be entitled, were he sixty years of age. The effect of permitting superannuation retirement after thirty-five years of service would be to increase the size of the state's annuity to which a member, who withdraws with thirty-five or more years of service, is currently entitled.

The estimated annual monetary cost of adopting this proposal is shown by the solid line on Chart III, page 33, for different interest rates, on the assumption that the rate of superannuation retirement before age sixty would be the same as the current withdrawal rate for persons with thirty-five or more years of service.

Additional members might be induced to discontinue their employment before reaching age sixty as a result of the psychological effect of knowing that they are eligible for superannuation retirement and/or as a result of the increased annuities attributable to the adoption of

⁴ Since these estimates are based upon future membership, they are not identical with ordinary actuarial estimates.

this proposal. The broken line on Chart III, page 33, presents the estimated annual monetary cost of making the proposed change, for different interest rates, assuming that all members below age sixty would retire as soon as they become eligible for superannuation retirement. The annual cost is expected actually to lie somewhere between the two lines presented on Chart III, but the absence of experience under the proposed plan precludes a more precise estimate.

Corresponding estimates of the present value of total costs are presented in Chart IV, page 34.

(Charts not reprinted in this appendix. See original report, pages 33 and 34.)

E. Estimated Total Monetary Costs Consequent Upon Optional Superannuation Retirement After Thirty-five Years of Service and Providing for Minimum Annuities—

The estimated total annual monetary cost of instituting both of these changes is presented in Chart V, page 36, for different interest rates. The solid line gives the estimate based on the assumption that the rate of superannuation for persons under age sixty would be the same as the current withdrawal rate for persons with thirty-five or more years of service. The broken line represents the estimate based on the assumption that members under age sixty will retire as soon as they become eligible for superannuation retirement. These two lines may be regarded as minimum and maximum estimates based on the assumptions outlined in Subsection B, above.

Corresponding estimates of the present value of total monetary costs of instituting the two changes are presented in Chart VI, page 37, for different interest rates.

(Charts not reprinted in this appendix. See original report, pages 36 and 37.)

A PENNSYLVANIA SHRINE
THE INDEPENDENCE MALL
A REPORT OF THE JOINT STATE GOVERNMENT
COMMISSION
TO THE
GENERAL ASSEMBLY OF THE
COMMONWEALTH OF PENNSYLVANIA
SESSION OF 1951

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943 March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

JOINT STATE GOVERNMENT COMMISSION

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

Senate Resolution Serial No. 36, adopted March 13, 1951, directs the Joint State Government Commission "to initiate at once an intensive study of the problem of completion of the Independence Hall Mall" and to report "during the current Session of the General Assembly."

To aid in the study of Independence Mall, the Commission appointed a subcommittee in accordance with the Act of 1943, March 8, P. L. 13, Section 1. On behalf of the Commission, the cooperation of the subcommittee is gratefully acknowledged.

In order to secure the benefit of the points of view of all interested persons, an open meeting was held at Harrisburg on May 1. Present at this meeting, in addition to the members of the subcommittee, were The Honorable Oscar L. Chapman, Secretary of the Interior, United States of America; Judge Edwin O. Lewis, president of the Independence Hall Association; Edward Hopkinson, Jr., chairman of the Philadelphia City Planning Commission; Albert M. Greenfield, president of the Philadelphia Chamber of Commerce; and Donald A. Cadzow, executive director, S. K. Stevens, chief historian, and Henry H. Eddy,

* Appointed February 6, 1951.

† Appointed to fill the vacancy created by the death of Frederick L. Homsher.

‡ Term expired.

§ Deceased.

|| Resigned.

¶ Appointed to fill the vacancy created by the resignation of Homer S. Brown.

chief records officer, all of the Pennsylvania Historical and Museum Commission.

On May 9, the subcommittee met to hear reports and suggestions from The Honorable Milo F. Draemel, Secretary of Forests and Waters, Commonwealth of Pennsylvania; Edmund N. Bacon, executive director of the Philadelphia City Planning Commission; William S. Canning, engineering director of the Keystone Automobile Club and chairman of the Off-Street Parking Committee of the Philadelphia Highway Traffic Board; James B. Doak, Esq., counsel for the Merchants' Central Business Association of Philadelphia; and Roy F. Larson, architectural supervisor of the Independence Hall Association.

The Independence Mall area consists of three blocks, bounded by Chestnut, Sixth, Race and Fifth Streets. The first block of the area, bounded by Chestnut, Sixth, Market and Fifth Streets, has been acquired by the Commonwealth at an estimated cost, including engineering and demolition fees, of \$3,258,000. The 1948 assessed valuation of \$1,643,100 represented 50.4 per cent of the acquisition cost, including demolition. Of the acquisition cost, 69.4 per cent (\$2,261,000) will be chargeable against the General Fund and 30.6 per cent (\$997,000) will be chargeable against the Motor License Fund.

The 1950 assessed valuations of Block 2 of the mall, bounded by Market, Sixth, Arch and Fifth Streets, and Block 3, bounded by Arch, Sixth, Race and Fifth Streets, were \$1,770,400 and \$999,900, respectively. Assuming that the relation between acquisition costs, including demolition, and assessed valuation, associated with Block One, will hold for Blocks Two and Three, the acquisition costs of these blocks would be \$3,512,000 and \$1,984,000, respectively, or a total of \$5,496,000. Again, on the assumption that total acquisition cost of these two blocks would be divided between the General Fund and Motor License Fund in the proportion shown for Block One, the amounts chargeable against the General Fund would be \$2,437,000 and \$1,377,000, or a total of \$3,814,000. The estimated acquisition costs to the Commonwealth, as shown in this report, are as of May 21, 1951.

The evidence indicates that the best interests of the Commonwealth will be served by the simultaneous acquisition of Blocks Two and Three. Under the circumstances, the Commission recommends that properties in both blocks be acquired simultaneously.

BAKER ROYER, Chairman.

PART I

THE HISTORICAL SIGNIFICANCE OF THE INDEPENDENCE HALL AREA

One hundred and seventy-five years ago, on July 4, 1776, a simple colonial capitol building in Philadelphia assumed world stature as an historic monument when fifty-six courageous colonists met there to sign a document declaring the thirteen American colonies independent of the British crown. In the red brick buildings of Independence Square, was begun the chain of events which established the free institutions of the United States of America. Here, within the confines of a single city block, were formulated the American principles of self government, and here were adopted the legal expressions of these principles, the Constitution of the United States of America and the Bill of Rights.

Within the walls of Independence Hall, Congress Hall, and the Supreme Court Building, the United States, in the first decade of the new nation, was given its name and character. Built to house one of the first elected provincial assemblies in America, Independence Hall provided a background of tolerance and self government for the representatives of the thirteen states who met there.

The history of Independence Hall began in 1729 when the colonial assembly of Pennsylvania recognized the need of a permanent capitol building. Andrew Hamilton, a member of the Pennsylvania Assembly, better known as "the Philadelphia lawyer" who successfully defended personal liberty and freedom of the press in the John Peter Zenger case, than as the designer of the Independence Square buildings, was named to select a suitable location and to draw plans for the erection of buildings to house the Assembly, the courts and the county and city governments. The site chosen by Hamilton for the State House, the name by which the building was long known, was the south side of Chestnut Street between Fifth and Sixth Streets in Philadelphia. The plans proposed by Hamilton envisioned the State House as the central building, with flanking buildings to shelter the other governmental branches and, eventually, an open green, or park, south of the buildings. Construction of the State House, judged by architectural critics as the most beautiful administration building of the American colonial period, was begun in 1732.

In 1735, the Pennsylvania Provincial Assembly first met in the east room on the ground floor of the unfinished building. The following year, Hamilton purchased lots to reserve ground on the northwest corner of the block for the erection of a building to house the county and city governments.

The Liberty Bell, cast in England and recast in Philadelphia, was ordered to commemorate the occasion of the Province of Pennsylvania having reached its fiftieth year

under the charter of civil and religious liberty granted by William Penn in 1701. The bell was placed in the State House in 1753, although the building was not completed until 1758. The inscription from the Old Testament presaged the role of the bell in American life: "Proclaim liberty throughout all the land unto all the inhabitants thereof" (Leviticus 25:10). From the tower of the State House, the peal of the bell could be heard throughout the town as it summoned the members of the Provincial Assembly to session, ". . . Those members who do not appear within half an hour after the Assembly bell ceases to ring shall pay one shilling."

Carrying out the plan of a State House set in a public square, the Assembly acquired parcel after parcel of ground in the block south of the State House, until, in 1769, the entire area from Chestnut to Walnut Streets between Fifth and Sixth Streets was purchased. The State House Garden or Square was to become an outdoor "committee room" for members of the Pennsylvania Assembly. Here members gathered to discuss the growing burdens of the Stamp Act and the other economic restrictions imposed upon them.

Although the Pennsylvania Assembly continued to meet in the State House, room was made there and in Carpenters' Hall for the meetings of the First and Second Continental Congresses. The latter, meeting in the State House, took the first steps toward resistance of crown measures. Between 1776, when the Declaration of Independence was signed, and 1787, when the Constitution of the United States was drafted and adopted, the State House, or Independence Hall as it came to be known in later years, was the scene of many of the stirring events which shaped the future of the nation.

In March, 1789, the Pennsylvania Assembly offered, "Any or all of the public buildings in Philadelphia . . . in case the United States Congress shall at any time incline to make the choice of that city for the temporary residence of the Federal Government." Congress, then in New York, named Philadelphia as the temporary capital in July, 1790. The county and district court building on the Square, completed in February of that year, was remodeled for congressional use. Work was speeded on the city hall building at the other end of the block, and construction finished the following year.

The First Congress of the United States began to hold its sessions in the county and district court building, thenceforth known as Congress Hall, in December, 1790. The House of Representatives met on the first floor and the Senate assembled in the chamber on the second floor. Vice President John Adams, presiding over the Senate, thanked the Philadelphia County Commissioners for "providing so commodious a building."

In the same year, the Pennsylvania Constitutional Convention, meeting in Independence Hall, drafted the new State Constitution which changed the lawmaking body from a unicameral to a bicameral legislature.

When not on circuit, the United States Supreme Court held sessions in the city hall building, giving its name to the building. This same structure housed the offices of the mayor of Philadelphia and the chambers of the Philadelphia city councils.

Philosophical Hall, standing on the Square just south of the Supreme Court Building and constructed at about the

same time, is still the home of the American Philosophical Society whose founder and president was Benjamin Franklin and to which many of the prominent men of the day belonged.

Philadelphia, during the period that it was the capital of the United States, while little more than a hundred years old, had the largest population of any city in the United States. It ranked first as a seaport and in number and variety of commercial and financial enterprises. Its cultural and scientific developments were noteworthy and the city was known for the architectural beauty of its churches and public and private buildings.

When the Pennsylvania General Assembly, in 1799, moved to Lancaster en route to a permanent capitol at Harrisburg, and the Federal Government in the following year removed to Washington, D. C., Independence Hall was left untenanted. In 1802, the General Assembly granted permission to Charles Willson Peale to use the upper floors and a part of the garden for a museum of natural history. Peale's tenancy contained the proviso, however, that the citizens of Philadelphia might continue to hold elections in the building.

In 1816, the General Assembly, established in Harrisburg since 1812, offered the old state capitol and garden to the City of Philadelphia for \$70,000. This offer contained the proviso that "No part of said ground lying to the southward of the State House, within the wall as it is now built, be made use of for erecting any sort of buildings thereon, but the same shall be and remain a public green and walk forever."¹ The City of Philadelphia acquired title to Independence Hall and the Square on March 23, 1818.

In 1828, the City of Philadelphia rebuilt the steeple of Independence Hall and purchased a new bell and clock. The clock faces were fitted into the four sides of the tower and, when illuminating gas came into use, were lighted at night.

The Liberty Bell had been placed in the upper story of the brick tower when the old steeple became unsafe and was rung only on occasions of public importance. Tradition has it that the bell cracked when tolled on July 8, 1835 in memory of John Marshall, Chief Justice of the United States Supreme Court, who had died two days before. Cracked on one side, the bell remains a silent symbol of liberty. The Liberty Bell was the emblem of the Centennial Exposition of 1876. For a number of years, the bell was shipped to expositions in various parts of the country. Today, by city ordinance, Independence Hall is the permanent abode of the Liberty Bell.

The Declaration Chamber in Independence Hall, often used as a receptoin room, was restored to its original appearance in 1833 and a portion of the Peale historic portrait collection was acquired and hung in the room in 1854. In 1875, the councils of Philadelphia designated the west chamber of the first floor of Independence Hall as a museum. Parts of the building continued to be used by city offices until 1895 when the new city hall was partially completed.

Few subjects have provoked the discussion or stimulated the planning as Independence Hall and its surroundings, and few have been productive of as many and as diverse suggestions. In 1875 and 1915, Independence Square under-

¹1816, March 11, P. L. 109 (Chapter LXXIX).

went major "restorations." Two ideas, however, consistently have been advanced—(1) that Independence Hall should face an open, park-like green to the north, and (2) that the Hall should be protected against the hazards of fire presented by a congested area.

Historical organizations and civic groups, as well as individual citizens, have labored to better the surroundings of Independence Hall. Proposals for the improvement of Independence Hall were advanced at the time of the Centennial celebration, and again prior to the Sesqui-centennial. With the completion of the Delaware River Bridge, the idea of extending the park area north to Race Street received added impetus.

The 175th anniversary of the signing of the Declaration of Independence sees plans translated into action. Today, the Commonwealth has acquired the block immediately north of the Independence Square buildings, and demolition of the structures in that area is proceeding. Independence Hall and its neighboring buildings have been designated a part of the Independence National Historical Park Project, which will also include a park area in the three blocks east of the Square and the development of three historic sites in the old city area by the Federal Government. The City of Philadelphia has marked for redevelopment an area which encompasses the historic park projects. (See map on page 7.)

PART II

DIVISION OF FINANCIAL AND ADMINISTRATIVE RESPONSIBILITY FOR THE INDEPENDENCE HALL AREA

At the present time, the Federal Government, the Commonwealth of Pennsylvania and the City of Philadelphia have proprietary interests in the Independence Hall area.

A. LEGAL ARRANGEMENTS

The terms of responsibility for the preservation, operation and improvement of Independence Hall and the surrounding area are set forth in agreements between the City of Philadelphia and the Federal Government, and between the City of Philadelphia and the Commonwealth of Pennsylvania.

1 Federal Government-Philadelphia Agreement

In July, 1950, the mayor of Philadelphia entered into a preliminary agreement with the Secretary of the Interior, acting for the Federal Government, which provided for the establishment of Independence National Historical Park, the transfer of custody of certain historical buildings to the National Park Service, and a unified, long-range program for preservation and development of the projected park area. The City of Philadelphia retained ownership of the Independence Hall structures and Independence Square. The Department of the Interior agreed:

- a. To occupy the buildings for the purpose of preserving, exhibiting, and interpreting them to the American people.
- b. To assume curatorial responsibility for the care and display of museum exhibits available in Independence Hall buildings, including the right to determine accession policy for items to be utilized in the interpretative program.

- c. Not to sublet or assign to another organization any part of the grounds and buildings without the prior approval of the City of Philadelphia.
- d. To operate and maintain the grounds and buildings, to make all repairs, and remedy all defects in the buildings or their equipment which may arise from any cause whatsoever, including ordinary wear and tear.
- e. To undertake such work of restoration or major alteration as may be satisfactory to the City of Philadelphia.

The erection or emplacement of any monument, marker, tablet, or other memorial in the Independence Hall buildings or grounds is prohibited without the consent of both the Department of the Interior and the City of Philadelphia. The design and location of any signs upon the exterior of the buildings indicating that they are occupied and operated by the National Park Service is subject to the approval of the City of Philadelphia. This agreement is to remain in effect until the actual establishment of Independence National Historical Park.²

2. Commonwealth of Pennsylvania-Philadelphia Agreement

In May, 1949, an agreement was executed between the City of Philadelphia and the Secretary of Forests and Waters and the Secretary of Highways, representing the Commonwealth of Pennsylvania, for the construction and development of a State park in the areas between the west side of Fifth and the east side of Sixth Streets and between Chestnut and Race Streets, and for the widening and improvement of Fifth and Sixth Streets from Chestnut to Race Streets.

The Commonwealth of Pennsylvania agreed:

- a. To improve Fifth and Sixth Streets from Chestnut to Race Streets.
- b. To construct and develop the areas lying between Fifth and Sixth Streets and between Chestnut and Race Streets to serve as an approach to the Independence Hall group of historical buildings and as a State park for recreational purposes.
- c. To acquire and clear, at the expense of the Commonwealth, all necessary right-of-way and land for making the improvements under a. and b., above, in accordance with approved plans.
- d. Upon the completion of the improvements, to maintain Fifth and Sixth Streets.
- e. To maintain and operate, upon completion, the State park.
- f. To permit the City of Philadelphia and public utility companies to maintain, construct or reconstruct structures and facilities within the limits of the State park as may be necessary for the continued and efficient operation of water, gas, sewer, electric, power, communication, steam and other services.

The City of Philadelphia agreed:

- a. To prepare at its own expense and cost a preliminary plan for the improvement of Fifth and Sixth Streets and the State park. Such plan, when approved by the Secretary of Highways and the Secretary of Forests and Waters for the Commonwealth and the Director of Public Works, City of Philadelphia, was to be the

² Ordinance of the City Council, City of Philadelphia, May 24, 1950.

basis for the preparation of contract drawings and specifications.

- b. To prepare at its own cost and expense all plans necessary for the improvement of Fifth and Sixth Streets, subject to the approval of the Secretary of Highways and the Governor of Pennsylvania.
- c. To prepare at its own cost and expense all studies, plans and drawings for the development and construction of the State park, subject to the approval of the Secretary of Forests and Waters and the Governor of Pennsylvania.
- d. To undertake at its own cost and expense such improvements of Market and Arch Streets as may be requested by the Secretary of Forests and Waters to conform with the plans for the development of the State park.
- e. To take necessary steps to compel public utility companies to make necessary replacements, relocations, or removals of any of their structures located within the limits of the planned improvements.

It was agreed that the obligation of the Commonwealth of Pennsylvania to proceed to the full completion of the project was subject to the appropriation or allocation of such additional funds as may be required. The Director of Public Works, City of Philadelphia, was also directed to contract for the construction of storm and sanitary sewers, water mains, and lighting facilities and appurtenant work essential to the proper completion of the project. The City Planning Commission was ordered to prepare studies and plans as authorized in the agreement.⁸ The Philadelphia City Council has designated the area as "Independence Mall" and has directed that it be placed on the city plan.⁴

B. FEDERAL OPERATIONS

Following the recommendations of the Philadelphia National Shrine Parks Commission, the Congress of the United States, in June, 1948, granted authority to the Secretary of the Interior to acquire by donation or purchase any property within specified areas for the creation of Independence National Historical Park. The specified areas were designated as follows:

1. Project "A"—An area of three city blocks east of Independence Hall, generally bounded by Walnut Street, Fifth Street, Chestnut Street and Second Street, including the Merchants' Exchange, the First Bank of the United States, Carpenters' Hall, and the Second Bank of the United States.
2. Project "B"—A memorial thoroughfare, extending generally from the south side of Walnut Street to the north side of Manning Street. This is to serve as an attractive approach to St. Mary's Church, the principal Roman Catholic Church in Philadelphia during the colonial period.
3. Project "C"—The site of the residence of Benjamin Franklin, south of Market Street between Third and Fourth Streets.
4. Project "E"—Certain land and buildings immediately adjacent to Christ Episcopal Church on the west side of Second Street and the north side of Market Street.

⁸ Ordinances of City Council, City of Philadelphia, January 18, 1949 and June 21, 1950.

⁴ Ordinance of City Council, City of Philadelphia, May 4, 1949.

The location of these areas with reference to Independence Square is shown on the map on page 7, and on the back cover.

[Maps not reprinted in this appendix. See original report, page 7 and back cover.]

The Secretary of the Interior was authorized to construct in the specified areas or other land that may be donated, offices and administration buildings, together with a suitable auditorium for interpretation of the historical features of the park. He was also permitted, at his discretion, to establish an advisory commission not to exceed eleven members. The advisory commission was appointed by the Secretary, three members being recommended by the Governor of Pennsylvania, three by the mayor of Philadelphia, one by the Carpenters' Company of Philadelphia, and one by the Independence Hall Association. The present members of the Commission appointed in November, 1949, are: Edwin O. Lewis, Chairman; Edward Hopkinson, Jr., Vice Chairman; Michael J. Bradley, Secretary; Thomas Buckley; Albert M. Greenfield; John P. Hallahan; Arthur C. Kauffman; Sydney E. Martin; Francis J. Myers; Isaac W. Roberts; Frederic R. Mann.

For the purpose of creating Independence National Historical Park, the Congress, in 1948, authorized an appropriation of \$4,435,000. The Joint State Government Commission has been advised that this appropriation is virtually exhausted.

C. COMMONWEALTH OPERATIONS

In 1945, the General Assembly appropriated \$16,500,000 to the Department of Forests and Waters for the acquisition by purchase or condemnation of forest land and for the development and use thereof for reforestation . . . for acquisition by purchase, condemnation or gift of lands, buildings or other properties for state parks and for the development thereof . . . the amount of this appropriation to be expended for any of the purposes enumerated . . . shall be determined by the Secretary of Forests and Waters with the approval of the Governor.⁵ On August 12, 1946, Governor Martin approved an allocation of \$3 million from this appropriation for the acquisition of property and the necessary demolition work for the area between Chestnut and Market Streets, bounded by Fifth and Sixth Streets north of Independence Hall in Philadelphia. The Department of Forests and Waters was unable to proceed actively with this project for three years by reason of its very heavy work load in connection with the desilting of the Schuylkill River.

Between 1949 and the beginning of 1951, the Department of Forests and Waters acquired by purchase, except for three properties, all of the block bounded by Chestnut, Market, Fifth and Sixth Streets, referred to hereafter as Block One.

The 1948 assessed valuation of Block One was \$1,643,100, while the purchase price, exclusive of the three properties to be condemned, was \$2,829,000. The ratio of the assessed valuation of the block to the estimated purchase price of all property is .534.

In addition to the purchase price of the properties, the acquisition involved legal, appraisal, negotiation and engineering fees totalling \$77,547 and a demolition cost of ap-

⁵ Appropriation Act No. 83-A, June 4, 1945.

proximately \$101,000. The total cost of Block One, including demolition, will approximate \$3,258,000.

In other words, for Block One, the ratio of assessed valuation to total acquisition cost will be about .504.

Of the total acquisition cost of Block One, approximating \$3,258,000, 69.4 per cent or \$2,261,000, is chargeable against the General Fund, and about \$997,000 or 30.6 per cent, will be charged against the Motor License Fund by virtue of the agreement between the Highway Department and the City of Philadelphia providing for the widening of Fifth and Sixth Streets.

The second block of the proposed Independence Mall is that bounded by Market, Arch, Fifth and Sixth Streets. The 1950 assessed valuation of Block Two was \$1,770,400. If the ratio of assessed valuation to total acquisition cost, as noted above for Block One, is applied for Block Two, the total acquisition cost for Block Two should approximate \$3,512,000.

Using the percentage given for Block One, above, about \$2,437,000 of this total acquisition cost will be chargeable to the General Fund and about \$1,075,000 to the Motor License Fund.

Block Three of the proposed Independence Mall is bounded by Arch, Race, Fifth and Sixth Streets.

Block Three was assessed at \$999,900 in 1950. Applying the Block One ratio of assessed valuation to total acquisition cost gives an estimate of \$1,984,000 for the total acquisition cost of Block Three.

Again, using the percentage shown for Block One, \$1,377,000 of the total acquisition cost of Block Three will be chargeable to the General Fund and \$607,000 to the Motor License Fund.

Commonwealth and Federal fiscal data pertaining to the Independence Hall redevelopment area are summarized in the chart on page 9.

[Chart not reprinted in this appendix. See original report, page 9.]

PART III

ECONOMIC ASPECTS OF THE INDEPENDENCE MALL DEVELOPMENT PROJECT

A side from the deep historical significance of the Independence Hall structures and the aesthetic considerations incident to the improvement of the surrounding area, specific economic benefits will accrue to the Commonwealth and to the City of Philadelphia in consequence of the development of the mall area.

A. TOURISTS, PARKING FACILITIES AND TRAFFIC

The national historical character of Independence Hall and the old city section has made Philadelphia an attraction for thousands of tourists each year. With the improvement of the mall and the provision of park and recreational facilities, a substantial increase in the number of annual visitors may be expected. In all probability, the resulting increase in business activity will not be confined to the City of Philadelphia but will be shared by other communities of the Commonwealth.

Parking facilities in the immediate Independence Hall area are inadequate. Projection of a parking study made in 1946 indicates that the existing demand for parking exceeds available facilities by at least a thousand vehicle spaces. Facilities to accommodate the additional visitors

attracted by the completed developments will probably more than offset the reduction in parking demand occasioned by the relocation of business firms now occupying premises within the mall area. One of the plans calls for the provision of underground parking facilities adequate to serve both business and tourist needs.

The Independence Mall project is an integral part of a comprehensive highway plan to facilitate vehicular flow through the City of Philadelphia. The conversion of Fifth and Sixth Streets into tree-lined boulevards will go a long way toward relieving traffic congestion and providing additional convenient approaches to the Delaware River Bridge.

B. CONFLAGRATION HAZARDS AND FIRE INSURANCE RATES

At the present time, there is above-average danger of a serious fire breaking out in the areas surrounding Independence Hall. The type of building construction in the mall area is presented in the map on page 14. Inspection of the map shows that a considerable portion of the building construction, particularly to the north and northeast of Independence Hall, is of low fire-resistant quality. Few relatively fire-safe buildings are in the three blocks which constitute the proposed mall. To the northeast and to the northwest of Independence Hall several blocks constitute a marked conflagration hazard.

[Map not reprinted in this appendix. See original report, page 14.]

In connection with the potential fire danger in the Independence Square area, it should also be noted that the demolition of the buildings now in the three blocks constituting the proposed mall will affect fire insurance premium rates. The National Board of Fire Underwriters' rating for Philadelphia was changed from 2 to 4 in consequence of a study by the National Board of Fire Underwriters in May, 1949, although for the time being no premium rate change was effected. If the rating of 4 becomes permanent, the premium rates now associated with certain properties will be increased. More specifically, it is estimated that for specific risk properties a permanent National Board rating of 4 would result in approximately a 7 per cent increase in aggregate premiums. Although the rates for dwellings would not be affected, increases in premiums for small mercantile and service establishments would range from 2 to 83 per cent, depending upon the type of construction. The Commission has been informed that the creation of a fire break, such as is represented by the proposed mall and the redevelopment of the Independence Hall area, taken in conjunction with improvements in the city fire department and water system, would assure Philadelphia of the retention of the class 2 rate structure.

C. TAXABLE REAL PROPERTY VALUES IN PHILADELPHIA

The inadequacy of local assessments^a aside, it appears from a comparison of property values within the proposed mall area with aggregate property values for the City of Philadelphia that values in the mall development area have, since 1930, decreased more rapidly than property

^a According to the findings of the State Tax Equalization Board, real estate in Philadelphia was assessed in 1949 at 54.89 per cent of market value.

values in the city as a whole. Indices for the value of all property in Philadelphia and the value of property within the proposed mall area are shown on the chart on page 11. The existing land use of the Independence Mall area is shown above.

[Chart and map not reprinted in this appendix. See original report, pages 11, 12 and 13.]

The acquisition by the Commonwealth of the three blocks under consideration would reduce the taxable assessed valuation of the City of Philadelphia by approximately \$4,413,000. Although for a few years after the purchase of this land by the Commonwealth the City of Philadelphia will realize no revenues from the three blocks, it is expected that the completion of the mall will be conducive to new real estate developments in the surrounding area representing a new capital outlay of at least \$20,000,000. On the assumption that this investment will be assessed at the prevailing rate of approximately 54.9 per cent of market value, the net increase after a period of time in the value of Philadelphia's real property tax base is tentatively estimated at a minimum of \$3,000,000. The estimate is obtained by subtracting from \$10,800,000, which represents the estimated assessed value of the \$20,000,000 in capital outlay, the assessed value of the three mall blocks and the taxable assessed valuation of the east side of Fifth Street and the west side of Sixth Street, from Chestnut to Race Streets, totalling \$7,843,000.

REPORT OF THE JOINT STATE GOVERNMENT COMMISSION OF THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA

Relating to the Following

DECEDENTS' ESTATES LAWS OF 1951

Incompetents' Estates Act of 1951
Register of Wills Act of 1951
Orphans' Court Act of 1951
Estate Tax Apportionment Act of 1951

Pursuant to House of Representatives Concurrent Resolution No. 74 of the General Assembly of 1949
1 9 5 1

The Joint State Government Commission was created by Act of 1937, July 1, P. L. 2460, as amended 1939, June 26, P. L. 1084; 1943, March 8, P. L. 13, as a continuing agency for the development of facts and recommendations on all phases of government for the use of the General Assembly.

JOINT STATE GOVERNMENT COMMISSION

Honorable Baker Royer, Chairman
Honorable John M. Walker, Vice Chairman
Honorable W. Stuart Helm, Secretary-Treasurer

Senate Members

Joseph M. Barr
Leroy E. Chapman
Montgomery F. Crowe¹
John H. Dent

House Members

Hiram G. Andrews

FOREWORD

Pursuant to House of Representatives Concurrent Resolution No. 74 of the regular session of the General Assembly of 1949, the Joint State Government Commission

² Appointed to fill the vacancy created by the death of Frederick L. Homsher.

³ Term expired.

⁴ Deceased.

⁵ Resigned.

^{*} Appointed to fill the vacancy created by the resignation of Homer S. Brown.

^{*} Deceased.

was directed to "study and revise . . . Orphans' Court Act, Orphans' Court Partition Act, Register of Wills Act, Revised Price Act, with their supplements and related statutes."

The Joint State Government Commission, as directed by Senate Resolution Serial No. 46 of the 1945 session of the General Assembly, submitted to the 1947 session drafts of an Intestate Act, a Wills Act, an Estates Act and a Principal and Income Act, all of which were enacted. These, with comments, are contained in the Commission's report, Decedents' Estates Laws of 1947. As directed by Senate Resolution Serial No. 34 of the 1947 session of the General Assembly, the Joint State Government Commission submitted to the 1949 session drafts of a Fduciaries Act and a Fiduciaries Investment Act, both of which were enacted. These, with comments, are contained in the Commission's report, Decedents' Estates Law of 1949.

Continuing the study of Decedents' Estates Laws under the 1949 directive, the Advisory Committee prepared drafts of the Incompetents' Estates Act of 1951, the Register of Wills Act of 1951, the Orphans' Court Act of 1951 and the Estate Tax Apportionment Act of 1951 which the Joint State Government Commission approved and submitted to the 1951 session of the General Assembly.

The Register of Wills Act of 1951 (Act No. 159) and the Estate Tax Apportionment Act of 1951 (Act No. 338) were enacted substantially as introduced. The Incompetents' Estates Act of 1951 (Act No. 158) and the Orphans' Court Act of 1951 (Act No. 263) were amended by the General Assembly to retain for common pleas courts throughout the Commonwealth the jurisdiction of incompetents' estates and to retain for the common pleas courts of Philadelphia County alone a concurrent jurisdiction over inter vivos trusts. The original bills had provided that orphans' courts throughout the Commonwealth have exclusive jurisdiction of incompetents' estates and of inter vivos trusts.

The four acts represent a complete revision of earlier legislation, with particular emphasis on clarification of procedures and simplification of language. Archaic laws regarding incompetents' estates have been modernized and to a large degree made to conform to provisions of the Fduciaries Act of 1949 relating to minors' estates. The Estate Tax Apportionment Act of 1951 has clarified and reduced to more understandable wording the difficult rules intended to apportion more fairly the burden of estate taxes.

There are submitted herewith the Incompetents' Estates Act of 1951, the Register of Wills Act of 1951, the Orphans' Court Act of 1951 and the Estate Tax Apportionment Act of 1951, all as finally enacted, together with explanatory comments on each section. The changes to existing law are fully explained in the comments.

BAKER ROYER, Chairman

Joint State Government Commission
Capitol Building
Harrisburg, Pennsylvania

INCOMPETENTS' ESTATES ACT OF 1951

HISTORY OF

INCOMPETENTS' ESTATES ACT OF 1951

SENATE BILL No. 6

Introduced by the Honorable A. Evans Kephart

In the Senate

Referred to Committee on Judiciary General, January 15.

Reported as amended, March 29.

Passed first reading, March 29.

Over in order, April 2, 3, 4.

Passed second reading, April 9.

Passed third reading and final passage, April 10 (40-7).

In the House

Referred to Committee on Judiciary, April 16.

Reported as committed, May 22.

Passed first reading, May 23.

Passed second reading, May 24.

Over in order, June 4.

Amended, June 5.

Passed third reading with amendments, June 5.

Passed finally, June 6 (206-0).

In the Senate

Senate concurred in House amendments, June 18 (50-0).

Approved by the Governor, June 28, 1951

Act No. 158

INCOMPETENTS' ESTATES ACT OF 1951

No. 158

An Act

Relating to the administration and distribution of incompetents' estates, both as to real and personal property, and the procedure relating thereto; including the disposition of such estates or portions thereof and the determination of title thereto without the appointment of a guardian in certain cases; the appointment, bond, removal and discharge of guardians of such estates, their powers, duties and liabilities, the rights of persons dealing with such guardians, and the rights of persons claiming an interest in such estates or in property distributed therefrom whether as claimants or distributees, and containing provisions concerning the determination of incompetency and the powers, duties and liabilities of foreign guardians; and also generally dealing with the jurisdiction, powers and procedure relating to incompetents' estates.

TABLE OF CONTENTS

ARTICLE I.

PRELIMINARY PROVISIONS.

Section 712. To Foreign Trustee, Guardian or Committee

C. Transfer of Administration.

Section 721. Award to Foreign Guardian When Incompetent Becomes a Nonresident

ARTICLE VIII.

REPEALER.

Section 801 (a). Specific Repeals

(b). General Repeal

(c). Saving Clause

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

ARTICLE I.

PRELIMINARY PROVISIONS

Section 101. Short Title.—This act shall be known and may be cited as the Incompetents' Estates Act of 1951.

Section 102. Definitions.—The following words when used in this act, unless the context clearly indicates otherwise, shall have the meanings ascribed to them in this section:

(1) "Prothonotary" means the prothonotary of the court of common pleas having jurisdiction.

(2) "Court" means the court of common pleas having jurisdiction of the appointment of the guardian.

(3) "Incompetent" means a person, who, because of mental infirmities of old age, mental illness, mental deficiency, drug addiction or inebriety, is unable to manage his property, or is liable to dissipate it or become the victim of designing persons. It includes a person heretofore declared to be a lunatic, an habitual drunkard, insane or weak-minded.

Comment. See Section 67 of the Act of 1836, P. L. 589,

50 PS §706; Section 1 of the Act of 1907, P. L. 292, 50 PS §941; and Procedural Rules, Rule 2051, for other tests of incompetency. The definition here employed is believed to be broad enough to supply all such or similar definitions. The last sentence is required because of the retroactive application of the act.

(4) "Guardian" means a fiduciary appointed by a court of competent jurisdiction to have the care and management of the estate of an incompetent. It includes committees and guardians heretofore appointed for incompetents.

Comment. A guardian is defined in the Statutory Construction Act to be "a fiduciary who legally has the care and management of the person, or the estate, or both, of another under legal disability." The last sentence is required because of the retroactive application of the act.

(5) "Foreign guardian" means a guardian, or one performing the function of a guardian, who is subject primarily to the control of the court of another jurisdiction and has not received ancillary authority in the Commonwealth.

Comment. This is suggested by the definition of "foreign fiduciary" in Section 102 of the Fiduciaries Act of 1949 as amended by Act 298 of 1951.

Section 103. Title to Real and Personal Estate.—Legal title to all real estate and personal property of an incompetent shall remain in him, subject, however, to all the powers granted to his guardian by this act, and to all orders of the court.

Comment. This is suggested by Sections 103 and 104 of the Fiduciaries Act of 1949.

Section 104. Effective Date.—This act shall take effect on the first day of January, one thousand nine hundred fifty-two.

Comment. There being no qualification of the language employed, the act clearly applies to estates of persons heretofore determined to be incompetent as well as those hereafter declared to be incompetent.

Section 105. Severability.—If any provision of this act or the application thereof to any person or circumstances is held invalid, the remainder of this act and the application of such provision to other persons or circumstances shall not be affected thereby, and to this end the provisions of this act are declared to be severable.

Comment. This is similar to Section 18 of the Estates Act of 1947 and to Section 106 of the Fiduciaries Act of 1949.

ARTICLE II.

SMALL ESTATES.

Section 201. When Guardian Unnecessary.—When the entire real and personal estate, wherever located, of a resident or nonresident incompetent has a gross value of one thousand dollars or less, all or any part of it may be received and held or disposed of by the person or institution maintaining the incompetent without the appointment of a guardian or the entry of security, in any of the following circumstances:

(1) Award from Decedent's Estate or Trust. When the court having jurisdiction of a decedent's estate or of a

* "jurisdiction" in original.

trust in awarding the interest of the incompetent shall so direct.

(2) Interest in Real Estate. When the court having jurisdiction to direct the sale or mortgage of real estate in which the incompetent has an interest shall so direct as the incompetent's interest in the real estate.

(3) Other Circumstances. In all other circumstances, when the court which would have had jurisdiction to appoint a guardian of the estate of the incompetent shall so direct.

Comment. This is suggested by Section 1001 of the *Fiduciaries Act of 1949*.

Section 202. Power of Person or Institution Maintaining Incompetent.—The court may authorize or direct the person or institution maintaining the incompetent to execute as natural guardian, any receipt, deed, mortgage, or other appropriate instrument necessary to carry out a decree entered under Section 201, and, in such event, may require the deposit of money in a savings account or the care of securities in any manner considered by the court to be for the best interests of the incompetent. The decree so made, except as the court shall expressly provide otherwise, shall constitute sufficient authority to all transfer agents, registrars and others dealing with property of the incompetent to recognize the persons named therein as entitled to receive the property, and shall in all respects have the same effect as an instrument executed by a duly appointed guardian under court decree.

Comment. This is suggested by Section 1002 of the *Fiduciaries Act of 1949*.

ARTICLE III.

GUARDIAN: APPOINTMENT, BOND, REMOVAL AND DISCHARGE; EVIDENCE.

A. Appointment

Section 301. Petition and Hearing.—

(a) Resident. The court, upon petition and a hearing at which good cause is shown, may find a person domiciled in the Commonwealth to be incompetent and appoint a guardian or guardians of his estate. The petitioner may be the alleged incompetent's spouse, a relative, a creditor, a debtor, or, any person interested in the alleged incompetent's welfare. Notice of the petition and hearing shall be given, in such manner as the court shall direct, to the alleged incompetent, to all persons residing within the Commonwealth who are sui juris and would be entitled to share in the estate of the alleged incompetent if he died intestate at that time, and to such other parties as the court may direct. The alleged incompetent shall be present at the hearing unless (1) the court is satisfied, upon the presentation of positive testimony, that, because of his physical or mental condition, his welfare would not be promoted by his presence; or (2) it is impossible for him to be present because of his absence from the Commonwealth. It shall not be necessary for the alleged incompetent to be represented by a guardian ad litem in the proceeding.

Comment. This is suggested by Section 14 of the Act of 1836, P. L. 589, 05 PS §731 and Section 1 of the Act of 1907, P. L. 292, as amended, 50 PS §941. The contents of

the petition and the form of notice should be governed by rule of court. For right to jury trial see Section 4 of the Act of 1907, P. L. 292, 50 PS §944, saved from repeal in Section 801(a) (14) hereof.

(b) Nonresident. The court may find a person not domiciled in the Commonwealth having property in the Commonwealth to be incompetent and may appoint a guardian of his estate. The appointment may be made after petition, hearing and notice as in the case of a person domiciled in the Commonwealth, or upon the submission of an exemplified copy of a decree establishing his incompetency in another jurisdiction. The court shall give preference in its appointment to the foreign guardian of the non-resident incompetent unless it finds that such appointment will not be for the best interests of the incompetent.

Comment. This is suggested by the Act of 1909, P. L. 185, 50 PS §§991-994. The guardian of the nonresident, whether ancillary or original, has the same powers as a domiciliary guardian appointed under Subsection (a) of this Section.

Section 302. County of Appointment.—

(a) Resident Incompetent. A guardian of the estate of an incompetent may be appointed by the court of the county in which the incompetent is domiciled.

Comment. This is suggested by Section 1011(a) of the *Fiduciaries Act of 1949*. Cf. Section 2, cl. III of the Act of 1836, P. L. 589, 50 PS §694.

(b) Nonresident Incompetent. A guardian of the estate within the Commonwealth of an incompetent domiciled outside of the Commonwealth may be appointed by the court of the county having jurisdiction of a decedent's estate or of a trust in which the incompetent has an interest. When the nonresident incompetent's estate is derived otherwise than from a decedent's estate or a trust within the Commonwealth, a guardian may be appointed by the court of any county where an asset of the incompetent is located.

Comment. This is suggested by Section 1011(b) of the *Fiduciaries Act of 1949*.

(c) Exclusiveness of Appointment. When a court has appointed a guardian of an incompetent's estate pursuant to subsections (a) or (b), no other court shall appoint a similar guardian for the incompetent within the Commonwealth.

Comment. This is suggested by Section 1011(c) of the *Fiduciaries Act of 1949*. See also Section 16 of the Act of 1836, P. L. 589, as amended, 50 PS §733.

Section 303. Nonresident Guardian.—When a guardian is or becomes a nonresident of the Commonwealth, the acceptance of his appointment or the act of becoming a nonresident, as the case may be, shall constitute the Secretary of the Commonwealth his attorney-in-fact upon whom service of process and notices may be made as to all causes of action relating to the incompetent's estate.

Comment. This is suggested by Section 1014 of the *Fiduciaries Act of 1949*.

B. Bond

Section 311. Necessity, Form and Amount.—Except as

hereinafter provided, every guardian of the estate of an incompetent shall execute and file a bond which shall be in the name of the Commonwealth, with sufficient surety, in such amount as the court considers necessary, having regard to the value of the personal estate which will come into the control of the guardian, and conditioned in the following form:

(1) When One Guardian. The condition of this obligation is, that if the said guardian shall well and truly administer the estate according to law, this obligation shall be void; but otherwise it shall remain in force.

(2) When Two or More Guardians. The condition of this obligation is, that if the said guardians or any of them shall well and truly administer the estate according to law, this obligation shall be void as to the guardian or guardians who shall so administer the estate; but otherwise it shall remain in force.

Comment. This is suggested by Section 1021 of the Fiduciaries Act of 1949. See also Section 15 of the Act of 1836, P. L. 589, 50 PS §732 and Section 2 of the Act of 1909, P. L. 185, 50 PS §992.

Section 312. Fiduciary Estate.—The court in its discretion, upon the application of any party in interest, in addition to any bond required for the incompetent's individual estate, may require a separate bond in the name of the Commonwealth, with sufficient surety, in such amount as the court shall consider necessary for the protection of the parties in interest in an estate of which the incompetent is a fiduciary and conditioned in the following form:

(1) When One Guardian. The condition of this obligation is, that if the said guardian shall well and truly account for property held by the incompetent as fiduciary according to law, this obligation shall be void; but otherwise it shall remain in force.

(2) When Two or More Guardians. The condition of this obligation is, that if the said guardians or any of them shall well and truly account for property held by the incompetent as fiduciary according to law, this obligation shall be void as to the guardian or guardians who shall so account; but otherwise it shall remain in force.

Comment. This is suggested by Section 322 of the Fiduciaries Act of 1949.

Section 313. When Bond Not Required.—

(a) Corporate Guardian. No bond shall be required of a bank and trust company or of a trust company incorporated in the Commonwealth, or of a national bank having its principal office in the Commonwealth, unless the court, for cause shown, deems it advisable.

Comment. This is suggested by Section 1022(b) of the Fiduciaries Act of 1949.

(b) Nonresident Corporation. A nonresident corporation or a national bank having its principal office out of the Commonwealth, otherwise qualified to act as guardian, in the discretion of the court, may be excused from giving bond.

Comment. This is suggested by Section 1022(c) of the Fiduciaries Act of 1949.

(c) Other Cases. In all other cases, the court may dis-

pense with the requirement of a bond when, for cause shown, it finds that no bond is necessary.

Comment. This is suggested by Section 1022(d) of the Fiduciaries Act of 1949.

Section 314. Requiring or Changing Amount of Bond.—The court, for cause shown, and after such notice, if any, as it shall direct, may require a surety bond, or increase or decrease the amount of an existing bond, or require more or less security therefor.

Comment. This is suggested by Section 1023 of the Fiduciaries Act of 1949.

C. Removal and Discharge

Section 321. Grounds for Removal.—The court shall have exclusive power to remove a guardian when:

(1) He is wasting or mismanaging the estate, is or is likely to become insolvent, or has failed to perform any duty imposed by law; or

(2) He has been adjudged incompetent; or

(3) He has become unable to discharge the duties of his office because of sickness or physical or mental incapacity and his disability is likely to continue to the injury of the estate; or

(4) He has removed from the Commonwealth or has ceased to have a known place of residence therein, without furnishing such security or additional security as the court shall direct; or

(5) For any other reason, the interests of the estate are likely to be jeopardized by his continuance in office; or

(6) The incompetent of whose estate he is a guardian is adjudged competent.

Comment. This is suggested by Section 331 of the Fiduciaries Act of 1949. Cf. Section 43 of the Act of 1836, P. L. 589, 50 PS §759.

Section 322. Procedure for and Effect of Removal.—The court on its own motion may, and on the petition of any party in interest alleging adequate grounds for removal shall, order the guardian to appear and show cause why he should not be removed, or, when necessary to protect the rights of creditors or parties in interest, may summarily remove him. Upon removal the court may appoint a substituted guardian and may, by summary attachment of the person or other appropriate orders, provide for the security and delivery of the assets of the estate, together with all books, accounts and paper relating thereto. Any guardian summarily removed under the provisions of this section may apply, by petition, to have the decree of removal vacated and to be reinstated, and if the court shall vacate the decree of removal and reinstate him, it shall thereupon make any orders which may be appropriate to accomplish the reinstatement.

Comment. This is suggested by Section 332 of the Fiduciaries Act of 1949. Cf. Sections 63, 64 and 65 of the Act of 1836, P. L. 589, 50 PS §§891-893.

Section 323. Adjudication of Competency.—The court, upon petition and after such notice as it shall direct, may find, after a hearing at which good cause is shown, that a person previously adjudged incompetent has become competent.

Comment. This is suggested by Section 63 of the Act of

1836, P. L. 589, 50 PS §891 and Section 7 of the Act of 1907, P. L. 292, 50 PS §963. For right of trial by jury see Section 4 of the Act of 1907, P. L. 292, 50 PS §944, saved from repeal by Section 801(a) (14).

Section 324. Discharge of Guardian and Surety.—After confirmation of his final account and distribution to the parties entitled, a guardian and his surety may be discharged by the court from future liability.

Comment. This is suggested by Section 333 of the Fiduciaries Act of 1949.

D. Evidence.

Section 331. Evidence of Mental Condition.—In any hearing relating to the mental condition of a person whose competency is in question, the disposition of, or sworn statement by, a superintendent, manager, physician or psychiatrist of any state-owned mental hospital or veterans administration hospital shall be admissible in evidence as to the condition of an inmate of such hospital, in lieu of his appearance and testimony, unless by special order, the court directs his appearance and testimony in person.

Comment. This is suggested by the Act of 1947, P. L. 293, as amended by the Act of 1949, P. L. 1409, 28 PS §10, and Section 811 of the Mental Health Act of 1951.

ARTICLE IV.

GUARDIAN: POWERS, DUTIES AND LIABILITIES.

A. In General.

Section 401. Possession of Real and Personal Property.—The guardian of the estate of an incompetent, until it is distributed or sold, shall have the right to, and shall take possession of, maintain and administer each real and personal asset of the incompetent, collect the rents and income from it, and make all reasonable expenditures necessary to preserve it. He shall also have the right to maintain or defend any action with respect to such real or personal property of the incompetent.

Comment. This is suggested by Section 1041 of the Fiduciaries Act of 1949. Cf. Section 20 of the Act of 1836, P. L. 589, 50 PS §753.

Section 402. Inventory.—Every guardian, within three months after real or personal estate of his ward comes into his possession, shall verify by oath and file with the prothonotary, (1) an inventory and appraisal of such personal estate, (2) a statement of such real estate, and (3) a statement of any real or personal estate which he expects to acquire thereafter.

Comment. This is suggested by Section 1042 of the Fiduciaries Act of 1949. Cf. Section 19 of the Act of 1836, P. L. 589, 50 PS §752.

Section 403. Abandonment of Property.—When any property is so burdensome or is so encumbered or is in such condition that it is of no value to the incompetent, the court may authorize the guardian to abandon it.

Comment. This is suggested by Section 502 of the Fiduciaries Act of 1949.

Section 404. Liability Insurance.—The guardian, at the expense of the estate, may protect himself, his employees

and the incompetent by insurance from liability to third persons arising from the administration of the estate.

Comment. This is suggested by Section 933 of the Fiduciaries Act of 1949.

Section 405. Continuation of Business.—The court, aided by the report of a master if necessary, may authorize the guardian to continue any business of the incompetent. The order may be with or without notice. If prior notice is not given to all persons residing within the Commonwealth who are sui juris and would be entitled to share in the estate of the incompetent if he died intestate at that time and to any other persons directed by the court, it shall be given to all such persons within five days after the order or within such extended time as the court, for cause shown, shall allow. Any person to whom notice is required to be given may, at any time, petition the court to revoke or modify the order. The order may provide—

(1) For the conduct of the business, by the guardian alone or jointly with others, or as a corporation to be formed;

(2) The extent of the liability of the estate or any part thereof, or of the guardian, for obligations incurred in the continuation of the business;

(3) Whether liabilities incurred in the conduct of the business are to be chargeable solely to the part of the estate set aside for use in the business or to the estate as a whole;

(4) The period of time the business may be conducted; and

(5) Such other regulations, including accountings, as the court shall deem advisable.

Comment. This is suggested by Section 934 of the Fiduciaries Act of 1949.

Section 406. Incorporation of Business.—After notice to all persons residing within the Commonwealth who are sui juris and would be entitled to share in the estate of the incompetent if he died intestate at that time and to any other persons directed by the court, the court, aided by the report of a master if necessary, may authorize the guardian alone or jointly with others, to organize a corporation to carry on a business held in the estate, whether the business is owned solely by the incompetent or with others, and may contribute for stock of the corporation, as capital, all or part of the property of the estate which was invested in the business.

Comment. This is suggested by Section 935 of the Fiduciaries Act of 1949.

Section 407. Claims Against Co-Guardians.—When one of two or more guardians shall be individually liable to the incompetent, the other or others shall take any legal action against him necessary to protect the incompetent.

Comment. This is suggested by Section 936 of the Fiduciaries Act of 1949.

Section 408. Proceeding Against Guardian.—Any proceeding may be brought against a guardian or the surety on his bond in the county of the court having jurisdiction of the incompetent's estate, and if the guardian or surety does not reside in that county, process may be served on either of them personally, or as follows:

(1) When Resident of Another County. By a duly depu-

tized sheriff of any other county of the Commonwealth in which he shall be found.

(2) When a Nonresident of the Commonwealth. By the sheriff of the county of the court having jurisdiction of the estate sending, by registered mail, return receipt requested, a true and attested copy of the process to the Secretary of the Commonwealth, accompanied by the fee prescribed by law, and to the guardian or surety at his last known address, with an endorsement thereon showing that service has been so made upon the Secretary of the Commonwealth.

Comment. This is suggested by Sections 621 and 937 of the Fiduciaries Act of 1949.

Section 409. Revival of Judgment Against Guardian.—When the incompetent holds a judgment which is a lien on real estate owned by the guardian individually, any party in interest may suggest his interest in the judgment upon the record thereof and bring an appropriate action to revive it and to continue its lien. Any judgment so revived shall remain for the use of all parties in interest.

Comment. This is suggested by Section 938 of the Fiduciaries Act of 1949.

Section 410. Liability of Guardian on Contracts.—Unless he expressly contracts otherwise, in writing, a guardian shall not be personally liable on any written contract hereafter entered into which is within his authority as guardian and discloses that he is contracting as guardian of a named incompetent. Any action on such a contract shall be brought against the guardian in his fiduciary capacity only, or against his successor in such capacity, and execution upon any judgment obtained therein shall be had only against property of the incompetent.

Comment. This is suggested by Section 939 of the Fiduciaries Act of 1949.

Section 411. Investments.—The powers and duties of guardians in making, retaining and managing investments shall be as prescribed by law generally for fiduciaries.

Comment. This is suggested by Section 940 of the Fiduciaries Act of 1949.

Section 412. Power of Attorney.—A guardian may convey real estate, transfer title to personal estate, or perform any other act of administration by an attorney or attorneys-in-fact: Provided, That this provision shall not authorize him to delegate the exercise of any discretionary power.

Comment. This is suggested by Section 941 of the Fiduciaries Act of 1949.

Section 413. Voting Stock by Proxy.—The guardians or a majority of them, either in person or by proxy, may vote stock owned by the incompetent.

Comment. This is suggested by Section 942 of the Fiduciaries Act of 1949.

Section 414. Nominee Registration; Corporate Fiduciary as Attorney-in-Fact.—

(a) Corporate Guardian. A bank and trust company or a trust company incorporated in the Commonwealth, or a national bank with trust powers having its principal office in the Commonwealth, may keep investments or

fractional interests in investments held by it, either as sole guardian or as co-guardian, in the name or names of the guardians or in the name of a nominee of the corporate guardian: Provided, †That the consent thereto of the co-guardians, if any, is obtained: And provided further, That all such investments shall be so designated upon the records of the corporate guardian that the estate to which they belong shall appear clearly at all times.

(b) Individual Guardian. A guardian serving jointly with a bank and trust company or a trust company incorporated in the Commonwealth, or with a national bank having its principal office in the Commonwealth, may authorize or consent to the corporate guardian having exclusive custody of the assets of the incompetent and to the holding of such investments in the name of a nominee of such corporate guardian, to the same extent and subject to the same requirements that the corporate guardian, if it were the sole guardian, would be authorized to hold such investments in the name of its nominee.

(c) Corporate Fiduciary as Attorney-in-Fact. An individual guardian may employ a bank and trust company or a trust company incorporated in the Commonwealth, or a national bank with trust powers having its principal office in the Commonwealth, to act as his attorney-in-fact in the performance of ministerial duties, including the safekeeping of estate assets. Such attorney-in-fact, when so acting, may be authorized to hold such investments in the name of its nominee to the same extent and subject to the same requirements that such attorney-in-fact, if it were the guardian, would be authorized to hold such investments in the name of its nominee.

Comment. This is suggested by Section 943 of the Fiduciaries Act of 1949.

Section 415. Acceptance of Deed in Lieu of Foreclosure.—The guardian may take for the incompetent from the owner of property encumbered by a mortgage owned by the incompetent, a deed in lieu of foreclosure, in which event the real estate shall be considered personalty to the same extent as though title had been acquired by foreclosure at sheriff's sale.

Comment. This is suggested by Section 944 of the Fiduciaries Act of 1949.

Section 416. Compromise of Controversies.—Whenever it shall be proposed to compromise or settle any claim, whether in suit or not, by or against an incompetent, or to compromise or settle any question or dispute concerning property of the incompetent, the court, on petition of the guardian or by any party in interest setting forth all the facts and circumstances, and after such notice as the court shall direct, aided if necessary by the report of a master, may enter a decree authorizing the compromise or settlement to be made.

Comment. This is suggested by Section 945 of the Fiduciaries Act of 1949.

Section 417. When Guardian Dies or Becomes Incompetent.—The fiduciary of the estate of a deceased or incompetent guardian by reason of such position shall not succeed to the administration of, or have the right to possess, any asset of an incompetent which was being administered by the deceased or incompetent guardian,

* "attorney-in-fact" in original.

† "That" omitted in original.

except to protect it pending its delivery to the person entitled to it. The account of the deceased or incompetent guardian may be filed by the fiduciary of his estate and it shall be filed if the court shall so direct.

Comment. This is suggested by Section 946 of the Fiduciaries Act of 1949.

Section 418. Surviving or Remaining Guardians.—Surviving or remaining guardians shall have all the powers of the original guardians.

Comment. This is suggested by Section 948 of the Fiduciaries Act of 1949.

Section 419. Disagreement Among Guardians.—

(a) Decision of Majority. If a dispute shall arise among guardians, the decision of the majority shall control. A dissenting guardian shall join with the majority to carry out a majority decision requiring affirmative action and may be ordered to do so by the court. A dissenting guardian shall not be liable for the consequences of any majority decision even though he joins in carrying it out, if his dissent is expressed promptly to all the other co-guardians: Provided, That liability for failure to join in administering the estate or to prevent a breach of trust may not be thus avoided.

(b) When No Majority. When a dispute shall arise among guardians as to the exercise or non-exercise of any of their powers and there shall be no agreement of a majority of them, the court, upon petition filed by any of the guardians or by any party in interest, aided if necessary by the report of a master, in its discretion, may direct the exercise or non-exercise of the power as the court shall deem for the best interest of the incompetent.

Comment. This is suggested by Section 949 of the Fiduciaries Act of 1949.

Section 420. Inherent Powers and Duties.—Except as otherwise provided in this act, nothing in this act shall be construed to limit the inherent powers and duties of a guardian.

Comment. This is suggested by Section 1044 of the Fiduciaries Act of 1949.

B. Sales, Mortgages, Leases, Options and Exchanges.

Section 441. Power to Sell Personal Property.—A guardian may sell, at public or private sale, any personal property of the incompetent.

Comment. This is suggested by Section 1061 of the Fiduciaries Act of 1949. The guardian would have to use a reasonable discretion having in mind the possible return to competency of his ward. Property which has a special value to the incompetent should be preserved in every instance where he may recover his competency unless sale is required to provide funds for his maintenance or funds for the maintenance of those whom he is under a legal duty to support.

Section 442. Power to Lease.—A guardian may lease any real or personal property of the incompetent for a term not exceeding five years after its execution.

Comment. With court approval, a lease for more than

five years could be granted under Section 443. See Sections 962 and 1062 of the Fiduciaries Act of 1949.

Section 443. Order of Court.—Whenever the court finds it to be for the best interests of the incompetent, a guardian may, for any purpose of administration or distribution, and on the terms, with the security and after the notice directed by the court: (1) Sell at public or private sale, pledge, mortgage, lease or exchange any real or personal property of the incompetent, (2) grant an option for the sale, lease or exchange of any such property, (3) join with the spouse of the incompetent in the performance of any of the foregoing acts with respect to property held by the entireties, or (4) release the right of the incompetent in the property of his spouse and join in the deed of the spouse in behalf of the incompetent.

Comment. This is suggested by Section 1063 of the Fiduciaries Act of 1949. It is contemplated that the court will not authorize sales of property which the incompetent may wish to receive in kind if his competency is regained unless the sale is necessary for his maintenance or for some other compelling reason. In reaching its decision the court will be influenced by existing case law, by the fact that title to the incompetent's property under Section 103 remains in him and by Section 14 of the Fiduciaries Investment Act of 1949 which authorizes retention of assets received in kind. Because of the power to sell personal property under Section 441, the court should approve sales thereof under this section only when the court agrees that the guardian is entitled to the protection of its decree, either because the circumstances are unusual or because the nature of the property is such that the incompetent may wish to have it in kind if he should regain his competency. Cf. Biddle Est., 1 Fiduc. Rep. 1. It is contemplated that the guardian under clause 4 may be authorized to assist the competent spouse in the disposition of real estate without any consideration passing to the incompetent's estate in the instances where the incompetent had been competent would have joined in the conveyance without any consideration passing to him.

Section 444. Restraint of Sale.—The court, on its own motion or upon application of anyone in behalf of the incompetent, in its discretion, may restrain a guardian from selling or carrying out any contract of sale of any personal property of the incompetent. The order may be conditioned upon the applicant giving bond for the protection of the incompetent's estate.

Comment. This is suggested by Section 1064 of the Fiduciaries Act of 1949.

Section 445. Purchase by Guardian.—A guardian in his individual capacity, may bid for, purchase, take a mortgage on, lease, or take by exchange, real or personal property belonging to the incompetent, subject, however to the approval of the court, and under such terms and conditions and after such reasonable notice to relatives of the incompetent or to persons having an interest in the welfare of the incompetent as the court shall direct. When the purchaser, mortgagee, or lessee is the sole guardian, the court may make an order directing the prothonotary to execute a deed or other appropriate instrument to him.

Comment. This is suggested by Section 1065 of the Fiduciaries Act of 1949.

Section 446. Title of Purchaser.—If the guardian has

given the bond, if any, required in accordance with this act, any sale, pledge, mortgage, or exchange by him, whether pursuant to a decree or to a power under this act, shall pass the full title of the incompetent therein free of any right of his spouse, unless otherwise specified. Persons dealing with the guardian shall have no obligation to see to the proper application of the cash or other assets given in exchange for the property of the incompetent. Any sale or exchange by a guardian pursuant to a decree under Section 443 shall have the effect of a judicial sale as to the discharge of liens, but the court may decree a sale or exchange freed and discharged from the lien of any mortgage otherwise preserved from discharge by existing law, if the holder of such mortgage shall consent by writing filed in the proceeding. No such sale, mortgage, exchange, or conveyance shall be prejudiced by the subsequent removal of the guardian.

Comment. This is suggested by Section 1066 of the Fiduciaries Act of 1949.

Section 447. Collateral Attack.—No decree entered pursuant to this act shall be subject to collateral attack on account of any irregularity if the court which entered it had jurisdiction to do so.

Comment. This is suggested by Section 1067 of the Fiduciaries Act of 1949.

Section 448. Record of Proceedings; County Where Real Estate Lies.—Certified copies of proceedings of any court of the Commonwealth relating to or affecting the real estate of any incompetent may be recorded in the office of the recorder of deeds in any county in which the real estate lies.

Comment. This is suggested by Section 1068 of the Fiduciaries Act of 1949. Cf. Act of 1836, P. L. 589, §18, 50 PS §736.

ARTICLE V.

PROPERTY RIGHTS AND OBLIGATIONS OF ESTATES OF INCOMPETENTS.

A. Control of Actions.

Section 501. Substitution of Guardian in Pending Action or Proceedings.—

(a) Voluntary Substitution. The guardian of the estate of an incompetent party to a pending action or proceeding in the orphans' court may become a party thereto by filing of record a statement of the material facts on which the right to substitution is based.

(b) Compulsory Substitution. If the guardian does not voluntarily become a party, the clerk of the orphans' court, upon the praecipe of an adverse party setting forth the material facts, shall issue a citation upon the guardian to show cause why he should not be substituted as a party.

(c) Status of Guardian; Continuance. If the guardian voluntarily becomes a party to the action or proceeding, or if the citation upon him is made absolute, he shall have all the rights and liabilities of a party to the action or proceeding. The court may order such continuances and extensions as may be necessary to afford him a reasonable opportunity to appear and prosecute or defend the action or proceeding.

Comment. This is suggested by Section 602 of the Fi-

duciaries Act of 1949, but limited to actions and proceedings in the orphans' court. See Procedural Rules 2352-2354 and 2375(7). No provision is made for service of citation or proof of service or notice which would be regulated by Sections 705, 706 and 711 of the Orphans' Court Act of 1951.

Section 502. Death or Removal of Guardian.—An action or proceeding in the orphans' court to which a guardian is a party is not abated by his death or resignation or by the termination of his authority. The successor of the guardian may be substituted in the action or proceeding in the same manner as though the incompetent were a party.

Comment. This is suggested by Section 604 of the Fiduciaries Act of 1949, but limited to actions and proceedings in the orphans' court. See Procedural Rules 2352-2354 and 2375(4).

B. Claims; Rights of Creditors.

Section 511. Effect of Determination of Incompetency.—An incompetent shall be incapable of making any contract or gift or any instrument in writing after he is adjudged incompetent and before he is adjudged to have regained his competency. This section shall not impair the interest in real estate acquired by a bona fide grantee of, or bona fide holder of a lien on, real estate, in a county other than that in which the decree establishing the incompetency is entered, unless the decree or a duplicate original or certified copy thereof is recorded in the office of the recorder of deeds in the county in which the real estate lies before the recording or entering of the instrument or lien under which, the grantee or lienholder claims.

Comment. The first sentence is suggested by Section 5 of the Act of 1907, P. L. 292, 50 PS §945. The words "incapable of making any contract or gift, or any instrument in writing" are suggested by similar language in the 1907 Act as it is the intention that the existing case law on the subject shall be preserved. Thus, it would remain possible for an incompetent in some circumstances to execute or revoke a will: cf. Mohler's Est., 343 Pa. 299. The second sentence is suggested by similar language protecting the rights of grantees and lienholders in Section 13 of the Wills Act of 1947 and in Section 216 of the Fiduciaries Act of 1949. Cf. also Section 16 of the Act of 1836, P. L. 589, as amended, 50 PS §733, and the Act of 1913, P. L. 358, 50 PS §734.

Section 512. Specific Performance of Contracts.—

(a) Application to Court. If any person makes a legally binding agreement to purchase or sell real or personal estate and is adjudged incompetent before its consummation, his guardian shall have the power to consummate it, but if he does not do so, the court, on the application of any party in interest and after such notice and with such security, if any, as it may direct, in its discretion, may order specific performance of the agreement if it would have been enforced specifically had there been no adjudication of incompetency.

(b) Execution and Effect of Deed or Transfer. Any necessary deed or transfer shall be executed by the guardian or by such other person as the court shall direct. The title of any purchaser under an agreement in which the incompetent was the vendor shall be the same as

though the incompetent had conveyed or transferred such property while competent.

(c) Indexing in Judgment Index. When any petition for specific performance of an agreement to purchase or sell real estate is filed, the prothonotary of the court of common pleas where the real estate or any part of it lies, upon the receipt of a certificate of such fact by the prothonotary of the court where the petition was filed, shall enter the petition upon the judgment index against the defendants and shall certify it as *lis pendens* in any certificate of search which he is required to make by virtue of his office.

Comment. This is suggested by Section 620 of the Fiduciaries Act of 1949.

Section 513. Notice to Commonwealth and Political Subdivisions.—When the Commonwealth or a political subdivision thereof has a claim for maintaining an incompetent in an institution, the guardian within three months of his appointment, shall give notice thereof to the Department of Revenue or to the proper officer of such political subdivision, as the case may be.

Comment. This is suggested by Section 623 of the Fiduciaries Act of 1949.

ARTICLE VI.

ACCOUNTS, AUDITS, REVIEWS, DISTRIBUTION— RIGHTS OF INCOMPETENT AND DISTRIBUTEES.

A. Accounts.

Section 601. Accounting Required.—A guardian shall file an account of his administration of real and personal property promptly at the termination of his guardianship, or at such earlier time or times as shall be directed or authorized by the court.

Comment. This is suggested by Section 1081 of the Fiduciaries Act of 1949. Cf. Sections 40, 41 and 42 of the Act of 1836, P. L. 589, 50 PS §§756-758, and Section 1 of the Act of 1909, P. L. 391, 20 PS §2853.

Section 602. Where Filed.—All accounts of guardians shall be filed in the office of the prothonotary.

Comment. This is suggested by Section 1082 of the Fiduciaries Act of 1949. Where the guardian has received payments from the United States Veterans' Administration, notice and copies of accounts should be given and supplied as required by the Act of 1929, P. L. 647, 20 PS §788.

Section 603. Notice to Parties in Interest.—The guardian shall give written notice of the filing of his account and of its call for audit or confirmation to the former ward if he has been declared competent, and otherwise to his succeeding guardian or personal representative and to such other persons as the court by general rule or special order may direct.

Comment. This is suggested by Section 703 of the Fiduciaries Act of 1949. Notice should be given to the United States Veterans' Administration when required by the Act of 1929, P. L. 647, 20 PS §788.

B. Audits.

Section 611. Confirmation of Accounts.—The account of

a guardian shall be confirmed by the court or by the prothonotary, as local rules shall prescribe, if no objections are presented within a time fixed by general rule of court. If any party in interest shall object to the account, or shall request its reference to an auditor, the court, in its discretion, may appoint an auditor.

Comment. This is suggested by Section 712 of the Fiduciaries Act of 1949.

Section 612. Recognition of Claims.—Upon the audit of the account of the guardian of a person who has died during incompetency, the auditing judge or auditor passing on the account shall not pass upon any claims against the estate of the incompetent other than necessary administration expenses, including compensation of the guardian and his attorney. All claims remaining unpaid at the incompetent's death shall be presented to the personal representative.

Comment. Section 612 is intended to clarify existing case law which remains in some confusion because of uncertainty as to when the claim should be presented to the guardian and when to the personal representative. Except when distribution can be made under Section 202 of the Fiduciaries Act of 1949, all questions concerning claims, other than those paid by the guardian prior to death and those incurred for necessary administration expenses, should be presented to the personal representative, for ultimate consideration by the orphans' court.

Section 613. Statement of Proposed Distribution.—A guardian filing an account shall file a statement of proposed distribution or a request that distribution be determined by the court or by an auditor, as local rules may prescribe. The statement of proposed distribution shall be in such form, and such notice thereof shall be given by advertisement or otherwise, and objections thereto may be made, as local rules prescribe.

Comment. This is suggested by Section 713 of the Fiduciaries Act of 1949.

Section 614. Decree of Distribution.—No account shall be confirmed, or statement of proposed distribution approved, until an adjudication or a decree of distribution is filed in conformity with local rules by the court or by the prothonotary of the court, expressly confirming the account or approving the statement of proposed distribution and specifying or indicating by reference to the statement of proposed distribution the names of the persons to whom the balance available for distribution is awarded and the amount or share awarded to each.

Comment. This is suggested by Section 714 of the Fiduciaries Act of 1949.

C. Review

Section 621. Rehearing; Relief Granted.—If any party in interest shall, within five years after the final confirmation of any account of a guardian, file a petition to review any part of the account, or of an auditor's report, or of the adjudication, or of any decree of distribution, setting forth specifically alleged errors therein, the court shall give such relief as equity and justice shall require: Provided, That this section shall not authorize review as to any property distributed by the guardian in accordance with a decree of court before the filing of the petition. The court or master considering the petition may

include in his adjudication or report findings of fact and of law as to the entire controversy, in pursuance of which a final order may be made.

Comment. This is suggested by Section 721 of the Fiduciaries Act of 1949.

D. Distribution.

Section 631. Award Upon Final Confirmation of Account.—A guardian shall be relieved of liability with respect to all real and personal estate distributed in conformity with a decree of court or in accordance with rule of court after confirmation of an account.

Comment. This is suggested by Section 733 of the Fiduciaries Act of 1949.

Section 632. Recording and Registering Decrees Awarding Real Estate.—A certified copy of every adjudication or decree awarding real estate or an appropriate excerpt from either of them may be recorded, at the expense of the estate, in the deed book in the office of the recorder of deeds of each county where the real estate so awarded lies, and if recorded, shall be indexed by the recorder in the grantor's index under the name of the incompetent and in the grantee's index under the name of the distributee, and shall be registered in the survey bureau or with the proper authorities empowered to keep a register of real estate in the county: Provided, That no adjudication or decree awarding real estate subject to the payment of any sum by the distributee shall be recorded or registered unless there is offered for recording, concurrently therewith, written evidence of the payment of such sum.

Comment. This is suggested by Section 736 of the Fiduciaries Act of 1949. It differs from Section 736 in that recording and registering decrees is made permissive rather than mandatory. This is because title will remain in the incompetent until his death under Section 103.

E. Rights of Incompetent and Distributees.

Section 641. Liability of Guardian for Interest.—A guardian who has committed a breach of duty with respect to estate assets shall, in the discretion of the court, be liable for interest, not exceeding the legal rate on such assets.

Comment. This is suggested by Section 754 of the Fiduciaries Act of 1949.

Section 642. Disposition of Trust Income.—Except as otherwise provided by the trust instrument, the trustee of an inter vivos or testamentary trust, with the approval of the court having jurisdiction of the trust, may pay income distributable to an incompetent beneficiary for whose estate no guardian has been appointed directly to the incompetent, or expend and apply it for his care and maintenance or the care, maintenance and education of his dependents.

Comment. This is suggested by Section 984 of the Fiduciaries Act of 1949 dealing with disposition of minor's income.

Section 643. Distributions of Income and Principal During Incompetency.—All income received by a guardian of the estate of an incompetent, in the exercise of a reasonable discretion, may be expended in the care and maintenance of the incompetent without the necessity of

court approval. The court, for cause shown, may authorize or direct the payment or application of any or all of the income or principal of the estate of an incompetent for the care, maintenance or education of the incompetent, his spouse, children, or those for whom he was making such provision before his incompetency, or for the reasonable funeral expenses of the incompetent's spouse, child, or indigent parent. In proper cases, the court may order payment of amounts directly to the incompetent for his maintenance or for incidental expenses and may ratify payments made for these purposes.

Comment. This is suggested by Section 1084 of the Fiduciaries Act of 1949. Cf. Sections 20 and 21 of the Act of 1836, P. L. 589, 50 PS §§753, 754, Section 6 of the Act of 1907, P. L. 292, 50 PS §961 and the Act of 1915, P. L. 661, as amended, 71 PS §1781.

ARTICLE VII.

FOREIGN GUARDIANS.

A. Powers and Duties.

Section 701. In General.—A foreign guardian may institute proceedings in the Commonwealth (subject to the conditions and limitations imposed on nonresident suitors generally) and may exercise all the other powers of a local guardian. Except in the case of powers with respect to securities, for which special provision is made in Section 702, the maintenance of a proceeding or the exercise of any other power by a foreign guardian shall be subject to the following additional conditions and limitations:

(1) Copy of Appointment. The foreign guardian shall file with the register of the county where the power is to be exercised or the proceeding is instituted, or the property concerning which the power is to be exercised is located, an exemplified copy of his appointment or other qualification in the foreign jurisdiction.

(2) Affidavit. The foreign guardian shall execute and file an affidavit with the register of said county stating that, after diligent search and inquiry, the estate of which he is guardian is not, to his knowledge or so far as he has been able to discover, indebted to any person in the Commonwealth, and that he will not exercise any power which he would not be permitted to exercise in the jurisdiction of his appointment. The affidavit shall be attached to the copy of appointment.

(3) Taxes. When the foreign guardian exercises a power to sell or mortgage any Pennsylvania real estate, all taxes due thereon to the Commonwealth or to any subdivision thereof must be paid or provided for.

Comment. This is suggested by Section 1101 of the Fiduciaries Act of 1949 as amended. Cf. Sections 17 and 18 of the Act of 1836, P. L. 589, 50 PS §§735, 736.

Section 702. Security Transfers.—When there is no guardianship in the Commonwealth, a foreign guardian, upon submission of a certificate of his appointment, shall have all the powers of a similar local guardian with respect to stock, bonds and other securities of a Pennsylvania corporation or a Federal corporation located in Pennsylvania and shall not be required to comply with the conditions and limitations of section 701.

Comment. This is suggested by Section 1102 of the Fiduciaries Act of 1949 as amended.

Section 703. Service of Process.—The acceptance by a foreign guardian of the privilege extended by the laws of the Commonwealth of exercising any of his powers within the Commonwealth shall constitute the Secretary of the Commonwealth his attorney-in-fact upon whom service of process and notices may be made in any suit or proceeding instituted in the courts of the Commonwealth arising out of, or by reason of, the exercise of any of his powers or the performance or nonperformance of any of his duties as such fiduciary.

Comment. This is suggested by Section 1103 of the Fiduciaries Act of 1949.

Section 704. Proof of Authority in Court Proceedings.—Upon commencing any proceeding in any court of the Commonwealth, the foreign guardian, in addition to the requirements of section 701, shall file with the court in which the proceeding is commenced, an exemplified copy of his official bond, if he has given a bond. If the court believes that he should furnish security or additional security in the Commonwealth or in the domiciliary jurisdiction, it may, at any time, order the action or proceeding stayed until sufficient security is furnished.

Comment. This is suggested by Section 1104 of the Fiduciaries Act of 1949.

Section 705. Effect of Local Proceedings.—No person who, before receiving actual notice of local administration or of application therefor, has changed his position by relying on the powers granted to foreign guardians by this act shall be prejudiced by reason of the application for or grant of local administration.

Comment. This is suggested by Section 1105 of the Fiduciaries Act of 1949.

B. Distribution to Foreign Fiduciaries.

Section 711. To Foreign Personal Representative.—When a share of an incompetent's estate administered in the Commonwealth is distributable to a deceased nonresident creditor or other distributee, the court may award it to his domiciliary personal representative or to some other person performing the function of a personal representative, unless it shall appear that the rights of any resident of the Commonwealth may be adversely affected or the court shall determine that, for any reason, ancillary administration within the Commonwealth is advisable.

Comment. This is suggested by Section 1111 of the Fiduciaries Act of 1949.

Section 712. To Foreign Trustee, Guardian or Committee.—When a share of an incompetent's estate administered in the Commonwealth is distributable to a nonresident minor, a trustee subject to the jurisdiction of a foreign court, or a nonresident incompetent, the court may award it to the guardian or committee of the nonresident appointed in the foreign jurisdiction, or to such trustee: Provided, That the court shall be satisfied that adequate security or other protection has been provided in the domiciliary jurisdiction by the domiciliary law for the protection of the persons beneficially interested in the share so awarded.

Comment. This is suggested by Section 1112 of the Fiduciaries Act of 1949. Cf. Act of 1868, P. L. 94, 50 PS §762.

C. Transfer of Administration.

Section 721. Award to Foreign Guardian When Incompetent Becomes a Nonresident.—When the incompetent for whose estate a guardian has been appointed by the court is or becomes a nonresident of the Commonwealth, the court, upon satisfactory proof that it will be for the best interests of the incompetent and that no rights of a resident of the Commonwealth will be adversely affected and that removal of the property will not conflict with any limitations upon the right of the incompetent to such property, may direct the locally appointed guardian to transfer the assets of the incompetent within his control to a duly qualified guardian or guardians in the jurisdiction where the incompetent resides.

Comment. This is suggested by Section 1121 of the Fiduciaries Act of 1949.

ARTICLE VIII.

REPEALER

Section 801(a). Specific Repeals.—The following acts and parts of acts and all amendments of each are hereby repealed as respectively indicated:

(1) The act, approved the thirteenth day of June, one thousand eight hundred and thirty-six (Pamphlet Laws 589), entitled "An act relating to lunatics and habitual drunkards," absolutely.

Comment. Article IX of the Mental Health Act of 1951 entitled "Guardian of the Person" supplies the portions of the 1836 and subsequent acts which deal with control of the persons of incompetents.

(2) Section one of the act, approved the sixteenth day of April, one thousand eight hundred and forty-nine (Pamphlet Laws 663), entitled "A supplement to the act relating to lunatics and habitual drunkards; to punish aldermen and justices of the peace for misdemeanors; relating to arbitrations in the district court in the city and county of Philadelphia; relative to deeds of assignment; relative to judgment liens; relating to limitation of actions; and relating to liens and terre tenants; and for the more effectual punishment of the crime of arson," absolutely, and Section two thereof insofar as it affects estates of incompetents.

Comment. Section 1 (50 PS §794) deals with sale of timber; Section 2 (50 PS §705), with costs and witness fees.

(3) Section 7 of the act, approved the fifteenth day of April, one thousand eight hundred and fifty-one (Pamphlet Laws 713), entitled "An act to annul the marriage contract between William Mead and Eliza his wife, to the uniformed militia of Perry and Luzerne Counties, to the Cumberland Valley Railroad, to the sale of the real estate of John Berge, deceased, to lunatics and habitual drunkards, and to the Susquehanna Canal Company," insofar as it affects estates of incompetents.

Comment. This section (50 PS §697) states who may apply for a commission of lunacy or drunkenness when there are no relatives residing in the Commonwealth.

(4) The act, approved the twenty-second day of March, one thousand eight hundred sixty-five (Pamphlet Laws 31), entitled "An act relating to the committees of the estates of lunatics and habitual drunkards," absolutely.

Comment. This act (50 PS §760) gave committees of

lunatics and habitual drunkards the same powers as guardians of minors in partition proceedings.

(5) Section one of the act, approved the twentieth day of February, one thousand eight hundred sixty-seven (Pamphlet Laws 30), entitled "An act to confer upon the committee of a lunatic, or a habitual drunkard, the power to institute actions of partition, and prosecute those already commenced," absolutely.

Comment. This act (50 PS §761) gave the committees of lunatics or habitual drunkards the right to institute partition proceedings. This has been suspended by Procedural Rule 2075 (2).

(6) The act, approved the thirteenth day of April, one thousand eight hundred sixty-eight (Pamphlet Laws 94), entitled "An act respecting the estates of non-resident lunatics," absolutely.

Comment. This act (50 PS §762) gave the foreign committee the power to remove property from the Commonwealth. This is covered by Article VII hereof.

(7) The act, approved the eighth day of May, one thousand eight hundred seventy-four (Pamphlet Laws 122), entitled "An act limiting the time within which inquisitions of lunacy or habitual drunkenness may be traversed," insofar as it affects estates of incompetents.

Comment. The right to trial by jury is preserved by Section 4 of the Act of 1907, P. L. 292, which is saved from repeal in clause (14) hereof.

(8) The act, approved the twenty-fifth day of May, one thousand eight hundred seventy-eight (Pamphlet Laws 154), entitled "An act to enable married women whose husbands are lunatics to dispose of their separate estates," absolutely.

Comment. The purpose of this act (50 PS §799) can be accomplished under Section 443 hereof.

(9) The act, approved the twenty-eighth day of March, one thousand eight hundred and seventy-nine (Pamphlet Laws 14), entitled "An act enabling wives of lunatics to release their right of dower in the real estate of their husbands," absolutely.

Comment. This act (50 PS §796) is no longer necessary. The competent spouse may join with the guardian in making the conveyance. If any doubt remains it is dispelled by clause 4 of Section 443.

(10) The act, approved the tenth day of June, one thousand eight hundred and ninety-seven (Pamphlet Laws 137), entitled "An act giving priority in the trial of lunacy cases traversing inquisitions of sheriff's juries in the courts of this Commonwealth," insofar as it affects estates of incompetents.

Comment. The purpose of this act (50 PS §711) is now accomplished by Rules 214 and 215 of the Procedural Rules.

(11) The act, approved the tenth day of June, one thousand eight hundred and ninety-seven (Pamphlet Laws 138), entitled "An act providing for the taking, filing and reviewing of the testimony taken before sheriff's juries in inquisitions of lunacy in and by the several courts of this Commonwealth," insofar as it affects estates of incompetents.

Comment. This act (50 PS §707) is more properly the subject of a rule of court.

(12) The act, approved the fifteenth day of June, one thousand eight hundred and ninety-seven (Pamphlet Laws 301), entitled "An act regulating applications for commissions to inquire into the lunacy or habitual drunkenness of inmates of any soldiers' and sailors' home, almshouse, home for the friendless, or other charitable institution," insofar as it affects estates of incompetents.

Comment. The subject of this act (50 PS §712) would seem to be covered by the more general language of Section 301 hereof.

(13) The act, approved the twenty-seventh day of April, one thousand nine hundred and three (Pamphlet Laws 325), entitled "An act entitled an act providing for the sale of *the real estate of lunatics, at private sale, and empowering courts of common pleas to order, direct and approve such private sales," absolutely.

Comment. This act (50 PS §793) is supplied by Section 443 of this act.

(14) The act, approved the twenty-eighth day of May, one thousand nine hundred and seven (Pamphlet Laws 292), entitled "An act to provide for the protection of insane persons, feeble-minded persons, and epileptics, and the appointment of a guardian for the said insane persons, feeble-minded persons, and epileptics, unable to care for their own property; authorizing the guardian to support the wife and children of the said insane persons, feeble-minded persons, and epileptics; defining the powers of the guardian, and authorizing the sale of real estate of the ward," absolutely, except section four thereof which is hereby saved from repeal.

Comment. This act (50 PS §§ 941-964), dealing with the estates of weak-minded persons and making reference to the Act of 1836, P. L. 589, is supplied by the new act. Section 4 of the 1907 act has been saved from repeal to preserve the right to trial by jury.

(15) The act, approved the twenty-seventh day of April, one thousand nine hundred and nine (Pamphlet Laws 185), entitled "A supplement to an act, entitled 'An act for the protection of persons unable to care for their *own property,' approved the twenty-fifth day of June, anno domini one thousand eight hundred and ninety-five; authorizing the appointment of guardians of the estates of weak-minded persons non-resident of this Commonwealth, and extending to said guardians the powers conferred upon guardians of weak-minded persons by the said act, approved June twenty-fifth, one thousand eight hundred and ninety-five, and its supplements, so far as relates to the real and personal property of said non-resident weak-minded persons, situate in the Commonwealth of Pennsylvania," absolutely.

Comment. This act (50 PS §§991-994) is supplied by Article VII hereof.

(16) The act, approved the twenty-eighth day of May, one thousand nine hundred thirteen (Pamphlet Laws 358), entitled "An act relating to the competency as

* "the" omitted in original.

* "own" omitted in original.

evidence of certain findings in processings in lunacy," absolutely.

Comment. This act (50 PS §734) is not required since no provision is made for establishing incompetency at an earlier date.

(17) Clauses 1 and 8 of subsection (a) of section 2 of the act, approved the seventh day of June, one thousand nine hundred seventeen (Pamphlet Laws 388), entitled "An act relating to the jurisdiction, powers, and procedure of the orphans' court and the court of common pleas as to sales, mortgages, conveyances on ground-rent, leases, extinguishment of ground-rents, partition, exchange, squaring and adjusting of lines between adjoining owners, consolidation and combination of mining lands and the leasing thereof, the joining by owners of undivided interests in making and taking conveyances in order to change the route or location of any right of way or passage over adjoining or other lands, and the subdivision of premises so as to command the highest price or greatest rents, and, for such purpose, the laying out or dedication of roads, streets, and alleys, or the vacation of such as have not been accepted by the public authorities, where the court shall be of opinion that such decree will be to the interest and advantage of all those interested; and where the legal title is held by minors, lunatics, habitual drunkards, or weak-minded persons, a married person whose spouse is a lunatic, or has abandoned him or her for one year or has been absent and unheard of for seven years; by corporations having no capacity to convey or by any unincorporated association, by any religious, beneficial, or charitable society or association, incorporated or unincorporated, and the title is subject to forfeiture if real estate is held in excess of the amount prescribed by its charter or by law; by a corporation, or individual or individuals, and is subject to a trust of any description whatever; by any person as to whom a presumption of death may have arisen, or any interest wherein is held by any person under legal disability to dispose thereof; where the legal title is an estate tail or is subject to the lien of debts of a decedent not of record, contingent remainders, executory devises, or remainders to a class, some or all of whom may not be in being or ascertained; where estates shall have been devised or granted for special or limited purposes, where there is a power of sale but the time may not have arrived for its exercise; any preliminary act may not have been done to bring it into exercise, the time limited for its exercise may have expired, or any one or more persons required to consent or join in its exercise may be non compos mentis, have removed out of the state, have died, refuse to act, unreasonably withhold consent, or be absent and unheard of; where there has been or shall be a defective appointment in any deed or will, and the necessary power is not given to the executor, devisee, or appointee to make sale and conveyance; where a trust has been created, and no power conferred on the trustee to do any of the acts which the court is hereby empowered to authorize or confirm; and to the effects of such decrees," insofar as they apply to estates of incompetents.

Comment. These clauses are repealed to make it clear that when there is a guardian for the incompetent, pro-

† "corporation" in original.

cedures provided for by the act should be followed rather than those under the Revised Price Act.

(b) General Repeal. All other acts and parts of acts inconsistent herewith are hereby repealed.

(c) Saving Clause. This act shall not repeal or modify any of the provisions of the following acts or parts of acts or any of their amendments:

(1) The act, approved the eleventh day of April, one thousand eight hundred sixty-six (Pamphlet Laws 780), entitled "An act authorizing persons, whose wives, or husbands, are non compos mentis, to sell, mortgage, lease for years and convey, upon ground rent, real estate held in their own right."

Comment. This act (50 PS §795) must be preserved because there are circumstances where no guardian has been appointed for the incompetent spouse.

(2) The act, approved the sixth day of April, one thousand nine hundred twenty-one (Pamphlet Laws 99), entitled "An act relating to the jurisdiction, powers, and procedures of the court of common pleas as to sale, mortgage, conveyance upon ground rent, and lease for years of real estate, where the legal title is held by a married person whose spouse is an habitual drunkard, and providing for the disposition of the proceeds thereof."

Comment. This act (50 PS §§797, 798) is the companion act to the Act of 1886, P. L. 780, and deals with the estates of habitual drunkards.

Approved the 28th day of June, A. D. 1951.

JOHN S. FINE.

REGISTER OF WILLS ACT OF 1951

HISTORY OF REGISTER OF WILLS ACT OF 1951 SENATE BILL NO. 17

Introduced by the Honorable Donald P. McPherson, Jr.
(By Request)

In the Senate

Referred to Committee on Judiciary General, January 15.
Reported as amended, March 29.
Passed first reading, March 29.
Over in order, April 2, 3, 4.
Passed second reading, April 9.
Passed third reading and final passage, April 10 (49-0).

In the House

Referred to Committee on Judiciary, April 16.
Reported as committed, May 22.
Passed first reading, May 23.
Amended, May 24.
Passed second reading with amendments, May 24.
Passed third reading and final passage, June 4 (206-0).
Vote by which bill passed third reading and final passage reconsidered, June 5.
Amended, June 5.
Passed third reading with amendments, June 5.
Passed finally, June 6 (206-0).

In the Senate

Senate concurred in House amendments, June 18 (50-0).

Approved by the Governor, June 28, 1951

Act No. 159

REGISTER OF WILLS ACT OF 1951

No. 159

An Act

Relating to the jurisdiction, powers, and duties of registers of wills, and regulating proceedings before them, and the costs thereof, the effects of their acts, and appeals therefrom.

Comment. This is substantially the same as the title to the 1917 act. It omits "qualification" of registers because Section 1 of the 1917 act, relating to the register's oath and bond, has not been re-enacted herein for the reasons stated in the comment to Section 601 (3).

ARTICLE VI.

REPEALER.

- Section 601(a). Specific Repeals
 - (b) General Repeal
 - (c) Saving Clause

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

ARTICLE I.

PRELIMINARY PROVISIONS.

Section 101. Short Title.—This act shall be known and may be cited as the Register of Wills Act of 1951.

Comment. This is similar to Section 25 of the 1917 act.

Section 102. Definitions.—The following words when used in this act, unless the context clearly indicates otherwise, shall have the meanings ascribed to them in this section.

(1) "Register" means the register of wills having jurisdiction.

Comment. This is the same as the definition of "register" in the Fiduciaries Act of 1949, and in the Orphans' Court Act of 1951, except that the words "to grant letters testamentary or of administration" are omitted.

(2) "Court" means the orphans' court having jurisdiction.

(3) "Clerk" means the clerk of the orphans' court having jurisdiction.

Comment. The definitions of "court" and "clerk" are the same as in the Fiduciaries Act of 1949, and in the Orphans' Court Act of 1951.

(4) "Personal representative" means an executor or administrator of any description.

Comment. This is the same as the definition of "personal representative" in the Fiduciaries Act of 1949.

(5) "Letters" means letters testamentary or letters of administration of any description.

* "(a) and (b)" omitted in original.

Comment. The Statutory Construction Act of 1937, P. L. 1019, 46 PS 601, includes no definition of letters. Its frequent use throughout the act requires its inclusion here.

(6) "Will" means a written will, codicil, or other testamentary writing and a nuncupative will.

Comment. The Statutory Construction Act provides merely that "'Will' includes codicil."

Section 103. Effective Date.—This act shall take effect on the first day of January, one thousand nine hundred and fifty-two.

Comment. There being no qualification of the language employed, the act clearly applies in all cases, regardless of the date of death of the decedent.

Section 104. Severability.—If any provision of this act or the application thereof to any person or circumstances is held invalid, the remainder of this act and the application of such provision to other persons or circumstances shall not be affected thereby, and to this end the provisions of this act are declared to be severable.

Comment. This is similar to Section 106 of the Fiduciaries Act of 1949, Section 18 of the Estates Act of 1947, and Section 104 of the Orphans' Court Act of 1951.

ARTICLE II.

JURISDICTION AND POWERS.

Section 201. Register's Jurisdiction.—Within the county for which he has been elected or appointed, the register shall have jurisdiction of the probate of wills, the grant of letters to a personal representative, and any other matter as provided by law.

Comment. This is suggested by Section 3 of the 1917 act.

Section 202. Deputy Register.—Every register shall appoint a deputy or two deputies who shall have power to perform the duties of the office in his behalf and for whose conduct he and his surety shall be accountable. In case of a vacancy in the office of register, the first deputy shall exercise all the powers of the register until a successor is appointed or elected.

Comment. This is suggested by Section 2 of the 1917 act, as amended in 1945, amplified to indicate more clearly the place of authority in the case of vacancy in the office of register. Before the 1945 amendment, the reference to "deputy" was in the singular. Sections 224 and 233 of the General County Law of 1929, 16 PS 224, 233, applying to all but first-class counties, and providing for a single deputy, are repealed and partially repealed in Section 601 (a) hereof to avoid any inconsistency with this section.

Section 203. Witnesses—Testimony.—The register shall have power to—

(1) Subpoenas. Issue a subpoena to any person in any county of the Commonwealth to appear or produce papers or records before him.

Comment. This is suggested by Section 9 of the 1917 act and by Section 741 of the Orphans' Court Act of 1951. It was not considered advisable to list in detail the circumstances when a subpoena may be issued or the procedure to be followed upon failure to obey the subpoena. See

Section 205, *infra*, for the procedure to enforce a subpoena.

(2) Administering Oaths. Administer oaths and affirmations to parties and witnesses appearing before him and to designate any clerk or clerks in his employ to administer such oaths and affirmations to parties and witnesses appearing before them.

Comment. This should be compared with Section 604 of the Orphans' Court Act of 1951, and Sections 304 and 311 of the Fiduciaries Act of 1949. There is no comparable provision in the 1917 act. The authority to designate clerks to administer oaths is included to give recognition to the practice in Philadelphia County where such delegation of authority is necessary because of the volume of business involved.

(3) Depositions. Issue commissions or rules to take the depositions of witnesses in another county or outside of the Commonwealth. The practice relating thereto shall conform to the practice in the local orphans' court.

Comment. This is suggested by Section 10 of the 1917 act. The second sentence is new and should be considered in connection with Section 742 of the Orphans' Court Act of 1951.

Section 204. Witness Fees.—Witnesses appearing before the register in obedience to the register's subpoena shall be entitled to the same fees and mileage as are allowed by law to witnesses in the orphans' court.

Comment. This is suggested by the last sentence of Section 9 of the 1917 act.

Section 205. Enforcement of Subpoenas, Orders and Costs.—Should any person refuse to comply with any subpoena or order of the register or to pay all costs, the register shall forthwith certify the record of the proceedings to the court. The court, upon petition of any party in interest, shall compel payment of the costs and shall enforce obedience to the subpoena or order in the same manner as in cases of subpoenas and orders issued or made by the court.

Comment. This is suggested by the portions of Sections 8 and 9 of the 1917 act which deal with the enforcement of the production of a will or the appearance of witnesses. It was considered advisable to refer enforcement to the orphans' court in all cases. See Orphans' Court Act of 1951, Sections 301(14), 751-756. This section makes unnecessary a special reference to enforcement of payment of the register's costs as provided in Section 23 of the 1917 act.

Section 206. Caveat.—

(a) Bond. When a caveat has been filed, the register shall not delay the probate of a will or the grant of letters for more than ten days after the filing of the petition for probate or for grant of letters, or after the filing of the caveat, whichever shall be later, unless within such ten-day period a party in interest shall file with the register his bond in the name of the Commonwealth with sufficient surety in such amount, not less than five hundred dollars or more than five thousand dollars, as the register considers necessary, conditioned for the payment of any costs which may be decreed against the caveator.

(b) Failure to Give Bond. If no bond is filed within the

ten-day period, the caveat shall be considered abandoned, except as the register, for cause shown, shall extend the time.

(c) Costs. The register, or the court upon appeal, shall determine the amount of costs occasioned by a caveat and direct by whom they shall be paid. If all or part of the costs shall be finally decreed to be paid by the caveator, any party interested in the costs may bring suit on the caveator's bond as provided by law.

Comment. This is suggested by Section 20 of the 1917 act but differs from Section 20 in that it is confined to a caveat alone and does not deal with appeals. Also it more clearly designates the time for the beginning of the ten-day period. Under existing practice it has been difficult to determine whether the ten-day period begins when a letter is filed with the register or only after a more formal caveat is filed. The allowance of a ten-day period after the filing of the petition for probate or for grant of letters will give persons the opportunity to examine the will and then to file a bond if they decide to contest the will.

Section 207. Certification of Records to Court.—Whenever a caveat shall be filed or a dispute shall arise before the register concerning the probate of a will, the grant of letters or the performance of any other function by the register, he may certify, or the court upon petition of any party in interest may direct the register at any stage of the proceedings to certify, the entire record to the court, which shall proceed to a determination of the issue in dispute. No letters of administration pendente lite shall be granted by the register after proceedings have been removed to the court except by leave of court.

Comment. This includes the substance of Sections 18 and 19 of the 1917 act, combined into a single abbreviated section as a matter of style. Section 17 of the 1917 act, under which a register may award an issue for jury trial, has not been included. When the register is convinced that an issue should be awarded for jury trial, he should certify the record to the orphans' court. The record so certified may include the testimony taken before the register and the court in its discretion may award an issue thereon without further hearing: Orphans' Court Act of 1951, Section 744.

Section 208. Appeals.—

(a) When Allowed. Any party in interest who is aggrieved by a decree of the register, or a fiduciary whose estate or trust is so aggrieved, may appeal therefrom to the court within two years of the decree: Provided, That the executor designated in an instrument shall not by virtue of such designation be deemed a party in interest who may appeal from a decree refusing probate of it. The court, upon petition of a party in interest, may limit the time for appeal to six months.

Comment. This is suggested by Section 21(a) of the 1917 act. As in the case of Section 771 of the Orphans' Court Act of 1951, the persons entitled to appeal are more clearly indicated. The prohibition against the executor, as such, appealing from refusal of probate is believed to be declaratory of case law: Faust Est., 364 Pa. 529; Knecht's Est., 341 Pa. 292; Winters' Est., 57 D. & C. 433.

(b) Bond. Anyone appealing from a decree of the

register shall, within ten days after filing his appeal, file with the register his bond in the name of the Commonwealth with sufficient surety in such amount, not less than five hundred dollars or more than five thousand dollars, as the register considers necessary, conditioned for the payment of any costs that may be decreed against him. If no bond is filed within the ten-day period, the appeal shall be considered abandoned.

Comment. This is suggested by Section 20(a) of the 1917 act and should be compared with Section 206(a) hereof dealing with caveats.

(c) Effect of Appeal. No appeal from a decree of the register shall suspend the powers of prejudice the acts of a personal representative to whom letters have been granted.

Comment. This is suggested by Section 21(b) of the 1917 act. It seemed advisable to refer to "a decree" rather than decrees involving the validity of a will or the right to letters as in the 1917 act. Compare Sections 520 and 547 of the Fiduciaries Act of 1949 and Section 772 of the Orphans' Court Act of 1951.

(d) Excepted Appeals. This section shall not apply to appeals for inheritance tax purposes, nor to appeals specially regulated by law.

Comment. This subsection is added to avoid any possible conflict with appeals on inheritance tax matters for which special provision is made in the tax laws. See Act of 1919, P. L. 521, Section 13, as amended, 72 PS 2327.

Section 209. Bill of Costs.—The court may establish a bill of costs to be charged for the services of the register not otherwise provided by law.

Comment. This is suggested by Section 22 of the 1917 act and is similar to Section 503 of the Orphans' Court Act of 1951. It seemed inadvisable to make any distinction between counties with or without separate orphans' courts as was done in the 1917 act. The Act of 1947, P. L. 933, as amended, 20 PS 2045, lists the fees of registers in counties of the fifth, sixth, seventh and eighth classes.

ARTICLE III.

PROBATE

Section 301. Place of Probate.—The will of a decedent domiciled in the Commonwealth at the time of his death shall be probated only before the register of the county where the decedent had his last family or principal residence. If the decedent had no domicile in the Commonwealth, his will may be probated before the register of any county where any of his property is located.

Comment. This is suggested by Section 4 of the 1917 act. It is consistent with Section 301 of the Fiduciaries Act of 1949, and Section 305(1) of the orphans' Court Act of 1951. The second sentence differs from the 1917 act which restricted the right to letters in such circumstances to the county "where the principle part of the goods and estate of such decedent within this Commonwealth shall be".

Section 302. Manner of Probate.—All wills shall be proved by the oaths or affirmations of two competent witnesses, and

(1) Will Signed by Testator. In the case of a will to which the testator signed his name, proof by subscribing

witnesses, if there are such, shall be preferred to the extent that they are readily available, and proof of the signature of the testator shall be preferred to proof of the signature of a subscribing witness.

Comment. There is no statutory precedent for this clause, but it conforms with Section 4 of the Wills Act of 1947. It should now be clear that when a subscribing witness is not readily available, the testator's signature may be proved by others without resort to proof of the witnesses' signatures. Compare *Miller v. Carothers*, 6 S. & R. 215.

(2) **Will Signed by Mark or by Another.** In the case of a will signed by mark or by another in behalf of the testator, the proof must be by subscribing witnesses, except to the extent that the register is satisfied that such proof cannot be adduced by the exercise of reasonable diligence. In that event other proof of the execution of the will, including proof of the subscribers' signatures, may be accepted, and proof of the signature of a witness who has subscribed to an attestation clause shall be *prima facie* proof that the facts recited in the attestation clause are true.

Comment. This is suggested by Section 2(2) and 2(3) of the Wills Act of 1947. The validity of such a will depends on the circumstances under which it was executed including its subscription by two witnesses. Proof of the signatures of subscribing witnesses would not of itself prove a compliance with the requirements of the Wills Act of 1947, unless the attestation clause recited a compliance therewith. Cf. *Hunter, O. C. Commonplace Book*, pp. 437, 440. Non-subscribing witnesses present at the execution of the will, of course, would be competent to prove compliance with the statutory requirements.

(3) **Nuncupative Will.** In the case of a nuncupative will the witnesses shall have been present when the will was declared, and shall have reduced it to writing or directed it to be reduced to writing.

Comment. This suggested by Section 3(a) of the Wills Act of 1947.

Section 303. Limit of Time for Probate.—

(a) **Original Probate.** A will, other than a nuncupative will, may be offered for probate at any time.

Comment. This conforms with the first portion of Section 16(b) of the 1917 act. The reference to nuncupative wills is included to avoid inconsistency with Section 3(a) of the Wills Act of 1947, and Section 304, *infra*. "Original probate" means the first probate of any testamentary writing of the decedent in Pennsylvania. It should be compared with "subsequent probate" mentioned in subsection (c) of this section which refers to the probate of a subsequent writing which revokes, in whole or in part, a writing originally probated.

(b) **Conclusiveness of Original Probate.** The probate of a will shall be conclusive as to all property, real or personal, devised or bequeathed by it, unless an appeal shall be taken from the probate as provided in Section 208.

Comment. This is suggested by Section 16(a) of the 1917 act. Regardless of its all-inclusive language, this subsection would not of course be applied strictly where fraud (cf. *Culbertson's Est.*, 301 Pa. 438) or uncertainty of the pro-

bate record (cf. *Rockett Will*, 348 Pa. 445) is involved. No special provision is made for refusal of probate as in Section 16(a) of the 1917 act. That is covered by Section 208 hereof.

(C) **Effect Upon Grantee or Mortgagee.** A will offered for original or subsequent probate more than two years after the decedent's death shall be void against a bona fide grantee or mortgagee of real estate of the decedent if the conveyance or mortgage is recorded before the will is offered for probate. This subsection shall not apply to a will of a person dying before the effective date of this act offered for original probate within three years after the decedent's death.

Comment. This is suggested by Section 16(b) of the 1917 act, but reduces the period from three years to two years. The last sentence avoids possible constitutional objections.

Section 304. Nuncupative Wills.— A nuncupative will shall not be admitted to probate, nor shall letters thereon be issued, unless notice has first been given to those who would be entitled to the estate in case of intestacy.

Comment. This is suggested by Section 6 of the 1917 act. The 1917 act prohibited probate of a nuncupative will within fourteen days of decedent's death. It is not considered advisable to delay the time for probate if provision is made for adequate notice to those who would be entitled to letters of administration. The requirements for nuncupative wills are found in Section 3 of the Wills Act of 1947.

Section 305. Wills in Foreign Language.— A writing not in English shall not be filed for probate or for any other purpose in the office of the register unless there is attached to it and filed with it a translation into English, sworn to be correct. The register shall attach the translation to the original and shall file them in his office, and in all cases where a recording is now or hereafter may be required, both the original and the translation shall be recorded. A writing filed in violation of this section shall not constitute notice to any person.

Comment. This is suggested by Section 12 of the 1917 act. It should be compared with Section 504 of the Orphans' Court Act of 1951.

Section 306. Wills Probated Outside the Commonwealth.— A duly authenticated copy of a will proved outside of the Commonwealth according to the law of the place of probate may be offered for probate before any register having jurisdiction, and letters testamentary or of administration with a will annexed may be granted thereon as though the original will had been offered before such register. If, in addition to such copy, there shall be produced a duly authenticated copy of the record of the probate proceeding of the original instrument, the will shall be entitled to probate in this Commonwealth and appropriate letters shall be issued thereon without the production or examination of the witnesses to prove such will, unless the record shows or it is satisfactorily proved that an essential requirement of Pennsylvania law for a valid will has not been met. In such event, the probate proceedings may be supplemented by the submission of additional evidence to the register.

Comment. This is suggested by Section 7 of the 1917

act. It is intended that probate proceedings in Pennsylvania may be supplemented by the production of additional evidence before the register without the necessity of changing the probate records of the jurisdiction where the will was originally proved. Authentication of wills probated outside of the Commonwealth is governed by Act of Congress, 28 USCA 1738 and 1741.

Section 307. Enforcing Production of Will.—The register, at the request of any party in interest, shall issue a citation to any person alleged to have possession or control of a will of a decedent requiring him to show cause why it should not be deposited with him. In the absence of good cause shown, the register shall order the will to be deposited with him.

Comment. This is suggested by Section 8 of the 1917 act. Provisions for enforcement are found in Section 205, *supra*. No special procedure is provided for service of the citation or for the hearing before the register. Presumably it will follow the practice in similar cases before the orphans' court.

ARTICLE IV.

LETTERS—ACCOUNTS.

Section 401. Bonds of Personal Representatives.—If any register shall grant letters without having taken such bond as may be required by law, he and his surety shall be liable to pay all damages which shall accrue to any person by reason thereof. Nothing herein stated shall be deemed to relieve the personal representative from liability which would otherwise be imposed upon him by law.

Comment. This is suggested by Section 8(d) of the Fiduciaries Act of 1917. The statement that letters issued without bond are void is omitted because it is believed that they should not be void insofar as other persons acting upon the faith thereof are concerned.

Section 402. Revocation of Letters.—

(a) When No Will. The register may revoke letters of administration granted by him whenever it appears that the person to whom letters were granted is not entitled thereto.

Comment. This is suggested by Section 5 of the 1917 act.

(b) When A Will. The register may amend or revoke letters testamentary or of administration granted by him not in conformity with the provisions of a will admitted to probate.

Comment. This is suggested by Section 5 of the 1917 act. Provision for amendment of letters will make it possible for the register to adjust his records when it is decided that a person improperly appointed should finish his administration in a different capacity. Cf. *Friese's Est.*, 317 Pa. 86, 91.

Section 403. Transmission of Accounts to the Court.—All accounts filed with the register shall be transmitted to the court for audit and confirmation on dates fixed by the court by general rule or special order and shall be advertised as required by law.

Comment. This is suggested by Section 46(d) of the Fiduciaries Act of 1917 which in addition made provision for the advertisement of accounts. This is now covered by Section 505 of the Orphans' Court Act of 1951.

ARTICLE V.

RECORDS AND CERTIFIED COPIES.

Section 501. Wills.—All probated wills shall be indexed and recorded by the register, and shall remain in his office, except for the period required to be in the custody of a higher court. The recording may be accomplished by photographic or other mechanical process.

Comment. This is suggested by Section 11 of the 1917 act. Compare Act No. 432 of 1951 which authorizes the orphans' court, upon petition therefor, to permit a document or documents, in the custody of registers, of persons deceased for more than 50 years, to be delivered to a museum, or organization with similar facilities, for public display.

Section 502. Inventories and Appraisements.—The register shall index and record all inventories and appraisements filed with him. The recording may be accomplished by photographic or other mechanical process.

Comment. This is suggested by Section 13 of the 1917 act.

Section 503. Certified Copies.—Every register, upon the request of any person paying the fee therefor, shall make and certify under the seal of his office true copies of his records or of papers filed with him or of proceedings before him. Such certified copies shall be as good evidence as the original in any judicial proceeding in the Commonwealth.

Comment. This is suggested by Section 14 of the 1917 act. The last sentence is suggested by Sections 11 and 13 of the 1917 act.

Section 504. Recording Proceedings in Another County.—Copies of wills and probate proceedings and records of the grant of letters of administration and proceedings relating thereto, duly certified by the register, may be filed in the office of the register in any county where real estate of the decedent* is located. The register with whom such papers are filed shall forthwith record the same, and the record thereof shall be as valid and effectual in law as the original, or its duly certified copy, or its record be for all purposes of vesting title, of evidence, and of notice.

Comment. This is suggested by Section 15 of the 1917 act. Permission to file and record the grant of letters of administration has been added because of the administrator's authority under the Fiduciaries Act of 1949 to convey real estate.

ARTICLE VI.

REPEALER.

Section 601(a). Specific Repeals.—The following acts and parts of acts and all amendments of each are hereby repealed as respectively indicated:

(1) Section 37 of the act, approved the fifteenth day of March, one thousand eight hundred thirty-two (Pamphlet Laws 135), entitled "An Act relating to Registers and Registers' Courts," absolutely.

Comment. This section except for this repeal would still apply to Beaver County. It was not supplanted by Section 7 of the Act of 1868, P. L. 3, repealed in clause (2) hereof. A proviso in Section 11 of the Act of 1868, P. L. 3,

* "testator" in original.

stipulated that it should not apply inter alia to Beaver County.

(2) Section 7 of the act, approved the second day of April, one thousand eight hundred sixty-eight (Pamphlet Laws 3), entitled "An Act to ascertain and appoint the fees to be received by the several officers of this Commonwealth," absolutely.

Comment. This section has applied only to Northampton County, the only county of the fourth class, other than Beaver County, not having a separate orphans' court. The Act of 1947, P. L. 933, as amended, expressly saved from repeal by subsection (c) hereof sets forth the fee bill of registers in counties of the fifth, sixth, seventh and eighth classes. Section 22 of the Register of Wills Act of 1917 provided that in the counties having separate orphans' courts "the said courts shall establish a bill of costs." Under Section 209 of this Act, the orphans' court "may establish a bill of costs to be charged for the services of the register not otherwise provided by law."

(3) Section 1 of the act, approved the seventh day of June, one thousand nine hundred seventeen (Pamphlet Laws 415), entitled "An Act relating to the qualification, jurisdiction, powers, and duties of registers of wills, and regulating proceedings before said registers, and the costs thereof, the effects of their acts, and appeals therefrom," except insofar as it applies to counties of the first class; and Sections 2 to 23, both inclusive, of the same act, absolutely.

Comment. While the subject matter of Section 1 of the 1917 act on the oath and bond of the register is included within the scope of the General County Law of 1929, it must nevertheless be preserved because the General County Law of 1929 does not apply to Philadelphia County. When legislation dealing with Philadelphia County is revised, Section 1 of the Register of Wills Act of 1917 can be repealed absolutely. Section 24 of the 1917 act is preserved from repeal because it provides for fees to be collected for the Commonwealth upon the grant of letters and is not incorporated in the new act.

(4) Section 224 of the act, approved the second day of May, one thousand nine hundred twenty-nine (Pamphlet Laws 1278), entitled "An Act relating to counties of the second, third, fourth, fifth, sixth, seventh and eighth classes; and revising, amending and consolidating the laws relating thereto," insofar as it applies to registers of wills; and Section 233 of the same act, absolutely.

Comment. These sections apply to all but first-class counties and overlap to some extent the provisions of Section 202 of this Act. The partial repeal of Section 224 and the absolute repeal of Section 233 will eliminate any possible conflict of interpretation.

(b) General Repeal. All other acts and parts of acts inconsistent herewith are hereby repealed.

(c) Saving Clause. This act shall not repeal or modify the act, approved the twenty-fifth day of June, one thousand nine hundred forty-seven (Pamphlet Laws 933), entitled "An Act prescribing the fees to be received by registers of wills in counties of the fifth, sixth, seventh and eighth class."

Approved—The 28th day of June, A. D. 1951.

JOHN S. FINE.

ORPHANS' COURT ACT OF 1951

HISTORY OF ORPHANS' COURT ACT OF 1951 SENATE BILL No. 25

Introduced by the Honorable Rowland B. Mahany

In the Senate

Referred to Committee on Judiciary General, January 15.
Reported as amended, March 29.
Passed first reading, March 29.
Over in order, April, 2, 3, 4.
Amended, April 9.
Passed second reading with amendments, April 9.
Passed third reading and final passage, April 10 (48-1).

In the House

Referred to Committee on Judiciary, April 16.
Reported as committed, May 22.
Passed first reading, May 23.
Passed second reading, May 24.
Over in order, June 4, 5, 6, 7, 18, 19, 20.
Amended, June 25.
Passed third reading with amendments, June 25.
Passed finally, June 26 (205-0).

In the Senate

Senate nonconcurred in House amendments, July 9 (50-0).
House insisted on its amendments nonconcurred in by the Senate, July 11.
Senate insisted on its nonconcurrence in House amendments and appointed Messrs. Mahany, Kephart and Rosenfeld a Committee of Conference, July 16.
House insisted on its amendments and appointed Messrs. McKinney, Tompkins and Schmidt a Committee of Conference, July 17.
Report of the Committee of Conference, presented to the Senate, July 17.
Report of the Committee of Conference, presented to the House, July 17.
Report of the Committee of Conference adopted by the Senate, July 30 (44-0).
Report of the Committee of Conference adopted by the House, July 31 (207-0).

Approved by the Governor, August 10, 1951
Act No. 263.

ORPHANS' COURT ACT OF 1951 No. 263

An Act

Relating to the orphans' courts; conferring exclusive jurisdiction on such courts over the administration and distribution of decedents' estates, trust estates, minors' estates, and absentees' estates; providing for the organization of orphans' courts, the procedure therein, the powers and duties of the judges thereof, and appeals therefrom.

(b) General Repeal

(c) Saving Clause

ARTICLE I.

PRELIMINARY PROVISIONS.

Section 101. Short Title.—This act shall be known and may be cited as the Orphans' Court Act of 1951.

Section 102. Definitions.—The following words, when used in this act, unless the context clearly indicates otherwise, shall have the meanings ascribed to them in this section:

(1) "Clerk" means the clerk of the orphans' court having jurisdiction.

(2) "Court" means the orphans' court having jurisdiction.

(3) "Register" means the register of wills having jurisdiction to grant letters testamentary or of administration.

(4) "Fiduciary" includes personal representatives, guardians, and trustees, whether domiciliary or ancillary, individual or corporate, subject to the jurisdiction of the orphans' court.

(5) "Trust" means any trust, whether testamentary or inter vivos, subject to the jurisdiction of the orphans' court

Comment. The denitions in clauses (1) to (5) are identical with definitions in the Fiduciaries Act of 1949.

(6) "Inter vivos trust" means an express trust other than a trust created by a will, taking effect during the lifetime or at or after the death of the settlor. It includes:

Comment. The definition of inter vivos trust becomes important because under Section 301(3) hereof the orphans' court is given exclusive jurisdiction thereof, except in Philadelphia Conuty. Heretofore the jurisdiction of the orphans' court over inter vivos trusts has been indefinite,

the case law defining inter vivos trusts being found largely in lower court opinions.

(i) A life insurance trust;

Comment. Life insurance trusts are included by definition rather than by seperate provisions as in Section 9(o) of the 1917 act.

(ii) A trust created under a deed, agreement, or declaration except as hereinafter excluded;

Comment. Existing case law makes no distinction between written and oral trusts: *Tober's Est.*, 82 Pitts. L. J. 91; *Gorkiewicz's Est.*, 43 D. & C. 40; 45 D. & C. 91. There will be many instances where the trust is not wholly evidenced by the written instrument.

(iii) A common trust fund or mortgage investment fund created by a corporate fiduciary for the investment of funds held by it as fiduciary or co-fiduciary;

Comment. The court which has jurisdiction of most of the trusts which hold investments in the common fund is considered best fitted to administer it: *Cf. Keppelman's Est.*, 27 Berks 299.

(iv) A tentative trust; and

Comment. Existing case law is not clear concerning the orphans' court's jurisdiction of tentative trusts: *Cf. Brown's Est.*, 343 Pa. 230; 352 Pa. 1; *Tunnell's Est.*, 325 Pa. 554; *Smith's Est.*, 141 Pa. Superior Ct. 571.

(v) Similar trusts.

It does not include:

(vi) A resulting or constructive trust created by operation of law;

Comment. This accords with existing case law: *Shaffer's Est.*, 21 D. & C. 90; *In re Stief*, 32 D. & C. 289. It should not be construed as limiting the jurisdiction of the orphans' court in regard to property of an estate or trust within its jurisdiction: *Cf. Restatement, Trusts* §§45, 55.

(vii) A trust for creditors;

Comment. This accords with existing case law: *Musser's Acct.*, 39 D. & C. 475; *Leinenbach's Pet.*, 24 D. & C. 443; *Weber's Trust*, 50 D. & C. 538

(viii) An escrow relationship;

Comment. This accords with existing case law: *Jernigan's Trust*, 55 Montg. 231; *Moorshead, Trustee*, 1 Del. Co. L. J. 45 (*staw party*).

(ix) A temporary trust to hold disputed property;

Comment. This accords with existing case law: *In re Stief*, 32 D. & C. 289.

(x) A principal and agent relationship;

Comment. There is no distinction whether or not the relationship is created by letter of attorney: *Miller's Est.*, 19 D. & C. 141; *Jenkin's Est.*, 20 D. & C. 671.

(xi) A trust primarily for the benefit of business employees, their families or appointees, under a stock bonus, pension, disability or death benefit, profit-sharing or other employee benefit plan;

Comment. Pension and profit sharing trusts are of sufficient importance to justify a seperate listing. The definition here included conforms with Sections 4(b)(3) and

6(6) of the Estates Act of 1947 and the Act of June 5, 1947, P. L. 477. In the only known reported Pennsylvania decision dealing with an employees' pension trust, jurisdiction was assumed by the common pleas court: *Luden, Inc., Employees' Trust Fund*, 42 Berks 1, 72 D. & C. 566.

(xii) A trust for bondholders;

Comment. This accords with existing case law: *Reading National Bank & Trust Co.'s Acct.*, 22 D. & C. 654

(xiii) A mortgagee in possession relationship; and

Comment. This accords with existing case law: *Reading National Bank & Trust Co.'s Acct.*, 22 D. & C. 654.

(xiv) Similar trusts or fiduciary relationships.

Section 103. Effective Date.—This act shall take effect on the first day of January, one thousand nine hundred and fifty-two.

Comment. Inasmuch as there are no exceptions, and the Orphans' Court Act of 1917 is repealed in Section 801 (a) (5), it is clear that this act applies to the administration of all estates and trusts within the orphans' court, regardless of the date of death or of the creation of the trust.

Section 104. Severability.—If any provision of this act, or the application thereof to any person or circumstances, is held invalid, the remainder of this act and the application of such provision to other persons or circumstances shall not be affected thereby, and to this end the provisions of this act are declared to be severable.

Comment. This is similar to Section 18 of the Estates Act of 1947 and Section 106 of the Fiduciaries Act of 1949.

ARTICLE II.

ORGANIZATION OF ORPHANS' COURT.

Section 201. Orphans' Court in Every County.—In each county of the Commonwealth there shall continue to exist, as heretofore, a court of record, which shall be called "The Orphans' Court of County."

Comment. This is suggested by Section 1 (a) of the 1917 act.

Section 202. Counties Having Separate Orphans' Courts.—The separate orphans' courts heretofore established shall continue to exist in the Counties of Allegheny, Berks, Cambria, Dauphin, Delaware, Erie, Fayette, Lackawanna, Lancaster, Lehigh, Luzerne, Montgomery, Philadelphia, Schuylkill, Washington, Westmoreland, and York. Each separate orphans' court shall have the number of judges provided by law.

Comment. This is suggested by Section 1 (b) of the 1917 act, altered to include additional counties now having separate orphans' courts, and to omit reference to the method of election and salaries, which are now taken care of by separate legislation. As thus altered, Section 202 will avoid conflict with other separate legislation on those subjects.

Section 203. Counties Having No Separate Orphans' Courts.—The orphans' court of each county in which no separate orphans' court is established shall be composed of the judges of the court of common pleas of that county.

Comment. This is suggested by Section 1 (c) of the 1917 act.

Section 204. Court of Record; Seal.—The orphans' court of each county, whether separate or not, shall be a court of record with all the qualities and incidents of a court of record at common law. Its proceedings and decrees in all matters within its jurisdiction shall not be reversed or avoided collaterally in any other court, but they may be reversed, modified or altered on appeal. Each orphans' court shall have a seal engraved with the same device as is on the great seal of the Commonwealth and with the name of the court.

Comment. This is suggested by Sections 2 and 6 of the 1917 act.

Section 205. Sessions; Terms.—Each orphans' court shall be in session as often as its judges shall think necessary or proper. There shall be no terms of the orphans' court.

Comment. This is suggested by Section 11 of the 1917 act. The last sentence is declaratory of existing case law: *Kretzer v. Murry*, 297 Pa. 451.

Section 206. Rules.—Rules and forms of procedure, not inconsistent with the Constitution and laws of the Commonwealth and with rules of the Supreme Court, may be made and prescribed by each orphans' court for the conduct of proceedings before it.

Comment. This is suggested by Section 10 of the 1917 act. Existing Supreme Court rules are those adopted December 30, 1942, effective the first Monday of July, 1943, 345 Pa. lv.

ARTICLE III.

JURISDICTION.

Section 301. Exclusive Jurisdiction.—The orphans' court shall have exclusive jurisdiction of:

(1) Decedents' Estates. The administration and distribution of the real and personal property of decedents' estates.

Comment. This is suggested by Section 9 (d) and 9 (e) of the 1917 act.

(2) Testamentary Trusts. The administration and distribution of the real and personal property of testamentary trusts whether created before or after the effective date of this act, except any testamentary trust created before the effective date of the Fiduciaries Act of 1917, jurisdiction of which already has been acquired by another Pennsylvania court. Another court which has acquired jurisdiction of the trust may transfer it to the orphans' court.

Comment. This is suggested by Section 9(b) of the 1917 act. The exception for testamentary trusts created before the effective date of the Fiduciaries Act of 1917 is required because it was not until the Act of 1917 that the jurisdiction of the orphans' court over testamentary trusts became exclusive. See comments of the Commissioners to Section 46(g) of the Fiduciaries Act of 1917 which refers to *Simpson's Estate*, 253 Pa. 217, as an example of an instance where the common pleas as late as 1916 was found to have exclusive jurisdiction of a testamentary trust.

(3) Inter Vivos Trusts. The administration and distribution of the real and personal property of inter vivos trusts whether created before or after the effective date of this act, except any inter vivos trust created before the ef-

fective date of this act, jurisdiction of which already has been acquired by another Pennsylvania court. Another court which has acquired jurisdiction of the trust may transfer it to the orphans' court. The jurisdiction of the Orphans' Court of Philadelphia County over the administration and distribution of the real and personal property of inter vivos trusts shall be concurrent with the several courts of common pleas as heretofore.

Comment. This is suggested by Section 9(n) and 9(o) of the 1917 act. The definition of inter vivos trusts in Section 102(6) is essential to an understanding of this clause (3).

(4) Minors' Estates. The administration and distribution of the real and personal property of minors' estates.

Comment. This is suggested by Section 9(a) of the 1917 act and by Section 59(a) of the Fiduciaries Act of 1917.

(5) Absentees' and Presumed Decedents' Estates. The administration and distribution of the real and personal property of absent persons and of presumed decedents.

Comment. This is suggested in part by Section 9(c) of the 1917 act. See also Article XII of the Fiduciaries Act of 1949. It is to be noted that death is not a jurisdictional requirement: cf. Hutton, *Death as a Jurisdictional Fact Before the Register of Wills and the Orphans' Court in Pennsylvania*, 53 Dick. L. R. 108.

(6) Fiduciaries. The appointment, control, settlement of the accounts of, removal and discharge of, and allowance to and allocation of compensation among, all fiduciaries of estates and trusts of which the court has jurisdiction, except that the grant of letters testamentary and of administration to personal representatives shall remain within the jurisdiction of the register as heretofore.

Comment. See Section 9(d) and 9(l) of the 1917 act, and *Kelley v. McGurl*, 13 D. & C. 350. Cf. Section 53 of the Fiduciaries Act of 1917 and Section 331 of the Fiduciaries Act of 1949.

(7) Guardian of Persons of Minors. The appointment, control and removal of the guardian of the person of any minor.

Comment. See Section 1011 of the Fiduciaries Act of 1949 and Section 59 of the Fiduciaries Act of 1917.

(8) Custody of Minors. The determination of the right to the custody of a minor in connection with any proceeding for his adoption or for the appointment of a guardian of his person.

Comment. This is suggested by the Act of 1949, P. L. 793, adding Section 9(q) to the Orphans' Court Act of 1917.

(9) Specific Performance of Contracts. To enforce specifically the performance by either party of any agreement made by a decedent to purchase or sell real or personal property.

Comment. This is suggested by Section 18(b) of the 1917 Fiduciaries Act, which has no counterpart in Section 620 of the Fiduciaries Act of 1949. See also Orphans' Court Act of 1917, Section 9(i).

(10) Legacies, Annuities and Charges. Proceedings for the enforcement of legacies, annuities and charges placed on real or personal property by will, inter vivos trust, or orphans' court decree, or for the discharge of the lien thereof.

Comment. See Article VIII of the Fiduciaries Act of 1949. "Enforcement" rather than "payment" is used to make it clear that clause (10) is not limited to money legacies, annuities or charges.

(11) Construction of Administrative Power. The construction of an administrative power as to real estate proposed to be exercised by a fiduciary subject to the jurisdiction of the orphans' court.

Comment. This has no statutory precedent. It is included here to make it clear that the orphans' court has jurisdiction to determine the extent of the testamentary or statutory power of a fiduciary subject to its jurisdiction to possess, lease, sell, exchange or exercise a similar administrative power in regard to real estate. Clause (11), being restricted to administrative powers, does not apply to dispositive powers such as powers of appointment.

(12) Disposition of Title to Real Estate to Render It Freely Alienable. The disposition of any interest in real estate of one disabled from dealing with it when title to it has been acquired by descent or will, or is an estate or trust subject to the jurisdiction of the orphans' court.

Comment. This is suggested by Section 9(g) of the 1917 act. See also Section 1 of the Revised Price Act of 1917.

(13) Title to Personal Property. The adjudication of the title to personal property in the possession of the personal representative, or registered in the name of the decedent or his nominee, or alleged by the personal representative to have been in the possession of the decedent at the time of his death.

Comment. This is intended to obviate, whenever possible, a preliminary dispute as to whether the orphans' court has jurisdiction to determine the title to the disputed property. There is no statutory precedent for it. In some cases, a right to trial by jury may exist. See Section 745, *infra*.

(14) Appeals and Proceedings from Registers. Appeals from and proceedings removed from registers.

Comment. This is suggested by Section 9(m) of the 1917 act. Sections 207 and 208 of the Register of Wills Act of 1951 provide for appeals and certification of proceedings to the orphans' court.

(15) Birth Records. Matters relating to birth records, as provided by law.

Comment. See Act of 1951, P. L. 383, 35 PS §§481-484, and Act of 1941, P. L. 405, 35 PS §§491-496. Clauses 15-18 are included in this section for purpose of notice only. The subjects are covered by separate statutes and there is no intention to interfere therewith.

(16) Adoptions. Adoptions, as provided by law.

Comment. See Adoption Act of 1925, P. L. 127, as amended, 1 PS §1. In Philadelphia adoptions are in the Municipal Court: 17 PS §693.

(17) Marriage Licenses. Marriage licenses, as provided by law.

Comment. See 48 PS §§1-19.

(18) Inheritance and Estate Taxes. Matters relating to inheritance and estate taxes, as provided by law.

Comment. See Inheritance Tax Act of 1919, P. L. 521, Sections 13, 15, 72 PS §§ 2327, 2351, as amended.

The provisions of clauses (8) and (16), in so far as they relate to adoptions, shall not apply to the Orphans' Court of Philadelphia County. Exclusive jurisdiction in the matter of adoptions shall remain in the Municipal Court of Philadelphia.

Section 302. Concurrent Jurisdiction.—Title to Real Estate.—The orphans' court shall have concurrent jurisdiction of the determination of the persons to whom the title to real estate of a decedent or of the creator of an estate or trust subject to the jurisdiction of the orphans' court has passed by devise or descent or by the term of the trust instrument: Provided, That nothing herein shall be construed to restrict the exclusive jurisdiction of the orphans' court to distribute real estate in an estate or trust within its jurisdiction.

Comment. This section is intended to eliminate any doubt concerning the jurisdiction of the orphans' court to deal with real estate for the purposes of Sections 734, 756, 983, and 1083 of the Fiduciaries Act of 1949.

Section 303. Conflict of Laws.—Nothing contained in this act shall be construed to interfere with the rules of law applicable to the determination of the question whether Pennsylvania courts have jurisdiction of the subject matter enumerated in this act.

Comment. There is no statutory precedent for this section which is intended to make it clear that this act does not attempt to assume jurisdiction in cases where, under the applicable rules of conflict of laws, jurisdiction would be in the courts of another state.

Section 304. Incidental Powers.—The orphans' court shall have all legal and equitable powers required for or incidental to the exercise of its jurisdiction.

Comment. This is suggested by what was originally Section 9(n) of the 1917 act.

Section 305. Venue of Decedents' and Minors' Estates.—When a Pennsylvania orphans' court has jurisdiction of a decedent's or a minor's estate, except as otherwise provided by law, the venue for all purposes shall be as follows:

Comment: The words "for all purposes" are included to make it clear that sales of real estate in all instances are to be authorized by the court of the indicated county rather than the court where the real estate lies.

(1) **Decedents' Estates.** In the case of a decedent's estate, in the county where the letter was granted to the personal representative, and in the absence of such letters, then where the decedent had his last family or principal residence, and if the decedent had no domicile in the Commonwealth, then in any county where any of his property is located.

Comment. This is suggested in part by Section 301 of the Fiduciaries Act of 1949.

(2) **Minors' Estates.** In the case of a guardian of a minor appointed by the court, in the county whose court appointed the guardian. In the case of a guardian of a minor not appointed by the court, or when there is a minor's estate but no guardian, in the county whose court which at the time proceedings are first initiated would have jurisdiction to appoint a guardian of the estate.

Comment. This is suggested by Sections 9(a) of the Orphans' Court Act of 1917 and 59(a) of the Fiduciaries Act of 1917. See also Section 18(b) of the Wills Act of 1947 and Act of 1945, P. L. 253, 20 PS §1178, which provide for the appointment of a guardian by will and inter vivos instrument. Case law on the jurisdiction of testamentary guardians is somewhat confused. *Rively's Est.*, 7 Del. 522, holds that jurisdiction is in the court of the county where the guardian resides. It is considered advisable that insofar as possible, only one court have jurisdiction of the assets of a minor, and that this court be the court of the county where the minor resides. This will assure that all applications for maintenance or other purposes of the minor will come before the same court.

Section 306. Venue of Trust Estates. When a Pennsylvania orphans' court has jurisdiction of any trust, testamentary or inter vivos, except as otherwise provided by law, the venue for all purposes shall be in the county where at the time being is the situs of the trust. The situs of the trust shall remain in the county of the court which first assumed jurisdiction of the trust, unless and until such court shall order a change of situs under the provisions of this act.

Comment. Contrary to prior law, the venue "for all purposes" is the county where the trust has its situs. Thus, petitions dealing with trust real estate should be presented to the court of the county where the trust has its situs rather than where the trust real estate is located.

Section 307. Situs of Testamentary Trust. The situs of a testamentary trust shall be in the county where letters were granted to the personal representative, and in the absence of such letters, then in a county where such letters could have been granted, and if no such letters could have been granted, then in a county in which any trustee resides or is located.

Comment. This is suggested in part by Section 46(g) of the Fiduciaries Act of 1917.

Section 308. Situs of Inter Vivos Trust.—

(a) **When Provided For in Trust Instrument.** If the trust instrument expressly provides for the situs of the inter vivos trust, its situs shall be at the place within or without the Commonwealth which is in accord with such provision.

Comment. Since the original situs of an inter vivos trust is largely within the control of the settlor, it was deemed advisable to recognize the right to provide for it in the trust instrument.

(b) **Not Provided For in Trust Instrument.** If the trust instrument does not expressly provide for the situs of the inter vivos trust, its situs shall be:

(1) **Resident Settlor.** In the case of an inter vivos trust whose settlor is domiciled in the Commonwealth (i) in the settlor's lifetime, either in the county of his principal residence or in the county in which any of the trustees resides or is located, and (ii) after the settlor's death, either in the county in which letters have been granted to his personal representative, or in a county in which letters could have been granted, or in a county in which any trustee resides or is located.

(2) **Nonresident Settlor.** In the case of an inter vivos

trust whose settlor (i) is not domiciled in the Commonwealth at the time when during his lifetime the first application is made to a court concerning the trust, or (ii) was not domiciled in the Commonwealth at his death if the first application to a court concerning the trust was made thereafter, in a county in which any trustee resides, and if there is no such trustee, then in a county where property of the trust is located.

Comment. There is no statutory precedent for this subsection. Confusion should not arise between counties because, under Section 306, jurisdiction after it is once assumed is confined to one county. The Act of 1931 which gave the orphans' court concurrent jurisdiction with the common pleas over inter vivos trusts was silent upon the matter of venue. Section 15 of the Act of 1836, P. L. 628, 20 PS §2741, in dealing with trusts subject to the jurisdiction of the common pleas, provided that the court of common pleas of the county in which any such trustee resided or was located at the commencement of the trust should have jurisdiction of inter vivos trusts. This act has been applied by analogy in the orphans' court. Cf. *Mathew's Trust*, 339 Pa. 219; *Cassone's Est.*, 19 D. & C. 272. Under the procedure hereinabove provided, it is believed that in most instances it will be possible to place the jurisdiction of inter vivos trusts in the same county where the decedent-settlor's estate is being administered without making a hard-and-fast rule to cover all cases. If the decedent's estate and trust estate are administered in the same county, the difficulties of adjusting the rights of creditors and taxing authorities and of interpreting inter-related testamentary and inter vivos provisions will be substantially reduced.

Section 309. Change of Situs—Order of Court.—A court having jurisdiction of a testamentary or inter vivos trust, on application of a trustee or of any party in interest, after such notice to all parties in interest as it shall direct and aided if necessary by the report of a master, and after such accounting and such provision to insure the proper payment of all taxes to the Commonwealth and any political subdivision thereof as the court shall require, may direct, notwithstanding any of the other provisions of this act, that the situs of the trust shall be changed to any other place within or without the Commonwealth if the court shall find the change necessary or desirable for the proper administration of the trust. Upon such change if situs becoming effective by the assumption of jurisdiction by another court, the jurisdiction of the court as to the trust shall cease and thereupon the situs of the trust for all purposes shall be as directed by the court.

Comment. The right of the court to change situs, when altered circumstances make a change desirable, may be particularly important in trusts of long duration, where the new circumstances could not have been anticipated and provided for.

ARTICLE IV.

JUDGES.

Section 401. Powers.—Any judge of an orphans' court, learned in the law, whether or not the court is separate and whether or not it consists of more than one judge, may hear and determine all matters of which the court has jurisdiction. His determination thereof shall be a final

decree, unless exceptions thereto are authorized by rule of court or the decree discloses that it is not intended as such.

Comment. This is suggested by Section 1(b) and 1(c) of the Orphans' Court Act of 1917.

Section 402. Sitting in Other Courts.—Subject to regulation by the Supreme Court, any judge of an orphans' court may hear and determine any matter in any court of record except an appellate court with statewide jurisdiction on call by the president judge of the court in which he is to sit, and any judge of a court of common pleas may hear and determine any matter in an orphans' court on call by its presiding judge. A judge shall not be required to accept any such call.

Comment. This is suggested by Sections 3, 4, and 5 of the 1917 act. See Act of 1911, P. L. 101, 17 PS §§226-229, 20 PS §2127, for the mechanics regulating the assignment and payment of services of judges to different districts. That act apparently deals only with fiscal matters and does not empower an orphans' court judge to hear and determine matters in a common pleas court of the same judicial district. For the situation when there is an entire vacancy in the orphans' court, see Act of 1925, P. L. 328, 20 PS §2141.

Section 403. Powers When the Court is Not in Session.—Any judge of an orphans' court, learned in the law, shall have power, whether or not the court is in session, to administer ex parte business and to issue process.

Comment. This is suggested by Section 15 of the 1917 act. Cf. Supreme Court Equity Rule 4.

Section 404. When President Judge Unable to Act.—Whenever the president judge of an orphans' court is unable to act, the judge next oldest in commission who is able to act shall have the powers of the president judge.

Comment. This is suggested by Section 4(c) of the 1917 act.

ARTICLE V.

CLERK; SHERIFF.

A Clerk.

Section 501. Duties.—The clerk shall have custody of the records and of the seal of the court, shall faithfully perform, under the direction of the court, all the duties of his office, and may appoint an assistant clerk or clerks, but only with the consent and approval of the court. He shall attest in the name of the president judge alone all process, subpoenas, certificates, copies of records and other documents which shall be issued out of the court.

Comment. This is suggested by Section 8(a) and 8(b)1 of the 1917 act. The General County Law of 1929, 16 PS §220, et seq., provides when the register shall be the clerk of the orphans' court. Cf. 20 PS §2182, 2183, regarding counties of over 150,000. The last sentence is based on Section 13 of the 1917 act.

Section 502. Dockets.—The clerk shall keep in the dockets provided for that purpose a record of all proceedings of the court. Local rules may prescribe the recording of all or parts of instruments filed with the court or the clerk, or may prescribe that any instrument be filed in duplicate, and that the duplicates be bound

into volumes and preserved in lieu of recording, or may prescribe that any instrument be copied by photographic or other mechanical process.

Comment. This is suggested by Section 8(b)2 of the 1917 act.

Section 503. Bill of Costs.—Each orphans' court may establish a bill of costs to be charged for the services of the clerk not otherwise provided for by law.

Comment. This is suggested by Section 8(c) of the 1917 act. Fees in counties of 5th-8th classes are fixed by law: 20 PS §2223.

Section 504. Translation of Foreign Language Documents.—A writing not in English shall not be filed in the court or in the office of the clerk unless there is attached to it and filed with it a translation into English sworn to be correct. A writing filed in violation of this section shall not constitute notice to any person.

Comment. This is suggested by Section 8(b)3 of the 1917 act.

Section 505. Advertisement of Accounts.—

(a) Requirement of Notice—Contents of Notice. The clerk shall give notice by advertisement of the time when accounts filed with him and with the register will be presented to the court for confirmation, stating in the advertisement the names and capacities of the respective accountants.

(b) Manner of Advertisement. The notice shall be advertised at least once a week during the four weeks immediately preceding the time for presentation of the accounts to the court in the case of accounts filed with the register, and at least once a week during the two weeks immediately preceding the time for presentation of the accounts to the court in the case of accounts filed with the clerk—

(1) In the legal publication, if any, designated by rule of court for the publication of legal notices, and

(2) In at least one newspaper of general circulation published within the county, and if no such newspaper is published in that county, then in one such newspaper published nearest to that county.

(c) Cost of Advertisement. The expense of the advertisement and of the proof thereof shall be charged to the estate or trust and allowed to the clerk, who shall pay the publications costs to the newspapers upon delivery of the proofs of publication.

Comment. This is suggested by Sections 46(d), 46(i) and 47(a) of the Fiduciaries Act of 1917.

Section 506. Money Paid Into Court.—The clerk shall have custody of all funds paid into court. Pending the distribution thereof, the clerk may invest the funds but shall have no duty to do so. Any such investment, except as the court shall otherwise direct, shall be restricted to obligations of the United States or the United States Treasury, or of the Commonwealth.

Comment. See Section 803 of the 1949 Fiduciaries Act as an instance when money is paid into court. Cf. Section 506 of the 1949 Fiduciaries Act for analogous language. See Act of 1878, P. L. 156, 12 PS §621, which is repealed insofar as it applies to the orphans' court by Section 801(4). For fees to be received by the clerk, see 20 PS §§2222, 2223.

B. Sheriff.

Section 511. Powers and Duties.—The sheriff shall serve process and execute orders directed to him pursuant to the provisions of this act.

Comment. There is no statutory precedent for this section.

Section 512. Fees.—The fees and allowances of the sheriff shall be as provided by law or in the absence thereof as fixed by rule of court.

Comment. This is suggested by Section 19 of the 1917 act.

ARTICLE VI.

MASTERS, AUDITORS, EXAMINERS, GUARDIANS AD LITEM AND TRUSTEES AD LITEM.

Section 601. Appointment; Purpose.—The court may appoint:

(1) Masters. A Master to investigate any issue of fact and to report his finding of fact, conclusions of law and recommendations to the court.

Comment. This is suggested by Section 20(b)1 of the 1917 act.

(2) Auditors of Accounts of Fiduciaries. Except in the circumstances prohibited by law, an auditor to examine and audit an account and to determine distribution.

Comment. This is suggested by Section 47(b) and (c) of the Fiduciaries Act of 1917. Cf. Sections 711 and 712 of the Fiduciaries Act of 1949.

(3) Auditors to State Accounts. An auditor to state an account when a proper account cannot be obtained from a fiduciary or other person required to state an account.

Comment. This is suggested by Section 17(i)2 of the Orphans' Court Act of 1917. It becomes an important power when a fiduciary, because of physical or mental inability, is unable to state an account, or when there is no fiduciary or other person having an obligation to state an account. See Smith's Est., 324 Pa. 575; Witman's Ap., 28 Pa. 376; Welsh's Est., 24 Dist. 489. No provision is made for the appointment of an auditor by the Supreme Court as provided in Section 22(b) of the 1917 act. Cf. Bennett Est., 366 Pa. 232.

(4) Examiners of Assets. By general rule or special order, an examiner or examiners to make periodic or special examination of assets of estates or trusts, and to require all persons in whose custody or control such assets may be held to present them for examination.

Comment. This is suggested by Section 46(b) of the Fiduciaries Act of 1917. No special provisions is made here for an examiner taking oral depositions outside of the Commonwealth, as provided in Section 20(b)3 of the 1917 act. See Section 742 of this act.

(5) Guardians and Trustee Ad Litem. On petition or on its own motion, a guardian or a trustee ad litem to represent the interest, not already represented by a fiduciary, of (i) a person not sui juris, or (ii) an absentee, or (iii) a presumed decedent, or (iv) an unborn or unascertained person.

Comment. This is suggested by Section 17(j) of the 1917

act added by amendment in 1943. See also Sections 704 and 1085 of the Fiduciaries Act of 1949.

Section 602. Compensation.—Any person appointed by the court as master, auditor, examiner, guardian ad litem, or trustee ad litem, shall be compensated by reasonable fees fixed by the court and paid from such sources as the court shall direct.

Comment. This is suggested in part by Section 46(b) of the Fiduciaries Act of 1917 relating to compensation to be paid to examiners.

Section 603. Subpoenas.—Masters, auditors and examiners shall have the power to issue subpoenas with or without a clause of duces tecum to witness to appear before them when necessary for the performance of any of their duties. If any person who has been duly subpoenaed fails to obey the subpoena, the master, auditor or examiner issuing the subpoena may report the neglect or refusal to the court. The court upon receiving such report shall have power to issue an attachment in the same manner as is provided in the case of subpoenas issued by it.

Comment. This is suggested by Section 4 of the Act of 1948, P. L. 506, 17 PS §1745.

Section 604. Power to Administer Oaths.—Masters, auditors and examiners shall have the power to administer oaths to parties and witnesses.

Comment. This is suggested by the last clause of Section 47(c) of the Fiduciaries Act of 1917.

ARTICLE VII

PROCEDURE

A. Institution of Proceedings and Original Process.

Section 701. Petitions.—All applications to the court shall be by petition in the form prescribed by rules of the Supreme Court.

Comment. Compare Pennsylvania Rules of Orphans' Court, Section 3, and Section 17 of the 1917 act.

Section 702. Accounts.—The court may decide or dispose of any question relating to the administration or distributing of an estate or trust and exercise any of its powers in respect thereof upon the filing of an account or in any other appropriate proceeding. The account may be a complete accounting of the estate or trust or of only the transactions which raise the question to be determined.

Comment. There is no statutory precedent for this section. The last sentence may be an extension of existing case law. But see *Cassatt Est.*, 105 Pa. Superior Ct. 14, where the record reveals that the accounting there involved included only the stock transaction giving rise to the apportionment dispute.

Section 703. Writs of Habeas Corpus.—In any proceeding for the adoption of a minor or for the appointment of a guardian of his person, the court may award a writ of habeas corpus.

Comment. This is suggested by Act of 1949, P. L. 793. See Section 301 (8), *supra*.

Section 704. Citation.—Jurisdiction of the person shall be obtained by citation to be awarded by the court upon application of any party in interest. The citation shall direct the party named therein to file a complete answer

under oath to the averments of the petition on or before a day certain, which shall be not less than ten days after the service thereof, and to show cause as the decree of the court shall provide.

Comment. This is suggested in part by Section 17(a) of the 1917 act.

Section 705. Service of Citation.—A citation to obtain jurisdiction of a person may be served by any adult person, or by the sheriff of the county wherein the citation issued, or by deputation of the sheriff of the county where the service may be had in any county of the Commonwealth, in the same manner as a writ of summons in an action of assumpsit in the court of common pleas. When no other time is specially fixed by the court, the order awarding the citation shall be void unless the citation is issued within six months.

Comment. This is suggested by Section 17(a), (b), (c), (d), (e), (g) and (h) of the 1917 act, and by Section 602(c) of the Fiduciaries Act of 1949. See Rules of Civil Procedure, Sections 1009 and 1010. When a citation is employed for purpose of notice, including notice to non-resident of the Commonwealth, it may be served as provided in Section 711.

Section 706. Proof of Service.—Proof of service shall be by affidavit of the person or the return of the sheriff making service, and shall set forth the same information as a sheriff's return in an action of assumpsit.

Comment. This is suggested by Section 17(f) of the 1917 act.

B. Notice

Section 711. Manner of Service; Proof.—Notice of any proceeding in the court may be given within or outside the Commonwealth by personal service, by registered mail, by publication, or otherwise, as the court shall direct by general rule or special order. Notice may be in the form of a citation served as provided in this section.

Comment. See Pa. Rules of Orphans' Court, Section 5, Rule 1, and Section 12 of the 1917 act.

C. Action Upon Default of Respondent

Section 721. Power of Court.—Should the respondent fail to comply with the requirements of any citation or notice, the court, upon proof of service thereof, shall have the power to make such order as may be just and necessary.

Comment. This is suggested by Section 17(i) 1 and 2 of the 1917 act.

D. Summary Decree; Injunction

Section 731. Decree Without Prior Hearing—Attachment—Sequestration.—The court, without a prior hearing, may allow the issuing of a writ of attachment of the person or a writ of sequestration, or both, against any one who the court is satisfied is about to leave the Commonwealth or conceals his whereabouts to the prejudice of the complainant or to an estate or trust within the jurisdiction of the court. On the return of the writ the court may proceed as on the return of a citation or make such order as it shall deem appropriate. An attachment or sequestration issued without a prior hearing may be dissolved at any time by the court upon the respondent's giving

security, to the satisfaction of the court, for his appearance on a day certain to answer the petition and to abide the orders and decrees of the court in the premises.

Comment. This is suggested by Section 18(b) 6 and 7 of the 1917 act. See *infra*, Sections 752 and 753 when summary action is not required.

Section 732. Injunctions.—The court may issue injunctions for the protection of property within its jurisdiction in the same manner as the court of common pleas of the same county.

Comment. This is suggested by Section 16 of the 1917 act.

E. Witnesses; Evidence; Hearings: Trials.

Section 741. Subpoenas.—The court may issue subpoenas with or without a clause of *duces tecum* into any county of the Commonwealth to witnesses to appear before it or any master, auditor, or examiner appointed by it.

Comment. This is suggested by Section 20(a) and (c) of the 1917 act. Section 20(a) of the 1917 act was based on Section 22 of the Act of 1836, P. L. 784, 17 PS §2079. Section 22 of the 1836 act makes no special mention of subpoenas *duces tecum* but apparently applies to them also: Cf. *Abernathy v. Pittsburgh Press Co.*, 91 Pitts. 187. Cf. Register of Wills Act of 1917, Section 9, which includes reference to subpoenas *duces tecum*. Under Section 603 of this act, subpoenas can be issued by masters, auditors, and examiners. The fact that there is authorization to issue subpoenas from both sources is not considered objectionable.

Section 742. Depositions and Discovery.—The court, by general rule or special order, may prescribe the practice relating to dispositions, discovery, and the production of documents. To the extent not provided for by general rule or special order, the practice relating to such matters shall conform to the practice in the local court of common pleas.

Comment. This is suggested by Section 20(b)2 and 3 and 20(c) of the 1917 act. See also Supreme Court Rules, Section 3, Rule 6. Supreme Court Equity Rules, Rule 60, and Rules 4001-4025 of the Procedure Rules.

Section 743. Perpetuation of Testimony and Court Records.—The court, by general rule or special order, may prescribe the practice relating to the perpetuation of testimony and to the perpetuation of lost or destroyed court records. When proved, such court records shall have the same legal effect as original records would have had. Notice of proceedings for the perpetuation of testimony and for the perpetuation of lost or destroyed court records shall be given in such manner as the court shall direct.

Comment. This is suggested by Section 20(d) of the 1917 act. See *Hyndman Est.*, 1 Fiduc. Rep. 399, and *Baker v. Weiss*, 43 D. & C. 707, as instances where the court authorized the taking and perpetuation of testimony.

Section 744. Testimony in Proceedings Removed from Register.—On appeal from the register, or in a proceeding removed from the register, the court may find, upon the testimony taken before the register, that a substantial dispute of fact exists and require a jury to decide the issue of fact. In all other cases, the court shall hear the testimony *de novo* unless all parties appearing in the proceed-

ing agree that the case be heard on the testimony taken before the register. In any event, the court may require witnesses already examined and other witnesses to appear before it.

Comment. This is suggested by Section 20(e)1 and 2 of the 1917 act. It differs in that it expressly approves the Philadelphia practice of permitting the court to award an issue based on testimony taken before the register. The court could not refuse an issue, however, without a hearing unless the parties agree the court may act on the testimony taken before the register.

Section 745. Jury Trial.—

(a) Will Contest. When a substantial dispute of fact shall arise concerning the validity of a writing alleged to be testamentary, any party in interest shall be entitled to a trial of this fact by a jury.

Comment. This is suggested by Section 21(b) of the 1917 act and is included herein to insure that the right to trial by jury in such circumstances is preserved. The absolute right to trial by jury in will contests was not a right recognized at common law: See *Hutton, Wills in Pennsylvania*, p. 385, et seq.; *Fleming's Est.*, 265 Pa. 399. Since the Constitution (Article I, Section 6) merely guarantees that "Trial by jury shall be as heretofore" and since there is doubt as to the extent of this right in will contests before the effective date of the Constitution, it seems advisable to preserve the legislative provision and not depend solely upon the constitutional guarantee. The court may award an issue for jury trial based on testimony taken before the register, but may not deny an issue without a hearing. See Section 744, *supra*.

(b) Title to Property. When a substantial dispute of fact shall arise concerning the decedent's title to property, real or personal, any party in interest shall be entitled to a trial of this fact by a jury.

Comment. This subsection is in conformation of existing case law: *DiPaola Est.*, 350 Pa. 408; *Moyer's Est.*, 341 Pa. 402; *Cross's Est.*, 278 Pa. 170.

(c) Waiver of Right. A person entitled to a trial by jury may make demand in writing therefor prior to the hearing of the issues of fact. The right to trial by jury is waived if such a demand is not so made, or if the person claiming the right fails to appear at the hearing or fails to object to trial by the court before the introduction of evidence is commenced.

Comment. This is suggested by Section 18(a) of the Model Probate Code, and is consistent with case law: *Grossman Bros. v. Goldman*, 85 Pa. Superior Ct. 205. The right to dispense with jury trial by agreement is recognized in Art. V, Section 27 of the Pennsylvania Constitution.

(d) When Not of Right. When there is no right to trial by jury or when the right is waived, the court in its discretion may require a jury to decide any issue of fact, and the verdict in such case shall have the same effect as though a trial by jury had been allowed as a matter of right to a party in interest.

Comment. This is suggested by Section 21(a) of the 1917 act, but differs therefrom in that the verdict of the

jury, unless a new trial or judgment n.o.v. is granted, would be conclusive, not merely advisory.

Section 746. Trials in the Orphans' Court.—

(a) Jury. Jury trials in any case begun before or certified or appealed to the orphans' court shall be tried in the orphans' court. The court shall draw a jury and preside at the trial of the issue and shall have all the powers of a judge in trials by jury in cases at law in the court of common pleas. The panel of jurors drawn for service in the common pleas court of the county in which the orphans' court is located shall be available for such service in the orphans' court when required, and in counties where there is a separate orphans' court, the orphans' court and the court of common pleas shall, by appropriate rules, provide for and regulate the manner in which the jurors shall be made available and sent to the orphans' court when required for the trial of issues therein.

(b) Rules of Court. Unless and until the orphans' court otherwise directs, the appropriate rules of the common pleas court of the same county shall apply to jury trials of issues in the orphans' court, and matters relating to such trials shall be heard and disposed of by the orphans' court.

(c) Effect of Verdict. The verdict of the jury in the orphans' court shall have the same effect as the verdict of a jury in a case at law in a court of common pleas.

Comment. This section is suggested by Section 21(d) of the 1917 act. It is intended that the jury trial shall be conducted in the orphans' court and have the same effect as a verdict of a jury in the common pleas court. No special provision is made for the certification of the verdict or judgment to the prothonotary. Ample provisions are made in Sections 751-756 for the enforcement of orders and decrees by the orphans' court.

F. Enforcement of Orders and Decrees.

Section 751. Methods of Enforcement.—Compliance with an order or decree of the court may be enforced by—

- (1) attachment of the person;
- (2) sequestration of real or personal property;
- (3) execution on personal property;
- (4) attachment execution; or
- (5) execution on real estate.

Comment. This is suggested by Section 18(a) of the 1917 act.

Section 752. Procedure on Attachment of the Person.—

(a) Direction of Writs. A writ of attachment of the person shall be directed to and executed by the sheriff of the county in which the court is located or of any county where the person to be attached is located.

Comment. This is suggested by Section 18(b)1 and 2 of the 1917 act.

(b) Discharge of Person Attached for Contempt. Any person attached for contempt may be discharged from custody by the court upon purging himself of contempt to the satisfaction of the court by whose order he was attached.

Comment. This is suggested by Section 18(b)8 of the 1917 act.

Section 753. Procedure on Sequestration of Real or Per-

sonal Property.—A writ of sequestration of real or personal property of an estate or trust, or of the respondent, to enforce an order or decree of the court in the administration of the estate or trust shall be allowed by the court as fully as in any court of equity, and shall be directed to and executed by the sheriff of the county in which the court is located or of any county where property to be sequestered is located. The court, by general rule or special order, may prescribe the practice relating to sequestration of real and personal property. To the extent not provided for by general rule or special order, the practice relating to sequestration shall conform to the practice in the local court of common pleas.

Comment. This is suggested by Section 18(b) of the 1917 act. Since the procedure for sequestration, as set forth in the 1917 act, has been employed very infrequently, and can be included in rules of court if deemed necessary, Section 753 has been set forth in an abbreviated form. The language employed is suggested in part by Section 2 of the Act of 1818, P. L. 285, 7 Sm. L. 131, 39 PS §200.

Section 754. Procedure on Execution on Personal Property.—Writs of execution on personal property shall be allowed by the court and directed to and executed by the sheriff of the proper county. The proceedings thereon shall be the same as on execution on personal property issued out of the court of common pleas of the same county.

Comment. This is suggested by Section 18(a)3 and Section 18(d) of the 1917 act.

Section 755. Procedure on Attachment Execution.—Writs of attachment shall be allowed by the court and directed to and executed by the sheriff of the proper county. The proceedings thereon shall be the same as attachment executions issued out of the court of common pleas of the same county.

Comment. This is suggested by Section 18(a)4 of the 1917 act.

Section 756. Procedure on Execution on Real Estate.—

(a) Filing in Common Pleas. The prothonotary of any court of common pleas shall, on demand of the fiduciary or of any party in interest, file and docket a certified transcript or extract from the record showing that an orphans' court has adjudged an amount to be due by any person, and such transcript or extract shall constitute a judgment against such person from the time of its filing with the same effect as if it had been obtained in an action in the court of common pleas. If the amount adjudged to be due shall be increased or decreased on appeal, the prothonotary shall, if the decree of the appellate court is certified to him, change his records accordingly, and if the appellate court has increased the amount, the excess shall constitute a judgment from the time when the records are so changed.

(b) Satisfaction and Discharge. If the orphans' court shall order such person to be relieved from any such judgment, the prothonotary shall, on demand of any party in interest, enter on his records a certified copy of such order, which shall operate as a satisfaction of the judgment.

(c) Executions. Execution may be issued on the judgment out of the court of common pleas against the real estate of such respondent by any interested party for the recovery of so much as may be due him, in the same

manner as upon a judgment rendered by the court of common pleas.

Comment. This is suggested by Section 18(e) of the 1917 act altered to conform to the style adopted in Section 755 of the Fiduciaries Act of 1949.

G. Costs.

Section 761. Allowance and Allocation.—The allowance and allocation of costs incident to proceedings before the court or to the administration of estates or trusts within the jurisdiction of the court shall be as now or hereafter provided by law, and in the absence thereof, as fixed by the court by general rule or special order.

Comment. This section has no counterpart in the 1917 act.

H. Appeals.

Section 771. Right of Appeal.—Any party in interest who is aggrieved by a final order or decree of the orphans' court, or a fiduciary whose estate or trust is so aggrieved, may appeal therefrom to the proper appellate court. An appeal in like manner may be taken from a decree of distribution of the orphans' court which is not final within the meaning of this section, provided the orphans' court shall certify that the decree is sufficiently definite to determine the substantial issues between the parties.

Comment. The first sentence of Section 771 is suggested by the first portion of Section 22(a) of the 1917 act. It is not intended that a fiduciary who is a mere stakeholder shall have the right to appeal, but it is intended that he shall have the right to appeal from an allowance of a claim against the estate. The second sentence is added to change the rule established by case law (cf. Hood's Est., 323 Pa. 253; Brusstar's Est., 123 Pa. Superior Ct. 45), which in some instances has caused unnecessary delay to the appeal when a schedule of distribution has been directed.

Section 772. Effect of Appeal.—No appeal from an order or decree of an orphans' court concerning the validity of a will or the right to administer shall suspend the powers or prejudice the acts of a personal representative acting thereunder. The reversal or modification of any decree of an orphans' court in a proceeding in which the court has jurisdiction of the sale, mortgage, exchange or conveyance of real or personal estate shall not divest any estate or interest acquired thereunder by a person not a party to the appeal.

Comment. This is suggested in part by Section 22(a) of the 1917 act. Cf. Fiduciaries Act of 1949, Sections 520, 547, 950, 967, 1045(c), 1066. See also Section 21(b) of the Register of Wills Act of 1917 and Section 208(c) of the Register of Wills Act of 1951.

Section 773. Disposition of Cases on Appeal.—The Supreme and Superior Courts of the Commonwealth shall, in all cases of appeal from a decree of the orphans' court, hear, try and determine the same as to right and justice may belong, and decree according to the equity thereof, and may place or allocate the record costs, including printing costs, upon an appellant or appellee or upon the estate or trust.

Comment. This is suggested by Section 22(b) of the 1917 act.

ARTICLE VIII.

REPEALER.

Section 801. (a) Specific Repeals.—The following acts and parts of acts and all amendments of each are hereby repealed as respectively indicated:

(1) Section four of the act, approved the eleventh day of April, one thousand eight hundred forty-eight (Pamphlet Laws 506), entitled "An act to establish a uniform line along the river Delaware, in front of the incorporated districts of the Northern Liberties and Kensington, in reference to county bridges, changing the name of Andrew Jackson Glarfke, to Andrew G. Jackson, to issuing subpoenas for witnesses by auditors, exempting the real estate of the Pennsylvania society for promoting the abolition of slavery, from taxation, in reference to fees of constables in Schuylkill county, in reference to the removal of the barn of Amos George, in the township of Blockley, county of Philadelphia, and to change the name of Dallas township, Lehigh county, to Washington, and relative to the commissioners of Kensington and Richmond, in Philadelphia county," insofar as it applies to auditors appointed by orphans' courts.

Comment. This is covered by Section 603 of this act.

(2) Section six of the act, approved the second day of April, one thousand eight hundred sixty-eight (Pamphlet Laws 3), entitled "An act to ascertain and appoint the fees to be received by the several officers of this Commonwealth," absolutely.

Comment. This is a fee bill.

(3) The act, approved the twenty-seventh day of March, one thousand eight hundred seventy-three (Pamphlet Laws 49), entitled "An act to further provide for the enforcement of decrees in the orphans' courts," absolutely.

Comment. This act which provides for the enforcement, by attachment, of a decree of the orphans' court for the payment of money is no longer required. See Section 755 of this act.

(4) The act, approved the twenty-fifth day of May, one thousand eight hundred seventy-eight (P. L. 156), entitled "An act to authorize the investment of money paid into court pendente lite," insofar as it applies to monies paid into the orphans' court.

Comment. This is covered by Section 506 of this act.

(5) The act, approved the seventh day of June, one thousand nine hundred seventeen (P. L. 363), entitled "An act relating to the organization, jurisdiction, and procedure of the orphans' courts; the powers and duties of the judges thereof; and appeals therefrom," absolutely, except the part of the last paragraph of section nine thereof, which was added by the act, approved the second day of July, one thousand nine hundred forty-one (P. L. 227), entitled "An act to further amend section nine of the act, approved the seventh day of June, one thousand nine hundred and seventeen (P. L. 363), entitled 'An act relating to the organization, jurisdiction, and procedure of the orphans' courts; the powers and duties of the judges thereof; and appeals therefrom,' by imposing liability on

executors, administrators or trustees for real estate broker's commissions in certain cases," which is not repealed hereby.

Comment. Provisions for the allowance and division of brokers' fees are not properly part of the Orphans' Court Act. They should be preserved in this form until later legislative action thereon. Another portion of Section 9 not included in this act, or saved from repeal, because not considered essential reads: "The right to empower and authorize testamentary trustees to continue to hold real estate charged with a charitable purpose, notwithstanding provisions of the will of the testator, where in the judgment of the court, it will enable the testamentary trustees eventually to accomplish the main intent of the testator."

(6) Section twenty-four of the act, approved the seventh day of June, one thousand nine hundred seventeen (P. L. 447), entitled, as amended, "An act relating to the administration and distribution of the estates of decedents and of minors, and of trust estates; including the appointment, bonds, rights, powers, duties, liabilities, accounts, discharge and removal of executors, administrators, guardians, and trustees, herein designated as fiduciaries; the administration and distribution of the estates of presumed decedents; widow's and children's exemptions; debts of decedents, rents of real estate as assets for payment thereof, the lien thereof, sales and mortgages of real estate for the payment thereof, judgments and executions therefor, and the discharge of real estate from the lien thereof; contracts of decedents for the sale or purchase of real estate; legacies, including legacies charged on land; the discharge of residuary estates and of real estate from the lien of legacies and other charges; the appraisement of real estate devised at a valuation; the ascertainment of the curtilage of dwelling houses or other buildings devised; the abatement and survival of actions, and the substitution of executors and administrators therein, the survival of causes of action and suits thereupon by or against fiduciaries; investments by fiduciaries; the organization of corporations to carry on the business of decedents; the audit and review of accounts of fiduciaries; refunding bonds; transcripts to the court of common pleas of balances due by fiduciaries; the rights, powers, and liabilities of nonresident and foreign fiduciaries; the appointment, bonds, rights, powers, duties, and liabilities of trustees durante absentia; the recording and registration of decrees, reports and other proceedings, and the fees therefor; appeals in certain cases; and, also, generally dealing with the jurisdiction, powers, and procedure of the orphans' court in all matters relating to fiduciaries concerned with the estates of decedents," except insofar as it saves the jurisdiction of other courts in actions which were pending at the time of the approval of said act, and subsections (b), (d), (g) and (i) of section forty-six and subsection (a) of section forty-seven thereof, absolutely.

Comment. These sections were saved from repeal by the Fiduciaries Act of 1949, Section 1401(a) (1) (i). Section 24 of the 1917 Fiduciaries Act is covered by Section 301(10) hereof; 46(b) by Section 601 hereof; 46(d) by Section 505 hereof; 46(g) by Section 301(2) and 301(6) hereof; 46(i) by Section 505 hereof; and 47(a) by Section 505 hereof.

(b) General Repeal. All other acts and parts of acts inconsistent herewith are hereby repealed.

(c) Saving Clause. This act shall not repeal or modify any of the provisions of the act, approved the twenty-fifth day of June, one thousand nine hundred forty-seven (P. L. 963), entitled "An act prescribing the fees to be received by the clerks of orphans' courts of counties of the fifth, sixth, seventh and eighth class," or its amendment.

Comment. This is a fee bill.

Approved the 10th day of August, A. D. 1951.

JOHN S. FINE.

ESTATE TAX APPORTIONMENT ACT OF 1951

HISTORY OF ESTATE TAX APPORTIONMENT ACT OF 1951

Senate Bill No. 303

Introduced by the Honorable John M. Walker (By Request)

In the Senate

Referred to Committee on Judiciary General, March 6.
Reported as committed, April 10.

Passed first reading, April 10.

Passed second reading, April 11.

Recommitted to Committee on Judiciary General, April 16

Re-reported as committed, May 1.

Passed third reading and final passage, May 2 (49-0).

In the House

Referred to Committee on Ways and Means, May 7.

Returned to House and referred to Committee on Judiciary, June 4.

Re-reported as committed, July 17.

Passed first reading, July 30.

Passed second reading, July 31.

Over in order, August 1, 6, 7.

Passed third reading and final passage, August 13 (205-1).

Approved by the Governor, August 24, 1951

Act No. 338

TABLE OF CONTENTS

Section 1. Definitions

Section 2. Equitable Apportionment

Section 3. General Rules

(a) Powers of Testator or Settlor

(b) Present and Remainder Interests

(c) Separate Apportionment of Interest and Penalties—Special Circumstances

 No. 338

An Act

Relating to the apportionment of estate taxes and providing procedure for enforcement of contribution or exoneration.

Comment. The Act of 1937, P. L. 2762, is an amendment to the Fiduciaries Act of 1917 and added Section 48.1 thereto. The title thereto reads:

"An act to add section 48.1 to the act, approved the seventh day of June, one thousand nine hundred and seventeen (P. L. 447), entitled [here follows the title of the 1917 act], by providing for the apportionment of estate taxes in certain cases."

In *Moreland Est.*, 351 Pa. 623, at p. 633, the court relied upon the title of the Fiduciaries Act of 1917 as well as of the amendatory act in concluding that "this is sufficiently broad to include provisions concerning the tribunal, and the ways and means, by which such apportionment is to be made." See also *Mellon Est.*, 347 Pa. 520, at p. 533, where it was held that the title of the 1937 Act gives adequate notice of proration of interest as well as of the tax.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. Definitions.—The following words when used in this act, unless the context clearly indicates otherwise, shall have the meanings ascribed to them in this section:

(1) "Person" includes a corporation, partnership, and association, as well as a natural person, whether acting in a separate or in a fiduciary capacity.

Comment. This is suggested by the Statutory Construction Act, §101(84), 46 PS 601.

(2) "Estate Tax" means gross Federal estate tax, including interest and penalty thereon.

Comment. The 1937 Act has been interpreted to apply to interest as well as to the tax: *Mellon Est.*, 347 Pa. 520. So interpreted, it has been held that where there are present and remainder interests, interest on estate tax should be paid from principal: *Widener Est.*, 1 Fiduc. Rep. 126; *Castner's Est.*, 59 D. & C. 370; cf. *Rieck's Estate*, 98 Pitts. L. J. 525. See Section 3(b) and comment thereto. Pennsylvania inheritance and other state death taxes are included in the apportionment to the extent that they are credits, because the tax which is apportionable is the gross Federal tax before any credit for state taxes.

(3) "Persons interested in property includible in gross estate" includes persons liable for payment of estate tax and persons whose property is subject to a lien for the estate tax. It includes personal representatives, guardians and trustees, individual or corporate.

Comment. The words "persons interested in property includible in gross estate" as defined in this clause are intended to embrace anyone who falls within the definition of "executor" found in Section 930 of the Internal Revenue Code, any transferee who may be liable under

Section 900 and any person whose property may be taken or is subject to lien for the tax under Sections 826 and 827 of the Code. Cf. *Mellon Est.*, 347 Pa. 520.

(4) "Gross Estate" means all property of every description required to be included in computing the estate tax.

Comment. This is suggested by a similar definition in the New Jersey tax apportionment act. The term as used here is intended to be identical with the term used in Section 811 of the Internal Revenue Code and to include the same items which are contained in that section.

(5) "Fiduciary" includes executors, administrators of any description and trustees.

Comment. A more embracing definition is not required for purposes of this act.

Section 2. Equitable Apportionment.—Estate tax, except as provided in subsection (a) of section three, shall be apportioned equitably, as near as may be in accordance with the principles hereinafter stated, among all persons interested in property in gross estate, whether resident or nonresidents of the Commonwealth, and they shall pay the amounts apportioned against them.

Comment. There is no general provision in the Federal statutes requiring an apportionment, but Section 826(b) of the Internal Revenue Code makes provision for equitable contribution from the decedent's estate when the tax is paid by someone other than the executor; Section 826(c) empowers the executor to secure contribution from insurance beneficiaries; and Section 826(d) empowers the executor to secure contribution from recipients of property over which decedent had power of appointment. It is not contemplated that insurance companies would be "persons interested in property includible in gross estate." Since their relationship to the decedent was contractual their policies, except as they should agree otherwise out of consideration for the beneficiaries, would remain as heretofore: *Moreland Est.*, 351 Pa. 623; cf. *May Est.*, 94 Pitts. L. J. 209. "Whether residents or nonresidents" is suggested by similar provisions in the New York and New Jersey Acts. Cf. *Knight Est.*, 66 D. & C. 267, 72 D. & C. 109; *Bedall Trust*, 1 Fiduc. Rep. 149. The reference to Section 3(a) is included to make it clear that a testator or settlor, within the indicated limits, may provide that there shall be no apportionment. The words "equitably, as near as may be" are intended to indicate that the court is to have some latitude in applying the principles set forth in the act.

While Pennsylvania courts of equity undoubtedly have the right without legislative authority to decree apportionment (*Mellon Est.*, 347 Pa. 520; *Jones' Est.*, 54 D. & C. 364; cf. *Jeffrey's Est.*, 333 Pa. 15), it nevertheless seems advisable to give statutory recognition thereto.

Section 3. General Rules.—

(a) Powers of Testator or Settlor. A testator, settlor, or possessor of any appropriate power of appointment may direct how the estate tax shall be apportioned or allocated or grant a discretionary power to another so to direct. Any such direction shall take precedence over the provisions of this act insofar as the direction provides for the payment of the estate tax or any part thereof from property, the disposition of which can be controlled by the instrument containing the direction or delegating the power to another.

Comment. The comparable wording of the 1937 Act is "except in a case where a testator otherwise directs in his will." The right to direct otherwise by will is also recognized in Section 826(c) and 826(d) of the Internal Revenue Code in regard to life insurance and appointed property. Numerous Pennsylvania cases indicate the difficulty in finding the intention of the testator under the particular wording and circumstances involved: See *The Apportionment of the Federal Estate Tax in Pennsylvania*, 54 Dick. L. R. 432, at p. 446, and cases cited therein.

It is the intention of this clause, for example, that the decedent-donor may by will relieve appointive property of tax by directing its payment from his own estate, but the creator of the power could not relieve it by directing payment from the decedent-donor's estate. Cf. *Schoen Est.*, 1 Fiduc. Rep. 113. However, a general power of appointment would be construed to include a discretionary power of apportionment which would empower the decedent-donor to direct apportionment of all taxes against the appointive property, including those attributable to other interests.

(b) Present and Remainder Interests. When estate tax shall be apportioned in a situation involving both a present and future interest, the amount apportioned, including interest and penalties, shall be paid entirely from principal, even though the holder of the present interest also has rights in the principal.

Comment. This subsection is most important and is directed toward the avoidance of complicated apportionments between principal and income: Cf. *Crane's Est.*, 314 Pa. 193; *Mack Est.*, 98 Pitts. L. J. 81; *Wyndham Est.*, 1 Fiduc. Rep. 136. The words "including interest and penalties" are intended to change the method of apportionment thereof introduced by Section 11(4) of the Principal and Income Act of 1947, repealed by Section 8 hereof insofar as it is inconsistent with the provisions of this act.

(c) Separate Apportionment of Interest and Penalties—Special Circumstances. When the orphans' court shall find that it is inequitable to apportion interest and penalties in the same manner as the principal of the estate tax by reason of special circumstances, it may direct apportionment of interest and penalties in a manner different from principal.

Comment. This exception is intended to enable the court in special circumstances to place the burden of interest and penalties on the persons who occasioned the delay or benefited most by it. Thus, penalty for a late return might be placed by the court on the testamentary estate if the executor is to be surcharged for his negligence; but if interest on estate tax has accrued because of a contest over the valuation of assets in an inter vivos trust, a greater portion of interest might be charged against the trust. However, it should be borne in mind that all persons against whom tax is apportioned benefit by reduced tax rates when any valuations are reduced or when assets are excluded from the gross estate. In exceptional cases the court might find it equitable to apportion some of the interest and penalties against income.

Section 4. Method of Apportionment.—

(a) Basis of Apportionment. Apportionment of the estate tax, except as provided in section three, shall be made among the persons interested in property includible in gross estate in the proportion that the value of the interest of each such person bears to the value of the net estate before exemption. The values used in determining the amount of tax liability shall be used for this purpose.

Comment. This establishes a general rule for fair apportionment of the tax. Each interest which is included in the taxable estate must bear its pro rata share of the tax. Uncertainty is reduced by adopting the values used for determining the tax.

(b) Treatment of Deductions and Credits. The following principles shall apply with respect to deductions and credits allowable:

(1) Deductions Allowed by Federal Revenue Laws in Determining the Value of Decedent's Net Estate. Any interest for which deduction is allowable under Federal revenue laws in determining the value of decedent's net estate, such as property passing to or in trust for a surviving spouse and charitable, public or similar gifts or bequests to the extent of the allowed deduction, shall not be included in the computation provided in subsection (a) of section four hereof, and to that extent no apportionment shall be made against such interest, except that when such an interest is subject to a prior present interest which is not allowable as a deduction, the estate tax apportionable against the present interest shall be paid from principal.

Comment. Clause (1) makes it clear that the surviving spouse or charity would not pay tax on property qualifying for a marital or charitable deduction respectively. See *Harvey Est.*, 350 Pa. 53; *Wilkinson's Est.*, 37 D. & C. 243; *Morris Est.*, 1 Fiduc. Rep. 141; cf. *North's Est.*, 50 D. & C. 703. A deduction would not be allowed for property passing under a postnuptial agreement except to the extent it might qualify for marital deduction: *Stadtfeld Est.*, 359 Pa. 147.

(2) Property Previously Taxed and Gift Tax. Any deduction for property previously taxed and any credit for gift taxes or taxes of a foreign country paid by the decedent or his estate shall inure to the proportionate benefit of all persons liable to apportionment.

Comment. There is no comparable provision in the 1937 Act. A similar provision is included in the New York and New Jersey acts, the former codifying the decision of *in re Blumenthal*, 293 N. Y. 707, 56 N. E. 2d 588. It is the intention of this clause that such deductions and credits should be taken into account only in determining the tax to be apportioned, and should not inure to the exclusive benefit of the recipients of prior-taxed property or donors of lifetime gifts.

(3) Credit for State Taxes. Any credit for inheritance, succession or estate taxes or taxes in the nature thereof in respect to property or interests includible in the gross estate shall inure to the benefit of the persons or interests chargeable with the payment of such taxes to the extent or in proportion that the tax paid or payable reduces the estate tax.

Comment. There is no comparable provision in the 1937 Act. It is consistent with *Mellon Est.*, 347 Pa. 520; *Wyndham Est.*, 1 Fiduc. Rep. 136; and *Rieck's Est.*, 98 Pitts.

L. J. 525, and is made to apply to credit for all local taxes. See Utilization and Apportionment of the Federal Estate Tax Credit, 98 U. of Pa. L. R. 102. In practical operation this clause would mean that the gross Federal tax is apportioned; and if the total inheritance taxes paid under the Act of 1919 and under the laws of other jurisdictions exceed the total Federal credit, for example by 10%, only 10/11 of the inheritance tax paid by each legatee would be allowed to him as a credit against the amount calculated as his contribution toward the gross Federal tax.

(4) Inheritance or Death Tax Effect. To the extent that property passing to or in trust for a surviving spouse or any charitable, public or similar gift or bequest does not constitute an allowable deduction solely by reason of an inheritance tax or other death tax imposed upon and deductible from such property, it shall not be included in the computation provided for in subsection (a) of section four hereof, and to that extent no apportionment shall be made against such property.

Comment. This clause is an innovation having as its purpose the avoidance of the complicated calculations otherwise required. The Federal taxing authorities in giving credit for charitable legacies or marital deduction do not allow a deduction of the portion of such legacies used to pay a Pennsylvania inheritance tax or other death tax: I. R. C. 812(d), 812(e) (1) (E) (i); cf. Rieck's Est., 98 Pitts. L. J. 525. Thus, a Federal estate tax is imposed on the portion of the legacies being used to pay the inheritance tax, which estate tax in turn, except for this clause, might be apportioned against the legacies qualifying for the deduction hereby reducing the deduction, and so on ad infinitum. While the rule here provided places a burden on other taxable shares, the slight additional burden is more than overbalanced by the practical considerations involved.

Section 5. Enforcement of Contribution or Exoneration.—

(a) Fiduciary's Duty. The fiduciary charged with the duty to pay the tax shall be entitled, and it shall be his duty to recover, from persons liable to apportionment or from whoever is in possession of property includible in the gross estate not in the fiduciary's possession, the amounts of tax apportionable thereto.

Comment. The rights here granted are necessary because of the personal representatives personal liability for payment of the tax levy; 26 U. S. C. A. 822(b). The clauses of the Federal statute permitting proration against insurance proceeds [I. R. C. 826(c)] and property taken by taxable power of appointment [I. R. C. 826(d)] appear to be permissive only. The duty here imposed is undoubtedly consistent with Pa. law. See Berkowitz Est., 36 Luz. 125.

(b) Suspending Distribution. Distribution of property includible in the gross estate to any person, other than a fiduciary charged with the duty to pay the tax, shall not be required of any fiduciary until the tax apportionable with respect thereto is paid, or if the tax has not been determined and apportionment made, until adequate security for such payment is furnished to the person making such distribution.

Comment. This subsection is consistent with cases awarding appointed property to the executor of the donee of the power pending determination of its liability for tax: Curran's Est., 312 Pa. 416, cf. Harris' Est., D. & C. 378. See Hansen's Est., 344 Pa. 12, as an instance where distribution was awarded to testamentary trustees upon giving requisite security before tax was determined, and Cardeza's Est., 51 D. & C. 461, as an instance where distribution to a legatee was delayed for several years while the amount of Federal tax was being established. Compare also Section 617, 618 and 619 of the Fiduciaries Act of 1949.

(c) Court Decrees. The orphans' court, upon petition or at an accounting or in any appropriate action or proceeding, shall make such decrees or orders as it shall deem advisable apportioning the tax. It may also direct a fiduciary to collect the apportioned amounts from the property or interest in his possession of any persons against whom such apportionment has been made and direct all other persons against whom the tax has been or may be apportioned or from whom any part of the tax may be recovered to make payment of such apportioned amounts to the fiduciary. When it is ascertained that the fiduciary holds property of the person liable to apportionment insufficient to satisfy the apportioned tax, the court may direct that the balance of the apportioned amount of tax shall be paid to the fiduciary by the person liable. Should an overpayment of the tax be made by any person or on his behalf, the court may direct an appropriate reimbursement for the overpayment. If the fiduciary cannot recover the tax apportioned against a person benefited, such an unrecovered amount shall be charged in such manner as the orphans' court may determine.

Comment. Mellon Est., 347 Pa. 520, illustrates the advisability of permitting the apportionment to be made upon petition as well as in proceedings already before the court. See also Elliott's Est., 58 Montg. Co. L. R. 114; Knight's Est., 166 D. & C. 267. It is clear that a fiduciary who has paid the estate tax could petition the court and be authorized to receive contributions from those against whom the tax is apportioned. Also under Mellon Est., the Commonwealth is not a necessary party entitled to notice, regardless of the fact proration may deprive it of an estate from which to collect the tax. Subsection (c) omits the word "summarily" included in the 1937 Act to avoid any implication that the due process requirement of adequate notice is to be dispensed with: Cf. Moreland Est., 351 Pa. 623. What is adequate notice will depend on the circumstances of each case. The decree could not direct a life insurance company to pay the tax, if to do so would change its obligations under its contract: Moreland Est., supra. Proceedings under this subsection must await the final assessment of tax (Lucey Est., 63 D. & C. 645; Cardeza's Est., 51 D. & C. 461) and should be instituted before the estate is distributed: Parker Est., 348 Pa. 211. The last sentence recognizes the difficulties of enforcement, particularly when the decree must be enforced outside of the Commonwealth. See annotation 16 A. L. R. 2d 1282.

Section 6 Severability.—If any provision of this act or the application thereof to any person or circumstances is held invalid, the remainder of this act and the application of such provision to other persons or circumstances

shall not be affected thereby, and to this end the provisions of this act are declared to be severable.

Section 7. Short Title.—This act shall be known and may be cited as the "Estate Tax Apportionment Act of 1951."

Section 8. Repeals.—Section forty-eight point one of the act, approved the seventh day of June, one thousand nine hundred seventeen (P. L. 477), entitled, as amended, "An act relating to the administration and distribution of the estates of decedents and of minors, and of trust estates; including the appointment, bonds, rights, powers, duties, liabilities, accounts, discharge and removal of executors, administrators, guardians, and trustees, herein designated as fiduciaries; the administration and distribution of the estates of presumed decedents; widow's and children's exemptions; debts of decedents, rents of real estate as assets for payment thereof, the lien thereof, sales and mortgages of real estate for the payment thereof, judgments and executions therefor, and the discharge of real estate from the lien thereof; contracts of decedents for the sale or purchase of real estate; legacies, including legacies charged on land; the discharge of residuary estates and of real estate from the lien of legacies and other charges; the appraisement of real estate devised at a valuation; the ascertainment of the curtilage of dwelling houses or other buildings devised; the abatement and survival of actions, and the substitution of executors and administrators therein; the survival off causes of action and suits thereupon by or against fiduciaries; investments by fiduciaries; the organization of corporations to carry on the business of decedents; the audit and review of accounts of fiduciaries; refunding bonds; transcripts to the court of common pleas of balances due by fiduciaries; the right, powers, and liabilities of nonresident and foreign fiduciaries; the appointment, bonds, rights, powers, duties, and liabilities of trustees durante absentia; the recording and registration of decrees, reports and other proceedings, and the fees thereof; appeals in certain cases; and, also, generally dealing with the jurisdiction, powers, and procedure of the orphans' court in all matters relating to fiduciaries concerned with the *estates of decedents," as added by the act, approved the second day of July, one thousand nine hundred thirty-seven (P. L. 2762), is hereby repealed.

Subsection four of section eleven of the act, approved the third day of July, one thousand nine hundred forty-seven (P. L. 1283), entitled "An act concerning the ascertainment of principal and income; and the apportionment of receipts and expenses among tenants and remaindermen," is hereby repealed insofar as it is inconsistent with the provisions of this act.

All other acts and parts of acts are hereby repealed insofar as they are inconsistent with the provisions of this act.

Section 9. Effectice Date.—The provisions of this act shall become effective immediately upon final enactment; and shall apply to the apportionment of estate taxes with respect to any estate for which the original Federal estate tax return is filed thereafter, regardless of when the decedent died.

Comment. The 1937 Act provided "the provisions of this act shall become effective immediately upon its final

* "estate" in original.

enactment." This was interpreted to apply retroactively. As so interpreted, it was determined to be constitutional because it did not disturb vested rights; Jeffrey's Est., 32 D. & C. 5, 333 Pa. 15; Stockler's Est. (No. 1), 30 Berks 149. The similar act in New York State was determined to be not in violation of the U. S. Constitution: Riggs Gdn. v. Del Drago, 317 U. S. 95. The 1937 Act created no new substantive rights; it merely clarified existing rights and implemented their enforcement by giving the orphans' court jurisdiction over persons found liable, including persons who would not otherwise be before the court and who as ordinary debtors would not be subject to its jurisdiction: Stadtfeld Est., 359 Pa. 147; Jones' Est., 54 D. & C. 364.

Approved the 24th day of August A. D. 1951.

JOHN S. FINE.

WAR CLAIMS COMMISSION

Washington 25, D. C.

February 2, 1951.

IMPORTANT INFORMATION REGARDING VETERANS

To Members of the State Legislature:

As a legislator of your State, I know that you are in close touch with the people of your communities. I am, therefore, writing to ask assistance in a matter affecting veterans and their families.

March 1, 1951, is the deadline for filing World War II prisoner of war, civilian interne and survivor claims, under the War Claims Act of 1948. Through the State Veterans' Agency, the veterans' organizations and regional offices of the Veterans' Administration, claims forms and information have been available in your State during the past year.

However, according to our records, apparently 30,000 persons who are eligible to the benefits provided by the War Claims Act have not filed claims thus far. Some of these no doubt live in your State but do not know they have benefit rights. Many of them may be the eligible survivors of deceased prisoners of war or of civilian internees. Every effort must be made in these next few weeks to get the word to them so they can receive the money to which they are entitled. To be paid these benefits, it is imperative that they file their claims with the War Claims Commission by March 1st.

Anything you, as a Member of your Legislature, can do to inform ex-prisoners of war and civilian internees or their families of their rights under the War Claims Act will be appreciated by them and by the War Claims Commission.

With best wishes, I remain,

Sincerely yours,

F. BYRNE AUSTIN,
Executive Director

WAR CLAIMS COMMISSION

Washington 25, D. C.

Background Information

BENEFITS FOR PRISONERS OF WAR AND CIVILIAN INTERNEES UNDER WAR CLAIMS ACT OF 1948, AS AMENDED

Note: This material is intended to aid prisoner of war and civilian internee claimants to know their rights under the War Claims Act of 1948; and to serve as a quick source of facts for veterans' service officers, State veterans' agencies, veteran and internee organizations, writers, speakers, etc. needing such information. . . This revision supercedes the two previous Background statements issued by the War Claims Commission, and may be quoted with or without credit.

War Claims Act of 1948, Public Law 896, 80th Congress, amended by Public Law 75, 81st Congress.

War Claims Commission, responsible for administering sections of the Act concerning prisoners of war and civilian American internees in certain Pacific areas. Organized September 14, 1949. Offices: Tariff Commission Building, Washington 25, D. C.

War Claims Commissioners: Three members, appointed by the President.

Daniel F. Cleary, Chairman; Chicago attorney, Air Force Major, World War II; Retraining Specialist, Retraining and Reemployment Administration, U. S. Department of Labor; Senior Attorney, Office of Legislation, Veterans Administration.

Mrs. Georgia L. Lusk, member, Carlsbad, New Mexico; member of the 80th Congress from New Mexico; rancher, educator, served two 4-year terms as State Superintendent of Public Instruction.

Myron Wiener, member, New York, N. Y.; attorney and businessman; for almost ten years member of Shanghai, China law firm, also Acting Judge of U. S. Consular Court and Commissioner U. S. Court for China, Shanghai; former Chief, China Legal Section, Office of Internal Trade, Department of Commerce; civilian internee in the Philippines in World War II. Took office June 8, 1950 to fill vacancy.

Only World War II prisoners of war and certain specified civilian American internees are eligible for benefits under the War Claims Act of 1948.

Prisoner of War — “. . . any regularly appointed, enrolled, enlisted or inducted member of the military or naval forces of the United States who was held as a prisoner of war for any period of time subsequent to December 7, 1941, by any government of any nation with which the United States has been at war subsequent to such date.” (Section 6 of the Act.)

Internee — “. . . ‘civilian American citizen’ . . . any person who, being then a citizen of the United States, was captured by the Imperial Japanese Government on or after December 7, 1941 at Midway, Guam, Wake Island, the Philippine Islands, or any Territory or possession of the United States attacked or invaded by such government, or while in transit to or from any such place, or who went into hiding at any such place in order to avoid capture or internment by such government . . .” (Section 5 of the Act.)

NOTE: Prisoners of war in all theatres are eligible. In-

ternees in the specified Pacific areas are eligible, not in the European theatre.

When and How to File Claims

The deadline for filing claims is March 1, 1951.

All completed claims forms should be sent to the War Claims Commission, Washington 25, D. C.

Each claim is numbered as it is received and is acknowledged. Many more claims have been received than could be acknowledged immediately but each claimant can expect to receive an acknowledgement card with his claim number stamped on it. This card should be kept until a final settlement of the claim is made. Insofar as possible, claims are adjudicated in numerical order.

Processing a claim requires considerable time and the information supplied by the claimant must be checked against military and other records related to the claim. Processing claims can be further delayed by letters of inquiry concerning the status of claims, since clerical staff which should work on processing must be used to answer the letters.

Only claims filed on official claims forms can be considered for adjudication. No reproduction of the claims form can be substituted for the official claims forms. Letters or other communications cannot be accepted as claims.

Change of Address

If a claimant has a change of address before his or her claim is settled, the War Claims Commission should be notified immediately. The full name, old address, new address and claim number (if one has been assigned) should be sent—over the claimant's personal signature—to the War Claims Commission, Washington 25, D. C.

Where to Secure Claims Forms

State agencies have been designated by the Governors to assist in the statewide distribution of the forms. In some cases these are the State department of veterans' affairs, the Adjutant General's or Attorney General's office, the employment security agency, or the State welfare department.

The 70 regional offices of the Veterans Administration.
The War Claims Commission, Washington 25, D. C.

Amount of Benefits

Prisoners of War—\$1 for each day a member of the U. S. Armed Forces was held prisoner of war on which the enemy failed to provide the amount and quality of food required under the Geneva Convention of 1929 Prisoner of war benefits are in addition to any other benefits to which a veteran or his survivors may be entitled. They are also in addition to military pay received by prisoners of war under the Missing Persons Act.

Internees—\$60 for each month of confinement if over 18 years of age at the time; if under 18 years of age, \$25 a month. . . . Civilians who have been paid under the Missing Persons Act are not eligible for benefits under the War Claims Act of 1948.

Benefits Cannot be Assigned. War Claims benefits can be paid only to the claimant. A war claims benefit is not negotiable and cannot be assigned by the claimant to another individual, company or bank.

No Court Review. Decisions of the War Claims Commission are final and not subject to court review.

Appeals. The Commission can reverse or modify its findings upon appeal from the claimant. Request for appeal must be made within six months of the decision on a claim.

Where the Money Comes From. Cash for benefit claims comes out of the War Claims Fund which consists of liquidated enemy assets.

Maximum Fees for Attorneys or Agents

It is not essential for an applicant to have an attorney or agent in order to file a claim under the War Claims Act of 1948.

The War Claims Commission has ruled that if an applicant desires the assistance of an attorney or agent, the following schedule of maximum fees must be observed:

—not to exceed 1% of the amount awarded the claimant for attorney's or agent's services in connection with filing out and filing a claim for living ex-prisoner of war or living civilian internee;

—not to exceed 2% of the amount awarded the claimant for attorney's or agent's services in connection with filing out and filing a claim for survivor of deceased prisoner of war or deceased civilian internee;

—not to exceed 10% (including any previously allowed fee) of the total amount awarded the claimant for attorney's or agent's services in cases requiring the securing of additional written or oral testimony or appeal.

Penalty for Payment of Excessive Fees. Claimant forfeits all rights under the Act. Attorneys or agents are also subject to penalties.

Number Eligible for War Claims Benefits (estimated)

220,000 Living Ex-Prisoners of War, U. S. and Philippine Military Forces

120,000 U. S. Military Forces in all theatres

100,000 Philippine Army of the Commonwealth

48,000 Deceased Prisoners of War, U. S. and Philippine Military Forces

13,000 U. S. Military Forces in all theatres

35,000 Philippine Army of the Commonwealth

10,000 Living and Deceased American Civilian internees, specified Pacific area.

The Act provides survivors benefits if the proper relationship is established.

Personal Injury and Property Damage

The War Claims Commission is not authorized by the War Claims Act of 1948 to receive claims for personal injury or property damage arising out of World War II. Recommendations have been made to the Congress which, if approved, would extend the benefits of the Act to cover such claims . . . Copies of the report of the Commission containing the recommendations, House Document 580,

2nd session, 81st Congress, may be secured from the Superintendent of Documents, Washington 25, D. C., price 25 cents.

Personal injury, disability and death benefits provided for in the War Claims Act are handled by the Bureau of Employee's Compensation, U. S. Department of Labor, Washington 25, D. C., to which all inquiries, claims, and correspondence should be addressed.

CLX—568—Revised.

STATE GRANTS FOR POST-WAR PUBLIC WORKS PLANNING

(Act 413, P. L. 1191 of 1945 and Act 186, P. L. 406 of 1947)

STATE PLANNING BOARD'S ACTION TOWARD TERMINATION OF POST-WAR PLANNING COMMISSION'S PROGRAM

Commonwealth of Pennsylvania, Department of Commerce, State Planning Board
Harrisburg, Pennsylvania

January 9, 1951

REPORT TO THE GENERAL ASSEMBLY

STATE GRANTS FOR POST-WAR PUBLIC WORKS PLANNING

(Act 413, P. L. 1191 of 1945 and Act 186, P. L. 406 of 1947)

STATE PLANNING BOARD'S ACTION TOWARD TERMINATION OF POST-WAR PLANNING COMMISSION'S PROGRAM

HISTORY

In 1945 the General Assembly appropriated to the Post-War Planning Commission (Act No. 413) \$1,000,000 to be distributed, under certain conditions, to political subdivisions of the Commonwealth which might request financial assistance in preparing plans and specifications for necessary and worthwhile post-war public works. More than 500 applications for funds were received from the political subdivisions and were analyzed by both the State Planning Board and the Post-War Planning commission. Approximately two-thirds of these were approved by the Commission and the Governor.

The 1947 Session of the General Assembly abolished the Post-War Planning Commission (Act No. 185) and transferred to and conferred on the State Planning Board (Act No. 186) certain powers and duties of the abolished Commission so that obligations covered by prior agreements with political subdivisions could be discharged.

Section 5 of Act 413 of 1945 states that "The Commission shall make a detailed report to the General Assembly within one week after it convenes of all agreements entered into by it, and the status of the work undertaken as a result of said agreements." Since duties of the Post-War Planning Commission have been transferred to the State Planning Board, it may be inferred that the Board should submit such a report to the 1951 Session of the General Assembly.

EXPLANATION OF APPENDICES

Tabulations are included in this report which show the current status of the appropriation. Appendix A lists the allocations to the various county areas of the State. The column "Approved Grants" shows the total amount of those grants within each county which were originally approved by the Post-War Planning Commission. The Governor approved all signed agreements referred to him by the Commission. A small number of the applicants did not sign agreements after grants were approved.

Appendix A shows that the amount "Paid" up to this date totals \$667,919. These payments have aided in the cost of preparing plans and specifications for public works projects having a construction value of more than \$100,000,000.

Money that is listed as "Unallocated or Cancelled," totaling \$181,675.65, could not be distributed because of lack of requests from political subdivisions, and also includes applications denied for valid reasons, and whole or partial cancellations after agreements had been signed. These funds cannot be reallocated for the purpose of the original program and therefore will be available for re-appropriation.

"Unpaid Grants" are those awaiting the fulfillment of responsibilities by political subdivisions under the terms of agreements which have been signed. Efforts of the State

Planning Board have been directed toward the early consummation of these agreements and negotiations are in process with many of the civil divisions which are identified with the amount of the grant shown for each in Appendix B.

COMMENTS

The original intent of the program was to supply incentives to the political subdivisions of the Commonwealth to prepare detailed plans and specifications for worthwhile public works, so that there would be no delay in instituting construction of the projects following the end of World War II if unemployment became a problem. The program was intended to supplement the employment-creating efforts of private enterprise through necessary and worthwhile public works. Since the post-war unemployment which was feared never materialized the need for the program appears to be ended.

CURRENT OBJECTIVES

At a meeting of the State Planning Board on December 8, 1950, it was unanimously agreed that this program of the former Post-War Planning Commission should be terminated at the end of the current biennium, May 31, 1951, and that appropriate action be taken to notify all participants of this intention.

APPENDIX TO THE

Appendix A
STATUS OF ALLOCATIONS—(By County)

January 9, 1951

County Areas	Allocation	Approved Grants	Paid	Unallocated or Cancelled	Unpaid Grants
Adams	\$ 3,983.00			\$ 3,983.00

THE REPORT OF THE PENNSYLVANIA COMMISSION
ON INTERSTATE COOPERATION

to the

GENERAL ASSEMBLY OF THE COMMONWEALTH OF
PENNSYLVANIA SESSION OF 1951

The Pennsylvania Commission on Interstate Cooperation was created under Senate Resolution Serial No. 120, Session 1935, and continued under the provisions of the Act of March 24, 1937, P. L. 109, as amended March 10, 1949, P. L. 10, as a continuing agency for the development of facts and recommendations on all phases of reciprocity and interstate cooperation for the use of the General Assembly.

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania.

The report of the Pennsylvania Commission on Interstate Cooperation for the year 1949 and 1950 is presented for your approval. Heretofore, this Commission was directed by the Department of Commerce with legislative members serving on the Commission. By act 10 of the 1949 Session the Commission came under the guidance of

the General Assembly with five members appointed each from the Senate and the House and five other members appointed by the Governor.

Under the leadership of the Legislative members, the Pennsylvania Commission on Interstate Cooperation assumed a role of real importance in interstate relations and reciprocity with other states.

NORMAN WOOD, Chairman.

Pennsylvania Commission on Interstate Cooperation
Capitol Building
Harrisburg, Pennsylvania.

FUNCTIONS OF THE COMMISSION

The functions of the Commission are to carry forward the participation of the State as a member of the Council of State Governments, both regionally and nationally, to confer with officials of other States and of the Federal Government, to formulate proposals for cooperation between this State and the other States, and with the Federal Government, and to organize and maintain governmental machinery for such purposes.

Five principal methods are available, and each has been employed by the Commission to strengthen and perfect interstate and Federal-State relations:

- (1) The Interstate Compact.
- (2) Reciprocal or Concurrent Legislation.
- (3) Uniform or Model Legislation.
- (4) Administrative Agreement.
- (5) Administrative Cooperation.

The Commission is affiliated with the Council of State Governments which is located in Chicago. There is a Regional Office of the Council in New York City which serves the Eastern States, and another in San Francisco.

There is also a Regional Office of the Council in Washington, D. C., which maintains a bulletin service of all pending legislation which pertains to the interest of the States. This bulletin is mailed each month to the various State Commissions.

The work of this Commission is done by Committees. These are as follows:

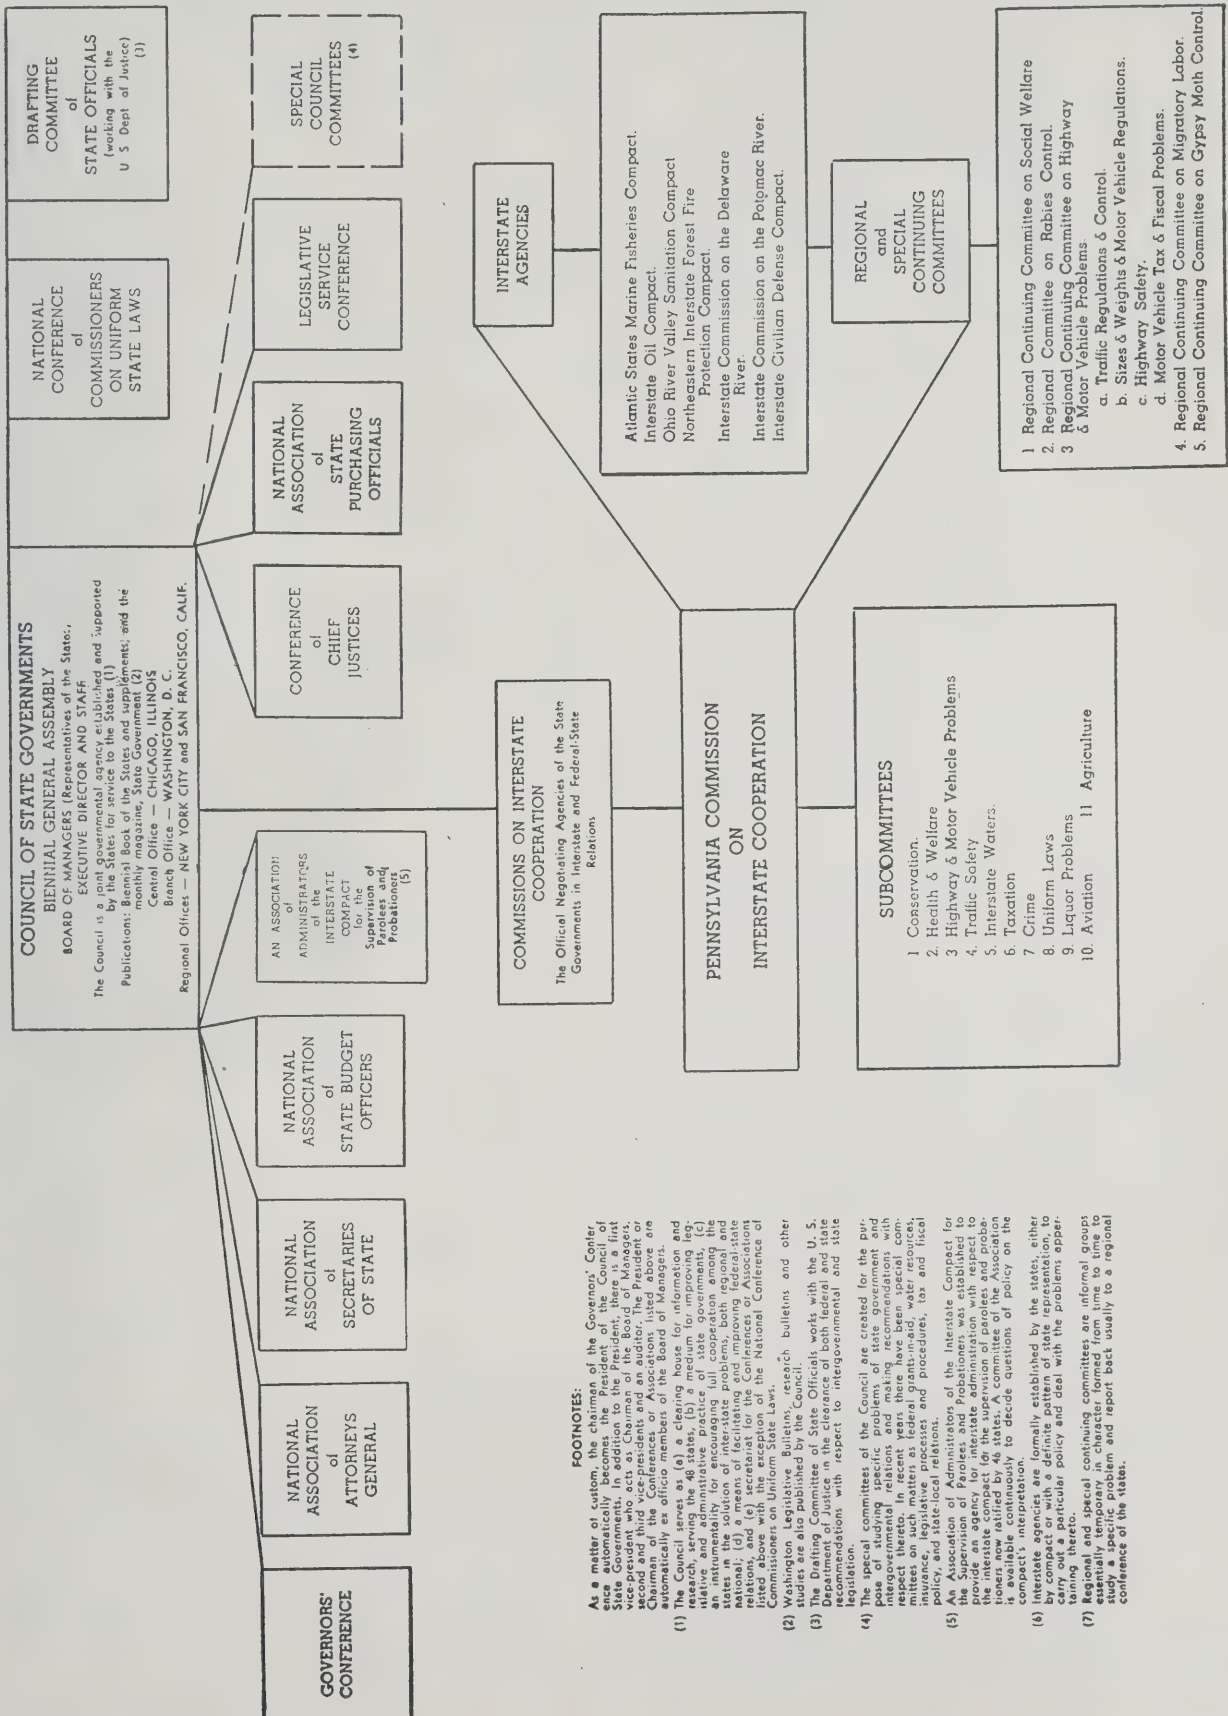

- | | |
|--|--------------------|
| 1. Conservation | 6. Taxation |
| 2. Health and Welfare | 7. Crime |
| 3. Highway and Motor
Vehicle Problems | 8. Uniform Laws |
| 4. Traffic Safety | 9. Liquor Problems |
| 5. Interstate Waters | 10. Aviation |
| | 11. Agriculture |

PENNSYLVANIA'S PART IN INTERSTATE COOPERATION

The best government is that which is (1) efficient, and (2) controlled by those it governs.

To meet the first requisite, the government controls should be unified. That is why, for instance, the Secretaries of War and Navy have been merged, into a Secretary of National Defense; and why in New York State they have merged the functions of the Fish and Game Commissions and those of the Forests and Waters Bureau into a Department of Conservation.

But, in order to meet the second requisite, the government must be responsive to the electorate. An example of failing to do this very thing, is the failure of our Federal Government to carry out the recommendations of

FOOTNOTES:

As a matter of custom, the chairman of the Governors' Conference automatically becomes the President of the Council. In the past, the President of the Council has been a Governor, a vice-president who acts as Chairman of the Board of Managers, second and third vice-presidents and an auditor, the President or Chairman of the Conference, or a representative of the States. The Council serves as (a) a clearing house for information and research, serving the 48 states, (b) a medium for improving legislative and administrative practice of state governments, (c) a forum for the exchange of views and information among the states in the solution of interstate problems, both regional and national; (d) a means of facilitating and improving federal-state relations; and (e) a secretariat for the conferences of the Association of Commissioners on Uniform State Laws.

(2) Washington Legislative Bulletin, research bulletins and other studies are also published by the Council.

(3) The Drafting Committee of State Officials works with the U. S. Department of Justice in the preparation of uniform legislation and state legislation.

(4) The special committees of the Council are created for the purpose of studying specific problems of state government and recommending legislation thereon. In recent years there have been special committees on such matters as federal grant-in-aid, water resources, insurance, legislative process and procedure, tax and fiscal compact, legislative relations.

(5) An Association of Administrators of the Interstate Compact for the Supervision of Parolees and Probationers was established to provide an agency for interstate administration with respect to parolees and probationers now ratified by 46 states. A committee of the Association is available continuously to decide questions of policy on the compact's interpretation.

(6) Interstate agencies are normally established by the states, either by statute or by executive order. They carry out a particular policy and deal with the problems pertaining thereto.

(7) Regional and special continuing committees are informal groups of state officials who study and discuss specific problems and report back usually to a regional conference of the states.

the Hoover Commission, which, if carried out, would save the tax payers of the United States as much as nine billion dollars.

While a single sovereignty thus achieves the first requisite, it endangers the second requisite, particularly in a country as large as the United States. For the impact of a single voter, or, indeed, of a single entire community, is small, due to the tremendous volume of voters and communities in the entire country. In addition, the differing conditions in the different sections of the country require governmental regulations. These differing regulations can be best selected and obtained by the sections which respectively feel their need.

Hence, there is need for separate States, in order to achieve the second above requisite—control of the government by those it governs. At the same time, in order to approximate the first requisite of efficiency and unity of control, these States must cooperate closely, both with themselves and with the Federal sovereignty. This was typified and achieved, on the brink of World War II, in unifying all controls of law enforcement throughout our Nation, at the Federal-State Conference on Law Enforcement Problems of National Defense, held in the U. S. Department of Justice, Washington, August, 1940.

It is to achieve these two basic essentials of good government that Commissions on Interstate Cooperation were created in every State throughout the United States. These Commissions thus seek to create (a) cooperation between the States, (b) cooperation by the States on the one hand, with Federal Government on the other, these Commissions themselves clearing and acting through the Council of State Governments.

There is a saying "Pennsylvania has everything." And this is no exception in administration or legislation. On conferring with groups of states as to beneficial legislation, your Commission has found in many instances that Pennsylvania already has such laws on its books, or that the laws that we have are ahead of those of neighboring states. In all our dealings with other states, your Commission has worked to achieve a higher degree of efficiency, reduce duplication, and to achieve economy and stability in our coordinated system of federal, state and local governments, our states must cease relying upon the federal government to do things for them and their citizens which they can do for themselves as well as, or better than, the federal government. In order that the state and local governments may be enabled to assume those functions, the federal government should reduce those taxes which can be administered best by state and local government. On the other hand, the federal government should reduce and relinquish certain of its taxes, while, on the other, the States should avoid encroachments on tax fields peculiarly adaptable to Federal uses.

Your Commission has consistently stood for high standards, and in cases of reciprocity has insisted that other states meet standards that have already been established in Pennsylvania. And we have refused to lower the qualifications established in Pennsylvania, even when it will help neighboring states—unless such a move is for the benefit of our citizens.

Our great Governor, the Honorable James H. Duff, has established a record for conservation, stream clearance and anti-stream pollution that puts Pennsylvania to the forefront. He has become an authority on these subjects;

nationally quoted in magazines and newspapers all over the United States. His accomplishments have become a model for other states to follow or to establish long range programs attempting to do in their states what he has already done in Pennsylvania.

ACTIVITIES OF THE COMMISSION

The Pennsylvania Commission on Interstate Cooperation met for organization on June 27, 1949, at 11 A.M., Eastern Daylight Saving Time. Present at this meeting were Senators Crowe, Dent, Tallman and Watson, and Representatives Andrews, Smith, Sorg and Wood. At this meeting Representative Norman Wood was elected chairman; Senator Edward B. Watson, Vice-Chairman; and Senator Montgomery F. Crowe, Secretary-Treasurer.

The Commission met again on July 12th, 1949, Daylight Saving Time. Both meetings being held in the office of the Speaker of the House. At this meeting were Senators Watson, Tallman and Crowe; and Representatives Wood, Smith, Brunner and Andrews; also Mr. E. B. Criehtfield, Eastern Representative of the Council of State Governments and Mr. F. A. Pitkin, Executive Director of the State Planning Board and Chairman of INCODEL.

At this meeting various committees and activities of the Commission were discussed, and it was decided to have a meeting with the Pennsylvania Liquor Control Board in reference to bringing the Pennsylvania license fee for out-of-state Distillers more in conformity with the fee charged by other states.

Various other meetings and conferences attended by the members of this Commission were:

- Aug. 25-26, 1949 North Eastern Conservation Meeting, Boston, Mass. Attended by Hon. Norman Wood, Hon. Charles H. Brunner, Jr., Miss M. Vashti Burr, Admiral Milo F. Draemel.
- Sept. 28-30, 1949 Atlantic States Marine Fisheries Commission—Hotel Roosevelt, New York. Attended by Hon. Edward B. Watson and Hon. Norman Wood.
- Sept. 29-30, 1949 Potomac River Basin Commission, Capon Springs, West Virginia. Attended by Hon. Charles H. Brunner, Jr.
- Sept. 29-30, 1949 Eastern States Welfare Meeting, Atlantic City, N. J. Attended by Hon. Norman Wood.
- Oct. 6, 1949 Eastern Migratory Labor Conference, Raleigh, N. C. Attended by Hon. Norman Wood.
- Oct. 20-21, 1949 Northeastern Highway and Motor Vehicle Conference, Hotel Roosevelt, New York. Attended by Dr. Paul L. Cressman, Col. C. M. Wilhelm, Major E. J. Henry, Robert I. Shreffler, Hon. M. F. Crowe and Hon. Norman Wood.
- Dec. 22-23, 1949. Northeastern Conference on Disability, Hotel Astor, New York. Attended by Dr. E. B. Logan, A. J. Caruso, T. J. Donaghy and Hon. M. F. Crowe.
- March 13, 1950. Eastern Gypsy Moth Control Conference, Washington, D. C. Attended by Hon. Norman Wood.
- Aug. 11, 1950. Liquor Control Conference, concerning license fees of out of state distillers. Attended by Hon. Frederick T. Gelder, A. W. Caley, Horace A. Segelbaum, B. E. Crisfield, Hon. Norman Wood and Hon. Charles C. Smith.
- Sept. 11-12, 1950. Interstate Commission on the Delaware

River Basin, meeting at Shawnee Inn, Shawnee-on-Delaware, Pa. Attended by Hon. Weldon B. Heyburn, Hon. Milo F. Draemel, Hon. Franklin H. Lichtenwalter, Francis A. Pitkin, James Allen, M. Vashti Burr, Hon. Norman Wood, Hon. Charles C. Smith and Hon. M. F. Crowe.

Sept. 19-20, 1950. Regional Civilian Defense Conference, Hotel Waldorf Astoria, New York. Attended by Francis A. Pitkin, Hon. Norman Wood, Hon. Charles C. Smith and Hon. M. F. Crowe.

Nov. 16-17, 1950. Regional Conference on Highway Safety and Motor Vehicle Problems, Hotel Roosevelt, New York. Attended by Hon. Ray F. Smock, Hon. Otto F. Messner, Major E. J. Henry, Dr. Paul L. Cressman, Robert I. Shreffler, Francis A. Pitkin, Hon. O. J. Tallman, Hon. Norman Wood and Hon. M. F. Crowe.

Dec. 7-8-9, 1950. General Assembly of the States, Council of State Governments, Edgewater Beach Hotel, Chicago, Ill., attended by Francis A. Pitkin, Weldon B. Heyburn, M. Louise Rutherford, Hon. Norman Wood and Hon. Charles C. Smith.

Dec. 19, 1950. Pennsylvania Commission on Interstate Cooperation. Office of the House Appropriation Committee, Capitol Building, Harrisburg, Pa. Attended by Senators E. B. Watson and M. F. Crowe; Representatives H. G. Andrews, Norman Wood, Charles H. Brunner, Jr., and Charles C. Smith; B. E. Carihfield, Eastern Representative of the Council of State Governments; Harrington Adams, Deputy Attorney General and William Chestnut, Secretary of Labor and Industry.

Civilian Defense and pacts with other states was discussed at this meeting, and the Office of the Attorney General was directed to frame bills following the interstate form to fit into the Pennsylvania pattern. Such bills were to be co-sponsored on a bi-partisan basis. These bills have since been introduced in the House of Representatives.

Other legislation discussed was:

- Banking operations of savings and loan banks.
- Reemployment of those in military service.
- Federal old age and survivors enabling act.
- Budget of Federal grants and aid.
- Payrolls savings act.
- Hospitalization of mentally ill.
- Reciprocal transportation of mentally ill.
- Alcoholism bureau.
- Uniform reciprocal support act.
- State water pollution law.
- Highway safety and motor truck regulations.
- Offering evidence in a criminal case by public officials.
- Act regulating testimony of public officials in office.
- Burglary tools bill.
- Interstate crime control.
- Uniform pistol act.
- Custom application of insecticides.
- Forest Practices act.
- Federal Airport trends and uniform airport laws.
- Registration and protection of trade marks.
- Shore and beach erosion act.
- Uniform bus legislation.
- Uniform traffic regulations and control.

Regulation and control of inflammable liquids and dangerous articles.

Turnpike and thruway legislation.

Bus inspection reciprocity.

A check on legislation—Atlantic States Marine Fisheries; Incodel; Potomac and Ohio River Compacts.

Jan. 23, 1951. Pennsylvania Commission on Interstate Cooperation. Office of the House Appropriation Committee, Capitol Building, Harrisburg, Pa. Attended by Harrington Adams, Deputy Attorney General, Hon. John H. Dent, William S. Livengood, Jr., Senators E. B. Watson and M. F. Crowe; Representatives Charles C. Smith, Herbert P. Sorg, Hiram G. Andrews and Norman Wood; B. E. Carihfield, Eastern Representative, Council of State Governments.

Topics discussed included:

- Civilian Defense Act.
- Air Warden Act.
- Registration of Communists.
- Deth Penalty for saboteurs.
- Act permitting local appropriations for civilian defense.
- Interstate military aid compacts.
- Old age and survivors enabling act.
- Interstate exchange of tax information.
- Hospitalization of mentally ill.
- Shore and beach erosion enabling act.
- Reciprocity liquor act.
- Uniform bus regulation of inspections.
- Uniform bass protection act.
- Uniform shad protection act.
- Interstate compact to regulate the dairy industry.
- Oil and gas conservation act.
- Well drillers act.
- Regulation of ground waters act.

Where it was considered essential, bills have been prepared either by various Departments or Bureaus for introduction in the present session of the Legislature. Complete data on other questions of interstate relations is available from your Commission or can be obtained through the Commission from the Council of State Governments. In no case has legislation been considered that will lower the high standards established by the Commonwealth of Pennsylvania, but improved for the good of our citizens.

Road Test One-MD

Report No. 1

GENERAL PROGRAM

Highway Research Board

2101 Constitution Avenue

Washington 25, D. C.

Approved June 30, 1950

Highway Research Board

Road Test One-MD

GENERAL PROGRAM

The research project covered by this program was proposed by the Interregional Council on Highway Trans-

portation which was formed at Columbus, Ohio, on December 5 and 6, 1949. The project which is identified as Road Test One-MD, is to be a study of the performance of a concrete pavement under operation of commercial type vehicles loaded to 18,000 and 22,400 pounds on single axles and 32,000 and 44,800 pounds on tandem axles. Each of these axle loads will be applied to a separate section of pavement at an average frequency of about one per minute on a 24-hour basis.

To determine the performance of the pavement under the different axle loads, surveys will be made of cracks as may develop in the pavement, and studies will be made of the soil conditions, of the characteristics of the concrete, and of stresses and strains in the slabs as shown by measurements of deflections and deformations.

The project has been arranged cooperatively by the State highway departments of Connecticut, Delaware, Illinois, Kentucky, Maryland, Michigan, New Jersey, Ohio, Pennsylvania, Virginia, Wisconsin and the District of Columbia and the Bureau of Public Roads. The project will be administered and supervised by the Highway Research Board of the National Academy of Sciences through a Project Executive Committee consisting of Fred Burggraf, Associate Director, Highway Research Board, Chairman; H. S. Fairbank, Deputy Commissioner, Bureau of Public Roads; Albert S. Gordon, Executive Assistant to Chairman, State Roads Commission of Maryland; and T. J. Kauer, Director, Ohio Department of Highways, with the assistance of an Advisory Committee.

The Advisory Committee for the project includes one representative from each participating State, one representative from the Bureau of Public Roads, one representative from the Automobile Manufacturers Association, one representative from the American Trucking Association, and one representative from the Department of the Army. Other members appointed by the Highway Research Board are Fred Burggraf, Associate Director, to be Chairman; H. S. Fairbank, Chairman of the Highway Research Board's Department of Economics, Finance and Administration; and C. N. Conner, Chairman of the Board's Department of Design. The Chairman and Director of the Board are members ex-officio. W. N. Carey, Jr., is assigned as Executive Assistant to the Chairman.

The engineer in charge of the project is A. Taragin who has been assigned to the Highway Research Board for this job by the Bureau of Public Roads.

The cost of this project will be shared by the participating States in monetary contributions; by the Bureau of Public Roads in providing personnel and instruments for measurements of surface roughness, slab strains and deflections caused by the test loads, for soil surveys, and other necessary instrumentation and testing services, and in providing the service of the project engineer and three assistants; the petroleum industry in providing gasoline, oil and grease; and truck manufacturers of the Automobile Manufacturers Association in providing the test vehicles. The Department of the Army will provide test drivers after about September 1, 1950. Prior to that time, drivers will be hired locally. Aerial photography will be contributed by the Department of National Defense.

Purpose

The purpose of this project is to observe and measure

the effects of the frequent passages of vehicles of known axle loading at known speeds over a pavement of known composition and dimensions, constructed on foundations of known character.

Base of Operation

The base of operations will be a field office erected on the project, on US 301, 9 mi. south of La Plata, Maryland, and 45 mi. south of Washington, D. C. The field office phone number is La Plata 6771. Mr. A. Taragin, the project engineer can be reached at the field office or at the residence of Mrs. R. L. Mitchell on Washington road in La Plata, phone La Plata 3481.

Test Sections

The tests will be conducted on a 1.1-mi. section of US 301, located between Allens Fresh and Bel Alton, approximately 9 mi. south of La Plata and 4 mi. north of the Morgantown Bridge in Southern Maryland. The location of the project is shown on Figure 1. During the test period, traffic ordinarily carried by this road will use an alternate parallel road.

The pavement is reinforced, 24 ft. wide, and divided at the center with a longitudinal joint. The cross section is of the double parabolic type thickened at both the free and longitudinal joint edges. The depth of the cross section is 9-7-9 in. Expansion joints are spaced at intervals of 120 ft. with two intermediate contraction joints at 40-ft. spacing between them. The original width of the expansion joints was $\frac{3}{4}$ in. and the average measurement is now approximately $\frac{3}{8}$ in.

Load transfer devices of a cantilever plain dowel type were placed in all of the transverse joints. The load transfer assembly is commercially known as Dowell. One end of the dowels are bent in a manner to anchor them in the slab on one side of the joint while the other end projects as a cantilever into the slab on the opposite side. The dowels are $\frac{3}{4}$ in. in diameter and are spaced at intervals of 15 in. c-c. The cantilever ends of the dowels project $7\frac{1}{2}$ in. into the concrete at contracting joints. At expansion joints the length of embedment is $7\frac{1}{2}$ in. less the width of the joint. The length of direct bearing at expansion joints, excluding the expansion cap, is approximately $4\frac{1}{2}$ to 5 in.

The longitudinal joint is a straight butt construction type with 4-ft. long tie bars spaced at intervals of 4 ft.

The reinforcement, welded wire fabric, is approximately 3 in. from the surface and contains No. 2 wires spaced 6 in. c-c. in the longitudinal direction and No. 2 wires 12 in. c-c. in the traverse direction. The weight of the fabric is 59.4 lb.

The 1.1-mi. test road has been divided into two sections; the south section being 0.5 mi. long, and the north section 0.6 mi. long. At each end of each section, turn-arounds of 50-ft. outside radius with 20-ft. bituminous roadways have been constructed to allow the test trucks to operate back and forth on the same lane. It is estimated that the vehicles will be able to negotiate these turn-arounds at 10 mph.

On the west lane of the south section, identified hereafter as test-lane 1, two single unit, two-axle trucks with rear axle loads of 18,000 lb. (Series I) will be operated. On the east lane of the south section, identified hereafter

as test-lane 2, two single unit, two-axle trucks with rear axle loads of 22,400 lb. (Series II) will be operated.

On the west lane of the north section, identified hereafter as test lane 3, two single unit, tandem-axle trucks with tandem loads of 32,000 lb. (Series III) will be operated. On the east lane of the north section, identified hereafter as test-lane 4, two single-unit, tandem-axle trucks with tandem loads of 44,800 lb. (Series IV) will be operated.

Each slab (12 by 40 ft.) will be identified by a number painted in the south end of the slab. Consecutive odd numbers will be used on test-lanes 1 and 3, and consecutive even numbers will be used on test-lanes 2 and 4. The numbers increase from south to north. Ten spots will be painted in each slab for reference points for precise level observations of variation in elevations.

TEST VEHICLE REQUIREMENTS

Vehicles

Eight single-unit trucks will be used. The vehicles will

be grouped into four series with two vehicles in each series. Series I, which will operate on test-lane 1, will be two 4 x 2 single-unit trucks with rear axle loads of 18,000 lb. The Ford Motor Company and Reo Motors, Incorporated, are supplying the vehicles for this series.

Vehicles in series II operated on test-lane 2. These will be two 4 x 2 single unit trucks with rear axle loads of 22,400 lb. The General Motors Corporation and the Autocar Company are supplying these vehicles.

Vehicles in series III will be operated on test-lane 3. These will be 6 x 4 single-unit trucks with tandem axle loads of 32,000 lb. The White Motor Company and the International Harvester Company are supplying these vehicles.

Vehicles in series IV will be operated on test-lane 4. These will be 6 x 4 single-unit trucks with tandem axle loads of 44,800 lbs. The General Motors Corporation and the Mack International Motor Truck Corporation are supplying these vehicles.

* Max. net HP assumed to be 90 percent of max. gross HP.

The trucks in each of the series have been selected so as to obtain the highest practicable rate of acceleration between 10 and 40 mph. Specifications of the test vehicles are given in Table 1.

Weights

The schedule of gross weights for the test trucks and the pay-load requirement are shown in Table 2. In order to provide the necessary test load, 215 1,000-lb. concrete blocks (30 by 24 by 16 in.) and ten 750-lb. concrete

blocks (22.5 by 24 by 16 in.) have been made at the Maryland State Roads Commission Garage in La Plata.

Gasoline and Oil

Based on 18 hours of continuous operation during each day, it is estimated that each truck will be driven 12,000 mi. per month. For all trucks, the monthly gasoline requirement is estimated at 24,610 gallons as shown in Table 3. For a project duration of six months, 147,600 gallons of gasoline will be needed. This gasoline and the necessary

motor oil and grease will be provided without charge by the petroleum industry.

TABLE 2

GROSS VEHICLE WEIGHT SCHEDULE AND PAYLOAD REQUIREMENT

Truck series	Test truck number	Truck weights in thousands of pounds when		Payload in thousands of pounds

6	12,000	4.0	3,000
7	12,000	3.0	4,000
8	12,000	3.0	4,000
Total			24,610

Vehicle Service and Maintenance

Earl's Service, a commercial service station, will provide general service and repairs to all test trucks. Each vehicle will be serviced once a week. It is difficult to estimate other than minor repair costs. A lump sum has been set aside which is one-quarter of that normally encountered by fleet operators. Preventive maintenance will be conducted by the test drivers.

SCHEDULE OF TRAFFIC OPERATIONS

Vehicles

The test vehicles will operate in lanes as previously described. Operation will follow the same pattern in each lane and the number of repetitions of load in test-lane 1 will be kept as near as possible to the number of repetitions in test-lane 2. Similarly repetitions in test-lanes 3 and 4 will be kept nearly equal to each other.

The 18,000-lb. rear axle load test trucks (series I) will operate in lane 1 as follows: Starting at one end of the lane, the two trucks will proceed towards the other end of the lane, one preceding the other about 200-ft. headway. They will attempt to accelerate as quickly as possible to forty mph. and when they approach the end of the lane, decelerate so as to negotiate the turnaround at about ten mph. They will then return in the same lane accelerating to forty mph. turn at the other end, and continue back and forth over the same lane.

Each lane will be marked with longitudinal stripes as follows: White stripes along the outside edge of the pavement and 8 ft. from the outside edge of the pavement; yellow stripes 2 ft. and 10 ft. from the outside edge of the pavement. These stripes will be used as guides for the trucks so that the following pattern of placement of the outside rear-axle tires will be maintained: One application with the outside tire at the edge of the pavement (truck centered between white stripes); one application with the outside tire 2 ft. in from the edge (truck centered between yellow stripes); three applications with the outside tire between the two positions (truck centered between the outside white and inside yellow stripes). Electrically-operated signal lights actuated by the sharp turns of the steering wheel at the turnarounds will indicate in the cab of the truck which position the driver should maintain for each run.

Operation in test-lanes 2, 3, and 4 will be identical to that described for test-lane 1.

Operation of all test vehicles will be continuous on a twenty-four hours per day, seven day per week basis, except as necessary for maintenance of the vehicles, meals and rest stops for the drivers and except as interrupted by special tests specifically authorized by the project engineer. It is expected that test traffic actually will be maintained for an average of 18 hours per day. Applications of load will be indicated and counted by means of photo-electric counters actuated by the passage of the test vehicles and checked by odometer readings in the trucks.

Before it was definitely decided to operate the vehicles back and forth in the same lane, the Advisory Committee gave careful consideration to the advisability of operating only in the normal direction of traffic. Normal operation was considered desirable in order that normal faulting at joints could occur. However in order to accomplish this end, it would be necessary either to build a two-lane return trip road the full length of the test pavement (or to improve and maintain the shoulders to a degree necessary to carry the test traffic), or to break the test road into four sections and run each test vehicle up one lane and back the other lane in the same section. The disadvantage of the first alternate is that a return trip road adequate to carry the test vehicles without requiring so much maintenance as to interfere with test traffic would be inordinately expensive and would no doubt take several months to complete. The main disadvantage of the second alternate is that the subgrade under the four separate sections would very likely not be uniform enough to permit direct comparison between sections.

Drivers

Drivers will work three eight-hour shifts starting at 2:00 A.M., 10:00 A.M. and 6:00 P.M. They will be allowed 30 min. for a meal and a 10-min. rest period each hour. They will work six out of seven days, and their free day as well as the shifts which they will operate will be rotated by the project engineer in whatever manner seems to be in the best interests of the project, except that the maximum consecutive duty time for any driver shall be 12 hr. and a minimum rest period of 8 hr. shall be allowed between tours of duty.

REMARKS: _____

Figure 2, Driver's Daily Truck Record

Drivers will be expected to perform preventive maintenance in accordance with instructions which will be issued by the project engineer.

At such time as Army test drivers are made available, they will be used in place of the hired drivers. The Army will assign their drivers without charge as their contribution to this project. The details as to test procedures, daily working shifts, etc., will be worked out between the project engineer and the officer in charge of the troops and will be as near as possible to the procedure outlined above for the hired drivers. If an occasion arises where special instructions to Army drivers or disciplinary action is necessary, the project engineer will not deal directly with the driver but will take up the matter with the officer in charge of the troops on the site at the time. It is expected that the Army will maintain on the site of the project at all times one person with authority to act immediately in such matters.

A daily record of operation will be kept by the drivers for each truck. The form of this record is shown in Figure 2.

INSURANCE

Public Liability and Property Damage

A schedule automobile liability insurance policy taken out in the name of the National Academy of Sciences for the Highway Research Board is designed to cover all automobile exposure and provides the following coverage: bodily injury, \$100,000-\$300,000; property damage, \$25,000. An additional interest endorsement is included naming the companies furnishing the test vehicles.

Workmen's Compensation

Personnel employed by the Highway Research Board for this project are protected in accordance with the workmen's compensation laws of the State of Maryland. Persons employed by the Federal Government and assigned to the Highway Research Board to work on this project are protected in accordance with the provisions of the U. S. Employees Compensation Act as amended.

TEST PROCEDURES

Crack Survey

A detailed survey will be made of the cracks in each slab prior to the beginning of operation with the test trucks. A solid, black line approximately one inch wide will be painted adjacent to each existing crack along its full length. With the progress of the test if new cracks or extensions of old cracks develop, they will be painted with contrasting lines one inch wide as follows:

Solid yellow line—At the end of 1½ months operation

Solid white line—At the end of 3 months operation

Dashed black line—At the end of 4½ months operation

Dashed yellow line—At the end of 6 months operation

Each slab will be checked for cracks every 2 or 3 days and the exact position of each crack as it develops will be recorded on a card with the date and number of applications when the crack was first noticed. An individual card record will be kept for each slab. The form used for these cards is shown in Figure 3.

Tests of Concrete

Road Surface Roughness—The Bureau of Public Roads

road surface roughness indicator will be used to obtain surface roughness data at the beginning and at the end of the test program and at such intermediate times as changes in surface roughness seem to warrant.

Measurements will be made in both directions along each normal wheel path. The wheel of the trailer unit will be kept 3 ft. from the outside edge of the pavement for one measurement and 3 ft. from the center joint for another, giving comparative data along the two normal wheel paths for each 12-ft. lane.

Strain—Using resistance type gages and oscillograph recording, strains in the concrete will be measured at the beginning and end of the test program at two locations.

At each location gages will be installed at a traverse expansion joint on the vertical face of the abutting slab ends in such a manner as to measure the bending strain in a direction parallel to the joint and as near to the upper surface of the pavement as feasible. The gages will be located so as to measure the maximum bending strain under the load imposed by the passing wheel. At each joint four gages will be installed, one on each of the two abutting slabs 3 ft. from each edge of the 12-ft. lane. The test vehicle will be operated so that the wheel will pass directly over the gage installation.

Data will be obtained for each of the four test vehicles at creep speed and at 15, 30 and 40 mph.

From these data, it will be possible to study the strain development as the wheel approaches, passes over and leaves the joint and to compare static and dynamic strains for the various types of vehicles, wheel loads, etc.

Corner Deflections—Resistance strain gage and oscillograph equipment will also be adapted to measure the entire deflection cycle of two slab corners at each of the expansion joints at which strains are to be measured. These data will be obtained simultaneously with the strain data.

Cores, beams, etc.—Records of tests made during the construction of the pavement have been made available by the Maryland Highway Department. Before starting test traffic, the following specimens will be cut from the pavement and tested to determine the physical properties of the concrete:

1. Twelve 6-in. diameter cores, four from the vicinity of each turnaround.

2. Four slabs, each approximately 4 ft. square, cut from the pavement at transverse expansion joints. Two of these will be taken from the central part of the 12-ft. traffic lanes, one immediately north of the north turnaround and one immediately south of the south turnaround. The other two will be taken from the central part of the heaviest traffic section and will be cut inward from the outside edge of the pavement for a distance of about 4 ft. in order to be representative of the area where the outside wheels of the test vehicles will travel.

The cores will be tested first to determine the static modulus of elasticity and, second, for compressive strength. Prior to making the modulus of elasticity determinations, the cores will be stored at a constant temperature of 73 F at 50 percent relative humidity for about two weeks. This will bring them to a stable moisture condition which, it is believed, approximates more closely that of the pavement during the summer and early fall than would either

Figure 3. Individual Slab Crack Record Form

a saturated or oven dried moisture condition. After the modulus of elasticity determinations have been completed, the cores will be stored under water for 14 days prior to making the compressive strength tests. This is in accordance with standard procedure.

The four slabs will be sawed in a direction parallel

to the pavement edge so as to produce a number of flexure specimens, each approximately 8 in. wide. These specimens, taken from the central part of the heaviest traffic section (test-lane 4) like the cores, will be stored under conditions of constant temperature and humidity for 14 days after which sonic modulus of elasticity determinations

will be made. The specimens will then be placed under water for an additional 14 days after which the sonic modulus of elasticity determination will again be made. While in the saturated condition, the specimens will be broken in transverse bending in accordance with standard procedure. Modified cube compression tests will be made on the remnants of the flexure specimens.

The specimens taken from the sections near the turn-arounds will be tested for modulus of rupture as soon as possible. The preliminary wetting period for these tests will be 48 hours.

At the conclusion of the traffic tests, additional slabs will be removed at the same transverse joints, but from the area traversed by the inside wheels of the test trucks. These slabs will be cut into additional flexure specimens for testing in the same manner as described above, the purpose being to determine what effect, if any, the concentrated traffic loading will have on the physical properties of the concrete.

Soil Surveys

A preliminary soil survey will be made before the traffic tests are started. Borings for soil examination will be made at the edges of the pavement at intervals of approximately 200 ft. Special attention will be given to areas in which soil conditions indicate that early distress in the pavement may occur under traffic. In such areas, additional borings will be made and samples taken. Representative soil samples taken in the preliminary survey will be tested to determine moisture content, liquid and plastic limits, and grain size.

In conjunction with the core drilling to be done in the turn-around areas, samples of the subgrade soil will be taken through core holes, and under the slabs removed in the test area. In-place density tests of the subgrade in these areas will be made at depths of 6, 12 and 18 in. and soil samples will be taken for the laboratory tests indicated above.

After the completion of the traffic tests or at such points as may be desired during traffic tests, density measurements of the sub-base and subgrade will be made through core holes in the pavement or in areas where slabs are removed. Soil samples will be obtained for the determination of the moisture content, liquid limit, plastic limit, grain size, and moisture-density relationship. California bearing ratio values at several different densities and moisture contents will be determined in the laboratory for each significantly different sub-base and subgrade soil identified during the soil survey. Undisturbed samples of the subgrade for use in making tri-axial compression or direct shear tests will be obtained where the textural character of the soil will permit.

Differential Levels

In order to measure the differences in the slab deformations that may develop to the different loadings, differential level elevations will be observed at several points in each slab. For this purpose, the Coast and Geodetic Survey of the Department of Commerce has installed 15 permanent bench marks at approximately 400-ft. intervals along the test road, and measured their elevations by first order leveling methods.

Using the elevations of the permanent bench marks, elevations will be determined at 10 points on each slab prior to starting traffic operation, 2 or 3 times during the

tests, and again at the conclusion of the tests. Additional elevations will be taken at such times and at such intervals as may be found necessary.

The 10 reference points will be painted on each slab as follows: three in., 5 ft., and 20 ft. from each transverse joint. Thus there will be five points along the pavement edge and five points along the longitudinal joint.

Photographic Records

Photographic records (still and motion pictures) will be made of the condition of the surface and of the cracks in the slabs prior to the beginning of traffic operations. The photography will be repeated at intervals during the test as may appear necessary, and at the completion of the tests. Photographic records will also be made of the various phases of the tests, of the vehicles, of the installations of instruments, and of other general items.

An informational motion picture will be prepared which will show the preparation for the tests, the conduct of the tests, and any pertinent operations and results which may be of general interest.

Through the cooperation of the Department of Defense, strip photographs will be obtained of the entire section of the test pavement. These photographs will be made at the start of the test, repeated twice during the test, and again at the completion of the test. The photographs will be obtained by flying at an elevation of about 300 ft.

INSTRUMENTATION AND EQUIPMENT REQUIREMENTS

Tests of concrete and soil surveys—The necessary instruments for these tests will be furnished by the Physical Research Laboratory of the Bureau of Public Roads.

Differential levels—One level and 2 level rods.

Photographic records—instruments and equipment will be furnished by those responsible for these records.

Eight micro-switches assembled with eight stepping switches and necessary lights to indicate to the drivers the proper transverse positions of the trucks in the test-lanes.

Four photo-electric counters of the single beam type, one in the middle of each test-lane to count and record the number of load applications.

One passenger car for transportation for the project engineer.

One station wagon for road service and transportation.

Stop watches.

Miscellaneous supplies (such as load binders, chain to fasten load on trucks, flashlights, etc.).

General Supplies, such as field office furniture, forms, clipboards, pencils, etc.

Personnel Requirements

Engineer in charge of project.

Three assistant engineers to help supervise operations on a 24-hour day, 7-day week schedule.

Twenty-eight full time truck drivers.

Factory mechanic-observers, such as may be furnished by the truck manufacturers.

Personnel for concrete tests.

Personnel for soil surveys.

Personnel for photographic records.

Analysis of data

- (1) One engineer in charge of analysis and responsible for preparation of report.
- (2) Two clerks—statisticians.

OPERATING BUDGET FOR SIX MONTHS

ROAD TEST ONE—MD

REPORT NO. 2

PRELIMINARY TEST RESULTS AND REPORT OF OPERATIONS FOR MAY AND JUNE

Highway Research Board
2101 Constitution Avenue
Washington, D. C.

July 1950

PRELIMINARY TEST RESULTS

(These tests were made by the Physical Research Branch, Bureau of Public Roads)

(A) Road Surface Roughness Measurements

Initial data on the relative roughness of the pavement surface of the four lanes were obtained on June 12, 1950. These were measured in both directions in each wheel path in each lane, with observations made at 0.1-mile intervals. The average values were:

Lane 1	Outside wheel path	94.5 units per mile
	Inside wheel path	90.2 units per mile
Lane 2	Outside wheel path	103.2 units per mile
	Inside wheel path	107.5 units per mile
Lane 3	Outside wheel path	93.4 units per mile
	Inside wheel path	89.6 units per mile
Lane 4	Outside wheel path	99.6 units per mile
	Inside wheel path	95.0 units per mile

While Lane 2 and 4 are shown to be measurably rougher than Lane 1 and 3, the difference is not great. There is no consistent difference between the inside and outside wheel paths although there is some indication of a tendency for the inside wheel path to be the smoother. The data indicate that the surface smoothness of both lanes may be considered to be very good at the beginning of the tests.

(B) Concrete Beams

A total of 19 beams, approximately 7 inches in width were sawed by a local Building Supply Company from the four concrete specimens removed from the pavement for this purpose by the Maryland State Roads Commission.

The nine beams taken from slabs 302 and 6 on the north and south ends of the test area were tested after storage in water for 48 hours. The results of the flexure tests made on the beams, the compression made on the ends of the beams (modified cube test) after 48 hours storage in water and the sonic modulus of elasticity are given in the following table.

APPENDIX TO THE

Tests on Sawed Concrete Beams
Road Test One—MD

Beams were completely immersed in water for 48 hours immediately prior to testing. They were loaded at third points on a 24-inch span with bottom as made in tension.

Modified cubes were loaded with top and bottom, as made in a horizontal plane. They were loaded by 7x7-inch plates at top and bottom. Unit loads were calculated by dividing the total loads by 49 sq. in. No correction for height was made. All specimens were tested wet 72 hours after flexure tests.

Sonic E was determined on beams after 48 hours im-

mersion in water. The first value for each beam was determined on the vertical axis of the beam, as made, and the second value is for the side, as sawed.

The 10 beams sawed from the specimens taken from slabs 204 and 186 and the 12 six-inch diameter cores drilled from the portions of the roadway not subjected to traffic are to be tested later in accordance with an approved procedure.

(C) Preliminary Report on Soil Survey for Road Test One—MD

Slab locations, designated by the number painted on each individual concrete panel of the test pavement are used for reference points in this report. The detailed preliminary soil survey will be issued as a separate report later to complete the project records.

The following soil information is based upon soil test data obtained from auger borings made adjacent to the concrete pavement to a depth of approximately 30 inches. In a limited number of cases soil borings were made through the concrete pavement to examine the subgrade soil beneath the pavement. It was not possible to make the required number of borings to evaluate the actual subgrade conditions beneath the pavement but such a detailed study will be made after the traffic tests have been completed. For this reason the subgrade soil tests given in this report may or may not represent the subgrade beneath this test pavement.

The test data in Table No. 1 indicate the type of soils found in the test holes made adjacent to the concrete pavement. The slab numbers are used as reference points. Where one number is given the boring was made adjacent to the midpoint of the slab and in case of two slab numbers, the boring was made at the joint between the two adjacent pavement slabs.

¹ Sample taken through concrete slab.

A study of the test data in Table 1 indicate that the majority of the soils are fine-grained plastic soils of the A-6 and A-7-6 soil groups. An estimation of the distribution of soils apt to be found beneath the test pavement is indicated in Table 2. A study of these data indicate that approximately 15 percent of the subgrade soils are likely to have granular characteristics as represented by the A-1, A-2, and A-3 soil groups.

Table 2. Estimation of Subgrade Soils Under Pavement
Based on Soil Samples Taken Along Pavement Edge
TEST ROAD ONE—MD

HRB Group	A-1	A-2	A-3	A-4	A-6	A-6	A-7-6	A-7-6
Group Index ¹	0	0	0	4-7	4-7	8-12	8-12	13-20
Percent of soil group ²	4	7	5	4	9	48	9	14

¹ The ranges indicated for group index were selected to summarize soil test data into arbitrary subgroups.

² The percentage distribution of soils indicated in the various subgroups is based upon the total number of samples taken from auger borings listed in Table 1. The soil test data represents soils taken from the upper 18 to 24-inch layer of soils below the elevation of the base of the concrete pavement.

Reference to Table 1 appears to indicate that with the exceptions of subgrade beneath slab numbers 252, 250, 249, 248, and perhaps 246, all the granular subgrade soils are located on the south end of the test road project.

The construction plans specified the use of an 18-inch granular subbase in this area. These locations referenced by slab numbers are from slab 12 to 44 and from 64 to 70. There appears to be a discontinuity of granular subgrade in the vicinity of slab number 30 which may extend beneath slab numbers 32, 29 and 28. A boring made adjacent to the center of slab number 30 indicates the presence of an A-6 soil.

It is estimated from the test data obtained for this project that slabs likely to have granular subgrade will be 12 to 28, 34 to 44, and 65 to 70, inclusive.

A summary of the soil test data was made with respect to the location of the pavement grade either in cut or near natural grade elevation or in fill sections. These data are indicated in Table No. 3. It appears that all fill sections are likely to contain fine-grain soils in the upper soil layer (18 to 24-inch) and that all the granular soils will be found in the cut sections. No granular material was found in locations where pavement was constructed at or near the natural ground elevation.

Table 3. Estimation of the Distribution of Subgrade Soils
With Respect to Cut and Fill Sections
ROAD TEST ONE—MD

HRB Group	A-1	A-2	A-3	A-4	A-6	A-6	A-7-6	A-7-6
Group Index ¹	0	0	0	4-7	4-7	8-12	8-12	13-20
Percent in fill ²	0	0	0	4	8	76	8	4
Percent in cut ²	6	12	9	3	9	31	9	21

¹ The ranges indicated for group index were selected to summarize soil test data into arbitrary subgroups.

² The percentage distribution of soils indicated in the various subgroups is based on the total number of samples taken from auger borings listed in Table 1. The soil test data represents soils taken from the upper 18 to 24-inch layer of soils below the elevation of the base of the concrete pavement.

(D) Strains and Deflections

The two joints selected for strain and deflection measurements are those between slabs 92 and 94 and between

slabs 200 and 202. There was no faulting or other indication of structural failure at either at the time of selection. Both were located on subgrade soils typical of the predominating types.

In accordance with the program, four resistance type gages were installed at each joint, one on each of the two abutting slabs at a distance of 3 feet from each edge of the 12-foot lane. At joint 200-202 one extra gage was attached on the surface near the free edge of the pavement and at a distance of 5 feet from the transverse joint being tested. At Joint 92-94 two gages were placed in this same position, that is, one on either side of and 5 feet from the joint.

The deflectometers were set up so as to measure the corner deflections of each of the two slabs which abutted at the joint.

The original program called for making the test at speeds of 0, 15, 30 and 45 mph. It was found that at zero speed, i.e., with the truck standing over the gage position some condition, probably the heat radiated from the underbody of the vehicle, caused the gages to behave in an erratic manner. To avoid this effect a "creep" speed with engine cut off was substituted from the static or zero speed condition. Furthermore, the maximum speed obtainable in the length of section available was less than 45 mph. with the larger trucks. For these reasons the tests were made at creep speed, 15, 30 and 40 mph. rather than as originally planned.

The tests were made during the night between the hours of 9:30 P. M. and 4:30 A. M., joint 200-202 being tested on the nights of June 15-16 and 16-17 while joint 92-94 was tested on the nights of June 20-21 and 21-22. The tests were made at night in order that, first, the temperature warping conditions in the pavement slabs might be as nearly constant as possible and, second, the load stresses in the vicinity of the joints might be more critical than would be the case during the day when the corner would be warped downward.

Two complete sets of tests were made at each joint. A detailed analysis has not yet been made of the data obtained, but certain general indications are apparent.

Regarding the stresses developed directly under the wheels at the joint edge, it is indicated that (1) as the speed of the vehicle increases there is a small reduction in load stress, the effect being most apparent between the creep speed and 15 mph., (2) the stresses for single and tandem axle trucks of the same axle loading are only slightly different and (3) stresses increase more or less directly with axle load. Assuming a modulus of elasticity value of 5,000,000 pounds per square inch, the general order of these load stresses in the joint edge is 150 to 200 pounds per square inch.

Regarding the tensile stresses along the pavement edge 5 feet from the joint, it is indicated that (1) there is an appreciable reduction in stress as the speed of the vehicle is increased (up to 40 mph.), (2) the stress produced by single and tandem axle trucks of the same axle loading are only slightly different and (3) the magnitude of stress increases more or less directly with the axle loading. The stress magnitudes were of the same general order as those observed at the transverse joint under the wheel load.

Static deflections measured at joint 92-94 were only slightly greater than those measured at creep speed. The

reduction in corner deflection at higher vehicle speeds was quite noticeable. For example, at joint 92-94 the deflection at creep speed was .050 inch while at a vehicle speed of 40 mph. it was .032 inch. This effect is of particular interest in relation to the effect of vehicle speed on the development of pumping joints.

REPORT OF OPERATIONS FOR MAY AND JUNE

This report by Mr. A. Taragin, Project Engineer, reviews the progress made on Road Test One—MD for the period from May 4 to June 30, 1950, inclusive.

1. Full operations with all eight test trucks began on June 23.

2. The starting date depended on the delivery of the test trucks. The following tabulation shows when the trucks were delivered to the Bureau of Public Roads Research Laboratory where the instruments were installed:

Make	Number	Delivery date
Ford	1	May 4
Reo	2	May 20
Autocar	3	June 2
GMC	4	June 5
International	5	May 3
White	6	June 12
GMC	7	June 9
Mack	8	June 17

3. The trucks were loaded with test blocks at the Maryland State Roads Commission Garage at La Plata. Approximate loads were obtained at the garage with loadometers. The loaded trucks with a crane were then driven to a Virginia State Highway Department weighing station located 5 miles south of the test section. All axle and gross loads were then adjusted to within 200 pounds (six trucks are within 50 pounds) of the loads specified in the program for each vehicle.

4. Detour road was opened to general traffic on May 15, at the same time the test road was blocked off with barricades for the project duration.

5. First set of levels on all the 304 slabs was run May 15 to May 17.

6. The removal of 12 cores, four 4x4 foot slabs, and soil samples was completed by May 22.

7. Original crack survey (prior to any test truck traffic) was completed on June 6. The results of this survey and the new cracks developed as of June 30 are shown in Table 1.

8. Final arrangements for gas, oil, and grease was completed on June 8. A 1000-gallon tank with a pump was installed on June 10, near the field office.

9. First roughness measurements were made on June 12.

10. The turnarounds, except in the area of the original shoulders, were constructed of the following courses:

Course 1: 18-inch dirt fill with 12-inch gravel cushion

Course 2: 4-inch decomposed marble stone

Course 3: 4-inch gravel from a local pit

Course 4: 4½-inch gravel mixed in place with RT16 tar

Course 5: ¾ inch No. 3 slag chips on 0.3 gal. of RT-6 oil

All this comprising 43¼ inches compacted section was completed by June 9. The areas where the turnarounds crossed the shoulders were treated with courses 4 and 5 above.

11. Part time operations, to test instrumentations and the turnarounds, were started on sections 1 and 2 on June 12. It was discovered, only after 10 hours of operations (a total of 1200 applications by all four trucks) that the shoulders were on a very unstable base. Considerable movement of the subgrade has been experienced under the turnarounds, especially at the shoulder area. Because of this, continuous maintenance has been necessary on the turnarounds ever since operations began. As of June 30, the base has more or less reached stabilization and the Maryland State Roads Commission has agreed to pave the turnarounds with an asphaltic concrete leveling course 3 inches thick at its thinnest point over which they will place a 2 to 2½-inch asphaltic concrete wearing course.

12. Strain and deflection measurements on the north section (test lane No. 4) were made on the nights (9:30 P. M. to 4:30 A. M.) of June 15-16, and 16-17. On the south section (test lane No. 2) these tests were run on the nights of June 20-21, and 21-22.

13. The Navy took aerial photographs (not Sonne strips) with 60 percent overlap, in color on June 21 and repeated the flight on June 28.

14. Considerable interest has been shown in this project by the fact that on the average five to six persons visit the project daily. A popular article was published in Baltimore Evening Sun on June 21. A more technical article will appear in the July 15, 1950 issue of the Commercial Car Journal, Photographers and reporters for two other papers have visited the project. In every case the reporters have been requested to submit their stories to the Chairman of the Executive Committee or to the Project Engineer for approval before publication. The above two articles complied with this request.

15. A satisfactory crew of 28 local drivers have been assigned to drive the test trucks. Local drivers are plentiful. Approximately 90 drivers have so far applied for jobs. At present there is a reserve of about 30 applications for truck drivers.

16. Excellent cooperation has been received from the manufacturers of all the test trucks, in supplying parts not locally available and also in the interest shown by them in keeping the vehicles in good running order at all times.

17. Table 2, attached, gives a summary of truck operations on this project as of June 30, 1950. It is the intention of the Project Engineer to submit each month Tables 1 and 2 brought up to date.

TABLE 1
RESULTS OF CRACK SURVEY ON ROAD TEST ONE—MD.

Item	Prior to beginning of tests (June 6, 1950)				New Cracks as of June 30, 1950

ROAD TEST ONE—MD
HIGHWAY RESEARCH BOARD

REPORT NO. 3

REPORT OF OPERATIONS FOR JULY

This report reviews the progress made on Road Test One—MD for the month of July, 1950.

1. Normal operations continued with all trucks throughout the entire month. A summary of operations as of July 31, 1950 is shown in Table 1.

2. With few exceptions crack surveys have been made once every day since July 7th. Table 2 shows the results of the crack development for all slabs except those on fill sections which were mudjacked long before the project was subjected to the test truck traffic. The following tabulation is a brief summary of the cracks which occurred during July.

Summary of Cracking on Road Test One—
MD During July, 1950

Section	All Cracks		Number of Slabs Cracked	Number of Truck Applications
	Number	Length in Feet		
1	6	9	4	40,997
2	19	75	13	39,153
3	8	23	7	28,752
4	37	360	29	24,447

Section 1—18,000 lb. Single Axle.

Section 2—22,400 lb. Single Axle.

Section 3—32,000 lb. Tandem Axles.

Section 4—44,800 lb. Tandem Axles.

A record is also being kept of the development of new cracks on the mudjacked sections.

3. Table 3 shows a summary of pumping observed on the four sections.

4. On July 5, 1950 the Portland Cement Association assigned Mr. Gordon Ray as an observer for the duration of the project. Mr. Ray has been found very useful in assisting the project engineer and his assistants in conducting the crack and pumping surveys.

5. Additional aerial photographs were taken by the Navy on July 2 and again on July 3. On July 28 we were informed that unsatisfactory results were obtained from the aerial surveys. The Navy is making an effort to obtain a Sonne camera and, when one becomes available they will make a new aerial survey.

6. In accordance with the decision by the Advisory Committee on June 29, 1950, all operations were suspended on July 4 to observe the holiday.

7. The Dahlgren Naval Proving Grounds located six miles South of the Project is regularly submitting weekly reports showing continuous records of temperatures, humidity and daily precipitation. However, to obtain more

accurate precipitation data at the project site, a rain gauge will be installed early in August near the field office.

8. On July 10 a detailed speed profile was obtained for each of the eight trucks for three round trips of normal operation on their respective sections.

The following tabulation shows the maximum speeds obtained in each section:

Section Number	Maximum MPH, Northbound	Maximum MPH, Southbound
1	33.5	36.5
2	40.0	40.5
3	40.5	34.5
4	38.5	32.5

The speeds on the turnarounds at the time were 5 to 10 miles per hour. Since July 28, the speeds at the turnarounds have been reduced to 4 to 6 miles per hour without materially decreasing the speeds on the test sections.

9. Considerable maintenance was necessary on all turnarounds until July 27 when they were paved with 3 layers of asphaltic concrete (2-2½ in. of binder course and 1½ in. of wearing course). A total of 509 tons of material was used. The work was done by the American Asphalt Company of Washington, D. C. as contracted by the Maryland State Roads Commission. Mr. Webb and Mr. W. A. Fowke of Maryland State Roads Commission and the project engineer supervised the construction. The contractor and the supervising engineers requested that operations be stopped to give the newly laid material a 48 hours curing period. Test truck operations were stopped on Section 3 and 4 from 10:00 a.m. July 27 to 10:00 a.m. July 29. On Sections 1 and 2 operations were halted from 10:00 a.m. July 28 to 10:00 a.m. July 30.

10. During the above period the following operations were completed:

A. Ran repeat levels (second time) on the previously painted ten points on each slab in the four test sections.

B. Deflection measurements during daytime were made at joint 200-202 (Section 4).

C. All cracks and slab numbers were repainted.

11. Until July 20 the trucks were turning to the left on the turnarounds at both ends of the section, as was set up in the program. It was believed that practice was contributing to low tire mileage and to excessive wear on certain mechanical parts in the trucks. Accordingly as of July 20, the trucks are making a left turn at one end of the section and a right turn at the other end. Comparative data for tire wear for before and after this practice are not yet available.

12. Trucks are now being serviced every 5 days instead of once a week as was the practice before July 10. This was recommended by the manufacturers of some of the test trucks. Under the new schedule a more desirable and more satisfactory maintenance program results. Not more than two trucks daily are being serviced at present.

13. On July 8 and 18 all bad spots in the joints were filled with Maryland K filler material and shoulder maintenance was as follows: Shoulders were dragged on July 13, 19 and 28. Gravel was added to the shoulders at least two times before dragging. The shoulders were rolled and covered with Calcium Chloride on July 20.

September 1950

ROAD TEST ONE-MD
HIGHWAY RESEARCH BOARD

REPORT NO. 4

REPORT OF OPERATIONS FOR AUGUST

This report reviews the progress made on Road Test One-MD for the month of August, 1950.

1. Normal operations, except when traffic was stopped for special tests, continued with all trucks throughout the entire month. A summary of operations as of August 31, 1950 is shown in Table 1.

2. Table 2 shows the results of the crack development for all slabs except those on the few fill sections which were mudjacked long before the project was subjected to the test truck traffic. The following tabulation is a brief summary of the cracks which occurred during August.

SUMMARY OF CRACKING ON ROAD TEST
ONE-MD DURING AUGUST, 1950

Section Number	All cracks		Slabs Cracked		Number of Truck Applications
	Number	Length in Feet	Number	% of Slabs in Sec.	
1	14	32	11	22.0	39,791
2	32	122	18	36.0	38,303
3	15	65	10	14.1	19,052
4	82	710	44	62.0	23,342

Also attached to this Report are four sheets of strip maps showing the location of all cracks as of August 31st. These maps are made from photo-stat copies of the cards on which the Field Staff keeps a continuous record of the cracks.

A profile is included to show the relative position to fill and cut sections.

3. Table 3 shows a summary of pumping observed on the four sections.

4. A rang gauge, loaned to the project by the Weather Bureau of the Department of Commerce, was installed on the project on August 19. The precipitation recorded by the Naval Proving Grounds at Dahlgren, Virginia, checks the rainfall recorded on the project with the exception of local thunder-showers. Total rainfall for August was 3.35 inches.

5. Repeat levels (second time) were run on July 28 on the previously painted ten points on each slab in the four test sections. Table 4 shows the average settlement as determined by the difference between the elevations of the points as recorded on May 16, (before test operations) and the elevations determined on July 28.

6. Table 5 shows a comparison of slab performance at expansion joints and contraction joints.

7. Road surface roughness measurements were made on August 8th and Table 6 shows the comparison with the initial measurements made on June 12th before the project was subjected to controlled truck traffic. The data show a slight increase in surface roughness as compared with the condition at the beginning of the test.

8. On August 11, arrangements were made with the Air Force to take colored Sonne strip photographs of the test pavement. Flights were made on August 14, and repeated on August 29.

9. At the beginning of the project, joints 92-94 and 200-202 were selected for strain and deflection measurements. About the middle of July the slabs at both joints broke, making it impossible to repeat measurements. Consequently four additional joints were selected; joints 44-46 and 110-112 in Section 2 and joints 152-154 and 242-244 in Section 4. Strain and deflection measurements were made at creep speed on Section 4 on the night of August 13-14, and on Section 2 on the night of August 30-31.

10. In addition to the measurements above, deflections measurements were made with an Ames dial on the two joints in Section 4, at 3:00 a.m. and 3:00 p.m. each day from August 23, until early in September.

11. Arrangements have been completed under which the States of Maryland, Pennsylvania, and Virginia will each send one man for a period of about 10 days on the project to obtain deflection readings every four hours on 16 joints (4 in each section) and midpoint along the free edge in two slabs on Section 4. The readings will be made with those trucks normally running in each lane.

12. From the start of the project until August 7, all new cracks were painted with a yellow line on the pavement. Beginning with August 8 for a period of 1½ months, the cracks will be painted with a white line.

13. An air compressor was installed on the project on August 7, to minimize the time spent in obtaining the desired pressure in all tires. The compressor was furnished free through the courtesy of the Petroleum Industry.

14. The lane placement lines on Sections 3 and 4 (white and yellow) were repainted on August 12 while traffic was stopped to install strain gauges for strain and deflection measurements.

15. On August 16, we were informed that due to the present Korean conflict it will be impossible for the Army to supply military personnel as drivers for the test trucks. Local drivers will continue to operate the vehicles.

16. On August 1 and 15 all bad spots in the joints were filled with Maryland K filler material (bituminous). Shoulder maintenance was as follows: Gravel was added to the shoulders on August 3 and 16; shoulders were dragged on August 4 and 24. In addition, gravel was added by hand shovels to the bad spots on the shoulders near the pavement edge on August 21 and 30.

ROAD TEST ONE—MD
HIGHWAY RESEARCH BOARD

REPORT NO. 5

REPORT OF OPERATIONS FOR SEPTEMBER

This report reviews the progress made on Road Test One—MD for the month of September, 1950.

1. Normal operations continued with all trucks throughout the entire month. A summary of operations as of September 30, 1950 is shown in Table 1.

2. Table 2 shows the results of the crack development for all slabs except those on the few fill sections which were mudjacked long before the project was subjected to the test truck traffic. Figure 1 is a graphical presentation of the total lineal feet of cracking for each section and the rate of cracking for Section 3 and 4. The following tabulation is a brief summary of the cracks which occurred during September.

SUMMARY OF CRACKING ON ROAD TEST ONE—MD
DURING SEPTEMBER, 1950

Section Number*	All Cracks		Slabs Cracked		Number of Truck Applications
	Number	Length in Feet	Number	% of Slabs in Sec.	
1	6	34	4	8.0	34,678
2	44	321	11	22.0	35,917
3	18	150	14	19.7	25,253
4	341	1878	67	94.4	23,804

* Section 1, 18,000 lb. single axle; Section 2, 22,400 lb. single axle; Section 3, 32,000 lb. tandem axles; and Section 4, 44,800 lb. tandem axles.

3. Table 3 shows a summary for September 1950 of pumping observed on the four sections.

4. Total rainfall, recorded by the rain gauge on the project, was 10.57 inches for September.

5. Table 4 shows a comparison of slab performance at expansion joints and contraction joints.

6. Road surface roughness measurements were made for the third time on September 20. Table 5 contains these data along with the previous roughness measurements.

7. In accordance with the decision by the Executive Committee on August 25, 1950, all operations were suspended on September 4 to observe the Labor Day Holiday.

8. During the period between August 24 and September 14 a number of readings were made with Ames dials to measure the deflections at various joints caused by the trucks traveling at creep speed over the pavement. The readings made between August 24 and September 3 were made at two joints in Section 4 (152-154 and 242-244) by the personnel regularly assigned to the project. These readings were made twice daily between 3:00 and 4:00 a.m. and 3:00 and 4:00 p.m. The readings made between September 5 and September 14 were made at intervals varying from 4 to 6 hours throughout the full 24-hour cycle by personnel loaned by the State Highway Departments of Maryland, Pennsylvania and Virginia, at two expansion and two contraction joints in each of the four sections and at the center of the slabs edge at two points in Section 4. The joints of each type selected for study within each of the four sections were those at which no and varying degrees of pumping had occurred.

A steel rod 1 by 48 inches driven in the shoulder a few

inches from the edge of the pavement served as a reference point in making these measurements. The dial was mounted on a pedestal which rested on the extreme corner of the slab and the deflections were measured on both sides of the joint.

(Due to the fact that it was not desired to operate the heavier trucks on the sections assigned to the lighter trucks and to the delay which would have been involved, the deflection measurements in the various sections were made only with the trucks normally operating in the section. The trucks were run with the outside edge of the rear wheels approximately 6 to 8 inches from the edge.

The data indicate that the deflections caused by the loads are (1) normally much greater at night when the pavement edges are warped upward than during the daytime when they are warped downward; (2) two to three times greater at pumping joints than at non-pumping joints; (3) larger at pumping expansion joints than at pumping contraction joints of the dummy type; and (4) larger during the period when pumping is receding than at any other time.

For the night time condition at pumping joints the deflections were frequently as high as 0.15 inches or more, while for the night time condition at non-pumping joints the deflections were generally less than 0.05 inches. For reasons stated earlier this study was not made in a way which makes it possible to study the effect of the different load magnitudes.

The measured deflections under circumstances such as those encountered in this study are not a true indication of the relative magnitudes of the stresses at the different joints. Thus a deflection at a pumping joint three times greater than that at a nonpumping joint does not mean that the stresses at the pumping joint are three times greater than those at a nonpumping joint. Plans are under way to obtain both deflection and stress measurements under moving loads of different magnitudes and at different speeds at several typical joints.

9. During the month the Air Force delivered the Sonne strip airphotos which they took from above the test road. These strips are continuous film records taken from one end of the job to the other from two different elevations, 100 ft. and 400 ft. They are in color and the painted

cracks are clearly visible. Because of the excellent detail shown in the strip taken from 100 ft. the Advisory Committee has decided to ask the Air Force to make one more flight at this altitude after test traffic is discontinued to record the condition of the pavement at that time. Before his flight is made all cracks will be repainted in their proper date-code colors. The Air Force has agreed that no charge will be made for their work on this project.

10. On September 29 installation was completed of 27 SR-4 strain gauges to measure warping stresses on Slab 129. Readings were started on September 30, and will be continued until desired data are obtained.

11. On September 29, all trucks were reweighed at the Virginia State Highway Department weighing station. The axle and gross loads of six vehicles were within 200 pounds, one within 300 pounds and one within 400 pounds of the loads specified in the program for each vehicle. No adjustment in the loads was deemed necessary because a tank-full of gasoline in each truck will cause the little variations found.

12. On September 16, the pavement surface at joint 92-84 in Section 2 had settled 4 inches. Truck operations on this section became difficult and the pavement surface was brought up to its original level with bituminous cold mix. The area affected was 192 square feet. In addition bituminous patching was performed on the areas where slabs were removed for test beams (Slabs 186 and 104 in Section 4).

13. From the start of the project until August 7, all new cracks were painted with a yellow line on the pavement. From August 8 until September 20, a white line was used. Beginning with September 21 for a period of 1½ months the cracks will be painted with a red line.

14. Bad spots in the joints were filled Maryland K filler material (bituminous) as follows: September 7 on Sections 3 and 4, September 9 on Sections 1 and 2, and September 26 in joints on all four sections.

15. Shoulder maintenance was as follows: Gravel was added to the shoulders (19 truck-loads) on September 15, the shoulders were dragged on September 5 and bladed on September 16 and 26. In addition, gravel was added by hand shovels to the bad spots on the shoulders near the pavement edge on September 7.

ROAD TEST ONE-MD
REPORT NO. 6
REPORT OF
OPERATIONS FOR OCTOBER
Highway Research Board
2101 Constitution Avenue
Washington, D. C.
November 1950
ROAD TEST ONE-MD
HIGHWAY RESEARCH BOARD
REPORT NO. 6

REPORT OF OPERATIONS FOR OCTOBER

This report reviews the progress made on Road Test One-MD for the month of October 1950.

1. By action of the Executive Committee, truck traffic was stopped on Section 4 at 8:00 A. M., October 13. This Section was cracking at the rate of approximately 100 feet per day during the three days previous to the 13th and because only one uncracked expansion joint and five contraction joints were left on this section, the Executive Committee decided that the additional stress and deflection measurements on these joints were more important than continuing the truck traffic. The resumption of traffic on this section after these tests are made will be decided by the Advisory Committee.

2. On Sections 1, 2, and 3, normal operation of the regularly assigned trucks continued throughout the month.

A summary of operations as of October 31, 1950 is shown in Table 1.

3. Table 2 shows the results of the crack development for all slabs except those on the few fill sections which were mudjacked in October 1948, before the project was subjected to the test truck traffic. Figure 1 shows graphically the rate of cracking for all the sections. Because truck traffic was stopped in Section 4 on October 13 with a total number of 92,166 applications, a direct comparison is shown in Table 2 of the crack development with 92,000 applications, in Section 3. The following tabulation is a brief summary of the cracks which occurred during October. The last two horizontal columns show the total crack development on Section 4 up to October 13 when traffic was stopped with 92,166 applications and on Section 3 with approximately the same number of applications.

SUMMARY OF CRACKING ON ROAD TEST ONE-MD

Section Number	Period included	All cracks		Slabs cracked		Number of truck applications
		Number	Length in feet	Number	% of slabs in section	
1	Oct. 1-31	8	53	5	10.0	43,869
2	Oct. 1-31	42	184	14	28.0	37,805
3	Oct. 1-31	56	348	28	39.5	30,289
4	Oct. 1-13	92	435	46	64.8	10,594
3	June 23-Oct. 9	55	307	29	40.8	92,000
4	June 23-Oct. 13	564	3303	68	94.4	92,166

Also attached to this Report are four sheets of strip maps showing the location of all cracks as of October 31st. These maps were made from photo-stat copies of the cards on which the Field Staff keeps a continuous record of the cracks.

4. Table 3 shows a summary for October 1950 of pumping observed on the four sections.

5. Total rainfall, recorded by the rain gauge on the project, was 2.04 inches during October. Rain was encountered during seven days in this month.

6. Levels for the third time were run on October 2 on the previously painted ten points on each slab in the four test sections. Table 4 shows the average settlement as determined by the difference between the elevations of the points on record on May 16 (before test operations) and the elevations determined on October 2.

7. Since October 13, and until the end of the current 1½ month period (November 8), the cracks developed on Section 3 are being painted with a dashed red line.

8. Warping stress measurements on slab 129 were begun on September 29 and completed on October 9. Continued readings were made during this entire period and weather conditions were very favorable for such tests. The warping stresses were measured along the full length of the free edge of the slab at intervals of 7½ ft. and along the transverse joints at distances of 3 and 6 ft. from the free edge. It was not possible to measure the warping stresses at the interior part of the slab because of the fact that this is a thickened edge. The warping stress data are now being analyzed.

9. During this month the contact areas of the tires on all test trucks were obtained. Cross-section paper and multigraph ribbon were used with good results. The tire inflation pressures were very closely checked for this operation.

10. On October 2 the slab ends at joint 234-236 in Section 4 had settled 3.7 inches, and on October 3 the pavement surface was repaved with 183 square feet of bituminous mix. Similarly, joint 282-284 also in Section 4 settled 2.9 inches and 168 square feet of bituminous mix was used. In addition, on October 3, bituminous patching was performed on the area where a slab for beams was removed in slab 186.

On October 13, 165 square feet of bituminous mix was used to repatch the broken slab ends at joint 86-88 in Section 2.

11. On October 13 all bad spots in the joints were filled with Maryland K filler material (blown asphalt). Shoulder maintenance was performed as follows: Shoulders were dragged on October 11 and 19, and they were bladed on October 27.

TABLE 1

SUMMARY OF OPERATIONS ON ROAD TEST ONE-MD, AS OF OCTOBER 31, 1950

Item	Section Number				Section Number				Section Number				Total as of Oct. 13 1950

December 1950

ROAD TEST ONE—MD
HIGHWAY RESEARCH BOARD

REPORT NO. 7

REPORT OF OPERATIONS FOR NOVEMBER

This report reviews the progress made on Road Test One—MD for the month of November, 1950.

1. Normal operations, except when traffic was stopped for special tests, continued with the regularly assigned loads on Sections 1, 2, and 3. A Summary of operations as of November 30, 1950 is shown in Table 1. As stated in the previous report, test traffic was stopped in Section 4 on October 13. The Executive and Advisory Committees decided at a meeting on November 21 not to resume traffic on this section.

2. Table 2 shows the results of the crack development for all slabs except those on the few fill sections which were mudjacked in October 1948, long before the pavement was subjected to the test truck traffic. The crack development on Section 4 as of October 13, with 92,166 truck applications is compared in Table 2 with the crack development on Section 3 with approximately the same number of truck applications. The following tabulation is a brief summary of the cracks which developed during November.

SUMMARY OF NEW CRACKING ON ROAD TEST ONE—MD

Section Number	All Cracks		Slabs Cracked		Number of Truck Applications
	Number	Length in Feet	Number	% of Slabs in Sec.	
1	3	28	3	6.0	31,625
2	33	181	18	36.0	34,480
3	30	180	19	26.8	26,219

3. Table 3 shows a summary for November 1950 of pumping observed on three sections subjected to test traffic.

4. Total rainfall recorded by the rain gauge on the project, was 1.87 inches during November. Rain was encountered during five days in this month. In addition on November 28, one-half inch of snow fell. The rain gauge recorded this snow to be the equivalent of 0.01 inch of rain. A minimum temperature of approximately 19 degrees above zero occurred on the night of November 25-26.

5. Table 4 shows a comparison of slab performance at expansion joints and at contraction joints. As in the other tables, here also, is shown a direct comparison between the performance of Sections 3 and 4 with the same number of truck applications (approximately 92,000).

6. From the start of the project until August 7, all new cracks were painted with a solid yellow line on the pavement. From August 8 until September 20, a solid white line was used. From September 21 until November 7 a solid red line was used on all sections, except on Section 3 where a dashed red line was used from October 9 (when 92,000 applications were recorded, the same as on Section 4 when traffic was stopped) until November 7. From November 8 until the end of the project (December 23) a dashed yellow line is being used.

7. When the test truck traffic was stopped in Section

4 on October 13 with 92,166 applications, one expansion joint and 5 contraction joints were left unbroken. The relative deflections of the slabs at these remaining joints were determined by an Ames dial and two contraction joints (232-234 and 244-246) were selected for extensive strain and deflection measurements. For these tests the Brush Oscillograph and the deflectometers were used. A total of 12 resistance type gauges were installed at each joint as shown in Figure 1. These tests were made with eight different axle loads of 14,000 lbs., 18,000 lbs., 20,000 lbs., and 22,400 lbs. on the single rear axle trucks and 28,000 lbs., 32,000 lbs., 36,000 lbs., and 44,800 lbs. on the tandem rear axle trucks. Tests were made at night at creep speed, 15, 30, and 40 miles per hour and during day-time at creep speed and 30 miles per hour. Because of the large number of gauges two nights and two days were required at each joint for a complete set of readings. At joint 232-234 tests were made from 9:30 P. M. to 4:30 A. M. on the nights on November 10-11 and 11-12 and from 11:00 A. M. to 3:00 P. M. on November 11 and 12. At joint 244-246 tests were made during the same hours on the nights of November 15-16 and 16-17 and during the day on November 16 and 17.

Two complete set of readings were obtained at each joint, for each gauge, for each load, and for each speed. The strain and deflection data are now being analyzed.

8. On November 15 the outside corner at Joint 32-34 in Section 2 had settled a maximum of 2.8 inches and the pavement surface at this joint was repaved with approximately 192 square feet of bituminous mix.

9. All the joints were refilled with Maryland K filler material (blown asphalt) on November 1, 4, and 28. All loose material in the joints was removed with a pick and broomed off the pavement before the filler material was poured.

10. Shoulders were dragged on November 3, and they were bladed on November 15.

11. In accordance with the decision of the Executive Committee, operations were suspended on November 23 to observe Thanksgiving Holiday.

ROAD TEST ONE—MD

REPORT NO. 8

REPORT OF OPERATIONS FOR DECEMBER

(Test Truck Traffic Terminated on December 23)

Highway Research Board
2101 Constitution Avenue
Washington, D. C.

January 1951

ROAD TEST ONE—MD
HIGHWAY RESEARCH BOARD

REPORT NO. 8

(Final Report on Test Traffic Operations)

REPORT OF OPERATIONS FOR DECEMBER

This report reviews the progress made on Road Test One—MD for December, 1950.

1. Test truck traffic on all sections was stopped at midnight December 23, 1950. This action was agreed to by the Advisory and Executive Committees at a meeting held on November 21, 1950.

2. Normal operations continued with the regularly assigned loads on Section 1, 2, and 3. A summary of operations as of December 23, 1950 is shown in Table 1.

3. Table 2 shows the results of the crack development for all slabs except those on the few fill sections which were mudjacked in October 1948, long before the pavement was subjected to the test truck traffic. The crack development on Section 4 (44,800 lb. tandem axle load) with 92,166 truck applications is compared in Table 2 with the crack development on Section 3 (32,000 lb. tandem axle load) with approximately the same number of truck applications. The following tabulation is a brief summary of the cracks which developed from December 1 to 23, inclusive.

SUMMARY OF CRACKING ON ROAD TEST ONE-MD IN
DECEMBER, 1950

Section Number*	All cracks		Slabs Cracked		Number of Truck Applications
	Number	Length in Feet	Number	% of Slabs in Sec.	
1	11	78	8	16.0	26,839
2	46	303	22	44.0	31,953
3	36	242	24	33.8	24,271

* Section 1, 18,000 lb. single axle load; Section 2, 22,400 lb. single axle load; Section 3, 32,000 lb. tandem axle load.

4. Table 3 shows a summary for December, 1950 of pumping observed on the three sections subjected to test traffic.

5. Total rainfall recorded by the rain gauge on the project was 2.40 inches during December 1 to 23. Rain or snow was encountered during five days in this month. Freezing temperatures were encountered during 12 days in this period with a minimum temperature of 18 degrees above zero occurring on the night of December 19-20. A few tests made on December 22nd under

the edge of the pavement on Section No. 4 (test traffic stopped on October 13th) showed the subgrade frozen from a fraction of an inch to a maximum of three inches, depending on type of soil.

6. On December 14 the outside corner at joint 91-93 in Section 1 had settled a maximum of 2.9 inches and the pavement surface at this joint was repaved with approximately 216 square feet of hot bituminous mix.

7. All the joints were refilled with Maryland K. filler material (blown asphalt) on December 22. All loose material in the joints was removed with a pick and broomed off the pavement before the filler material was poured.

8. Shoulders were bladed on December 15.

9. On December 6 a detailed speed profile was repeated for each of the six trucks for three round trips of normal operations on the respective sections (1, 2, and 3). A preliminary analysis of the data shows that the speeds obtained were very similar to those recorded on July 10, which were reported in Progress Report Number 3.

HIGHWAY RESEARCH BOARD

MEMBERS OF COMMITTEES AND OTHER PERSONNEL OF ROAD TEST ONE—MD

ADVISORY COMMITTEE

Chairman

Represents

Burggraf, Fred, Associate Director, Highway H.R.B. Board, 2101 Constitution Avenue, Washington 25, D. C.

Personnel

Allen, Charles W., Research Engineer, Ohio Department of Highways, 101 North High Street, Columbus 15, Ohio OHIO

Bleck, A. T., Construction Engineer, State Highway Commission of Wisconsin, State Office Building, Madison 2, Wisconsin WIS.

Chacey, D. Kenneth, Highway Engineer, Highway Transport Service Division, Office of the Chief of Transportation, Department of the Army, Washington 25, D. C. ARMY

Childs, Wm. F., Jr., Chief Engineer, State Roads Commission of Maryland, 108 East Lexington Street, Baltimore 3, Maryland MD.

Clemmer, H. F., Engineer of Materials, D. C. Engineer Department, 203 Bryant Street, N. W., Washington 1, D. C. D.C.

Conner, C. N., Chairman of the Department of Highway Design, Highway Research Board—Principal Highway Engineer, Bureau of Public Roads, U. S. Department of Commerce, Washington 25, D. C. H.R.B.

Fairbanks, H. S., Chairman of the Department of Economics, Finance and Administration, Highway Research Board—Deputy Commissioner, Bureau of Public Roads, U. S. Department of Commerce, Washington 25, D. C. H.R.B.

	Represents	
Finney, E. A., State Highway Research Laboratory, Room 3, Olds Hall of Engineering, Michigan State College, East Lansing, Michigan	MICH.	mittee, Highway Research Board—Research Engineer, Institute of Transportation and Traffic Engineering, University of California, Berkeley 4, California
Gregg, Lowell E., Associate Director of Research, Kentucky Materials Research Laboratory, Lexington 29, Kentucky	KY.	<u>EXECUTIVE COMMITTEE</u>
Hathaway, C. M., Chief Highway Engineer, Illinois Division of Highways, Centennial Building, Springfield, Illinois	ILL.	Mr. Fred Burggraf, Chairman Associate Director Highway Research Board 2101 Constitution Avenue Washington 25, D. C.
Jorgensen, R. E., Deputy Commissioner, Connecticut State Highway Department, Hartford 15, Connecticut	CONN.	Mr. H. S. Fairbank, Deputy Commissioner Bureau of Public Roads U. S. Department of Commerce Washington 25, D. C.
Lawrence, John V., Managing Director, American Trucking Association, Inc., 1424 16th Street, N. W., Washington 6, D. C.	A.T.A.	Mr. A. S. Gordon, Executive Assistant State Roads Commission of Maryland 108 East Lexington Street Baltimore 3, Maryland
Richards, Karl M., Manager, Motor Truck Division, Automobile Manufacturers Association, New Center Building, Detroit 2, Michigan	A.M.A.	Mr. T. J. Kauer, Director Ohio Department of Highways Ohio Departments Building Columbus 15, Ohio
Shelburne, T. E., Director of Research, Virginia Department of Highways, Thornton Hall, University of Virginia, Charlottesville, Virginia	VA.	Mr. Wm N. Carey, Jr., Highway Research Board, Executive Assistant to Chairman of Executive and Advisory Committees.
Van Breeman, William, Engineer of Special Assignments, New Jersey State Highway Department, Scotch Road, Fernwood, Trenton, New Jersey	N.J.	<u>PROJECT ENGINEER AND FIELD STAFF</u>
Van Riper, H. G., Highway Planning Engineer, Pennsylvania Department of Highways, Harrisburg, Pennsylvania	PA.	Assigned to Highway Research Board by the Bureau of Public Roads
Wilson, M. Allan, Chief Engineer, Delaware State Highway Department, Dover, Delaware	DEL.	Mr. Asriel Taragin, Project Engineer; Mr. J. R. Hutchins, Assistant Project Engineer; Mr. S. W. Smith, Assistant Project Engineer; and Mr. T. Dec, Assistant Project Engineer.
Ex-Officio		<u>INSTRUMENTATION AND TESTING PERSONNEL</u>
Crum, Roy W., Director, Highway Research Board, 2101 Constitution Avenue, Washington 25, D. C.	H.R.B.	In addition to Mr. Earl C. Sutherland and Mr. Harry D. Cashell, who supervised the strain and deflection testing program, the Bureau of Public Roads also furnished additional personnel for making soil surveys and tests, slab elevation readings, concrete tests, and roughometer tests.
Moyer, Professor R. A., Chairman, Executive Com-	H.R.B.

ROAD TEST ONE-MD

REPORT NO. 9

1. THE MAJOR EFFECTS OF THE TRUCK TRAFFIC TESTS
2. THE SCOPE OF STRAIN AND DEFLECTION STUDIES
3. THE SOIL SAMPLING AND TESTING PROGRAM

Highway Research Board
2101 Constitution Avenue
Washington, D. C.

May 1951

ROAD TEST ONE-MD

HIGHWAY RESEARCH BOARD

REPORT NO. 9

Although the test truck traffic was terminated on December 23, 1950, the analysis of the accumulated data has continued. Also the supplemental strain and soil testing programs have been carried on as actively as the weather conditions permitted. Due to frozen subgrades the strain and deflection tests were suspended for about six (6) weeks in January and February. This also delayed the soil testing program as the sequence of the testing programs are such that the strain and deflection tests have to be made before the soil testing program can be started.

This report contains a brief review of:

1. The Major Effects of the Truck Traffic Tests.
2. The Scope of the Strain and Deflection Studies.
3. The Soil Sampling and Testing Program.

These reports show the great amount of data that have been accumulated and in the case of the soil program the great number of soil samples that have been obtained. In the latter case a trench 24 inches wide and 36 inches deep was dug along both edges of the entire test section (see p. 19). This permitted detailed examination and sampling of the subgrade soils and removed any doubt as to the type and condition of this important component of the road structure.

The analyses of all these data and the testing of the soil samples will take time. But plans are to issue periodical

reports of the results as rapidly as certain segments of the data and tests are analyzed.

1. THE MAJOR EFFECTS OF THE TRUCK TRAFFIC TESTS

This part of the report includes mainly tabular and graphical data of the final effects of the six-month truck traffic tests.

The test truck operations began on June 12th for Sections 1 and 2, and on June 23rd for Sections 3 and 4. The truck tests were stopped on December 23rd, 1950, for Sections 1, 2 and 3. On Section 4 (44,800 lb. tandem axle load) the test truck traffic was stopped on October 13th due to the high rate of cracking.

(A) SUMMARY OF TRUCK OPERATIONS

Table 1 contains a summary of the most important information obtained on the truck operations during the six-month test period. The frequency of application of the truck loads in this Table show that for the trucks with single axle loads of 18,000 and 22,400 lb. the average was 1,320 applications per 24-hour day; for the 32,000 and 44,800 lb. tandem axle loads the average was 915 applications per day.

(B) SUMMARY OF STRUCTURAL CRACK FAILURES

For the 18,000 lb. and 22,400 lb. single axle loads, Table 2 shows the number and length of each type of crack, the increment of time they occurred and the corresponding number of load applications. One of the interesting facts brought out in this Table is that on the 18,000 lb. axle load no structural failure cracks occurred during the first eight week period of test during which time the road was subjected to 70,363 truck applications. During the same interval the 22,400 lb. single axle load caused 110 feet of cracking after 63,381 truck applications.

The record also shows that it required 98 days of continuous operations with the 18,000 lb. axle load to cause the first structural failure. This first crack failure did not occur until September 18th, only two days before the end of the second six week interval, at which time the road had been subjected to 119,388 applications of the 18,000 lb. axle load. During the same interval the 22,400 lb. single axle load caused 284 feet of cracking.

TABLE 1
SUMMARY OF OPERATIONS ON
ROAD TEST ONE-MD FOR THE DURATION OF THE TEST

Item	Section number*			
	(1)	(2)	(3)	(4)
1. Period included	June 23 to December 23, 1950			as of Oct. 13 1950
2. Total days operating	185	184	178	106
3. Days operating 24 hours	177	175	174	104
4. Net operating time hours	2,999	2,960	2,762	1,576
5. Average operating time in 24-hr. period	16.5	16.6	15.9	15.2
6. Frequency of application				
a. Per 24-hr. period	1,311	1,327	945	884
b. Per hour of operation	80	80	60	58
7. Total number of applications	238,281	238,263	164,523	92,166
8. Mileage driven				
a. On test section	111,839	111,792	106,668	59,256
b. Total (including service mileage) ..	114,026	113,953	109,605	60,226
9. Gasoline used—gallons	19,617	25,854	24,967	17,612
10. Gas consumption—m. p. g.	5.81	4.41	4.39	3.42

* Section 1, 18,000 lb. single axle load; Section 2, 22,400 single axle load; Section 3, 32,000 lb. tandem axle load; Section 4, 44,800 lb. tandem axle load.

Table 3 contains the same information for the 32,000 and 44,800 lb. tandem axle. In this Table the difference in the relative destructive effect between the 44,800 lb. and the 32,000 lb. tandem axle loads is much greater than that shown in Table 2 between the 22,400 lb. and 18,000 lb. single axle loads.

The destructive effect of the 44,800 lb. tandem axle load was so great that the test traffic was stopped on October 13th after less than four months operation. At that time the crack failures totaled 3,704 feet, whereas on the adjacent section subjected to 32,000 lb. tandem axle load there was only 302 feet of cracking.

Table 4 includes a summary of the crack failures for all four sections at the end of the six month traffic test. This Table shows that on Sections 1 and 2, after each had received slightly over 238,000 truck applications, there were 6.5 times more cracking on Section 2 (22,400 lb. single axle load) than on Section 1 (18,000 lb. single axle load). Also Section 4 (44,800 lb. tandem axle load) had 12.3 times more cracking than Section 3 (32,000 lb. tandem axle load) after each Section had been subjected to slightly over 92,000 truck applications. Figure 1 shows graphically the rate of cracking as the number of truck application increases for Sections 1 and 2. Figure 2 shows the same relationship for Section 3 and 4. In Figure 2 attention is called to the shape of the curve for Section 4 (44,800 lb. tandem axle load). From this curve it is obvious that there was no need to continue the test beyond October 13th.

A comparison, based on the final results, of slab performance at expansion and contraction joints is given in Table 5 for the four Sections. In general, many more crack failures occurred at the expansion joints than at the contraction joints. For Sections 1 and 2, an average of 53 percent of the expansion joints showed crack failures

whereas, although there were two contraction joints for each expansion joint, only 23 percent of the contraction joints were cracked. For Sections 3 and 4 the corresponding figures were 67 percent for expansion joints and 48 percent for contraction joints.

Attention is also called to the wide variation in the performance behavior of expansion and contraction joints in each Section. In both the single and tandem axle test sections the variation in the performance behavior between expansion and contraction joints is much less for the heavier axle loads.

(C) SUMMARY OF SLAB SETTLEMENT

The average settlements of slabs at different locations along the free edge and the longitudinal joint are given in Table 6. This Table also contains the corner settlement of the broken slabs in all of the four Sections. This Table shows the progressive increase in settlement as the axle load increases. The comparison of the total settlement at the corners of the broken slabs reveals that for the 18,000 lb. single axle load the average settlement at 11 broken slab ends was 0.99 inches or a total of 10.9 inches for the 11 slabs. The corresponding figure for the 22,400 lb. single axle load was 52.1 inches (1.27 in. x 41 slabs). For the tandem axles, the 32,000 lb. load produced 10.8 inches (0.72 in. x 15 slabs) and the 44,800 lb. load 116 inches (1.00 in. x 116 slabs).

(D) ROAD ROUGHNESS MEASUREMENTS

Table 7 contains the summary of the road roughness tests made at four different times during the traffic test period by the Bureau of Public Roads roughness indicator. This Table shows that the degree of roughness increased with the heavier axle loads for each vehicle type. The Table also contains some roughness data taken on one

¹ Sections 3 and 4, each has 71 slabs under test, for a total length of 2840 feet.

² Small areas adjacent to joint.

mile sections both north and south of the test project. These data show that these sections have about the same degree of roughness as that shown by the test section subjected to the 18,000 lb. single axle load.

(E) TRANSVERSE POSITIONS OF VEHICLES ON TEST PROJECT

Each test section consisted of a single lane and the trucks assigned to each section operated back and forth in the same lane. The transverse position of the test vehicles on the pavement were programmed to be typical of normal operations of general truck traffic as determined by lateral placement studies conducted by the Bureau of Public Roads at 48 locations in 11 States where some 100,000 samples were recorded.

Figure 3 shows the distribution of transverse positions of heavy commercial vehicles on 2-lane concrete pavements. This figure contains four sets of diagrams. The first two sets of diagrams, A and B show normal operations

of general truck traffic on pavements with 10 and 12-foot lanes. The program for the test traffic, (diagram C) was patterned after normal operations in 10-foot lanes, except that the test truck drivers were instructed not to travel on the shoulder area.

In diagram D the extent of driver observance of the program is indicated by the results of actual operations on Sections 1 and 2. The results shown are for a 24-hour period from 6 P. M. on July 31, 1950 to 6 P. M. August 1, 1950, and is considered to be typical of operations on the test sections. It will be observed that the actual operations on the Road Test was closer to normal operations in 12-foot lanes than in 10-foot lanes. Only 1.9 percent of the trips in Section 2 and 3.1 percent of the trips in Section 1 were on the shoulders and only to the extent of 1-foot. This compares with the 2 percent of trucks that encroach on the shoulder in normal operations on 12-foot lanes. The Bureau of Public Roads lateral placement equipment was used to observe the actual operations on the test section.

TABLE 4
SUMMARY OF FINAL RESULTS OF CRACK SURVEY ON ROAD TEST ONE-MD

Section number	Number of trucks passes	Cracks analyzed to be structural failures due to load	Cracks analyzed to be NOT structural failures due to load	Total Cracks
1—18,000 lb. single axle	238,281	196	54	250
2—22,400 lb. single axle	238,263	1,269	55	1,324
Ratio 2 to 1	1.0	6.5	1.0	5.3
3—32,000 lb. tandem axles	92,363	302	30	332
4—44,800 lb. tandem axles	92,166	3,704	14	3,718
Ratio 4 to 3	1.0	12.3	0.5	11.2
3—32,000 lb. tandem axles	164,523	1,050	30	1,080

¹ Truck tests stopped October 13, 1950.

June 12 readings were taken before truck tests started.

January 18, 1951 readings were taken after truck tests stopped on December 23, 1950

On March 2, 1951, road roughness measurements were made on one mile sections on U. S. 301, just north and south of Road Test One-MD. Readings were taken in the center of each lane. The following are the results:

Northbound lane, 0.3 to 1.3 miles north of north end of project 107 units per mile
 Southbound lane, 1.3 to 0.3 miles north of north end of project 103 units per mile
 Southbound lane, 0.1 to 1.1 miles south of south end of project 112 units per mile
 Northbound lane, 1.1 to 0.1 miles south of south end of project 106 units per mile

2. SCOPE OF STRAIN AND DEFLECTION STUDIES

Prior to the application of test traffic, strain and deflection data were obtained at two selected joints, one in section 2 and one in section 4. The tests at these joints were made with two single-axle trucks with axle loads of 18,000 and 22,400 pounds, respectively, and two tandem axle trucks with combined axle loads of 32,000 and 44,800 pounds, respectively, at speeds of creep, 15, 30 and 40 miles per hour. It was also intended to obtain data under static loading, but the heat from the trucks had an adverse effect on the electric gages. With the trucks running in a path so that the outside edge of the outside tire was 6 inches from the longitudinal free edge of the pavement, deflections were measured on both sides of the transverse joint and strains were measured along the free edge of the pavement at a distance of 5 feet on each side of the transverse joint. The gages were placed at 5 feet from the joint because, at this point, maximum stresses along the free edge were expected to develop. With the trucks running in a position in which the center of the outside dual tires was 3 feet from the free edge of the pavement, stresses directly under the wheel loads were measured on each side of the joint in both wheel tracks.

Four additional joints were tested during the month of August, two in section 4 and two in section 2. The tests at the two joints in section 4 were made with the 22,400-pound single and 44,800-pound tandem-axle trucks, whereas those in section 2 were made with all four of the trucks mentioned earlier. Since pumping had developed at these joints, the stress pattern in the slabs had changed and the position of the strain gages was modified accordingly. For these tests, gages were placed at the edge of the leaving slab, in the direction of test traffic, at points 6 feet and 9 feet from the transverse joint and on the vertical edges of the transverse joint at a point approximately 5 feet from the free edge of the pavement. The latter gages were intended to study stress conditions causing the longitudinal cracking which developed in section 4. These tests were made with the trucks operating along the edge of the pavement at creep speed.

All tests mentioned above were limited so that they would not interfere seriously with the regular test traffic. However, as the traffic tests were completed on the respective sections representative joints at which cracking had not developed were selected and tested in a much more comprehensive manner. These joints are listed in the accompanying table with certain data pertaining to them. All the joints were tested when the pavement was in an unwarped condition or with the edges warped upward, but certain special tests were made under other conditions of warping.

The position in which the strain gages were placed for the more comprehensive studies is shown in Figure 4. The strain gages along the free edge were placed to study the stress conditions which caused the numerous diagonal cracks which have developed at the pumping joints while those at the transverse joint, 5 feet, 2 inches, from the free edge, were placed to study the stress conditions which caused the longitudinal cracking in section 4. In some of the later tests another gage was added for the same purpose. This gage was in the same position with respect to the free edge, but 5 feet from the transverse joints. In the tests for the above gages the trucks were

run with the outside edge of the dual tire in a position 6 inches from the free edge of the pavement.

Single rear axle—18,000 and 30,400 pounds.

Tandem rear axles—18,000, 22,400, 28,000 and 60,000 pounds.

Also a Texaco tractor trailer with axle loads of 19,600 and 18,600 was included in the line-up.

Joint 43-45.—This joint is on the granular subgrade where no pumping has developed.

During two consecutive nights this joint was tested with the regular truck line-up in the same manner as the previous joints. During the third night tests were made with the following special axle loads:

Single—18,000 and 30,000 pounds.

Tandem—18,000, 22,400, 28,000 and 60,000 pounds.

A placement study in which the position of the trucks with respect to the edge of the pavement was varied was also made at this joint. In the tests with the special truck loads and in the placement study, the deflections and strains at critical stress points were measured.

Joint 44-46.—This joint is also on a granular subgrade where no pumping has developed.

The tests with the regular truck line-up were made in the regular manner, but an Army tractor trailer (empty) was also included in the line-up. The tractor is designated M-26 while the trailer is designated M-15-A1. The axle loads, empty and loaded, are as follows:

Axle	Axle Load		Remarks
	Empty	Loaded	
	Pounds		
1	23,000	19,290	Two wheels with single tires.
2	16,750	42,740	Axles 2 and 3 are tandem, 65 inches apart, and have 2 wheels on each axle with dual tires
3	16,750	44,300	
4	13,250	45,720	Axles 4 and 5 are tandem, 64 inches apart, and have 4 wheels on each axle (separated) with single tires.
5	13,250	46,720	

Note: Axles 3 and 4 are 308 inches apart.

The Army trailer was tested in two positions, that is, operating in the normal position on one lane and then straddling the longitudinal joint. A number of special gages were placed along the edge at the longitudinal joint and at other points to measure the critical stresses caused by the Army trailer.

After the completion of the above tests data were obtained with the following special trucks:

Single axles—5,500, 10,000, 18,000 and 30,000 pounds.

Tandem axles (combined loads)—18,000, 22,400, 28,000 and 60,000 pounds.

The Texaco trailer mentioned earlier and the Army tractor trailer in a loaded condition were included in this line-up.

A special test was made at this joint to study the effect of faulting at joints. Since there were no faulted joints, $\frac{3}{4}$ -inch plywood was placed on the approach slab in a way to simulate a faulted joint. Tests were made with the plywood in position after which it was immediately removed and the joint retested. These tests were duplicated after cutting the dowels in the joint.

A placement study, described earlier, was also made at this joint with a limited number of trucks.

Joint 102-104.—This joint is on a fine grained soil

and moderate pumping developed during the traffic tests. The main object of testing this joint was to find the influence which this moderate pumping might have on the stresses caused by the Army trailer. The Army trailer was tested at this joint in the same manner as at the previous joint, except that only two trucks, for comparative purposes, were included in the line-up.

After the tests with the Army trailer had been completed, a placement study was made with various axle loads using all eight trucks.

Joint 109-111.—This joint is on a fine-grained soil and a moderate amount of pumping developed during the traffic tests. The tests described in the discussion of joint 44-46 where plywood was used to simulate a faulted joint, both before and after cutting the dowels, was repeated at this joint to study the influence of the subgrade variable.

It will be possible with the data already obtained to study the influence of axle spacing on the critical stresses caused by loads acting at and in the vicinity of transverse joints by the influence line method. It is planned to make tests on one slab to obtain data for this same purpose for the interior and edge cases of loading. For these tests the strain gages and lead wires are being set slightly below the surface of the slab so that it will be possible to run the trucks directly over the gages. The slab selected for this purpose is one at which no pumping has developed along the edges.

For the maximum legal axle loads used, the critical stresses along the edge of the slab varied from approximately 200 pounds per square inch at joints on the granular subgrade to more than 600 pounds per square inch at badly pumping joints. Due to changes in the condition of subgrade support, as the pavement is deflected, the load-stress and load-deflection relations are not linear at pumping joints or at joints in the upward warped condition. The stress conditions at pumping joints are influenced by the moisture condition of the subgrade as well as the actual loss of subgrade material.

The progress in making the strain and deflection studies at the selected joints has been slow because of the adverse weather conditions. The tests were delayed during a large part of January and February due to the fact that the subgrade was frozen. Also it was necessary to allow the concrete at each joint to go through a period of natural and artificial drying before placing the gages and the frequent rains and cold weather made this very difficult.

A great amount of strain and deflection data have been accumulated in these tests and it will require some time to get out the final report, but as quickly as the results of certain phases of these tests are analyzed they will be included in future Progress Reports.

JOINTS TESTED AFTER THE COMPLETION OF TRAFFIC TESTS

Joint No.	Section	Month tested	Type of subgrade	Remarks
232-234	4	Nov.	Fine grain	Serious previous pumping
244-246	4	Nov.	Fine grain	Serious previous pumping
247-249	3	Jan.	Fine grain	Bad pumping at time of testing
Crack on Slab 231	3	Feb.	Fine grain	Bad pumping at time of testing

159-161	3	Feb.	Fine grain	Pumping at time of testing
43-45	1	March	Granular	No pumping
44-46	2	March	Granular	No pumping
102-104	2	April	Fine grain	Moderate pumping previous to testing
109-111	1	April	Fine grain	Moderate pumping previous to testing
Slab 43	1	To be tested	Granular	No pumping

3. SOIL SAMPLING AND TESTING PROGRAM

The sampling and testing program of the soils underlying this test section is an extensive one, consisting of taking samples from core holes made through the pavement and from horizontal auger borings made under the pavement edge at various elevations below the slab.

A trench 24 inches wide and 36 inches deep was dug along both edges of the test sections. Figure 5 shows the open trench along Sections 3 and 4. In the left foreground is the trenching machine. The purpose of this trench was:

- (1) to facilitate detailed sampling and mapping of the soil profiles;
- (2) to obtain photographic record of this important component of the test road structure;
- (3) to afford a convenient means for making visual examinations of the subgrade.

Over 800 sample of the subgrade have been taken from under the pavement of this project. Most of these were taken from the trench but samples were also obtained from about 100 core holes and under 12 small slab sections removed for concrete quality tests.

All of these soil samples were taken so that the relation between pavement performance and subgrade soils can be studied. In addition the soil profile was mapped for each 40 foot pavement slab so that the occurrence and extent of each significantly different soil type can be accurately determined.

All the soil samples will be tested in the laboratory for natural moisture content, grading, liquid limit, and plasticity index.

Briefly, the following test procedure was used in making the extensive soil survey:

(1) Detailed soil profiles were made from the trenches along both sides of the pavement. In addition to mapping, samples were taken from each significant soil layer. All samples were taken under the pavement at a distance of 12 to 18 inches from the pavement edge.

(2) Core holes were drilled through the pavement at specified locations to obtain undisturbed soil samples for laboratory determination of strength, density and moisture content at 0 to 4 inches and 4 to 8 inches below the bottom of the pavement. The concrete cores will be tested for strength.

(3) At designated locations sections of the pavement were removed for strength test of the concrete. At these locations in-place density, moisture content and in-place CBR tests were made to obtain supplemental test data useful for correlating the pavement performance with the physical and environmental characteristics of the underlying subgrade soils.

The testing of these soil samples and the correlation of the soil tests with service behavior will take time but

APPENDIX TO THE

as rapidly as the results of each of the test sections are determined they will be reported.

DEPARTMENT OF PENNSYLVANIA

VETERANS OF FOREIGN WARS OF THE UNITED STATES, INC.

201 N. Front St., Harrisburg, Pa.
Telephone 4-7927

September 25, 1951.

TO ALL MEMBERS OF THE HOUSE OF REPRESENTATIVES:

The members of the veterans of Foreign Wars in Pennsylvania are gravely concerned and disturbed by recurring reports that the Pechan Loyalty Bill is to be killed.

This is unbelievable. It is also inconceivable that a measure would be voted down that would afford citizens of this Commonwealth, and through this Commonwealth to all citizens of our nation, protection from communists and subversive elements.

It is only through such a bill that communists and subversive elements in our state government, or tax-supported agencies and institutions can be cleaned out.

The loyalty oath helped clean out undesirables in our Federal Government.

The one thing communists and subversive elements fear most is perjuring themselves. That is why they so violently oppose this measure.

I know you do not want communists or subversive elements in state or tax-supported institutions, but should this bill not be passed, those members who vote against it will be responsible for what occurs.

The Pechan Bill must be passed. Our State Government cannot be subservient to communists or others who object to our only means of protecting ourselves from them.

Sincerely yours,

JAMES J. DAVIS,
Department Commander.

Enclosure: Resolution adopted at the 1951 Philadelphia encampment of the Department of Pennsylvania, Veterans of Foreign Wars of the U. S.

DEPARTMENT OF PENNSYLVANIA

VETERANS OF FOREIGN WARS OF THE UNITED STATES, INC.

201 N. Front St., Harrisburg, Pa.
Telephone 4-7927

RESOLUTION APPROVED BY THE DELEGATES ASSEMBLED IN 32ND ANNUAL ENCAMPMENT, DEPARTMENT OF PENNSYLVANIA, VETERANS OF FOREIGN WARS OF THE UNITED STATES, JULY 12-14, 1951, BELLEVUE-STRATFORD HOTEL, PHILADELPHIA, PENNSYLVANIA

Whereas, there is a positive need for appropriate legislation to combat enemies of our political and economic freedom within our borders, we of the Department of

Pennsylvania of the Veterans of Foreign Wars of the United States, assembled in our 32nd annual Encampment, July 12 to 14 inclusive, at the city of Philadelphia, do hereby emphatically protest the apparent disinterest of the members of the General Assembly of the Commonwealth of Pennsylvania, particularly the Committee on State Government of the House of Representatives for their failure to favorably report to the floor of the House, the so-called loyalty bills introduced under the sponsorship of the Pennsylvania Joint Veterans Council composed of the recognized veterans organizations representing more than 800,000 Pennsylvania veterans, and

Whereas, hearings on the proposed legislation showed the need for protection to ourselves and our institutions and since ample time has elapsed to consider the merits of this legislation which would curb subversive elements in our midst, therefore

Be It Resolved, that we urge the Committee on State Government of the House of Representatives to break the bottleneck preventing the entire membership of the House of Representatives from considering these measures, therefore

Be it Further Resolved, that failure of the Committee on State Government of the House of Representatives to report out this measure is endangering the welfare of the Commonwealth and its citizens, therefore

Be It Finally Resolved, that the Commander of this Department transmit a copy of this resolution to the Honorable John S. Fine, Governor of the Commonwealth; the Honorable Herbert P. Sorg, Speaker of the House of Representatives; Honorable Robert G. Woodside, Attorney General of the Commonwealth and to each of the members of the Committee on State Government of the House of Representatives.

JAMES J. DAVIS,
Department Commander.

Attest: C. A. GNAU,
Department Adjutant.

Telephone LOcust 7-6763

Francis P. Jennings, President
Esther Soler, Legislative Director

August 10, 1951.

Dear Representative:

Please permit me to take up a few points concerning the Pechan Bill, S. B. 27.

1. The most surprising thing about the so-called "loyalty" bill is that it has no definition of loyalty. It gives power to the administration to discharge state employes about whose loyalty the administration has a "reasonable doubt," but it leaves up to the administration itself the power to decide what is loyalty and what is not. Can't you just see the dollars rolling in to the administration's campaign fund just before every election? No state employee would dare to risk a refusal to contribute. No teacher could remain free of ward politics.

2. The bill is purported to contain a simple oath of loyalty, "such as elected officials take." The best answer to this assertion is the bill itself. No member of the

legislature ever took the full oath contained in it, and I hope none of you ever will be required to. The Pechan oath, as distinct from the oath of allegiance you now take, is a legal trap, full of opportunities for frame-ups. If you took Pechan's oath, unscrupulous political opponents could make legislative service one long series of attacks upon your character, your friends, and your political associates. In the same way, public employees who took that oath could be hounded day and night.

3. The advocates of the bill assert that all loyal teachers favor it. The fact is that the following organizations of teachers have formally adopted resolutions opposing the bill:

The Pennsylvania State Education Association
The Pennsylvania Chapters of the American Association of University Professors
The Pennsylvania Federation of Teachers, AFL
The Private School Teachers Association
The Association of Pennsylvania Teachers
My own organization, The Teachers Union.

To my knowledge, no teachers group has taken action in favor of the bill.

No reasonable person quarrel with the idea that public employees ought to be loyal to our country. But the Pechan Bill is not a loyalty bill; it is a political blacklist bill. In the name of those lofty ideals which have made American the greatest country in the world, I ask you to vote against the bill.

Sincerely yours,

FRANCIS P. JENNINGS, President.

The Evening Bulletin, Philadelphia, Wednesday, August 8, 1951

IN OUR TOWN

By Earl Selby

FROM THE TOP SECRET FILE: Ever hear of a guy named Allen Zoll?

Most of us haven't, but Ford City's Senator Pechan has. In his current drive to get a loyalty bill passed the jovial dentist told us he's written Zoll:

"Thank you very much for your very informative and educational pamphlets, editorials, etc. They have been very helpful, believe me. . . . If a public hearing is held I shall wire you; perhaps you may find it convenient to attend and perhaps testify. . . ."

So who is Zoll? Curious, we checked—and found:

(1) Though now suggested as a witness for a loyalty program, he formerly bossed the "American Patriots, Inc.," an outfit the government said was both fascist and subversive.

(2) His race-hate propaganda led the chairman of the House Un-American Activities Committee to call him a "very strong anti-Semite."

(3) He was arrested on charges of trying to shake down a radio station for \$7,500 to get rid of pickets protesting the dropping of biased broadcasts. He was indicted but never brought to trial.

(4) Currently he bosses an outfit called "The National Council for American Education," headquartered in New York. Its propaganda, designed to cast suspicion on the public schools, was a big force in the Pasadena scandal,

where an educator was driven from his post in a way that split the community and spread fear and distrust.

(5) Though Pechan says the American Legion backs his loyalty program here is what the American Legion said in 1948 of Zoll: "He has a long record of activity in connection with . . . dubious outfits of a fascist or near-fascist character. . . ."

THE PHILADELPHIA BULLETIN, THE PHILADELPHIA INQUIRER,

and now the

PITTSBURGH POST-GAZETTE

An Editorial reprinted from the Pittsburgh Post-Gazette of August 10, 1951

REJECT THE PECHAN BILL

The State House should stand fast against new pressures for passage of the Pechan Loyalty Oath Bill. The measure would require teachers and other State employees to take a loyalty oath in which any subversive activity would be forsworn. Its intent is good but as a practical weapon against Communism we fail to see its value.

Does anyone really believe that a Communist sympathizer would hesitate to take a loyalty oath if it served his purposes? Aside from that rather obvious aspect of the proposal, however, the legislation itself is poorly drawn and would jeopardize the basic liberties of those it covered.

Take, for instance, the case of a teacher. The bill supersedes, as inadequate, the present Tenure Act under which teachers may be discharged for the advocacy of or participation in "un-American or subversive doctrines." It adds an undefined test of "loyalty" and, most dangerous of all, provides that no one shall be eligible for State office or employment in the public schools if he is a "subversive person" or if "there is reasonable doubt concerning his loyalty to the Government of the United States or the Commonwealth of Pennsylvania." Shall every public job in this State hang on the whim of administrators who might entertain "reasonable doubts"? The opportunities for abuse under this vague provision are illimitable.

The bill does not attempt to define "loyalty." It lists a number of activities or associations which "may be considered" in the discharge of an employee, but the agency making the decision is not limited to them. There are no boundaries within which loyalty is to be tested. The bill covers membership in any "subversive" organization and, in addition, any organization designated by the Attorney General of the United States.

There are other flaws in the legislation, but the above will suffice to indicate its undesirability. It would accomplish nothing except to pacify those who feel that anyone who disagrees with them is subversive and that any evil, material or spiritual, can be banished by the simple device of passing a law.

This restrictive legislation, no matter how well-intentioned, would threaten the foundations of our republic—free speech and free opinion. It would lead us into the

paths of totalitarianism which every good American abhors and is conscientiously trying to avoid.

For those reasons, we urge the House to keep its head and to reject this ill-considered legislation.

August 11, 1951.

Dear Representative:

In our day we are being forced to examine the very basis of our democratic form of society. We must weigh in the balance security for the nation against freedom for the individual.

Loyalty oaths and loyalty programs go to the heart of this question. Basic and difficult issues are raised about which honest men can and do differ.

Some who favor the loyalty program provided in the Pechan Bill are willing to sacrifice freedom in the name of security. Specifically, they are frank enough to say: "Teachers who oppose the loyalty oath are those whom we do not want in our school system in the first place."*

What clearer illustration is needed of the dangers in Mr. Pechan's loyalty program! Every organization of teachers in the State is opposed to the bill. Are the members of all these groups to be fired?

Some sponsors of the Pechan Bill cast aside academic freedom. They say "No one's 100%-American academic freedom would be curbed."* But who will decide what is "100%-American?"

Let's get this straight. The so-called Loyalty Oath Bill provides far more than a loyalty oath. It creates a loyalty program which will bring job insecurity to every public servant and teacher in Pennsylvania. This bill permits the boss to fire any teacher or any public servant, if he has a "reasonable doubt" of their loyalty. And the boss can define loyalty as he pleases! He makes the investigation, he judges, and he fires!

Many who favor the Pechan Bill have never read it. We hope you will take time to study it carefully, and will decide that this legislation is unworthy of the Commonwealth of Pennsylvania. You will merit the support of thousands of principled and loyal citizens by voting against this bill.

Sincerely,

WILLIAM ALLEN RAHILL,
Vice-President.

THE LOYALTY OATH AGAIN

The Pechan Loyalty Oath Bill that passed the State Senate in April and ran into a storm of protests has been

revised, and is again being pushed forward. Now it is worse than ever.

Since disloyal persons would have no scruples about taking a loyalty oath, the uselessness of such a measure of uncovering disloyalty is rather obvious. If this were all there were to it, the public back would not be broken by the burden of accumulating, storing, and filing enormous batches of loyalty oaths, which is said to be the principal consequence of the passage of such laws in other states.

But the Pechan Bill threatens more than a burdensome and useless routine. It opens ways to harass and oppress innocent people, to brand them with unproved charges, and to punish them without opportunity to defend themselves.

As it now stands, the bill lists some activities and associations which a public officer seeking to remove an employe may consider disloyal, but it vaguely adds that disloyalty is not limited to the stated activities and associations. So there is really no definition of the conduct or attitude of mind for which an employe may be penalized.

Moreover, the employe cannot even demand as a matter of right that the charges against him be fully stated.

The Pechan Bill treats very lightly the fundamental American rights of being told what one is accused of and of confronting his accusers.

IT'S STILL A POOR BILL

The more the Pechan "loyalty" bill is amended in the State Legislature the more one is induced to wonder why Pennsylvania should have any such law upon its books.

The supposed intent of the measure, to weed out Communists from colleges, schools and public office in this State, is unobjectionable, but its practicality is open to question.

Anyone who believes that the requirement of a loyalty oath would separate traitors from patriots has little knowledge of Communist practice. Perjury is routine among Reds. If they thought that swearing an oath of loyalty would keep them in jobs of value to the party, they would do the swearing without a scruple—with their fingers crossed.

At the same time the provisions of the bill would work hardship to some whose loyalty is beyond question, and they would threaten basic freedoms. The amendments inserted in the House committee, permitting court appeals by those dismissed from school and other public jobs because of suspicion of subversive activities, furnish scant protection.

Teachers and other State employes could be dismissed merely on the basis of "reasonable doubt" as to their loyalty. With no definition of loyalty provided, the way is thus opened to persecution and discrimination.

This is another of those rush-jobs in anti-Communist

legislation that do not stand up under inspection. It ought to be scrapped.

Rep. George T. Guarnieri

Honorable Sir:

We are writing to you to give expression to the concern of a large number of Pennsylvania citizens.

The Pechan Loyalty Oath Bill (S. 27), as extensively amended by the Committee on State Government of the House of Representatives, retains the test oath and adds a sweeping loyalty program.

The new version provides that teachers and other public servants may be discharged if on investigation there appears to be a "reasonable doubt" of their loyalty. No definition of loyalty is provided, but tests are suggested which are so vague and general as to jeopardize the constitutional rights of everyone who falls within reach of the bill.

Such legislation is unworthy of the General Assembly of Pennsylvania. Distinguished citizens have voiced their opposition. To help you in appraising the dangers of the amended bill, we are enclosing an analysis of its provisions and a recent editorial from the Philadelphia "Evening Bulletin."

May we count on you to oppose the Pechan Bill as amended?

Sincerely,

WILLIAM ALLEN RAHILL,
Vice-President.

To the Honorable Members of the House of Represen-
tatives

Dear Sir:

HOUSE BILL NO. 1187

This bill is designed to force compulsory arbitration upon employees in the Transportation industry. It also is intended to prevent strikes.

You cannot legislate harmonious labor relations. That is a matter for the parties directly involved. The right to cease work to register protest is one which needs to prevail if workers are to be really free. To those with experience in labor relations, compulsory arbitration is repulsive. It engenders discord and high tempers and contributes nothing towards the orderly disposition of grievances. In addition, under the law which this bill would amend, there would result very substantial delays which are bad.

The Pennsylvania CIO Council respectfully urges you to vote against House Bill No. 1187.

SENATE BILL NO. 27

This so-called Loyalty Oath bill would cause considerable confusion and will not do what its proponents claim. A Communist will not hesitate to take the oath. They will swear to anything if it suits their purpose. This bill provides for the possible harassment and humiliation of many decent law-abiding citizens.

Under this bill, a Communist can obtain the badge of respectability by taking an oath, which to him doesn't mean a thing. Let us not get involved in a witch-hunting expedition. The FBI is doing an excellent job on watching Communists in this country. Their position should be strengthened not interfered with.

The CIO doesn't like Communists and its record shows that it did something effective about it.

The Pennsylvania CIO Council respectfully urges that you vote against Senate Bill No. 27.

Very truly yours,

HARRY BOYER, President.

May 31, 1951.

To the Members of the Senate and the House of Repre-
sentatives, Harrisburg, Pa.

Dear Sir:

The Pennsylvania "Loyalty" legislation has taken a sudden turn which should arouse the concern of all who prize their democratic freedom. The original Pechan measure, which slipped through the Senate without hearings or adequate debate, received widespread condemnation from outstanding community leaders. Apparently in response to that protest the bill has been rewritten in the House Committee on State Government.

It would be natural to expect that the revised measure met the evils which were pointed out in the original version. The fact is that in many ways the new bill is more vicious than the old; In addition to the original loose provisions aimed at "subversive" persons, the new bill casts an even more vague and sweeping net to catch state employees and teachers about whom there is a "reasonable doubt" that they are "disloyal." The bill does not attempt a complete definition of this elusive test; but its possible reach would be such as to jeopardize precious American rights of open discussion and inquiry. It is the more ominous that the bill takes pains to withdraw elementary rules of fair procedure; in hearings leading to discharge, the right which teachers now have to know in advance the charges against them has been limited. Likewise withdrawn is the right of court review.

We believe that you join with us in the conviction that these critical times require every resource of a free nation. Certainly we cannot afford to sacrifice our greatest source of strength, the freedom of our minds.

Enclosed is a brief summary of the present bill. We urge careful study of this measure and any steps which are within your power to obtain its reconsideration or defeat.

Very truly yours,

JOHN O. HONNOLD, JR., Chairman,
ADA Civil Rights Committee.

FROM BAD TO WORSE

Far from improving the Pechan Loyalty Oath bill passed by the Pennsylvania Senate, the House Committee on State Government has waded into still deeper water by removing all appeal to courts and multiplying the chances of injustice.

Anyone in State employ (with few exceptions) dismissed for being "subversive," or suspected of being disloyal, can appeal only to the Civil Service Commission, and a teacher has recourse only to the State Superintendent of Public Instruction. Decisions of these two are final. This takes away from teachers the right they now have under the Tenure Act to court review.

Determination of who is subversive and who disloyal is not carefully defined in the bill; the hiring authority can stretch his imagination and whims about as far as he wishes; he could deny employment, for instance, on the grounds that facts unpleasant to the administration has been disclosed. Employees must answer a list of questions to be drawn up by the Attorney General and sworn to, but there is no limit to the questions the Attorney General can ask.

The introduction of "reasonable doubt" as to loyalty, without defining just what loyalty is, leaves the door wide open to abuses for which no impartial review is provided.

If this is the best the House Committee could do after listening to the objections of the State's leading educators to the loyalty oath method of combating subversion, academic freedom in Pennsylvania is in for bad times.

THE CALIFORNIA OATH

The California Court of Appeals has now wisely invalidated the special anti-Communist declaration which had been imposed by the Board of Regents on the University of California's faculty.

Loyalty cannot, of course, be guaranteed by a loyalty oath—even by the regular oath required of all state employees, including the members of the California faculty. But that kind of oath is simply a public avowal of loyalty, and there cannot be serious objection to it. It is the imposition of the special test to which spokesmen for a large segment of the academic world—and the eighteen professors now reinstated by court action—take exception.

Apart from the obvious futility of a sort of super-oath—to which no real Communist would hesitate for a moment to subscribe if it served his purpose—it carries an unavoidable implication that teachers are somehow more suspect than other citizens and require special depositions to prove their honesty and their innocence. All that this famous oath has done has been to throw the university into an uproar, drive some scholars of integrity and distinction away from it and lower its prestige throughout the country.

COURT RULES ANTI-RED OATH INVALID; CALI-
FORNIA MUST REHIRE TEACHERS

By Lawrence E. Davies

Special to The New York Times

Sacramento, Calif., April 6—Regents of the University of California were held today to have violated the State Constitution in imposing a special non-Communist loyalty oath as a condition of employment.

They were ordered in a unanimous decision by the Third District Court of Appeals to reinstate faculty members who had been dismissed last Aug. 25 for refusal to sign the special oath. The regular constitutional oath with its pledge of allegiance to the state and nation was held sufficient.

That constitutional pledge, indeed, said the court, "is the highest loyalty that can be demonstrated by any citizen." The judges added that "the exacting of any other test of loyalty would be anti-ethical to our fundamental concept of freedom."

"Any other conclusion," the decision stated, "would be to approve that which from the beginning of our Government has been denounced as the most effective means by which one special brand of political or economic philosophy can entrench and perpetuate itself to the eventual exclusion of all others; the imposition of any more inclusive test would be the fore-runner of tyranny and oppression."

Twenty-six faculty members were affected by the ruling of the Regents last August, reversing a decision the preceding month. Twenty sued to get their jobs back. Two of the twenty later dropped out of the suit, leaving

eighteen petitioners who carried the action through to today's opinion, written by Associate Justice Paul Peek and concurred in by Presiding Justice Annette Adams and Associate Justice B. F. Van Dyke.

Robert M. Underhill, secretary-treasurer of the Board of Regents was ordered to issue a letter of appointment to each of the petitioners "to his regular post on the faculty of the university."

Stanley A. Weigel, San Francisco attorney representing the eighteen nonsigners, expressed gratification over the decision. John F. Neylan, the regent who led the fight for the special contractual oath and for dismissal of the nonsigners, refused comment until he had seen the decision. Eugene Prince, attorney representing the Regents in the court action, said he "assumed" a hearing before the State Supreme Court would be sought.

The Appellate Court held that the special oath violated Section 3 of Article XX and Section 9 of Article IX of the State Constitution. The latter article, the opinion stated, contained a specific mandate "providing that the university shall be entirely independent of all political or sectarian influence," and added that this mandate furnished a standard by which to decide the question whether the nonsigning faculty petitioners were to be included within the terms "office of public trust" as used in Section 3 of Article XX.

Cites Subversion Peril

The faculty members, the court ruled, fell within the class of persons to whom the framers of the Constitution intended to extend the protection of this section. Hence, it stated, reappointment could not be denied them solely because of failure to "comply with the invalid condition" in the Regents' resolution imposing the special oath.

"While this court is mindful of the fact that the action of the Regents was at the outset motivated by a desire to protect the university from the influence of subversive elements dedicated to the overthrow of our constitutional Government and the abolition of our civil liberties" the decision went on, "we are also keenly aware that equal to the danger of subversion from without by means of force and violence is the danger of subversion from within by the gradual whittling away and the resulting disintegration of the very pillars of our freedom."

Mr. Weigel in his statement said the decision "may well mark the turn of the tide against a dangerous and un-American trend to judge men by what they sign instead of by what they are."

COMMITTEE FOR PHILADELPHIA

Richardson Dilworth, Chairman
2635 Fidelity-Philadelphia Trust Bldg.
Philadelphia 9, Pennsylvania
Sidney B. Dexter, Treasurer
c/o Land Title Bank and Trust Co.
Philadelphia 10, Pennsylvania

September 24, 1951.

To the Honorable George T. Guarnieri,
House of Representatives Office Building,
Harrisburg, Penna.

Dear George:

It has become apparent that a final decision on the Pechan "loyalty" Bill is imminent. Before the final vote I would like to reiterate that such legislation is neither necessary nor in accord with democratic principles.

This Bill certainly is not needed to remove Communists from the school system or from other public employment. If any Communist should be found on the public payroll, he is subject to discharge under legislation which has been on the books since July 28, 1951 (24 Purdon's Digest 11-1122).

The proposed additional legislation would go far beyond the removal of Communists, and would launch a continuing "loyalty" inquisition on tests so vague as to render the public service unattractive to loyal Americans. Still the Bill fails to define the "loyalty" which it imposes. Instead, it lists several vague tests which "may" be considered but to which the reviewing body "shall not be limited!"

Even worse, loss of livelihood need not be based on proof, but merely a reasonable "doubt" of lack of loyalty. At the hearings before the House Committee, Judge Musmanno and other representatives of the sponsoring veterans' organizations conceded that this part of the Bill violated the basic American principle that an individual is innocent unless he is proved guilty. Nevertheless, the "doubt" standard is still in the Bill.

If you want proof of the lengths to which such a clause would be used, just examine the present outrageous investigation of Mrs. Matson, an Assistant District Attorney in Allegheny County. That investigation is being conducted by Robert Kunzig, a Deputy Attorney General, who is a two-bit copy of Gerald L. K. Smith, and the man who drafted the present bill.

I urge you to vote against this Bill, whose only excuse is a cowardly wave of hysteria.

Sincerely,

RICHARDSON DILWORTH.

STATEMENT OF CONVICTION IN OPPOSITION TO SENATE BILL 27, SENATE BILL 87, HOUSE BILL 458, AND SIMILAR LEGISLATION

We the undersigned herewith assert our opinion that S.B. 27, S.B. 87, H.B. 458, and whatever other bills may be introduced with similar objectives are such as to nullify the legitimate aims and practices of education. They impose such risks as tempt teachers not only to shirk their duty toward the future but also to falsify their knowledge of the past. Where originality is penalized and communication of truth proceeds at peril, there can be no scholarship, no independent research, on authentic instruction, no exercise of intelligence.

Accordingly, we declare our belief and conviction that all such legislative measures are a threat to the continued existence of our free institutions.
